I am not sure if this is the right place to be posting this, but i figure its worth a shot. OK, first of all i have been away from radio for a few years (regretably) my call is KB2YFH. Anyway, i got my ticket when i was 16 i think or maybe younger... My question is i am getting older and still have nothing but a H.S diploma and dead-end jobs to show for... so, obviously i would like to continue my education. I realize now that my only true love was fixing and tinkering with my old radio equipment. I would like to know if someone could tell me what career path i should take that will qualify me and give me the experience i need in working with electronic equipment... preferably Wireless communications, RF circuts ... you know all the skills used to diagnose and repair such things as amateur transievers etc. I was licensed in NJ, but recently moved to Florida's Space Coast (Melbourne) where i am happy to see that ham radio is alive and thriving. I assume taking courses in electronic engineering would be in the right direction, but i am not sure exactly what i should do. If anyone could please give me some advice on what type of schooling i should look for, and if possible what schools are good for what i am looking for it would be greatly aprreciated. Thank you and i look forward to getting back on the air ASAP.

LOL. Like the NY Times, right? Or the BBC? Both are discredited now, and
have been proven to be, as you so quaintly call it, "blatantly
propagandistic" themselves.

>and a blatantly propagandistic one.

No, you simply gave me *your* OPINION of the WT. You didn't refute anything
they wrote, however. Or give me any credible "evidence" of them "lying".
Please do so, while I laugh at you some more.

>
> > (calling the WT "Moonie") yourself kinda makes you look the
> > fool, doncha think?
>
> Why? It IS the moonie times. You do know who owns it don't you? Do you
> have an inkling of Moon and his long, close relationship with the Bush
> family don't you?

Yawn. It's NOT an issue any more. Over the past 2 or 3 years, and please do
a Google search, I've asked the same question on many of the journalism
newsgroups here on Usenet, and asked anti-Moon types their take on it as
well.

They all told me that Moon's ownership of the WT MAY have been an "issue" a
decade ago, but it's irrelevant now, except to you fools who have nothing
else to "argue" with. I even asked an anti-Moon documentary film producer,
and he told me the same thing. It's not an issue any more.

As I said, all you seem to be able to do is call them the "Moonie Times" and
claim they have a relationship with Bush, but when I challenge you to
provide credible evidence of their alleged "wrongdoing", you get mad, throw
things, and call me nasty names.

Not being a medical expert...but...it sounds to me like a happening when one is trying to bust through a certain word per minute barrier. Where you must learn to copy BEHIND.

Try this. Listen at a rate of sending that you ARE NOT COMFORTABLE with. In this case TEN or 13 WPM.

ONLY RIGHT DOWN a character that you copy. Forget about ALL the others. Keep doing this. Do not drop down to the 5 wpm at all. Forget that is the goal.

As time goes on you will start getting more and more of the characters. This technique forces the brain to copy BEHIND. This should allow you that split second of time needed.

It works for getting the speed up.

Like I said, it may be what will help you.

Just a thought.

I'm thinking about getting a DX-70TH for my 1997 Ford Escort sedan and am wondering about:

1) noise

2) antenna connections

What vertical do people recommend? How would a CD antenna do? Or a screwdriver?

Do I need a separate auto tuner? If so, which one?

I'm in the Boston, MA area.

Thanks.

Scott, WY1Z

980. What kind of (2 way) radio is this?

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-29 22:41:11 UTC
From: Toscano <toscano2@ix.netcom.com>
Message-ID: <bg6tjv$fc3$1@slb6.atl.mindspring.net>
Source record: 64652

I picked this up at a flea market from a guy who thought it was a CB, he said he got it out of a tow truck he bought. To me it looks like a trunked radio of some sort, most likely 800MHz judging by the front panel.
The ID sticker is missing but the serial number is still on the inside (no FCC ID to go by) so I am not suspicious. It is a Johnson with a front speaker and sort of sloped front unlike anything I have ever seen (the side with the speaker comes out about 5/8" farther than the other side). Rear has a large heat sink. Radio measures about 2x6x10 inches. Front panel has following controls: power, V, A, S, Volume, System, Group.
Modular-type plug for the microphone (like my Yaesu FT2600).
Curiously the power cord is blue and red wires. I tried this on two different 13.8VDC power supplies and I tried reversing the wires and no matter what they short out the power supply.
Any ideas? Anyone even know the correct power requirement for this

Yeah. Monty DePont (and the rest of us who were craftsmen in rule
and affidavit and opinion writing) retired before that time and it's
so difficult to get "good help nowadays"......

>I disagree. There is a [U.S.] requirement for these licenseholders
>to meet the international requirement. Show me how they can do this
>if the international requirement doesn't exist....

Sure it exists. It requires each Administration to determine if a
code test is necessary. It's not an "option" - each Administration
MUST determine if a code test is necessary or not. If the
Administration determines that it is, then any test that is ordered
complies with "international requirements".

>S25.5 no longer REQUIRES anything. So how can one show that one has
>met the requirement? That's impossible.

>Having a choice (regardless of whom holds the choice) means that it
>is an OPTION, and options aren't requirements. A requirement means
>that there is no choice; no option. These are OPPOSITES.

The "international requirement" (inflexible rule) is that the
decision on code proficiency is now up to each Administration. This
isn't an "option" - this is a fixed rule = "requirement".

"Meeting the international requirement" means meeting the rule set
by the FCC. The FCC cannot remove an operating privilege for an
entire class of licensee without a formal rule change unless it is a
temporary or emergency measure. There has not been any formal rule
change, so the situation remains as is.

Whether or not the IRS and the Tax Court works that way, that's how
the FCC works.

Dieter, you've been dealing with the IRS too much to think clearly
on this matter.....

Sarcasm aside, I do believe that I ask a legitimate question.

The operating privileges described in 47 CFR 97.301(e) are based on several requirements, ALL which must be met. One of those is the "international requirement" - which is no longer a requirement but an option (chosen by each government). How can an individual show compliance with a requirement that no longer exists?

I'm certain you've read this and several threads on this point. What is your view on whether .301(e)? Does it still convey privileges, or because no one can meet the requirement, does it convey NOTHING? My view is that since one of its requirements (i.e. to meet the international requirement) cannot be met, it conveys nothing, and thus no novice or technician licenseholder has any [HF] privilege (under this subsection).

DICK, I pay attention to what the FCC has published in Part 97. It
tends to be the guide book of amateur radio. Your petty little jabs,

half-baked thoughts and incomplete sentences don't rule the ARS. They merely distract and annoy.

Wrong with respect to the General, Advanced, and Extra license classes. Their ability to operate on HF is dictated SOLELY by license class, and for these classes, 47 CFR 97.501 indicates the credits (including element 1). These classes have NO REFERENCE to any international requirement as necessary to be met.

You need to re-read the operating frequency privilege rules in 47 CFR 97.301.

That means that there is no international requirement (in your words, "has been dropped").

I agree exactly: "Until the FCC changes the rules, it is still required ...."

How do you show compliance with a non-existent requirement?
Please demonstrate your proof.

1) I am not a troll, nor have I ever posted from easynews.com. I don't even have an account at easynews.com.

2) I have asked a legitimate question. 47 CFR 97.301(e) bases the HF operating privileges for the novice and technician license classes on a requirement that now no longer exists, but the FCC hasn't removed the requirement for those licensees to comply with the external requirement. How are these licensees to show compliance with a[n international] requirement that no longer exists?

If they can't demonstrate compliance, then they don't have the privilege. Is that beyond your comprehension?

This top one is NOT a handle but my name. So what if it's an "ampr.org" address. It's one of the few that actually WORKS because I know what I'm doing.

None of the rest are mine nor under my control. Most I've never even seen before.

Please define "optional requirement."

If it's optional, it's not a requirement. If it's required, it's not an option.

47 CFR 97.301(e) is defined in terms of a requirement. That requirement, having been turned into an option, no longer exists - but the appropriate licenseholders, in order to execute the privilege, still must demonstrate compliance with the non-existent requirement. How do they do this? If they can't, then they don't have the privilege. I say that demonstrating compliance with a non-existent requirement is an impossible act.

If each government has a choice, then it's not an "international requirement."
A requirement means that there is no choice. The replacement S25.5 means that
each country has a choice to impose a NATIONAL REQUIREMENT on its
licenseholders (something they could have done anyway). How does that become
an international requirement when some member country to the agreement can opt
out?

> >S25.5 no longer REQUIRES anything. So how can one show that one has

That statement focuses on "requirement," forgetting about "international."

> "Meeting the international requirement" means meeting the rule set
> by the FCC. The FCC cannot remove an operating privilege for an
> entire class of licensee without a formal rule change unless it is a

> temporary or emergency measure. There has not been any formal rule

Yes, there has. Treaties and international agreements supersede national laws.

>
> Dieter, you've been dealing with the IRS too much to think clearly
> on this matter.....

Perhaps so, but you will find that interpretation of rules and regulations was
one of my strongest points when I worked for them. Thinking can be taxing! :-)

Why are you blaming me for this? The original thread was crossposted. Blame
the person who started it all.

You should note that where I have noted an inapproprate group, I have killed
the cross-posting in my responses. I don't always note that, nor do I really
care. I'm not a mind reader of the originator of any thread, myself excluded.
```

A liberal in the 1700s is the same as a conservative of today.

Just like if JFK would have run in this election, it would have been as a
Republican.

You have a lot to learn child.

994. Icom 706MKiiG and SDA-100 require a tuner?

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-30 02:35:56 UTC
From: se@panix.com
Message-ID: <bg7auc$fg6$1@panix5.panix.com>
Source record: 64664

I recently learned the Alinco radio I posted about before is no longer available from HRO. Instead, I'm now directing my attention to the 706 MKIIG and an SDA-100. I've read good reviews about the SDA-100. What are people's experiences with this combo in the city? (I'm in Boston)

From what I gather, I will not need an intermediate antenna tuner between the rig and the antenna. Is this true?

It also does not appear the 706 permits direct frequency entry from the optional dtmf mic. Is this true? If so, I found http://www.john.hansen.net/keypad.htm which looks like a good deal.

Comments welcome.

Thanks.

Scott, WY1Z

The DTMF keypad on HT's is primarily used for accessing phone patches on repeaters that are equiped with them. It may also be used for accessing other things on a repeater too. Contrary to what some people may tell you in this newsgroup, CW is far from dead. I have an Extra class license and I am working on improving my CW skills right now. I think I would probably use CW more than voice once I become proficient in it. Good luck!

That's a bad idea, an hour straight is 'way too long for learning
purposes.

> In the old days, that would mean going to a code
> practice course, or buying one of those records (I had one to
> start, and I think it did help), or listening to a receiver

When I studied for my earliest tests there were no consumer-level
recording methods let alone computers. My only options for practicing
Morse were having somebody hand-send it or copying it off the air.
Which, as a practical matter, meant copying it with a rcvr or forget
it. I'm still a very strong supporter of learning Morse via the W1AW
code practice sessions. Today they transmit computer-generated code
and back then I believe they used tape-generated code so it has always
been quite precise. I'll concede that I'm only around 150 miles from
the station so they boom here on 80M and QRM wasn't/isn't a problem.
Might be more difficult from the west coasts but I don't know.

I still recommend W1AW over any of the "canned" aids. Two downsides of
course are that W1AW does not send Farnsworth and one needs a
half-decent HF rcvr.

Article published Jul 28, 2003
A HAUNTING ACT
Let's talk sedition

Dear Mr. Ashcroft,
I feel it is my duty to pass along the following information:

One recent evening, I was stretched out on my couch reading a book -- a novel by Tom Robbins, if you must know -- when an old lady with her hair in a bun appeared suddenly before my eyes.

This being Florida, I can't say I was startled, exactly. But I was puzzled. I was reasonably certain I'd locked the doors.

"Get your feet off that chair!" she snapped. "And sit up straight!"

I grumbled mildly but followed her instructions. "Yes, ma'm," I said.
"You don't have any idea who I am, do you?" she asked testily.

"No, ma'm. I don't believe so," I replied with as much obsequiousness as I could muster under the circumstances. "Do you live around here? Can I give you a ride home?"

"'Can I give you a ride home?' he says! You always were a little slow on the uptake, buster. Take a closer look."

I did as I was told. The bun, which served as a nest for a No. 2 pencil, was vaguely familiar. The scowl I'd seen somewhere before. And the arched brow -- well, a fellow in my business gets a lot of those.
I ventured a guess. "Sunday school?" "No! God spared me that test! Try again."

I blinked. School bus driver? No, that's not it. Cafeteria lady? No. DMV? Nope.

Suddenly it came to me. "The librarian!"

"Miss Crabapple, to you," she said, folding her arms and smiling with satisfaction. "From beyond the grave."

"L-L-Look," I sputtered. "I can't possibly have any overdue books. And even if I do, there must be a statute of limitations. I've been out of fifth grade for, what, 29 years now?"

"Shhh! I'm not here about overdue books. I'm here to talk to you about sedition."

There was a long pause. "Uh-huh," I said. I scanned the room for some means to defend myself. There were the pillows on the sofa. And my book. Not much else.

"Presently there is a bill in Congress called the Freedom to Read Protection Act," she said. "Have you heard of it?"

"Well, uh, yeah. It's a proposed amendment to the Patriot Act of 2001. It would repeal a provision of the anti-terrorism law that enables the government to secretly inspect the records of libraries and bookstores."

"Continue."

"Under the Patriot Act, the FBI can monitor the reading materials of any individual without any indication that a crime has been committed. In fact, librarians and bookstore owners can be charged with a crime -- a felony -- if they reveal such an investigation."

"Very good. You still split infinitives, but you're not quite as stupid as I remember. You must have married above yourself."

"Yes, ma'm," I said. "I did."

"Don't be so proud of yourself. The odds were decidedly in favor of your doing so."

I had a feeling I'd just been insulted, but I pressed on. I wanted to get this haunting over with. "What do you want from me, lady?"

"I want you to speak out against this abomination! I want people to climb onto the tabletops at their local libraries and shout, 'Just because I read a murder mystery doesn't make me a murderer! Just because I read a book about communism doesn't make me a communist!"

"And just because I read about civil liberties doesn't make me a libertine!" I yelled.

She glowered.

"Sorry," I said sheepishly. "I got swept up by the moment."

"I want you to write to your elected officials and urge them to pass this amendment."

"Gee, I dunno," I replied. "My congresswoman is Katherine Harris. I might end up not being able to vote next time."

"OK, then, smart aleck. Write to your senators. Write to the president. Write to John Ashcroft, the man behind this mess! Tell him that no real patriot will tolerate this outrage, this affront to democracy, this assault on civilization!"

So there you have it, Mr. Ashcroft.

Miss Crabapple always said she does not suffer fools gladly. As one to another, I felt it was my duty to write to you and give you fair warning:

She's pulled your file, dude.

In your humble service, I am .

Lawyers sue Blair over war
By Richard Galpin
BBC Athens correspondent

Top lawyers from Greece filed a lawsuit with the International Criminal Court (ICC) in the Hague on Monday against senior UK officials.
They want to indict Prime Minister Tony Blair and other senior members of the UK government and military for allegedly breaching international law by attacking Iraq.

The lawyers, from the Athens Bar Council, say they have compiled a dossier of "strong evidence" against the officials, including more than 20 alleged war crimes.

They include the killing of Iraqi civilians, depriving the population of drinking water in cities such as Basra, the destruction of food supplies and the bombardment of residential areas.

The allegations are based on dozens of reports about the conflict, printed in newspapers and broadcast on television.

The Bar Association said the alleged crimes breached the statute of the International Criminal Court.

Among those accused with Mr Blair are Defence Secretary Geoff Hoon, Foreign Secretary Jack Straw, and Admiral Sir Michael Boyce, who recently retired as Chief of Defence Staff.
The prosecutor of the International Criminal Court received the dossier, saying the contents would be reviewed.

The prosecutor of the International Criminal Court will now decide whether the case falls within his jurisdiction.

If he thinks it does, a panel of judges must also give approval before an investigation can begin.

Heinous crimes

The British Government has always stressed it acted within the law during the conflict.

But a senior Greek lawyer, who helped draw up the lawsuit, said it would be difficult for the British prime minister and others to defend themselves against the charges.

She alleged that heinous crimes have been committed which should not go unpunished.

The Greek lawyers announced in May their intention to take legal action.

They said the war in Iraq breached international treaties such as the Charter of the United Nations, the Geneva Conventions and the ICC's own Statute.

However, the ICC has already rejected almost 40 cases over the war in Iraq.

Pentagon's Futures Market Plan Condemned

By KEN GUGGENHEIM, Associated Press Writer

WASHINGTON - The Pentagon (news - web sites) is setting up a stock-market style system in which investors would bet on terror attacks, assassinations and other events in the Middle East. Defense officials hope to gain intelligence and useful predictions while investors who guessed right would win profits.

Two Democratic senators demanded Monday the project be stopped before investors begin registering this week. "The idea of a federal betting parlor on atrocities and terrorism is ridiculous and it's grotesque," Sen. Ron Wyden (news, bio, voting record), D-Ore., said.

The Pentagon office overseeing the program, called the Policy Analysis Market, said it was part of a research effort "to investigate the broadest possible set of new ways to prevent terrorist attacks." It said there would be a re-evaluation before more money was committed.

The market would work this way. Investors would buy and sell futures contracts - essentially a series of predictions about what they believe might happen in the Mideast. Holder of a futures contract that came true would collect the proceeds of investors who put money into the market but predicted wrong.

A graphic on the market's Web page showed hypothetical futures contracts in which investors could trade on the likelihood that Palestinian leader Yasser Arafat (news - web sites) would be assassinated or Jordanian King Abdullah II would be overthrown.

Although the Web site described the Policy Analysis Market as "a market in the future of the Middle East," the graphic also included the possibility of a North Korea (news - web sites) missile attack.

That graphic was apparently removed from the Web site hours after the news conference in which Wyden and fellow Democratic Sen. Byron Dorgan (news, bio, voting record) of North Dakota criticizing the market.

Dorgan described it as useless, offensive and "unbelievably stupid."

"Can you imagine if another country set up a betting parlor so that people could go in ... and bet on the assassination of an American political figure, or the overthrow of this institution or that institution?" he said.

According to its Web site, the Policy Analysis Market would be a joint program of the Pentagon's Defense Advanced Research Projects Agency, known as DARPA, and two private companies: Net Exchange, a market technologies company, and the Economist Intelligence Unit, the business information arm of the publisher of The Economist magazine.

DARPA has received strong criticism from Congress for its Terrorism Information Awareness program, a computerized surveillance program that has raised privacy concerns. Wyden said the Policy Analysis Market is under retired Adm. John Poindexter, the head of the Terrorism Information Awareness program and, in the 1980s, a key figure in the Iran-Contra scandal.

In its statement Monday, DARPA said that markets offer efficient, effective and timely methods for collecting "dispersed and even hidden information. Futures markets have proven themselves to be good at predicting such things as elections results; they are often better than expert opinions."

The description of the market on its Web site makes it appear similar to a computer-based commodities market. Contracts would be available based on economic health, civil stability, military disposition and U.S. economic and military involvement in Egypt, Iran, Iraq (news - web sites), Israel, Jordan, Saudi Arabia, Syria and Turkey.

Contracts would also be available on "global economic and conflict indicators" and specific events, for example U.S. recognition of a Palestinian state.

Traders who believe an event will occur can buy a futures contract. Those who believe the event is unlikely can try to sell a contract. The Web site does not address how much money investors would be likely to put into the market but says analysts would be motivated by the "prospect of profit and at pain of loss" to make accurate predictions.

Registration would begin Friday with trading beginning Oct. 1. The market would initially be limited to 1,000 traders, increasing to at least 10,000 by Jan. 1.

The Web site says government agencies will not be allowed to participate and will not have access to the identities or funds of traders.

The market is a project of a DARPA division called FutureMAP, or "Futures Markets Applied to Prediction." FutureMAP is trying to develop programs that would allow the Defense Department to use market forces to predict future events, according to its Web site.

"The rapid reaction of markets to knowledge held by only a few participants may provide an early warning system to avoid surprise," it said.

It said the markets must offer "compensation that is ethically and legally satisfactory to all sectors involved, while remaining attractive enough to ensure full and continuous participation of individual parties."

Dorgan and Wyden released a letter to Poindexter calling for an immediate end to the program. They noted a May 20 report to lawmakers that cited the

possibility of using market forces to predict whether terrorists would attack Israel with biological weapons.

"Surely such a threat should be met with intelligence gathering of the highest quality - not by putting the question to individuals betting on an Internet Web site," they said.

Wyden said $600,000 has been spent on the program so far and the Pentagon plans to spend an additional $149,000 this year. The Pentagon has requested $3 million for the program for next year and $5 million for the following year.

Wyden said the Senate version of next year's defense spending bill would cut off money for the program, but the House version would fund it. The two versions will have to be reconciled.

July 29, 2003
U.S. Fights Verdict Backing Ex-P.O.W.'s
By ADAM LIPTAK

When 21 freed American P.O.W.'s returned home from the Persian Gulf war in March 1991, Dick Cheney, then secretary of defense, welcomed them at Andrews Air Force Base, Md.

"Every man and woman who cares for freedom," Mr. Cheney said, "owes you a very special measure of gratitude."

Of those 21 former prisoners of war, 17, who had been tortured by their Iraqi captors, would like something more tangible. This month they won a court award of almost $1 billion against Iraq, and a federal law says they may be paid from frozen Iraqi funds.

The Bush administration has expressed sympathy for the plaintiffs over what they endured but is fighting them about the money, saying it is urgently needed to rebuild Iraq.

But Richard W. Roberts, a federal district judge in Washington, has ordered the government to keep enough Iraqi money in the United States to satisfy $653 million of the award, the amount of the compensatory but not the punitive damages he ordered paid to the former prisoners.

The Iraqi government never responded to the suit, which was filed in April 2002, and Judge Roberts acted after hearing evidence only from the plaintiffs. He set out his findings, in harrowing detail, in a 118-page decision.

The judge is to hear government arguments today asking him to rescind his order setting aside the $653 million and to cancel the award itself. The government cites "foreign policy interests in ensuring a safe and successful transition in Iraq."

Taylor Griffin, a Treasury spokesman, said that in March, President Bush ordered the seizure of about $1.7 billion of Iraqi money, already frozen. Mr. Griffin added that under a provision of a second federal law, the U.S.A. Patriot Act, that money became government property unavailable to the former prisoners. The parties disagree on how the two laws should be interpreted.

Mr. Griffin said the government had been periodically transferring those assets to Iraq, in cash, to pay Iraqi pensioners and civil servants, to

provide working capital for Iraqi ministries and to buy equipment for the Iraqi police.

One lawyer for the former prisoners, Stephen A. Fennell, said changing conditions in Iraq should be of no consequence. Under the Geneva Convention, he said, "these types of liabilities run with the states, not the governments."

John Choon Yoo, who until recently was a Justice Department lawyer specializing in international issues, said the prisoners' suit was dangerous. "I terrifically sympathize with their personal situation and what they went through," he said, "but the use of the courts and damages remedies interferes with the president's conduct of foreign policy."

One plaintiff, Lt. Col. Richard Dale Storr, now with the Washington Air National Guard, said the administration's position troubled him. Colonel Storr endured beatings in Iraq that broke his nose, dislocated his shoulder and burst his left eardrum.

"It's sending a conflicting message to our troops," he said of the administration's recent court filings. "Congress and the judicial branch say, `Let's protect our guys to the maximum extent possible,' " while the executive branch is "saying the opposite."

"Disappointing," he added, "would be a good way to put it."

Outrageous Bush Executive Order on Iraq Oil Must Be Investigated
July 28, 2003
EarthRights International

President Bush has issued an Executive Order, so far completely unreported, that purports to grant broad legal immunity to oil companies operating in Iraq. The Order is, on its face, outrageous, and should be investigated.

Executive Order 13303, issued on May 22, 2003, claims to be essential to Iraqi reconstruction efforts. A cursory reading of the Order indicates that its real purpose is to protect oil companies by giving virtual impunity for any activities undertaken relating to Iraqi oil.

This Order, with broad language that seems to sweep aside federal statutes, including the Alien Tort Claims Act, has received no public attention. It has been brought to light by a researcher with the Sustainable Energy and Environment Network (SEEN).

Under this Order, an oil company complicit in human rights violations, or one that causes environmental damage, would be immune from lawsuits. The language of the Executive Order is so broad that it might as well have been written by lawyers for Halliburton, ExxonMobil and ChevronTexaco.

In 13303, President Bush declares a national emergency as the basis for protecting the Development Fund for Iraq (an entity intended to fund reconstruction efforts with oil proceeds, overseen by an international board including World Bank officials) as well as all Iraqi petroleum, petroleum products, "interests", proceeds, and contracts related to Iraqi petroleum. Claiming that interference with Iraqi petroleum, petroleum products, and "interests therein" jeopardizes reconstruction efforts in Iraq, EO 13303 offers a wide range of protections to certain persons, entities and assets associated with the Iraqi oil industry. The document is apparently intended as a sweeping grant of immunity to individuals, corporations, agencies and others involved in Iraqi oil sales, marketing, or other oil-related activities.

The Order provides protection at both the front end-the activities that generate the oil-as well as the back-the profits and proceeds that ensue. U.S. companies engaged in petroleum-related work in Iraq are purportedly given broad immunity from suits for environmental damage, workplace harms, contractual disputes, and numerous other wrongs. For example, a U.S. oil company benefiting from human rights abuses, no matter how egregious, apparently falls within the Order's immunity from suit. Similarly, the Order

purports to protect any assets derived from Iraqi oil from judgment, garnishment, or any other seizure in U.S. courts. For example, if a corporate entity or an individual engages in criminal activity in the U.S., its assets traceable to Iraqi oil are protected by this order. The list of situations in which a person or corporation could get away with, if not murder, then at least millions, is endless.

The title of the EO, "Protecting the Development Fund for Iraq and Certain Other Property in Which Iraq Has an Interest," is a sham. This EO may be about Iraq, but it's also about the oil industry exclusively. (Remember the Administration has claimed that the Iraq war had nothing to do with oil?) There is nothing at all about protecting humanitarian organizations, communications, computer or electrical companies, or other industries that are critical to Iraq's reconstruction.

EarthRights International is joining SEEN and the Government Accountability Project in investigating the legitimacy of this Order. We call on Congress to investigate EO 13303 immediately.

Try +12V (13.8V) to the red, ground to the chassis of the radio. Blue
wires are usually for variable illumination levels, and tied to the lights
in the vehicle console.

You know, perhaps Technician class amateurs DO have HF privileges due to the reference to the old International requirement. However, where in the Schedule are the specific frequency bands allocated.

I would need to reread Pt97, but, my guess is that they either have NO specific allocated frequency bands, or, they would be the same as the Novice class licence.

> it.

Exactly, and with my old ARC 5 receiver you NEVER heard only one signal, the thing was wide open and you
had to pick out which signal you wanted to copy and learn to ignor ethe rest. Sure was good training, I
developed a very
good 'internal filter' at the outset and still retain that skill.

The upside was that the Novice bands were absolutely packed with slowspeed code and finding lots of
practice was no problem. You also learned to copy the many and varied 'fists', it was all hand sent, no
one had a keyer, though some used bugs. That provided another experience which developed lifetime
skills that no one today gets. I still enjoy copying hand sent or bug sent code, unless it's *really*
butchered.

> I'm still a very strong supporter of learning Morse via the W1AW
> code practice sessions.

It's probaby the best training resource around if one owns a receiver, especially after one has learned
basic Morse.

I've heard them one one band or another everywhere in the USA
that I've listened for them including out on the west coast.

The wording we are arguing about, and the associated frequency table that it applies to, are both in 97.301(e). It's just a hassle to reproduce a table in ASCII text, but it's the table of Novice HF frequencies. This was mentioned earlier, but there is more than one thread on this.

There's no dispute that nobody can get a no-code General or Extra until after the FCC change the rules, but those rules don't refer to the international rules, and this one does.

From what I heard, (from a posting on QRZ) the NCVEC group
yesterday filed a petition with the FCC to abandon CW testing.

The petition, unfortunatly, makes no provisions to preserve CW
subbands...

Pentagon Cancels Terrorism Betting Plan

By KEN GUGGENHEIM
The Associated Press
Tuesday, July 29, 2003; 7:06 PM

WASHINGTON - Under fire from all sides, the Pentagon on Tuesday dropped plans for a futures market that would have allowed traders to profit from accurate predictions on terrorism, assassinations and other events in the Middle East.

Republicans said they knew nothing about the program and would never have approved it. They called the head of the Pentagon agency overseeing the project to Capitol Hill to answer questions.

Democrats demanded details of any related Pentagon programs, an apology from the Bush administration and the firing of those responsible for the market.

"I think those who thought it up ought not only close down the program. They ought not be on the public payroll any longer," said Sen. Byron Dorgan, D-N.D, at a news conference.

At a hearing where senators criticized the program, Deputy Defense Secretary Paul Wolfowitz said, "I share your shock at this kind of program." But he also defended the Pentagon office that came up with the project, saying "it is brilliantly imaginative in places where we want them to be imaginative."

Dorgan and Sen. Ron Wyden, D-Ore., touched off the furor Monday by disclosing details of the Policy Analysis Market, a project that seemed so bizarre that some lawmakers said they thought it was a hoax.

The Pentagon's Defense Advanced Research Projects Agency, working with two private partners, would have set up an Internet futures trading market on events in the Middle East. Traders could buy and sell futures contracts based on their predictions about what would happen in the region. Examples given on the market's Web site included the assassination of Palestinian leader Yasser Arafat and a biological weapons attack on Israel.

Investors were to begin registering Friday and trading was to begin Oct. 1.

From the trading patterns, the Pentagon agency, known as DARPA, hoped to gain clues about possible terrorist attacks. In statements Monday and Tuesday, it said markets are often better than experts in making predictions.

But the response from both parties was outrage.

"This program could provide an incentive actually to commit acts of terrorism," Democratic Leader Tom Daschle of South Dakota said on the Senate floor. He described it as a "plan to trade in death."

Majority Leader Bill Frist of Tennessee asked Appropriations Committee Chairman Ted Stevens, R-Alaska, and Armed Services Chairman John Warner, R-Va., to make sure the market wasn't funded.

"I cannot conceive of any reason why the United States government should be involved in a project of this nature," Frist said.

By late morning, Warner and Wolfowitz, at separate hearings, announced the program would be ended.

As he praised DARPA at a Senate Foreign Relations hearing, Wolfowitz said with a smile, "It sounds like maybe they got too imaginative."

Sen. Barbara Boxer, D-Calif., told Wolfowitz, "I don't think we can laugh off that program."

"There is something very sick about it," she said. "And if it's going to end, I think you ought to end the careers of whoever it was thought that up. Because terrorists knowing they were planning an attack could have bet on the attack and collected a lot of money. It's a sick idea."

Warner said he had spoken with the head of DARPA, Tony Tether, who agreed the program should end.

Warner said in an interview that DARPA "didn't think through the full ramifications of the program."

Senators said they had only vague information about the DARPA project that included the market. That project, FutureMAP, or "Futures Markets Applied to Predictions," will end along with the market Web site, the Pentagon said.

The Pentagon had requested $3 million for FutureMAP next year. The senators said the money attracted little attention in the overall the $3 billion DARPA budget proposal.

About $750,000 had been approved for FutureMAP in past budgets.

"It's totally unauthorized as far as we're concerned," Stevens said. "No funds should have been used for it at all. It's really a serious mistake on the part of DARPA."

Tether was called to Capitol Hill to meet with Warner and Sen. Pat Roberts, chairman of the Intelligence Committee and Armed Services' emerging threats subcommittee.

Warner's spokesman, John Ullyot, described the meeting as businesslike and professional. He said the senators will submit written questions to Tether and will await responses before deciding if hearings or other actions are needed.

Tether was asked as he left whether retired Adm. John Poindexter, who runs the DARPA division that included the market program, would keep his job.

"I don't see why not," he said.

Poindexter, who runs DARPA's Information Awareness Office, is used to political storms. A former national security adviser to President Reagan, Poindexter was a key figure in the 1980s Iran-Contra scandal. In addition to FutureMAP, his office oversees the Terrorism Information Awareness project, a computerized surveillance program that has raised privacy concerns.

Asked if Poindexter remained on the DARPA payroll, Pentagon spokesman Lawrence Di Rita said, "At the moment, Admiral Poindexter continues to serve in DARPA."

At 5 wpm with Farnsworth spacing, you have around 1.5-2 seconds
between characters. That should be plenty. Are you using Farnsworth
spacing?

Try this experiment: Have someone read a random sequence of standard
phonetics ("Hotel, Sierra, Alfa, Yankee..." at a rate of about one
word every two seconds while you write down the first letter of each
word. If you can do that, it's a good bet you can learn to copy 5 wpm
code.

Are you block printing or writing cursive? I found block printing
avoided a lot of problems because each letter stands alone.

> > > I just get further

> > > more. I use computer programs and ARRL training CDs.
> > >
> > > I will check "The Art and Skill of Radiotelegraphy". Thanks for the
> > > encouragement.

Try this:

Set the computer to send just two unrelated characters - say, R and Z.
Practice copying those two until you get 95% or better copy. Then add
just one more letter and practice until you can get 95% or better with
those three. The trick is to not add any new ones until you know the
old ones almost perfectly.

Good advice. But don;t be afraid to backtrack as above, to find what
letters are giving you trouble.

Me too. And no time was allowed for going back - when the code
stopped, they took the paper away. Plus, if the examiner could not
read your writing, you flunked. Also you had to send 20 per to the
examiner's satisfaction.

But all that has been gone for over 20 years now. Ancient history. Yet
many hams licensed since those days could easily meet that standard.

Note that today's test can be passed by answering the questions OR
finding one minute (25 characters) of solid copy.

A 5/8 wl has gain over a quarter-wave, of course, but so does a dipole
:) I think they are roughly the same (that is, 5/8 vs. dipole), and the
reason I'm asking is because of the ERP requirements of the 60 meter
allocation.

All the best, and 73,
Dave

Mike,

What CW subbands?

I just read the thing on QRZ.com, and it looks to me like all the
NCVEC wants to do is dump Element 1 and allow Techs who have not
passed a code test to have the same HF privs as Novices and Techs who
have passed a code test. No subband changes, written test changes,
etc. Just elimination of Element 1.

Did I miss something?

Odd that NCVEC beat NCI to the punch on this one.

I'd suggest that you re-post on a newsgroup where someone might have one of those. Asking for a CB radio here is a lot like asking for a tricycle in a dragster newsgroup.

Just out of curiosity, have you ever thought about getting a ham license? It's easier than ever, and you will have about a million times more fun than CB. Check out http://www.arrl.org

Also, you can LEGALLY transmit with one and a half KILOWATTS, instead of a puny four watts (CB). On the ham bands, you can use AM, FM, SSB, TV, packet (digital), fax, even Morse code. You can talk using satellites, bounce signals off the moon, use local repeaters on HF, VHF, UHF, and use digital tone squelch, CTCSS, and lots of other acronyms. Or, you can just shoot the breeze with your buds and no one will bother you. Unlike CB, with their 40 channels, there are literally millions of "channels" on the ham bands. Plenty for everyone to have their own!

Again, go to http://www.arrl.org and look around. Email me if you'd like, for more info. Make sure to fix my email address before you reply.

All the best,
Dave

--

Please yank that last "t" from my email address.
It's "net", not "nett". You know how to do that,
but the spammers won't.

==========

The original poster had it right,, JFK would be a republican by todays
standards. Smaller government, tax cuts that he signed into law. His speeches
he gave on no government has ever taxed its way into prosperity.
LBJ a republican,,, LOLOLOL his war on poverty, his great society,
his welfare programs enacted. 40 years and 4-5 trillion dollars later and
we still have the poor. His redistribution of wealth programs smacks of
socialism.

> politically active for much longer. I worked for the libertarian party

> Dick

Hey Dick........

Were you perchance a Ham-Op in the 80's and early 90's
when the infamous "14.313 Booer Wars" between
KV4FZ's "anti-phone patch" factions and the opposing
Maritime Mobile Net's faction were in full swing..?

It was QUITE a time!

Just about any week night and all weekend long you could
tune to either 14.300 or 14.313 and hear any variety of
catcalls, music, snide comments, foul language, noisemakers,
the infamous "dirty black box" and anything else in-between.
(the way it worked was if the MM Net was on .313 then the
nuts were on .300 and visa-versa) This went on for close
to 12 Years that I was aware of. It became known as the
Ham Radio Comedy Channel and before it ended it drew in
just about every kook from 75 Meters.

Guess what Dick...? It turned out that 90% of the WORST
on the air offenders and un-ID'ed stations turned out to be
Hams with Advanced and Extra Class Licensees, most of
of which had held that ticket for 10 or more years duration
and more importantly, at that time one needed to pass a 13 and 20
WPM code test respectively to obtain in the first place!
(...unless of course, you bribed the VEC for your code-credit
which was occuring in parts of the Southeastern USA at the time)

So Dick, please remember that keeping Code WILL NOT
keep the fruitcakes out of the hobby, nor will it bring more stations
into the same. The fruitcakes are already here, and for the most
part, the general public does not know ham radio from a wristwatch
nor would they as the "radio craze" of the late-70's CB Era

ended a VERY long time ago.

Besides, if they (the public) want "radio communications" they are
going to go to WalMart and purchase a pair of blister-packed FRS
Radios for $39.95 from off the pegboard in Asile #7. (...and if you
went to WalMart back in April or May, you could have snagged
a pair of full-channel Motorola FRS Radios for $26.68 as I did
when they were on sale)

I've been in ham radio since the late 60's and
supported the ending of code
in the 80's when it would have done some good.
Forget it doing ANY good now of course as
today's youth are more interested in the Internet
than in ham radio. If they want "radio" there's FRS.
Buy em, put in 3 type AA Cells and your talkin with FRS.

Sorry but that's the truth.

Still, it's ****Un-be-freaking-lievable**** that the
same ages-old debate of if to keep stupid
damm old code or not is still going on.
Then again, ham radio has been in an arrested state
of development for Years.

Looks like ole Wayne Green was right ALL ALONG.

.... .. :) :) :)

If you read the proposal, it's a bit confusing in how they specify frequency
for privilege. The only two scenarios that make sense is that they propose
rolling in novice CW space with generic space, or that novice space is
allowed into the CW space even though they've never been tested for
CW.

The second I approve of. I think right now, today, all tech operators
should be allowed on HF in the CW space for novices. Ie, give them
the CW space to play with IN CW ONLY.

Mike

Oh, no one ever expected code or anything else to keep ALL the nutcases out of ham radio, nor anywhere else. We've always had a few bad apples, but they had always been few enough that the rest were able to keep them from spoiling the whole barrel.
With the code test gone, that filter -(yes, even 5WPM *is* a filter, and I would remind you that no filter catches _all_ the unwanted trash)- disappears, and there is just no other stopper for the influx of spoilers will turn out to be unstoppable by any means short of gutting the ARS.

It's a fact, was a fact, and WILL be a fact. Live with it. I will.

By that time BPL will have HF wiped out anyway, and Hey! What a coincidence!

Maybe there is method to all this madness after all!

The training CD's aren't bad for practicing the code if you know the code
and just want to get better. The real situation is that a person needs to
still learn the code in the beginning. It would the same as if I was
listening to Chinese language and didn't know a word of the Chinese language
versus knowing the language on a basic level and listening to Radio China or
something like that......

Definitely a problem if you do not have a HF reciever at all. And those Rat Shack ones suck for that too. There used to be publication of VHF rebroadcasts of the w1aw transmissions, but I have yet to hear any around here in Michigan. Where the hell is the so-called field organization they are so proud of on this one? Even if it is a members-only thing, still you would think that the local (state-wise) field organizations would think that was important enough to rebroadcast.....

A completely different issue I had and/or have is not the speed as much as the audio pitch of the code being sent. It's hard as hell to get a VE team to adjust the pitch/tone sound at all if they even bother to send with a key. Hell, a couple of them are only using premade CD's, which are played a fixed rate and since most VE's are not frivolous (at all), they usually only have a "basic" cd player, and would not have equipment capable of code at a lower tone but keeping the same speed.

I say this because my hearing loss makes me hear "normally" sent code at its "proper" pitch rate as one long solid tone, as if you placed a finger on a straight key and never lifted up at all while sending. In other words, if there was a 2 minute QSO in morse code being sent at its "normal" pitch, it sounds like a 2 minute long T to me. If I lower the frequency of the tone of the amount of at least 200-250hz less, to where it starts becoming a more rich, bass(y) sounding tone, then I can distinguish the difference between a dit and a dah.

On a lighter note, I think my ex-wife had a voice in the same range as being sent at most VE sessions..... she said I never listened to her!

Rice Takes Responsibility for Bush Speech

Bush Adviser Rice Says She Feels Responsible for Questionable State of the Union Language

WASHINGTON --

National Security Adviser Condoleezza Rice said Wednesday that she feels responsible for the questionable statement in President Bush's State of the Union address about Iraqi plans to buy uranium in Africa.

"I certainly feel personal responsibility for this entire episode," she said in an interview on PBS' "NewsHour With Jim Lehrer."

"What I feel most responsible for is that this is detracting from the very strong case the president has been making."

Rice was the latest administration official, including CIA Director George Tenet and the president himself, to take responsibility for the now-discredited claim.

Less than half of US would vote to return Bush to White House: poll

WASHINGTON (AFP) -

Less than half of Americans surveyed -- only 47 percent -- would vote
for President George W. Bush in the 2004 election, according to a
Gallup/CNN/USA Today poll published.

Some 41 percent of those polled said they would vote for the
yet-to-be-chosen Democratic candidate.

There are nine Democrats vying for their party's nomination.

The dip below the key 50 percent mark is "a sign that this thing's not
done," political analyst Charles Cook told USA Today.

Bush backs law to bar gay marriage

Legislation would define marriage as union between
a man and a woman

WASHINGTON --

President Bush said Wednesday that he had government lawyers working on a law that would define marriage as a union between a woman and a man, casting aside calls to legalize gay marriages.

"I BELIEVE MARRIAGE is between a man and a woman, and I believe we ought to codify that one way or the other, and we have lawyers looking at the best way to do that," the president said in a wide-ranging news conference at the White House Rose Garden.

Bush also urged, however, that America remain a "welcoming country" not polarized on the issue of homosexuality.

U.S. Official Says North Korea a 'Hellish Nightmare'

By Martin Nesirky

SEOUL (Reuters) -

Top U.S. arms negotiator John Bolton described North Korean leader Kim Jong-il on Thursday as a tyrannical dictator who lived like royalty while jailing thousands and keeping many hungry in a "hellish nightmare."

In a tough speech guaranteed to provoke a blistering North Korean response, the undersecretary of state also said Kim was mistaken if he thought threats to develop and proliferate nuclear weapons would weaken international resolve to halt Pyongyang's atomic ambitions through multilateral talks.

> V = (1+sqrt(R/F)) / (1-sqrt(R/F))
> Why can't I seem to figure out how to solve for R?

Let x = sqrt(R/F).

Then V = (1 + x)/(1 - x)
(1 - x)V = (1 + x)
V - Vx = 1 + x
V - 1 = Vx + x
V - 1 = x(V+1)
x = (V-1)/(V+1)
sqrt(R/F) = (V-1)/(V+1)
R/F = [(V-1)/(V+1)]^2
R = F*(V-1)^2 / (V+1)^2

Multiply both sides by (1-sqrt(R/F)). Then simplify.

Multiply both sides by [1 - sqrt(R/F)] and then solve for sqrt(R/F).
That will give you

sqrt(R/F) = (V-1) / (V+1)

Square both sides and solve for R. If I did it right, you should come
up with

R = F [(V-1)/(V+1)]^2

which is the well known, but grossly erroneous, W4NTI voltage /
frequency / resistance formula (He got kicked out of engineering
school because of his weird theory). I'm surprised that anyone other
than Dan is still using that formula.

Arrangements for a different tone have to be made in advance so that they
have time to obtain a CD or tape of the needed pitch from the VEC. You
can't just drop into a test session and expect them to have anything
different than the commonly used tone.

The CW subbands are already called out in the FCC regulations separately from the CW testing. Thus simply dropping the code test from the rules does not change the rules on the subband allocations. Thus the NCVEC petition does not need a provision to preserve the CW subbands.

Gee, Bush wins the election by 6 points. Why did you bother posting this?

BTW, another new poll has 69 percent of *Democrats* already saying Bush will win in 2004. How come you didn't post THAT poll?

And what about THIS? This is a Clinton guy saying this, so be VERY afraid....

PHILADELPHIA - The Democratic Party is approaching the 2004 elections in its weakest position since Franklin Roosevelt forged the enduring Democratic coalition 70 years ago, a prominent pollster warned Monday.

The party still has solid support from the core of Roosevelt's coalition - union members, minorities and the working poor - said pollster Mark Penn. It also enjoys solid support from gays and Hispanics, the nation's fastest-growing minority.

But less than one-third of Americans now consider themselves Democrats, down from 49 percent at their peak in 1958. And Democrats lag well behind Republicans among other growing groups of voters whose loyalties swing back and forth between parties and who hold the key to close elections - including suburbanites, professionals and middle-class families with children. That leaves the party in a poor position to build the new coalition it needs to beat President Bush and build an enduring majority in an evenly divided country.

"In terms of the percentage of voters who identify themselves as Democrats, the Democratic Party is currently in its weakest position since the dawn of the New Deal," Penn told a gathering of the Democratic Leadership Council, a group of centrist Democrats. "Exciting the Democratic base alone will not bring enough voters into the Democratic fold."

Penn, who was President Clinton's pollster, revealed his findings at a time when centrists are again battling liberals for dominance within the

Democratic Party. Centrists fear that catering to the party's base with anti-war talk and "big government" proposals for health care will turn off other voters.

Already, said DLC founder Al From, the party is reviving an unwelcome image as the pre-Clinton party of "tax-and-spend" big government, weak on defense and captive to special interests. That image cost the party three straight presidential elections in the 1980s, From said.

"The Democratic Party is in danger of being taken over by the far left," said Sen. Evan Bayh, D-Ind., chairman of the DLC.

One key problem, Penn and others said, is that Democrats are perceived as catering to a political base that is losing its electoral clout in a changing country. When likely voters are asked which party they prefer, Democrats still hold an edge among many groups. Union members and gays prefer Democrats over Republicans by 43 percentage points, and African-Americans and the working poor do by 41 percentage points, Penn found.

But Republicans have an edge of 15 percentage points among suburban voters, 21 percentage points among professionals, and 29 percentage points among white-collar workers.

The Penn poll of 1,225 likely 2004 voters was conducted June 29-July 1 and had a margin of error of plus or minus 2.8 percentage points.

"The decline of manufacturing jobs and the shift from cities to suburbs and exurbs, and the dramatic increases in college education and white collar and professional jobs, do not favor the Democrats," Penn said.

The Republican advantage increases as people move up the economic ladder. Among whites, Democrats are favored only among those who make less than $20,000 a year. The Republican edge grows with income, reaching 66 percentage points among whites making more than $150,000 a year.

Democrats also maintain strength among single voters, but once families have children, they tend to turn Republican, Penn said.

And while Democrats are more often favored on issues such as poverty, the environment and health care, voters prefer Republicans on terrorism and national security.

Despite their party's weaknesses, centrist Democrats believe Bush can be defeated next year if the party coalesces around a centrist candidate who is strong on defense and offers an agenda to spark the economy. Anxieties about the war in Iraq and the economy have hurt Bush's standing; Penn's survey found that 48 percent of likely voters believe Bush deserves re-election, while 42 percent believe someone else should be elected.

Sensing opportunity, many Democrats at the DLC conference said they believe there is plenty of time for the party to settle its internal debate and find a new leader before voters make up their minds for 2004. Polls show none of the nine Democratic presidential candidates is emerging as a frontrunner,

leaving the party without a single voice for now to counter Bush.

"It's still early," said Jennifer Mann, a state representative from Allentown, Pa. "Most people in my district aren't getting up every morning wondering what's happening in the presidential race. ... I know there is a degree of impatience. People are anxious for someone to emerge. But when that person does emerge, people will rally behind them."

Yep, As I was aware of that. And I never expected them to change for me at the last minute. BUT, I do believe that with enough warning ahead of time it should be considered more than fair for a VE team to make an adjustment. It should be no problem for a VEC to be able to send via code practice oscillator!!!!!! Wouldn't that be a shame if the VEC's have become so lazy they can't even send a code test via a key because they are relying on the code CD's and tapes.

Where the hell did you think I expected to walk into a test session in the past, and at the last possible moment expect a major change?

It's nice to find our american cousins promoting the international fraternity for which amateur radio is famous, to quote the arrl web site:

"Ham radio operators use two-way radio stations from their homes, cars, boats and outdoors to make hundreds of friends around town and around the world"

Perhaps there are other reasons why people didn't take the morse test? Maybe like me some of them have been long term ill and just don't need the hassle? I even use morse a lot on 50mhz and expect to do so on HF but I've not been tested (my morse seems to be better than some which I hear from the USA - odd, that, don't you think?)

Helmsman - (who I note hides behind anonymity) I look forward to being boycotted by you and not working you on HF, the rest of you I look forward to talking to both on SSB and CW.

Sleeping with the enemy
Joe Conason - The New York Observer

07.30.03 - Now that America knows who was responsible for those 16 misleading words about African uranium -- namely anybody except the man who uttered them -- perhaps the time has come to move on to other pertinent issues of war and terror. Now, perhaps, we should inquire about another dubious premise underlying the pre-emptive invasion of Iraq: the insistence by the President and his associates that Saddam Hussein's regime provided support to Al Qaeda and conspired with Osama bin Laden against the United States.

That incendiary charge is again under scrutiny, following the partial release of the report prepared by the House and Senate intelligence committees after last year's joint investigation of the Sept. 11 attacks. While the government censored critical portions of the Congressional report, leaks did emerge about the redacted section concerning "foreign support" for the hijackers. Those leaks indicate that such support came from officials and "businessmen" linked to the kingdom of Saudi Arabia -- and not from Iraq.

Such a finding might be expected to perturb the citizens who accepted White House insinuations about the supposed connection between Iraq and Islamist terror. Polls indicate that this accusation thoroughly pervaded public consciousness; many if not most Americans even believed that the hijackers were of Iraqi origin. Nearly all were Saudis, of course.

Nevertheless, the President and members of his cabinet repeatedly warned that Saddam Hussein would someday provide Al Qaeda with the most deadly weapons ever made, creating the imminent threat of an immense atrocity far worse than Sept. 11.

As Mr. Bush put it, "Iraq could decide on any given day to provide a biological or chemical weapon to a terrorist group or individual terrorists. Alliance with terrorists could allow the Iraqi regime to attack America without leaving any fingerprints." In his famous Oct. 7, 2002, speech in Cincinnati, the President stated: "We've learned that Iraq has trained Al Qaeda members in bomb-making and poisons and deadly gases."

Was any of that terrifying rhetoric based in truth? Leaving aside the fact that American and British forces have so far discovered no poisons or deadly gases in occupied Iraq, let alone nuclear weapons, the available evidence offers no solid proof of a conspiracy between Iraq and Al Qaeda. Moreover, the President and his aides had every reason to know that they were misleading us on this question.

Classified material in the National Intelligence Estimate prepared by the C.I.A. last year cast doubt on the ties between Al Qaeda and Iraq, and also noted how unlikely it was that Saddam Hussein would deliver his most lethal weapons to terrorists. According to C.I.A. director George Tenet, the consensus reflected in the National Intelligence Estimate was that Saddam Hussein would foment a terrorist strike only as an "extreme" final act of revenge for an American invasion. So the White House kept Mr. Tenet's full report in the top-secret file, where the doubts expressed by the C.I.A. director couldn't interfere with the drive toward war.

The urge to conceal embarrassing secrets never abates. So last week, when the joint Congressional committee released its report on Sept. 11, the chapter on foreign support for the terrorists was blacked out at the insistence of the White House. The ostensible reason was to prevent worsening relations with Saudi Arabia, since the report examined financial and other ties between the kingdom's agents and two of the hijackers.

According to sources quoted widely in the mainstream media, the Congressional probers discussed the activities of Saudi nationals residing here who assisted hijackers Khalid Almihdhar and Nawaf Alhazmi. One of the suspect Saudis was an employee of the kingdom's civil-aviation authority named Omar Al-Bayoumi. Suspected by the F.B.I. of terrorist ties as early as 1998, Mr. Bayoumi had paid the security deposit on the hijackers' San Diego apartment and found them an English translator. Another Saudi national with connections to a Saudi charity is suspected of providing financial aid to the conspirators. The report's declassified sections quote U.S. officials complaining about the kingdom's lack of cooperation with investigations of the hijackers.

Imagine what the President would have said -- or would say now -- if the C.I.A. or the F.B.I. had discovered such intimate connections between the hijackers and agents of Iraq.

Apparently, there were so few clues to Iraqi links with the Sept. 11 hijackers that the Congressional report doesn't even mention the subject. Yet we're supposed to believe that the deposed regime of Saddam Hussein was deeply involved with Al Qaeda -- and that the kingdom of Saudi Arabia is our friend and ally.

On July 29, Mr. Bush refused the Saudi foreign minister's request to declassify the 28 pages of the Congressional report that pertain to the kingdom. The President said he doesn't want to "compromise" the ongoing investigation of the terror attacks. Full disclosure might also compromise other important interests -- including his own political future.

Editorial: Bait and switch / The neocon case for war in Iraq

Published July 31, 2003 ED31

In an appearance Tuesday before a skeptical Senate Foreign Relations Committee, Deputy Defense Secretary Paul Wolfowitz declared that "the peace in Iraq is now the central battle in the war on terror." That same refrain has begun to pop up in statements by President Bush and Vice President Dick Cheney -- as well as the neoconservative thinkers and writers who provide the intellectual framework for this administration's approach to foreign and defense policies. It begins to get down to the bedrock rationale for going to war in Iraq.

Strands of that rationale have been around for years, but they weren't given public emphasis -- not in the 2000 presidential campaign and not in the prewar debate about whether to invade Iraq. If you piece together those strands, the rationale, prewar, went like this:

Saddam Hussein is a brutal tyrant who routinely thumbs his nose at the United States. His interest in weapons of mass destruction -- if not his possession of them -- is well-established, meaning he may become a threat to the United States and its friends at some point. Moreover, he is in violation of numerous U.N. Security Council resolutions. The United States can make a case for ousting him by military force -- a case that can't be made for any other Middle East leader. So Saddam's the guy.

Removing Saddam will do a number of positive things. In his place the United States and friends can build a peaceful, prosperous, democratic, secular state in Iraq. That in turn will be a powerful catalyst for promoting change and reform throughout the Islamic world. Oppressive, corrupt regimes will become vulnerable because people across the region will want what the Iraqi people now have. And Islamic reform is key to removing the conditions that breed terrorism.

There's also what is called the "flypaper" or "magnet" effect, to which Bush spoke with his famous "Bring 'em on" statement. The idea is that the presence of tens of thousands of American military personnel on the ground in Iraq will make them a magnet for terrorists from around the world. It will pull terrorists away from Israel and the United States to Iraq, where U.S. forces can safely engage them in full-fledged combat and defeat them.

Those American forces also are likely to embolden reformist elements next door in Iran, threatening the rule of the oppressive, America-hating mullahs. On the other side of Iraq, in Syria, terrorist groups such as

Hezbollah are likely also to get the message that they'd best behave, lest they too get whacked by the Americans.

That's the neocon theory, and there is evidence that pieces of it are indeed working. But pieces are not: Witness the warning that also came Tuesday of a new airliner hijacking threat in the United States and overseas. Note also that in his appearance before the Senate committee, Wolfowitz and others declined repeated efforts by frustrated Democrats and Republicans to estimate the cost of occupying Iraq, how long it might take or even how many troops it might require.

"Oh, come on now," responded Sen. Joseph Biden, D-Del., the ranking Democrat. "Does anyone here at the table think we're going to be down below 100,000 forces in the next calendar year? When are you guys starting to be honest with us?"

The larger question is why those guys weren't honest with Congress and the American people before the war started. Why did they focus almost exclusively on the supposedly imminent threat posed by Saddam Hussein's weapons of mass destruction? Why not lay out their far more nuanced, ambitious neocon theory about projecting American values into the Middle East and thus beginning a regional transformation? Wolfowitz has said the WMD rationale was chosen for "bureaucratic" reasons; it was the one factor everyone could agree on.

But other neocon writers hint it was for a different reason: They knew they couldn't sell their vision -- not to traditional conservatives, as George Will has made clear; not to most liberals, and not to the nonideological middle which would balk at the cost in dollars and human life. So they gussied up the "imminent threat" posed by Iraq's WMD programs and rode that argument into war.

The neocon theory is interesting and complex. It's like a new theory for solving a scientific question. New theories need grueling examination by peers who try to knock holes in them before they are accepted as the basis for action. They also need to be explained, patiently and with precision, so the public can know what it is being asked to purchase with the lives if its kids and its money.

The neocon foreign policy agenda got neither a thorough vetting nor public explication -- because its authors apparently thought the American people wouldn't understand it or wouldn't buy it. Instead, the neocons pulled a classic, and very arrogant, bait and switch. Sooner or later, they're going to pay for it.

Leaders of Iraq Weapons Search Brief Senators
Thu July 31, 2003 11:50 AM ET
By Tabassum Zakaria

WASHINGTON (Reuters) - U.S.-led experts have not found any weapons of mass destruction in Iraq but have uncovered documents pointing to a program to develop such weapons, U.S. officials said, as the two men leading the hunt on Thursday briefed senators on their efforts.

Former U.N. weapons inspector David Kay and Army Maj. Gen. Keith Dayton were testifying at closed-door hearings of the Senate Armed Services Committee and the Senate Intelligence Committee.

Kay was sent by the CIA to Iraq as a special advisor to develop a strategy for finding alleged weapons of mass destruction. Dayton, director of operations for the Pentagon's Defense Intelligence Agency, heads the Iraq Survey Group searching for evidence of chemical, biological and nuclear weapons in Iraq.

U.S. officials, speaking on condition of anonymity, said Kay and Dayton had not come up with a "smoking gun" in the search for such weapons even after investigators spoke with key Iraqi scientists, but have found evidence of weapons programs.

The United States went to war in March saying Iraq posed an imminent threat because it possessed large amounts of weapons of mass destruction. No such weapons have been found since the government of Saddam Hussein was toppled in April.

A defense official said members of the Iraq Survey Group "have come across information of a variety of types -- through interrogation of people, conversations with people, (and) documents that have been recovered that clearly point to a WMD program."

"One document will lead us to someplace else, or name people. Then we'll try to go find those people," the official said.

Some of the information from some of the lower-level Iraqis "has proved very fruitful -- not led us to any buried 'smoking gun,' so to speak, but certainly has given a lot of insight into how they moved things around and when they did," the official added.

Sen. Bob Graham, a Florida Democrat and 2004 presidential candidate, said at a news conference he hoped evidence of Iraqi weapons programs would be

found.

"If we do not find weapons of mass destruction and we do not find that they were positioned in a way for imminent use, the credibility of the United States government abroad and the credibility of the United States government with its own people here in the United States will be significantly eroded," Graham said.

The Iraq Survey Group, with roughly 1,500 personnel, is staffed mostly by Americans, but with some British and Australians, the official said. It took over the search for such weapons in June.

The Australians are leading the document-reviewing effort, the official said, while British military officer John Deverell serves as Dayton's deputy.

The official said members of the group are speaking with Iraqis knowledgeable about Iraq's weapons programs, including numerous scientists.

"Certainly the case is being built that, no doubt in anybody's mind, they had a program," the official said. "We have good documents. We have come across documentation of their program."

But the past existence of Iraq chemical and biological weapons is not in dispute. The Iraqis used chemical weapons in the 1980s against Iranian troops and against Iraqi Kurdish civilians. And Iraqi officials admitted to the United Nations in 1995 the existence of a biological arms program.

Ex-Diplomat Joseph Wilson: Bush May Start Another War in 2004 To Win The Election
Wednesday, July 30th, 2003

http://www.democracynow.org/article.pl?sid=03/07/30/1513221
Former U.S. Ambassador to Iraq Joseph Wilson predicts the situation in Iraq will deteriorate so much over the next year Bush may resort to start another war in order to win the 2004 election. Wilson is the retired diplomat who visited Niger in a CIA-sponsored trip last year during which he determined the alleged Iraq-Niger uranium deal was bogus. His conclusion was ignored by the Bush White House.

Retired U.S. diplomat Joseph Wilson is accusing the White House of orchestrating a smear attack against him and his wife. Wilson gained headlines earlier this month when he revealed that he had personally traveled to Niger in 2002 in a CIA-financed trip to investigate any nuclear link between the African nation and Iraq. Wilson set off a firestorm of debate when he told the media, the White House and CIA were both warned in 2002 of his findings.

Wilson now says the White House deliberately leaked to the press that his wife, Valerie Plame, is a covert CIA operative thus damaging her career and compromising past missions.

Writing on the Nation website, David Corn points out that whoever within the Bush administration outted Wilson's wife may have committed treason. Disclosing information that identifies covert agents violates the Intelligence Identities Protection Act of 1982. Plame's identify was first revealed in a column by conservative Robert Novak who said government officials leaked him the information.

The Best Democracy Money Can Buy: Part I
Greg Palast - GregPalast.com

07.24.03 - "The guts for Michael Moore's opening screed on how Bush 'stole' the 2000 election," writes the Village Voice, "came from investigative reporter Greg Palast, whose own book, The Best Democracy Money Can Buy, has fast become a cult fave among progressives." Now, WorkingForChange brings you an exclusive serialization from Palast's New York Times bestseller. Over the next two weeks, you can get your daily dose of Palast's opening chapter, "Jim Crow in Cyberspace" -- which we will interrupt only to bring you BBC reporter Palast's latest comments -- on Liberia, on Iraq and on the economic wars at home.

This series is part of the WorkingForChange campaign, in cooperation with Martin Luther King III of the Southern Christian Leadership Conference, to prevent the theft of the presidential election of 2004. With each excerpt we are including links to sign onto the WorkingForChange/King petition.

JIM CROW IN CYBERSPACE: The Unreported Story of How They Fixed the Vote in Florida

From the book, The Best Democracy Money Can Buy (Penguin 2003) by Greg Palast

In the days following the presidential election, there were so many stories of African Americans erased from voter rolls you might think they were targeted by some kind of racial computer program. They were.

I have a copy of it: two silvery CD-ROM disks right out of the office computers of Florida Secretary of State Katherine Harris. Once decoded and fed into a database, they make for interesting, if chilling, reading. They tell us how our president was elected-and it wasn't by the voters.

Stop the Florida-tion of the 2004 election!

Here's how it worked: Mostly, the disks contain data on Florida citizens-57,700 of them. In the months leading up to the November 2000 balloting, Florida Secretary of State Harris, in coordination with Governor Jeb Bush, ordered local elections supervisors to purge these 57,700 from voter registries. In Harris's computers, they are named as felons who have no right to vote in Florida.

Thomas Cooper is on the list: criminal scum, bad guy, felon, attempted voter. The Harris hit list says Cooper was convicted of a felony on January 30, 2007. 2007?

You may suspect something's wrong with the list. You'd be right. At least 90.2 percent of those on this "scrub" list, targeted to lose their civil rights, are innocent. Notably, over half-about 54 percent-are Black and Hispanic voters. Overwhelmingly, it is a list of Democrats.

Secretary of State Harris declared George W. Bush winner of Florida, and thereby president, by a plurality of 537 votes over Al Gore. Now do the arithmetic. Over 50,000 voters wrongly targeted by the purge, mostly Blacks. My BBC researchers reported that Gore lost at least 22,000 votes as a result of this smart little blackbox operation.

The first reports of this extraordinary discovery ran, as you'd expect, on page one of the country's leading paper. Unfortunately, it was in the wrong country: Britain. In the USA, it ran on page zero-the story was simply not covered in American newspapers. The theft of the presidential race in Florida also grabbed big television coverage. But again, it was the wrong continent: on BBC Television, broadcasting from London worldwide-everywhere, that is, but the USA.

Was this some off-the-wall story that the British press misreported? Hardly. The chief lawyer for the U.S. Civil Rights Commission called it the first hard evidence of a systematic attempt to disenfranchise Florida's Black voters. So why was this story investigated, reported and broadcast only in Europe, for God's sake? I'd like to know the answer. That way I could understand why a Southern California ho'daddy like me has to commute to England with his wife and kiddies to tell this and other stories about my country.

In this chapter, I take you along the path of the investigation, step by step, report by report, from false starts to unpretty conclusions. When I first broke the story, I had it wrong. Within weeks of the election, I said the Harris crew had tried to purge 8,000 voters. While that was enough to change the outcome of the election (and change history), I was way off. Now, after two years of peeling the Florida elections onion, we put the number of voters wrongly barred from voting at over 90,000, mostly Blacks and Hispanics, and by a wide majority, Democrats.

That will take us to the Big Question: Was it deliberate, this purge so fortunate for the Republicans? Or just an honest clerical error? Go back to the case of Thomas Cooper, Criminal of the Future. I counted 325 of these time-traveling bandits on one of Harris's scrub lists. Clerical error? I dug back into the computers, the e-mail traffic in the Florida Department of Elections, part of the secretary of state's office. And sure enough, the office clerks were screaming: They'd found a boatload like Mr. Cooper on the purge list, convicted in the future, in the next century, in the next millennium.

The jittery clerks wanted to know what to do. I thought I knew the answer. As a product of the Los Angeles school system, where I Pledged my Allegiance to the Flag every morning, I assumed that if someone was wrongly accused, the state would give them back their right to vote. But the Republican operatives had a better idea. They told the clerks to blank out the wacky conviction dates. That way, the county elections supervisors, already wary

of the list, would be none the wiser. The Florida purge lists have over 4,000 blank conviction dates.

You've seen barely a hair of any of this in the U.S. media. Why? How did 100,000 U.S. journalists sent to cover the election fail to get the vote theft story (and preferably before the election)?

The Best Democracy Money Can Buy: Part II
Greg Palast - GregPalast.com

07.25.03 - "The guts for Michael Moore's opening screed on how Bush 'stole' the 2000 election," writes the Village Voice, "came from investigative reporter Greg Palast, whose own book, The Best Democracy Money Can Buy, has fast become a cult fave among progressives." Now, WorkingForChange brings you an exclusive serialization from Palast's New York Times bestseller. This series is part of the WorkingForChange campaign, in cooperation with Martin Luther King III of the Southern Christian Leadership Conference, to prevent the theft of the presidential election of 2004. With each excerpt we are including links to sign onto the WorkingForChange/King petition.

Silence of the Media Lambs: The Unreported Story of How They Fixed the Vote in Florida

Part 2, from the book, The Best Democracy Money Can Buy (Penguin 2003) by Greg Palast

[In the opening excerpt from Palast's book we learned that five months before the November 2000 election, Governor Jeb Bush of Florida and his Secretary of State, Katherine Harris, moved to purge 57,7000 people from the voter rolls, supposedly criminals not allowed to vote. Almost every one was innocent of crimes -- though the majority were guilty of being African American. BBC reporter Palast asks, "How did 100,000 US journalist sent to cover the election fail to get this vote theft story?"]

Investigative reports share three things: They are risky, they upset the wisdom of the established order and they are very expensive to produce. Do profit-conscious enterprises, whether media companies or widget firms, seek extra costs, extra risk and the opportunity to be attacked? Not in any business text I've ever read. I can't help but note that Britain's Guardian and Observer newspapers, the only papers to report this scandal when it broke just weeks after the 2000 election, are the world's only major newspapers owned by a not-for-profit corporation.

But if profit lust is the ultimate problem blocking significant investigative reportage, the more immediate cause of comatose coverage of the election and other issues is what is laughably called America's "journalistic culture." If the Rupert Murdochs of the globe are shepherds of

the New World Order, they owe their success to breeding a fiock of docile sheep -- snoozy editors and reporters content to munch on, digest, then reprint a diet of press releases and canned stories provided by government and corporate public-relations operations.

Take this story of the list of Florida's faux felons that cost Al Gore the presidential election. Shortly after the U.K. story hit the World Wide Web, I was contacted by a CBS TV network news producer eager to run a version of the story. The CBS hotshot was happy to pump me for information: names, phone numbers, all the items one needs for your typical quickie TV news report. I freely offered up to CBS this information: The office of the governor of Florida, Jeb Bush, brother of the Republican presidential candidate, had illegally ordered the removal of the names of felons from voter rolls -- real felons who had served time but obtained clemency, with the right to vote under Florida law. As a result, another 40,000 legal voters (in addition to the 57,700 on the purge list), almost all of them Democrats, could not vote.

Stop the Florida-tion of the 2004 election!

The only problem with this new hot info is that I was still in the midst of investigating it. Therefore, CBS would have to do some actual work -- reviewing documents and law, obtaining statements.

The next day I received a call from the producer, who said, "I'm sorry, but your story didn't hold up." And how do you think the multibillion-dollar CBS network determined this? Answer: "We called Jeb Bush's office." Oh.

I wasn't surprised by this type of "investigation." It is, in fact, standard operating procedure for the little lambs of American journalism. One good, slick explanation from a politician or corporate chieftain and it's case closed, investigation over. The story ran on television, but once again, in the wrong country: I reported it on the BBC's Newsnight. Notably, the BBC is a publicly owned network -- I mean a real public network, with no "funds generously provided by Archer Mobil Bigbucks."

Let's understand the pressures on the CBS TV producer that led her to kill the story simply because the target of the allegation said it ain't so. The story demanded massive and quick review of documents, dozens of phone calls and interviews -- hardly a winner in the slam-bam-thank-you-ma'am school of U.S. journalism. Most difficult, the revelations in the story required a reporter to stand up and say that the big-name politicians, their lawyers and their PR people were freaking liars.

It would be much easier, a heck of a lot cheaper and no risk at all to wait for the U.S. Civil Rights Commission to do the work, then cover the commission's report and press conference. No one ever lost their job writing canned statements from a press release. Wait! You've watched Murphy Brown so you think reporters hanker to uncover the big scandal. Bullshit. Remember, All the President's Men was so unusual they had to make a movie out of it.

The Election Fix Story Steals Into the States

In London the Guardian and Observer received about two thousand bless-you-Britain-for-telling-us-the-truth-about-our-elections letters from U.S. Internet readers circulating the samizdat presidential elections coverage. I also received a few like this:

You pansey brits seem to think that the average American is as undereducated and stupid as the average british subject..Well comrad [sic], I'm here to tell you . . . . . .which ended with some physically unfeasible suggestions of what to do with the Queen (figure 1.1).

My Observer report went to print within three weeks of the election. The vote count in Florida was still on. Watching the vote-count clock ticking, Joe Conason, the most determined of American investigative reporters, insisted to his editors at Salon.com, the Internet magazine, that they bring my story back to America. Salon posted "Florida's Ethnic Cleansing of the Voter Rolls" to the Net on December 4, 2000. It wasn't exactly "print," but at least it was American. Still, not one U.S. news editor called, not even from my "sister" paper, the Washington Post, with whom the Guardian shares material and prints an international weekly.

From a news perspective, not to mention the flood of site hits, this was Salon's biggest politics story ever -- and they named Part I their political story of the year. But where was Part II? On their Web site and on radio programs the magazine was announcing Part II would appear in two days... and in two days... and in two days... and nothing appeared. Part II was the story blown off by the CBS Evening News about an additional 40,000-plus voters whom Jeb Bush barred from voting. The fact that 90 percent of these 40,000 voters were Democrats should have made it news... because this maneuver alone more than accounted for Bush's victory.

I was going crazy: Gore had not yet conceded... the timing of Part II was crucial. Where the hell was it? Finally, an editor told me, "The story doesn 't check out. You see, we checked with Jeb Bush's office and they said..."

Argh! It was dï¿½jï¿½ vu all over again.

Another staffer added, as a kind of explanation, "The Washington Post would never run this story."

Well, he had me there. They hadn't, they didn't. Not yet. At least Salon helped me sneak the first report past the border patrols. So God bless America.

While waiting for the United States to awaken, I took my BBC film crew to Florida, having unearthed a smoking-gun document: I had a page marked "confidential" from the contract between the State of Florida and the private company that had purged the voter lists. The document contained cold evidence that Florida knew they were taking the vote away from thousands of innocent voters, most of them Black.

It was February. I took my camera crew into an agreed interview with Jeb Bush's director of the Florida Department of Elections. When I pulled out the confidential sheet, Bush's man ripped off the microphone and did a fifty-yard dash, locking himself in his office, all in front of our cameras.

It was killer television and wowed the British viewers. We even ran a confession from the company that was hired to carry out the purge operation. Newsworthy? Apparently not for the United States.

My program, BBC Newsnight, has a film-trading agreement with the ABC television network. A record twenty thousand Net-heads in the United States saw the BBC Webcast; and several banged on the door of ABC TV's Nightline to run our footage, or at least report what we found. Instead, Nightline sent its own crew down to Florida for a couple of days. They broadcast a story that ballots are complex and Blacks are not well educated about voting procedures. The gravamen of the story was, Blacks are too frigging dumb to figure out how to vote. No mention that in white Leon County, machines automatically kicked back faulty ballots for voter correction; whereas in Gadsden County, very Black, the same machines were programmed to eat mismarked ballots. That was in our story, too.

Why didn't ABC run the voter purge story? Don't look for some big Republican conspiracy. Remember the three elements of investigative reporting: risk, time, money. Our BBC/Guardian stories required all of those, in short supply in U.S. news operations.

Finally, in February, my Part II -- the report that was too scary and difficult for Dan Rather's show -- found asylum in the Nation magazine, that distant journalistic planet not always visible to the naked eye.

And then, mirabile dictu, the Washington Post ran the story of the voter purge on page one, including the part that "couldn't stand up" for CBS and Salon . . . and even gave me space for a bylined comment. Applause for the Post's courage! Would I be ungrateful if I suggested otherwise? The Post ran the story in June,though they had it at hand seven months earlier when the ballots were still being counted. They waited until they knew the findings of the U.S. Civil Rights Commission Report, which verified BBC's discoveries, so they could fire from behind that big safe rock of Official Imprimatur. In other words, the Post had the courage to charge out and shoot the wounded.

Part 3 next week: 'A Black-List Burning for Bush'

A Black-List Burning for Bush: The Unreported Story of How They Fixed the Vote in Florida

Part 3, from the book, The Best Democracy Money Can Buy (Penguin 2003) by Greg Palast

[In the opening excerpt from Palast's book we learned that five months before the November 2000 election, Governor Jeb Bush of Florida and his Secretary of State, Katherine Harris, moved to purge 57,7000 people from the voter rolls, supposedly criminals not allowed to vote. Almost every one was innocent of crimes -- though the majority were guilty of being African American. Palast's discovery of the ethnic cleansing of the voter rolls, which gave George Bush the White, was front page news in Britain, where Palast reports for the Guardian papers. But the report remained hidden from Americans.]

How did British newspapers smell the Florida story all the way across the Atlantic? At the time, I was digging into George Bush Sr.'s gold-mining business [Bush's gold mines? see Chapter 2 of The Best Democracy Money Can Buy>], when English newshound Solomon Hughes caught a note on the Mother Jones Internet bulletin board flagging a story in the Palm Beach Post printed months before the election. The Post's back pages mentioned that 8,000 voters had been removed from the voter rolls by mistake. That's one heck of a mistake. Given the Sturm und Drang in Florida, you'd think that an American journalist would pick up the story. Don't hold your breath. There were a couple of curious reporters, but they were easily waylaid by Florida's assurances that the "mistake" had been corrected, which the Post ran as

truth.

But what if the Florida press puppies had been wrong? What if they had stood on their hind legs and swallowed a biscuit of bullshit from state officials-and the "mistakes" had not been corrected?

It was worth a call.

From London, I contacted a statistician at the office of the county elections supervisor in Tampa. Such an expert technician would have no reason to lie to me. The question at the top of my list: "How many of the voters on the scrub list are BLACK?" And the statistician said, "You know, I 've been waiting for someone to ask me that." From his leads, I wrote "Black-Out in Florida" (The Observer, London, November 26, 2000:

Vice-President Al Gore would have strolled to victory in Florida if the state hadn't kicked up to 66,000 citizens off the voter registers five months ago as former felons. In fact, not all were ex-cons. Most were simply guilty of being African-American. A top-placed election official told me that the government had conducted a quiet review and found -- surprise! -- that the listing included far more African-Americans than would statistically have been expected, even accounting for the grievous gap between the conviction rates of Blacks and Whites in the U.S.

One list of 8,000 supposed felons was supplied by Texas. But these criminals from the Lone Star State had committed nothing more serious than misdemeanors such as drunk driving (like their governor, George W. Bush).

The source of this poisonous blacklist: Database Technologies, acting under the direction of Governor Jeb Bush's frothingly partisan secretary of state, Katherine Harris. DBT, a division of ChoicePoint, is under fire for misuse of personal data in state computers in Pennsylvania. ChoicePoint's board is loaded with Republican sugar daddies, including Ken Langone, finance chief for Rudy Giuliani's aborted Senate run against Hillary Clinton.

When the Observer report hit the streets (of London), Gore was still in the race. Columnist Joe Conason pushed his bosses at Salon.com to pick up my story and take it further. But that would not be easy. The Texas list error -- 8,000 names -- was corrected, said the state. That left the tougher question: What about the 57,700 other people named on that list?

The remaining names on the list were, in the majority, Black -- not unusual in a nation where half of all felony convictions are against African Americans. But as half the names were Black, and if this included even a tiny fraction of innocents, well, there was the election for Bush. The question was, then, whether the "corrected" list had in fact been corrected. Finding the answer would not be cheap for Salon. It meant big bucks; redirecting their entire political staff to the story and making hotshot reporters knuckle down to the drudgery of calling and visiting county elections offices all over Florida. But they agreed, and our Salon team came back with a mother lode of evidence proving that, by the most conservative analysis, Florida had purged enough innocent Black voters -- several thousand -- to snatch the presidency from Al Gore.

At that time the presidential race was wide open. Word was, Gore's camp was split, with warriors fighting the gray-heads of the Establishment who were pushing him to lie down and play dead, advice he'd ultimately follow. Just before we hit the electronic streets with it, someone called a key player in the White House and Gore's inner circle about the story Salon would soon break.

The Big Insider said, "That's fantastic! Who's the reporter?" The tipster said, "This American, he's a reporter in Britain, Greg Palast."

Mr. White House Insider replied, "Shit! We hate that guy." But that's another story.

On December 4, 2000, I wrote, "Florida's Ethnic Cleansing of the Voter Rolls," printed in Salon.com. It began:

If Vice President Al Gore is wondering where his Florida votes went, rather than sift through a pile of chads, he might want to look at a "scrub list" of 57,700 names targeted to be knocked off the Florida voter registry by a division of the office of Florida Secretary of State Katherine Harris. A close examination suggests thousands of voters may have lost their right to vote based on a flaw-ridden list of purported "felons" provided by a private firm with tight Republican ties.

How did we know the "felons" were innocent? We asked a county elections official, Linda Howell, of Madison County, Florida. In March 2000, Harris sent the supervisor a list of criminals -- and Ms. Howell's own name was on it.

"I was very upset," Howell said. "I know I'm not a felon." Howell, a white Republican, refused to remove her own name from the voter rolls and threw out the Harris list. In another county, an elections official restored the rights of one "felon" on the list -- a local judge.

But not everyone on the list was treated so delicately.

"We did run some number stats and the number of Blacks [on the list] was higher than expected for our population," says Chuck Smith, a statistician for Hillsborough County. Smith was concerned that African-Americans made up 54 percent of the people on the original felons list, though they constitute only 11.6 percent of the county's voting population. He challenged the state on this but was told by Harris' office that since most criminals are Black the figure was not surprising.

On the Hillsborough list, in hundreds of cases, names of felons and voters did not match, nor birthdates, nor even gender. Smith added that the ChoicePoint computer program automatically transformed various forms of a single name. In one case, a voter named "Christine" was identified as a felon based on the conviction of a "Christopher" with the same last name. Smith says ChoicePoint would not respond to queries about its proprietary methods. Nor would the company provide additional verification data to back its fingering certain individuals in the registry purge.

By the rules established by Harris' office, a voter is assumed guilty and convicted of a crime and conviction unless and until they provide documentation certifying their innocence. Some had been convicted of a misdemeanor and not a felony, others were felons who had had their rights restored and others were simply cases of mistaken identity. While there was much about the lists that bothered Hillsborough Elections Supervisor Iorio, she felt she didn't have a choice but to use them.

Of the 3,258 names on the original list, the county concluded that more than 15 percent were in error, and tried to restore as many as possible. If that ratio held statewide, no fewer than 7,000 voters were incorrectly targeted for removal from voting rosters. Gore lost by 537 votes.

Hillsborough County's attempt to do the right thing was rare. In rural Florida, the mostly-Black purge list met little opposition.

Etta Rosado, spokeswoman for the Volusia County Department of Elections, said the county essentially accepted the file at face value, did nothing to confirm the accuracy of it and doesn't inform citizens ahead of time that they have been dropped from the voter rolls.

"When we get the con felon list, we automatically start going through our rolls on the computer. If there's a name that says John Smith was convicted of a felony, then we enter a notation on our computer that says convicted felon -- we mark an 'f' for felon -- and the date that we received it," Rosado said.

"I don't think that it's up to us to tell them they're a convicted felon," Rosado said. "If he's on our rolls, we make a notation on there. If they show up at a polling place, we'll say, 'Wait a minute, you're a convicted felon, you can't vote.' Nine out of ten times when we repeat that to the person, they say 'Thank you' and walk away. They don't put up arguments." Rosado doesn't know how many people in Volusia were dropped from the list as a result of being identified as felons.

She failed to add that in the two cases of black voters who did raise a complaint, her office threatened them with arrest if they voted and were proven later ineligible.

Florida was the only state in the nation to contract the first stage of removal of voting rights to a private company. And that company, ChoicePoint Inc. of Atlanta, had big plans. "Given the outcome of our work in Florida," said their PR spokesman, "and with a new president in place, we think our services will expand across the country."

Especially with a President named "Bush." ChoicePoint's board, executive suite and consultant rosters are packed with Republican stars, including former New York Police Commissioner Howard Safir and former ultra-Right congressman Vin Weber, ChoicePoint's Washington lobbyist.

Stop the Florida-tion of the 2004 election!

Thursday, 2 a.m., December 7, 2000. On the other end of the line, heavy breathing, then a torrent of words too fast for me to catch it all. "Vile .

. . lying . . . inaccurate . . . pack of nonsense . . . riddled with errors . . ." click! This was not a ChoicePoint whistleblower telling me about the company's notorious list. It was Choice- Point's own media communications representative, Marty Fagan, communicating with me about my "sleazy disgusting journalism" in reporting on it.

Truth is, Fagan was returning my calls. I was curious about this company that chose the president for America's voters.

They had quite a pedigree for this solemn task. The company's Florida subsidiary, Database Technologies (now DBT Online), was founded by one Hank Asher. When U.S. law enforcement agencies alleged that he might have been associated with Bahamian drug dealers -- although no charges were brought -- the company lost its data management contract with the FBI. Hank and his friends left and so, in Florida's eyes, the past is forgiven.

Thursday, 3 a.m. A new, gentler voice gave me ChoicePoint's upbeat spin. "You say we got over 15 percent wrong -- we like to look at that as up to 85 percent right!" That's 7,000 votes-plus -- the bulk Democrats, not to mention the thousands on the faulty Texas list. (Gore lost the White House by 537 votes.)

I contacted San Francisco-based expert Mark Swedlund. "It's just fundamental industry practice that you don't roll out the list statewide until you have tested it and tested it again," he said. "Dershowitz is right: they had to know that this jeopardized thousands of people's registrations. And they would also know the [racial] profile of those voters."

"They" is Florida State, not ChoicePoint. Let's not get confused about where the blame lies. Harris's crew lit this database fuse, then acted surprised when it blew up. Swedlund says ChoicePoint had a professional responsibility to tell the state to test the list; ChoicePoint says the state should not have used its "raw" data.

Until Florida privatized its Big Brother powers, laws kept the process out in the open. Just before the election, when counties asked to see ChoicePoint's formulas and back-up for blacklisting voters, they refused -- these were commercial secrets.

So we'll never know how America's president was chosen.

That's not it at all. Anybody who wants to bugger anyone else
(consensually) doesn't bother me at all as long as it's in private.
The REAL problem is that if buggery is ordained "legal" by the
government, then, US TAXPAYERS will end up footing the bill because then the
buggers will have access to all sorts of government resources paid for by
TAXPAYERS (that's me) which are currently available to only male/female
married couples.
That my friend, is the reason for this big buggery push.
The nasty by-product of making buggery "unions" legal is that, religion
aside, we will be heading down the road to a degraded society where
historical values will be deemed unimportant and our US society will
eventually go the way of Rome. That is also the goal of progressives and
liberals with regard to political goals in general; buggery is just part of
their big picture.
And that, my friend, is why EVERYONE (whether they are religious or not)
must contact their representatives in Congress to STOP IT IN IT'S TRACKS!
Stay focused on the important aspects of this issue, not your personal
disgust of it (which I share).

Amen, don't even think about one of those turkeys. One advantage I/we
had back then was a profusion of quite inexpensive but usable HF rcvrs
which are not available today. Mostly military surplus gear and some
commercial cheapies like the Hallicrafters S-38. In this respect maybe
we had it much easier than the newbies today have.

Too much work. Plus once VHF comes into play CW becomes a no-interest
thing. We've had sporadic attempts around here to get 2M code practice
sessions going but they didn't last very long.

As we used to in college: "you should wipe the dick prints off your
lips before saying that!"

Why do you focus on the 10 percent of a relationship that is sexual
and ignore the 90 percent that is filled with loyalty and commitment?
Perhaps because in modern society, loyalty and commitment seems to
have nothing to do with marriage anymore?

And if youre interested in denying medical insurance benifits and
other relationship "perks" to homosexuals then why don't we go all the
way back and once again deny freedom, education and decent jobs to
black people? According to the logic of some who post here, that is

also costing us way too much.

I say that President Bill Clinton had the best solution for our time:
Don't ask. Don't tell.

Does this guy understand the difference between an investigation and
an arrest?

Somehow I don't have a problem with the government knowing about
people who buy books on how to build bombs. Its still legal to read
about building bombs but the moment you start to build one its time
for you to go to prison.

> Vote in Florida

Do a Google search on "Ralph Boyd" sometime, Skippy. He's a
Clinton-appointed Assistant Attorney General, who stayed on with the Bush
Administration, and was the one who investigated Palast's "fixed election"
in Florida.

Mr. Boyd, who FYI is himself black, found that Palast was, in fact, LYING.

Clarence Thomas is also African American and a poster child for
affirmative action, as is Dubbya, votes consistently for any issue
with a whiff of affirmative action, and, further, Thomas is widely
recognized for his lack of independent voice and "me too" voting with
Scalia.

You are proposing that Boyd's race means he would stand up for
disenfranchised voters in Florida? A specious argument. And further,
you assert Boyd's "findings" include direct evidence that Palast is
lying? Where are your sources?

Here is the most common assessment of Boyd:

"Ralph F. Boyd, assistant attorney general for civil rights, told the
Senate Judiciary Committee that there were "very few voters who
actually were prevented from voting." But that doesn't square with the
numbers of complaints filed by Floridians. For instance, the Justice
Department logged 11,000 complaints from mostly African-American
voters, yet determined only 14 warranted an investigation. "

Yessir. Ya had to learn operating skills along with learning just the
code. Whether ya wanted to or not. There was no "pause" button on W1AW
and ya couldn't replay it either.

I saw some *really* off-the-wall Novice rcvrs. One buddy of mine
comandeered an old wooden case Philco BC/SW rcvr which didn't have a
BFO. Musta had a 15 Khz "bandwidth". So he copied the thumps the
speaker cranked out. Some time later he managed to pick up a
half-working grid-dipper and tuned the dipper just off the sides of
the incoming signals and viola, hetrodynes he could copy. As long as
he had his mitts on both tuning knobs. I came along and had a
brainfart. I fished an insulated wire down inside the last IF can and
wound the other end loosely around the GDO coil and tuned the GDO to
455 kHz. Instant BFO. He took it one step further yet and added a
gawdawful narrow passive surplus audio filter and cruised all over
40M with that lashup. The homebrewed TX was another Rube Golberg gem,
some xtal oscillator tube driving a 6146, all of it in a cigar box.

Imagine any nocode even considering jumping thru those hoops just to
get on the air.

> The upside was that the Novice bands were absolutely packed with slowspeed code and finding lots of
> practice was no problem. You also learned to copy the many and varied 'fists', it was all hand sent, no

it's *really*
> butchered.

Absolutely correct. It goes farther than that though.

As much as a pain in the butt as those days were in a number of
respects that regime had a number of huge advantages over what is
available today to newbies. The Novice bands were actually a very
successful "support group", we had no options but to clump together
and work with each other toward the same objectives. We climbed all
over each other trying to get our speeds up and beat the one-year
clock on our drop-dead tickets.

Boy there was the incentive licensing move from Hell! But it worked
and the only bitching I ever heard was from a few of the OFs who
turned their noses up at the mere thought of allowing newbies to get
on the HF bands with a lousy 5wpm code test. Turned out to be a
non-sequeter for them 'cause the FCC tossed us into our isolated
playpens 'way up the 80 & 40M bands where they didn't have to put up
with us. We *had* to work each other. Clever arrangement in
retrospect.

And in many if not most cases getting a Novice station took a bunch of
self-taught knowledge and work just to get on the air. All of which
were more learning experiences. One did not use a rubber-duckie or any
otjer catalog antennas on 80 . . autotuners . . as if . . digital
nothing . .

No doubt a dumb-down proponent or two will scan this diatribe and get
some giggles out of the ramblings of another stuck-in-the-past grouchy
OF. But in the end who will be the **real** losers?

Yeah, there's a "cultural gap", fuggem all, I hope they get just
exactly they want.

Yup. Lotta newbies have used zero-cost borrowed rcvrs. I'd loan one of
my "spares" to anybody who was genuinely interested in copying W1AW.
I "loaned" my old HQ-120 to the kid accross the street, he then loaned
it some other kid . . . I have no idea wher it finally landed.

Good. Then they do have big coverage.

Well stated and amen to that. People who have the opinion that anybody
should be able to do anything they want are not long term thinkers, or even short term
thinkers for that matter, after all it takes effort to logically think about things. I work
in the medical field and see the outcome of this kind of behavior frequently. Its not
pretty nor is it cheap and someone has to eat the cost.

I would not know about that, but in my high school algebra class
we were taught a result called "componendo et dividendo". Very
useful in cases like this one.

If a/b = c/d, then (a+b)/(a-b) = (c+d)/(c-d).

Works wonders!

Problem is TOO MANY LOVE TO TELL. I could care less about Gays. But I do not want it shoved down my throat. What goes on behind closed doors be it a man/woman, man/man, woman/woman, human/animal - whatever - SHOULD STAY there. WHY do they have to SHOUT IT to the world? WHO GIVES A SHIT? You want to suck dick, good, go for it, just quit advertising. As for love and commitment, hell, there is so little of that anymore it is pathetic. Look in the chat rooms, look at divorce records. Look at shows like Jerry Springer. This world (at least the US) is lacking seriously in that area.

JOSH MARSHALL

Investigation? No, Bush should pick up the phone

Enough already. Enough excuse-making.

We know that two senior members of the Bush administration intentionally blew the cover of an undercover CIA officer whose job is combating weapons
of mass destruction (WMD) proliferation. And their motivation was pure politics.

The president should find out who they are, reprimand them or, preferably,
fire them. But instead of being outraged, he doesn't even seem to care.

In case you're not familiar with what I'm talking about, let me explain.

You know about Joe Wilson, the retired diplomat who traveled to Niger at the
request of the CIA last year to get to the bottom of those claims about uranium sales to Iraq. Wilson says the White House disregarded or ignored
his report debunking the allegations because it weakened their case that Saddam was rapidly rebuilding his nuclear weapons program.

After he went public with his charges in a New York Times op-ed article, the
White House did all it could discredit Wilson's mission by portraying him as
a small-time operator whose investigation amounted to little. That's no surprise, I guess. We're all adults in this town. And if Wilson was going to
hold the White House to account in public, he had to expect he'd get hit back.

But they didn't stop there. To get back at Wilson, they blew the cover of
his wife, Valerie Plame, a covert CIA operative specializing in tracking other countries' efforts to acquire WMD.

How do we know this? Because two weeks ago syndicated columnist Robert Novak
fingered Wilson's wife as an "Agency operative on weapons of mass

destruction" on the say-so of "two senior administration officials." They
told him Plame had suggested Wilson for the job.

Now, as it happens, it's not even clear that this charge - that Wilson's
wife got him the gig in Niger - is true. The more relevant point, however,
is that two senior administration officials publicized her identity which
they almost certainly knew only because of their access to government
secrets.

Consider what that means.

CIA agents work under different sorts of "cover." There's "official
cover" -
like when an agent is assigned to a U.S. embassy under the guise that
he or
she is a foreign service officer. Then there's "nonofficial" cover -
like
when your business cards say you're a manager at Acme Overseas Energy
Corporation, but you really work for the CIA.

Plame is in that latter category.

By telling the world who she really works for, those senior
administration
officials not only jeopardized her career, they also compromised
whatever
operations she may have worked on, whatever networks she may have
developed
or relationships she may have cultivated. According to one highly-
respected
retired CIA officer who I spoke to Monday, revealing the identity of
a "NOC"
like Plame could literally put the lives of those who cooperated with
her at
risk. To reveal her identity, he told me, was "grossly irresponsible."

Some of the White House's spinners have been putting out the word that
Plame
may not that been that covert an agent after all. So maybe broadcasting
her
identity wasn't such a big deal. This isn't that easy an argument to
refute
since, precisely because Plame is a covert agent, it's difficult to
find out
just what she does or precisely what her status is.

My sources tell me that Plame formerly worked abroad under nonofficial
cover
and has more recently worked stateside. Her position today may be less

sensitive than it was when she worked abroad. But she still works on WMD proliferation issues. And, at a minimum, any operation that she may once have been involved in is probably now fatally compromised, any company which
provided her cover is now exposed.

However that may be, though, just how deep undercover does a CIA operative
have to be before blowing her cover becomes a problem?

So far, the White House's reaction has been awfully weaselly. When pressed,
Scott McClellan told reporters: "I'm saying no one was certainly given any
authority to do anything of that nature, and I've seen no evidence to suggest there's any truth to it."

Frankly, I think Novak's column gives us plenty of evidence. But who cares
whether Andy Card signed off on it or not. It never should have happened at
all - not least of which because it probably violated federal law. No one at
the White House should think it's okay to use the privileged information vouchsafed to them for national security reasons to settle political scores.
And, after all, I thought WMD proliferation was something were concerned about.

To date, Sens. Dick Durbin (D-Ill.) and Charles Schumer (D-N.Y.) have called
for investigations and any number of other senators have told reporters that
some sort of inquiry is probably in order. But let's be honest. We don't really need any investigations, with all their depositions and fancy lawyers
and public grandstanding. If the president wanted to, he could wrap this up
with a few quick phone calls. So why doesn't he?

A few years back, this town sped into paroxysms over claims that the Clinton
White House had used FBI files to smear its critics. Even according to Ken
Starr, those charges turned out to be baseless. This outrage, on the other
hand, actually happened. And, when you think about it, that sort of makes it
worse.

I have a 90 foot vertical for 160 meters.

Yes, I have tried it on 60 meters. It seems to be
about equal to an inverted vee at 60 feet at long
distances. For short skip, as expected, the inverted
vee wins. It is over a VERY extensive ground screen.

A 90 foot vertical is the same as a 90 foot
dipole, except it is in a different orientation
and is fed at the end instead of in the middle.
Since the FCC rules do not address these distinctions,
AFAIK this is a regulation dipole into which
you can transmit 50 watts.

MF,

For a while the was the concept of a registared "Domestic Partnership"
{A "Legal Arangement" between two persons.} That would provide
certain benefits and rights to the signatories. This had broader
public support then the concept of GAY Marriage that does not have
broad public support and generates hostility from many segments of
society.

> And if youre interested in denying medical insurance benifits and
> other relationship "perks" to homosexuals then why don't we go all the

> black people?

MF,

This may be your personal 'logic' (mind set) to lump "Black People"
(African-Americans) and "Gays" (Homosexuals) together but the same
general percentages of African-Americans view "Gay Marriage" as
objectionable as American Society as a whole. Hispanic-Americans and
Asian-Americans as groups also have simular percentages with respect
to "Gay Marriage".

The FCC does require that you be able to show your calculations or
measurements to confirm that it is equivalent to a dipole (i.e. no gain).

They are supposed to make those provisions. If they did not, they were in the wrong. However, I would not favor them using hand sent code with an oscillator for two reasons. 1) Oscillators are often not adjustable in pitch. 2) Some people who copy quite well have absolutely lousy fists and do not send good clean code. It takes a pretty good op to copy some of the people out there.

The little AWOL/Deserter/Dictator stops payment to tortured POWs. Says money should be given to his corporate cronies to help rebuild Iraq.

http://www.philly.com/mld/inquirer/news/nation/6422371.htm

Judge lets U.S. keep Iraqi money from ex-POWs
By Sam Hananel
Associated Press

WASHINGTON - Reluctantly siding with the Bush administration, a federal judge ruled yesterday that the government can prevent 17 Americans detained during the 1991 Gulf War from collecting $653 million in damages from frozen Iraqi assets.

The former POWs, who won the compensatory damages this month, contended they were entitled to some of the money from Iraqi assets in a special Treasury Department bank account. Justice Department lawyers countered that President Bush has the authority to determine how the money is spent. Bush wants the funds to help pay for rebuilding Iraq.

U.S. District Judge Richard W. Roberts made clear he was uncomfortable supporting the government. He said its position that the POWs cannot "recover any portion of their judgment as requested, despite their sacrifice in the service of their country, seems extreme."

The former POWs, including Cherry Hill's Jeffrey Zaun, were beaten and tortured by their Iraqi captors. They sued under a federal law that allows victims who win damages against foreign governments that sponsor terrorism to pursue blocked assets.

A law passed in April allows Bush to prevent litigants from tapping Iraqi funds. He invoked the law in this case shortly before the Iraq war began.

Treasury Department spokesman Taylor Griffin said the decision validated a tough judgment call to use a limited pool of funds to rebuild Iraq.

Stephen Fennell, a lawyer for the former POWs, called the ruling "incredibly disappointing." He said Congress could not have intended "that Iraq would be rebuilt on the backs of these victims." Fennell said he had asked a higher court to block the decision while he appeals.

In their lawsuit, the former POWs also won $306 million in punitive damages. Federal law does not allow them to try collecting that amount from Iraqi assets in the United States.

The jobless rate slid to 6.2 percent last month from 6.4 percent, the
Labor Department said.

The decline was caused by an exodus of people from the labor force,
not by any surge in hiring.

The government said 556,000 departed the labor force

Big drops in the labor force can occur as job seekers become
discouraged and abandon their searches.

Unless they are actively searching for a job, workers are not counted
as unemployed.

There were also signs of weakness elsewhere as the worker hours were
cut back to 33.6 hours per week in July from 33.7 hours in June.

Factory hours fell to 40.1 hours a week from 40.3 hours in the prior
month.

From Reuters, 8/1/03:

tmpl=story&cid=568&ncid=749&e=1&u=/nm/20030801/bs_nm/economy_jobs_dc

Jobless Rate Drops but Payrolls Slump

WASHINGTON (Reuters) -

The U.S. unemployment rate fell in July for the first time in more
than a year but in a report on Friday that ran counter to other signs
of an economic strengthening, employers chopped 44,000 workers from
their payrolls.

The jobless rate slid to 6.2 percent last month from 6.4 percent, the
Labor Department said.

The decline was caused by an exodus of people from the labor force,
not by any surge in hiring.

Indeed, July's payroll drop marked the sixth month in a row the
economy has lost jobs.

It contrasted with the expectations of private economists that
payrolls would grow by 18,000.

U.S. Shifts Rhetoric On Its Goals in Iraq

New Emphasis: Middle East Stability

By Dana Milbank and Mike Allen
Washington Post Staff Writers

Friday, August 1, 2003; Page A14

As the search for illegal weapons in Iraq continues without success, the Bush administration has moved to emphasize a different rationale for the war against Saddam Hussein: using Iraq as the "linchpin" to transform the Middle East and thereby reduce the terrorist threat to the United States.

President Bush, who has mostly stopped talking about Iraq's weapons, said at a news conference Wednesday that "the rise of a free and peaceful Iraq is critical to the stability of the Middle East, and a stable Middle East is critical to the security of the American people."

In the run up to this year's Iraq war, conferences and studies commissioned by hawkish conservative think tanks in Washington debated and prepared models for privatization of the Iraqi oil industry with, of course, major U.S. participation.

Neo-conservative pundits with equal faith and fervor argued that Iraqi oil revenues would finance the country's own reconstruction after the war and that they could even be used to offset some U.S. military operating costs, surely a cheap price to pay for liberating the Iraqi people from the terrible yoke of President Saddam Hussein?

But it hasn't worked out that way.

The cost of the war itself exceed previous public projections from the office of the Secretary of Defense.

At an April 16 news conference, Pentagon comptroller Dov Zakheim acknowledged that the cost of the war to that point came to $10 billion-$12 billion.

But the cost of returning troops to base would be another $5 billion-$7 billion, plus another $9 billion for the 3-1/2 weeks of combat operations, bringing the total cost at that point to between $24 billion-$28 billion.

Since then, the continued cost of occupying Iraq and of the continued pacification and counter-guerrilla operations mounted there has been widely estimated at around $1 billion a week.

Combining these two figures -- the Pentagon's own admitted costs of the war and the generally accepted cost of occupation operations, the costofwar.com Web site has estimated the cost of the war for the fiscal year after it took place at $76 billion.

Costofwar.com also notes interest rates on the $1-billion-a-week occupation costs will make them $1.5 billion a week, or $78 billion per year.

And even that figure may prove optimistic, as it assumes larger numbers of U.S. troops will not be required and the current levels of violence against U.S. forces will not escalate either.

The federal budget deficit for the coming year has been projected by the Bush administration's own Office for the Management of the Budget at $455 billion: the largest in history.

That means the Iraq war and its consequences alone will comprise 15.5 percent of the annual federal deficit at a time when it is larger, and rising faster, than ever before.

Far from being a windfall to the U.S. economy, the Iraq war has already proven itself to be a ball and chain around the economy's neck.

What happened to the vast oil production bonanza that was going to flow from Iraq?

It hasn't happened and quite possibly never will.

No one doubts the oil is there.

But what the war planners and energy strategists never factored into their considerations was that, far from welcoming the U.S. Army and Marines as their liberators, the Iraqis -- Sunni and Shiite alike -- might resent any continued U.S. military occupation and very quickly make it too hot to handle, which is exactly what has happened.

The Pentagon hawks and their favorite energy strategists also turned out to have no strategy for rebuilding Iraq or maintaining security in the oil fields and pipelines running from them.

First, they assumed an almost bloodless march to Baghdad instead of three weeks of high-speed and utterly successful, but still heavy, fighting. Collateral damage to oil facilities was considerably greater than anticipated.

Second, and far more important, the grand strategy, insofar as there was one, anticipated an orderly takeover of occupation duties by an undersized U.S. military force that could rapidly be half evacuated.

This plan ignored the warnings of Army Chief of Staff Gen. Eric Shinseki that hundreds of thousands of U.S. troops would be needed to ensure security in Iraq, including the security necessary to rebuild and operate the country's oil industry.

Deputy Defense Secretary Paul Wolfowitz even hung Shinseki out to dry publicly for making this estimate.

But since then he has had to swallow crow.

Wolfowitz and even his gung-ho boss, Defense Secretary Donald Rumsfeld, have been forced to acknowledge that at least 200,000 U.S. troops, or more than a quarter of the standing strength of the U.S. Army, will be needed to occupy Iraq for the foreseeable future. And that kind of presence costs money: currently $1 billion a week.

So far, no significant amounts of Iraqi oil have been produced for world markets since the war ended.

Therefore Iraqi oil exports, which were running at 2.6 million to 2.8 million barrels per day before the war began in March, have now further dropped.

The complete failure of two successive U.S. administrators in Baghdad to restore security, order and basic services to Iraq is a major reason why this has not happened.

The administration, indeed, has been unable to even recruit any significant number of volunteers from conservative think tanks or the federal government to volunteer to work in Iraq for the next year or two, so the occupation administration there remains seriously undermanned.

But there is a second reason that is in large part a consequence of the first -- U.S. planners never anticipated the rapid emergence of nationwide guerrilla war against the U.S. occupation, which is already costing up to one U.S. soldier killed per day.

And as part of this guerrilla war, sabotage operations against oil pipelines are already widespread.

Even with 150,000 U.S. troops in Iraq, they are spread far too thinly to aggressively fight the guerrilla war, lock down Iraq's borders with Iran and Syria and protect the oil facilities and pipelines at the same time.

Furthermore, the troops currently deployed are not trained in police tactics.

Pentagon officers speaking on condition of anonymity to United Press International have said at least twice the current manpower -- 300,000 U.S. or allied troops -- may be necessary to do this.

In the meantime, the supposed "macro-economic" benefit of "liberating" Iraqi oil for the world market not only has not happened, precisely the opposite has occurred.

Iraq is now in far-worse position to export either crude or refined oil to the world markets.

As a result, the continuing effect of the war has been to strengthen the market position of the three leading global producers, Saudi Arabia, Russia and Iran, while keeping global energy prices relatively high and thereby adding a further burden to the U.S. annual balance of trade deficit, already by far the largest of any country in world history.

And even if Iraqi oil finally starts to flow under optimum conditions, the total amount of revenue realistically projected from it would do no more than balance the already horrendous costs of the U.S. occupation.

John Cassidy made the relevant calculations in the July 14 issue of The New Yorker.

He wrote:

"Assuming that oil prices hover around twenty-five dollars a barrel, which is in the middle of OPEC's target range (twenty-two to twenty-eight dollars a barrel), a resurgent Iraqi oil industry producing six million barrels of oil a day for export would generate about fifty-five billion dollars a year in revenues."

But the cost to the United States of occupying Iraq is already running at between $52 billion to $78 billion a year on the U.S. government's own projections.

Analysis: Soaring costs of 'rescuing' Iraq

By Martin Sieff
UPI Senior News Analyst

WASHINGTON, July 31 (UPI) --

The liberation of Iraq was to have been the war that paid for itself in spades, and gave U.S. corporations the inside track on the greatest energy bonanza of the 21st century.

Instead, it has become a fiscal nightmare, a monetary Vietnam that already accounts for around 15 percent of the U.S. annual budget deficit, a figure likely to only grow remorselessly into the unforeseeable future.

The unforeseen cost of the war is already attracting powerful and influential critics, most worryingly to U.S. President George W. Bush, from within the GOP itself.

On July 26, Republican Sen. Richard Lugar of Indiana, chairman of the Senate Foreign Relations Committee, told National Public Radio that rebuilding Iraq is certain to cost U.S. taxpayers tens of billions of dollars over the next few years.

He estimated the rebuilding costs alone at $30 billion.

"But they do not wish to discuss that," he said.

Pentagon goes to Congress as war costs mount

By Peter Spiegel, Defence Correspondent, in London

When Lawrence Lindsey, then the White House's chief economic adviser, said in a published interview almost a year ago that he believed that the war in Iraq could cost anywhere from $100bn to $200bn, he was quickly admonished by his colleagues in the Bush administration.

Mitch Daniels, then the budget director, just two days later called Mr Lindsey's estimate "likely very, very high", and subsequently said the war would probably cost between $50bn and $60bn.

Just two months after Mr Lindsey made his remarks he was out of a job, with White House officials speculating that his war estimate was a big reason why he had been replaced.

As the 2003 fiscal year approaches its end, however, Mr Lindsey's prediction is looking more and more prescient.

After securing a $79bn appropriation in April to fund both the military and reconstruction efforts in Iraq for this year, the Pentagon acknowledged this week that it would have to come back to Congress again for another round of Iraq-related spending, although officials furiously refused to estimate how much they might need.

But people who have been briefed on the Pentagon's budgeting process said that the Defense Department is burning through its funds so quickly - $3.9bn per month - that it will need a new supplemental appropriation as early as January. Indeed, in an interview with the Financial Times this week, Dov Zackheim, the Pentagon's comptroller, said the US military was expected to have spent $58bn of the $62bn it received in the April spending bill by the end of the year.

With such funds running short, experts who have studied Pentagon spending patterns believe that during the next round of budget requests the Bush administration could be asking for as much as they did just four months ago.

From The Berkshire Eagle, 8/1/03:
http://www.berkshireeagle.com/Stories/0,1413,101%7E6267%7E1545833,00.html

Where's Osama, where are the jobs?

President Bush, dragged out to the Rose Garden by his handlers for one of his rare news conferences Wednesday, dodged and weaved, rambled and obfuscated before a press contingent that was not quite as deferential as usual.

One of the few times he showed enthusiasm for the task at hand was when he declared "Just watch" in response to a question as to how he planned to spend $170 million on a primary campaign when he had no opponent.

If the president's enthusiasm for governing equaled his enthusiasm for fund-raising, the country might be in better shape today.

Unfortunately, that is not the case, and the president's failures, domestic and foreign, were cast in sharp relief Wednesday, which is one reason he rarely takes questions from the press.

Concerning the economy, the president described the current recession as "shallow," which may be true if you are not among the growing legion of unemployed, and while he said there were "hopeful signs" about the economy he didn't offer any examples of them.

Signs aside, here are some facts.

Since Mr. Bush took over from President Clinton, the nation's unemployment rate has risen from 4.1 percent to 6.4 percent and a budget surplus has been replaced by the largest budget deficit in the nation's history.

There are no signs to indicate the economic situation will improve soon.

On foreign affairs, the president returned often to the hunt for Saddam Hussein, whose capture or killing is of dubious relevance outside of its public relations value to the White House.

Of greater relevance are the questions of when will American troops, reduced to sitting duck status in Iraq, be joined by foreign forces and how can a nation so deeply in debt continue to bear the cost of its military occupation of Iraq?

Hemming and hawing passed for answers to these questions.

While we heard plenty about Saddam Hussein Wednesday we did not hear much about Osama bin Laden who, after all, is the man who ordered airplanes to be flown into the World Trade Center, not Mr. Hussein, who is or was a threat exclusively to Iraqis.

It is apparent that the administration has no clue as to the whereabouts of Mr. bin Laden and no idea how to predict or prevent al-Qaida's next attack, which is the reason the White House builds up Mr. Hussein as a bogeyman for Mr. bin Laden and substitutes the squashing of Iraq for the unsuccessful destruction of al-Qaida.

Now, with the trying business of talking to journalists, and by extension Americans, behind him for at least several more months, President Bush can return to what he does best and enjoys most -- raising funds from fat cats.

Just watch.

Green Bay workers gather to protest tax cuts

Demonstrators gather near Conger Industries to protest President Bush's economic policy.

They say the cuts aren't going to create new jobs
By Jessica La Plante
News-Chronicle
A bouquet of signs and chorus of protests greeted a busload of Cabinet officials who pulled into the parking lot of Conger Industries on Tuesday to promote the president's new 2003 Jobs and Growth Act.

A group of several dozen workers, union officials and students picketed in a parking lot near Conger to protest growth in the nation's unemployment rate.

Unlike most labor-related pickets, the messages displayed across the sea of brightly colored signs weren't directed at the usual corporate CEOs or vice presidents. The management decisions these picketers were protesting were none other than the fiscal policies of the United States government.

The list of policymakers on board included Treasury Secretary John Snow, Commerce Secretary Don Evans and Labor Secretary Elaine L. Chao. The trio stopped at the Green Bay company as part of a two-day public-relations campaign through the Midwest.

During the campaign, the officials are explaining how the president's new plan uses tax cuts as a tool for economic growth. The goal of the Jobs and Growth Act is to create 1.4 million new jobs by the end of 2004 by giving American business owners and families tax breaks that can be reinvested into the U.S. economy. The plan includes tax deductions of up to $100,000 for companies that purchase new equipment.

However, many local workers are skeptical the tax cuts will spark an economic renaissance and cure Green Bay's 4.6 percent unemployment rate.

Larry Marx, co-director of Wisconsin Citizen Action - the group that organized the Tuesday picket - said the WCA has planned its own statewide tour to educate the public about Bush's policy. The busload of activists will follow the secretaries on their tour to remind the officials of the economic hardships working families have suffered.

Standing in a parking lot near Cormier Road, a group of local activists, including 13 Green Bay residents, waited to board a bus sporting the sign, "Read Bush's Lips ... No New Jobs."

David Newman, WCA staff director, said the traveling protesters represent a cross section of Wisconsin residents who attribute their loss of work and financial security to the Bush administration's economic plan.

"They're college graduates who can't find a decent job to farmers who are taking second jobs just to make ends meet," Newman said. "We (also) have a number of struggling single parents who do not qualify for the child tax credit and are pretty upset."

Mary Goulding, president of the Greater Green Bay Labor Council, spoke out at the rally against Bush's legislation. She said the tax cuts won't make the financial burdens of working families any lighter.

"I would like to question a $400 rebate for a family who has one child ... how is that going to create a job?" Goulding said. "Look at how much CEOs or presidents get (under) these tax cuts; what kind of jobs have they created?"

Goulding said she feels workers' rights have taken a back seat under Bush's leadership. She said the bus tour is proof of that.

"I'm a public employee, and when we try to go and organize, they say the union is bad," Goudling said. "With the budget cuts that are affecting all of Wisconsin and the other 49 states, they're putting pressures on unions like they did in the 1930s ... It's going backwards and we need to go forward in this country."

Richard Salmon, a retired disabled worker from Bellevue, said he came to the rally because he fears for his family's job security.

"My son-in-law works at (a manufacturing) plant here and they're threatening the workers there with moving their plant to Brazil," Salmon said. "These are good union-paid jobs ... you can't find those jobs anymore and that's the reason I'm here."

Salmon said he fears any new jobs created by the tax cuts will be located in foreign countries, where workers demand cheaper wages.

More than calling Bush's new plan ineffective, some Green Bay leaders said they felt the tax cuts would actually harm the U.S. economy by contributing to the national debt.

"It's been three years and (Bush) has taken a huge surplus and turned it into the largest deficit in American history," said Rabbi Sidney Vineburg. "We have a president and administration that is cut off from what real people are going through and how it feels to have people lose their jobs.

"We've got to have someone in that office who's going to work for the betterment of the common people and not the corporate people."

The protesters weren't the only sight to greet the Cabinet tour on Tuesday. A small crowd of a half-dozen women and children gathered along Cormier Road, waving Bush-Cheney signs to greet the policy makers with a show of support.

Barbara Tuttle, the owner of a Green Bay advertising agency, said she believes the tax cuts will help get the nation's economy back on track after the 9-11 terrorist attack derailed consumer spending.

"I think we're going to see things move forward," Tuttle said.

It's certainly possible, but in this day and age, I could see prospective amateur one complaining that the custom test was too easy or too hard, or complaining that he or she wanted to take the test from a CD instead of a real person, or some other such.

Almost all of us can handle the standard test methods.

The rest can be accomodated for.

Over the course of my testing, I took tests at 4 different places: Williamsport PA, Butler PA, State College PA, and Lock Haven PA. ALL the VE teams were extremely helpful and accomodating. Those who knew of my hearing problem when I took Element 1 (twice, cuz I flunked the first time) were just great. The first time I took the test, they were more bothered by my failing it than I was, and the second time, I spoke to one of the VE's beforehand, and he outlined the different methods I might use, and explained the lengths they were capable of going to to accomodate my needs.

I just want to point this out, because the tone of you letter sounds like you think that VE's are some sort of ossified "my way or the highway" people. They aren't.

Give me a call at 705-313-1518 or come on by

220 Paudash Road
Hiawatha, Ontario, Canada

I've got a load of ham radio gear that will go the dump very soon.
Some old, but most of it is new stuff that I have "accumulated" over
the past 3 or 4 years. I'm moving very soon and need to get rid of
it.

Dave Munroe

Not sure if a "code key/Oscillator" applies here, but if a person needs to
have special testing done, the rules I"ve seen written state that the
examinee is the one who must furnaish the equipment to the VEs in which to
use to accomidate that persons handicap. Perhaps the VEs didn't have one.
Not every one does.

I can say this.. I HAVE seen some VEs who were real bastards. Not wanting to help anyone. But I've seen those too, who helped all as much as they could. However, my former comment still stands, according to the rules I've read, if an applicant is handicapped and requires special equipment to use in testing, it is THEIR responsibility to provide it for the VEs to use. It is NOT the VEs place to provide it. There is a comment though I'd like to make about the My way or the Highway when it comes to testing. It is "supposed" to be required of the VEs to afford the candidates the best possible conditions in which to examine. IF someone in the waiting or even an applicant his/herself starts making it miserable for the others OR even before hand if the applicant fails to provide all required documentation, the VEs have a right to evict them from the area. You made an initial claim. He asked you a valid question about that claim and you countered by ridiculing him which is typical of most of your
responses. Can you or can't you answer his question and provide sources for your claim that Palast is lying? Simple question. Can you answer it or
not? Thank you.

You are proposing that Boyd's race means he would stand up for
disenfranchised voters in Florida? A specious argument. And further,
you assert Boyd's "findings" include direct evidence that Palast is
lying? Where are your sources?

What a rhetorical jerk you are, Mister Pineapple. Typical of many on the I-know-best-for-you right, your ability to bluster with words is more important than any underlying facts. You set up your own straw dogs and then focus the attention there, rather than on anything I actually said or quoted. I did not cook anything and never said I did. I was correcting my own typo. And how could I "refuse" to cite sources when they were not requested. It was you I asked for a reference . . .

And as for my references, I assumed, based on your own noise, that you were the Google-mister. Here is my reference:

http://www.progressive.org/Media%20Project%202/mpbj1102.html

Here's another exact quote from the article:

"The purging of eligible voters seems to be where most of the fraud took place in Florida. For example, in an in-depth study by the Palm Beach Post, at least 1,100 eligible voters, incorrectly listed as felons, were prevented from casting their ballot. However, 1,100 votes seems trivial compared to findings of a recently released book."

What about your reference, where Ralph E. Boyd "proves" that Greg Palast lied?

This, of course, is the Pineapple King arguing with his own fantasies.
I am, indeed, deeply concerned for Pineapple's mental well-being. If
his delusions come from an external source, such as reading Ann
Coulter, then there is hope. If, however, and this is my real
concern, he is able to find "admissions" and "fears" in my writing,
then there is twisted torment in that poor soul, and he may be beyond
help.

My detailed reply is posted following his earlier playtime, where he
posed a personal attack of his fantasy of me, rather than the
substance of what I said.

Library thwarts Patriot Act snooping

Boulder patrons' records purged

By Marcos Mocine-McQueen, Denver Post Staff Writer

BOULDER -

Librarians across the country have raised their voices in objection to the USA Patriot Act - and those in Boulder may have found an end-run around the law.

The law allows federal investigators to gain access to records from businesses, including libraries, while conducting investigations.

If a federal agent asks a Boulder librarian for a list of all the books checked out by John Q. Public in the last month, the answer will be "Records? What records?"

"People have a right to read what they want to read without other people looking over their shoulder," said Priscilla Hudson, manager of the Boulder Public Library's main branch.

The library has decided to almost completely stop recording what books patrons have checked out.

The library will keep tabs only while a book is checked out; when the book is returned, that record will be purged from the library's computers.

While officials for other library systems in Colorado say they examined the law, and do purge their records, Boulder's decision to delete records solely to keep them out of investigators' hands is unusual.

The library backs up all of its checkout data in case the main computer system should fail.

Before the decision was made to delete the information after books are returned, all files would be kept for weeks or even months.

Under the Patriot Act, libraries would have to make those records available to federal agents.

That possibility, Hudson said, troubled librarians and forced them to examine record keeping.

They found it could be tightened.

"We really don't want this information," Hudson said.

"It's of no use to us. We really could clean this up faster."

So now, the records are deleted several days each week.

Deleting those files has become a regularly scheduled duty, instead of an afterthought.

"I don't think it concerns anybody what books I check out," said Maria Taylor as she left the Boulder Public Library with books in arm.

"I appreciate what the library is doing."

The federal law has prompted libraries across the country to examine their record-keeping habits.

"It's something we're all talking about," Hudson said.

"We're looking at every record we keep and asking, 'What's the purpose of this? Do we need it?"'

The Denver Public Library has not changed its procedures but is looking at what steps, if any, it should take to protect patrons' privacy and still comply with the law.

In Santa Cruz, Calif., librarians were troubled not only by the obligation to turn over information but by the fact that the law prohibits librarians from telling patrons that their records have been turned over.

The library has posted signs at checkout desks that read:

"Although the Santa Cruz Library makes every effort to protect your privacy, under the federal USA Patriot Act, records of the books and other materials you borrow from this library may be obtained by federal agents. That federal law prohibits library workers from informing you if federal agents have obtained records about you. Questions about policy should be directed to: Attorney General John Ashcroft ..."

The Santa Cruz Public Library now shreds its records each day.

So do libraries in Berkeley, Calif., and Arlington Heights, Ill.

Agents wishing to get library records under the act go to the secretive court that administers the Federal Intelligence Surveillance Act.

But they can't get records that don't exist, as library officials point out.

"There are a lot of areas of the Patriot Act that no one's doing anything about," said Carl Rose, a Boulder Public Library patron.

"I think what the library is doing is one of the greatest things anyone's done in a long time."

In 2000, before the Patriot Act, the North Metro Drug Task Force sought records from the Tattered Cover bookstore to see what books a man accused of manufacturing methamphetamine had purchased.

The Tattered Cover took the case to the Colorado Supreme Court to battle a judge's order that it turn over the records, and was successful.

The Patriot Act may provide a little extra motivation for those who don't return their library books on time.

The Boulder Public Library will continue to keep records of late fees.

The records are needed in case disputes arise about whether or not such fees have been paid, Hudson said.

Bush Prefers Program to Weapons

By Pascal Riche
La Liberation

Friday 01 August 2003

Not finding an arsenal, the researchers now want to prove that Saddam was trying to constitute one.

Washington correspondence

The order has been given to the whole Bush administration: from now on, one must no longer speak of "Saddam Hussein's weapons of mass destruction", but simply of his "program".

During his Wednesday press conference, President George Bush used the new expression three times.

This semantic shift is not innocent: it's easier to discover a program than an arsenal.

Yesterday, David Kay, the American inspector charged by the CIA with leading the search for Iraqi weapons, was heard in closed session by two Senate Committees (Armed Services and Intelligence).

He was accompanied by General Keith Dayton, Director of the Pentagon's Intelligence Services, who co-directs the searches.

The 1,500 researchers working under their command have not, up till now, found the least trace of forbidden weapons, in spite of the numerous interviews they've had with Iraqi scientists.

On the other hand, Kay has brought together kilometers of documents, which, according to the Bush administration, clearly bring the existence to light of an "active" weapons program.

During a press conference, David Kay took stock of the "important progress" that he was making every day, mentioning the discovery of new "sensitive sites", the existence of which had been hidden from UN inspectors, and of illuminating testimony from scientists "whose cooperation keeps growing."

The Democratic opposition was not fooled.

The semantic displacement of arsenal to program represents "a clear defeat for the White House", reckons Democratic Senator Jay Rockefeller (West Virginia).

According to him, this is still very far from the "imminent threat" put forward by the government at the beginning of the year.

For the moment, Americans are divided. In an NBC-Wall Street Journal poll, 48 % of respondents thought that Bush had given overall fair information about the reality of the Iraqi threat, against 47 % who felt he had obscured the case.

Analysis: Bush's Iraq war

By Nicholas M. Horrock
UPI Chief White House Correspondent

WASHINGTON, Aug. 1 (UPI) --

Up through May 1, the Iraq war for President George W. Bush was going nearly perfectly.

Certainly as he pointed out to reporters in the White House Rose Garden Wednesday, the sandstorms and delay in the first week the United States drove into Iraq had been troubling.

But when Saddam Hussein's giant statue tumbled in the center of Baghdad on April 9, both Bush and the world felt the United States had triumphed.

A little more than a month later, danger signs of chaos and difficulty were clear at the White House, yet the plan to fly out to the USS Abraham Lincoln was already laid on and Bush went ahead with it, landing on the deck wearing a flight suit and declaring the major fighting in Iraq over.

The world read that as the "war is won!"

But now, as Bush heads to his ranch in Crawford, Texas, the war against Iraq cannot be said to be over and nor really even won.

The Iraq war has changed context for Bush, moving from a foreign policy decision, to a domestic issue; from a foreign adventure to one of two main issues that could control his re-election.

The wounding and killing of American soldiers is a major part of this problem.

Since Bush declared the major fighting over on May 1, 108 U.S. soldiers have died in action or accidents.

The deaths are neither glamorous nor sensible.

A rocket-propelled grenade, a shot in the dark, a land mine triggered under a moving truck.

The U.S. command correctly points out that the bulk of the attacks have come in the Sunni Muslim "triangle" of cities and towns stretching north and west from Baghdad to Tikrit, Saddam's birthplace.

But there have been other attacks, northeast of Baghdad and, in earlier weeks, south into the Shiite areas.

The first direct lesson for Bush was one learned by Presidents Lyndon Johnson and Ronald Reagan: technological Western military power can defeat technological Western military power, but it remains vulnerable to an individual with a weapon.

Take Thursday's deaths in Baghdad.

One soldier died and three were wounded when the armored-personnel carrier they were riding in struck an explosive device on the road between Baghdad and its international airport, despite the fact this road has been the scene for dozens of previous attacks.

That was in mid-day.

At 11:45 that same evening, nearly a hundred miles away, an American soldier was killed and two wounded in an attack on a military outpost.

Four attackers, news accounts reported, were wounded and captured.

There are about 25 million Iraqis, some 40 percent are Sunnis or about 10 million people who might approve of that attack and a lot of others who don't care.

Beyond the deaths, being all the more worrisome and painful for Americans coming as a surprise is the nature of the U.S. troops.

In the aftermath of the Vietnam War, Johnson was criticized for not calling up the National Guard and relying upon the draft to supply troops.

He had foresworn the Guard because it was a major domestic political entity.

Bush has no freedom to make such a choice.

A large part of the U.S. military's operations are now carried out by reserve units and Guard outfits.

In order to smooth out the occupation of Iraq over what he has now convinced could be as long as a year, the administration has notified 20,000 National Guardsman they may be called up.

A goodly number of the combat deaths in recent weeks have been of reservists serving in Iraq on short-term assignments.

From the day that Baghdad was entered by the U.S. Marines last April, it has become increasingly clear the United States had no adequate plans for the post war.

The first American assigned there to direct, Jay Garner, was replaced by L. Paul Bremer, a 60-year-old former ambassador, who faultlessly wears a business suit in the heat of Baghdad.

He came to Washington late last month to brief Bush on his plans.

The goals -- free elections, choosing a new government and U.S. withdrawal -- remained the targets, but the timetable has slipped if there ever was one.

Bremer said this week that elections might be held in the fall of 2004.

But other things must come first: water, telephone service, full electrical power, jobs and transportation.

Along with delays and dangers, the U.S. forces have been unable to find evidence of a weapons of mass destruction program with anything like the scope and immediacy that Bush sketched in the weeks before the war.

The United States began, as soon as the first troops went into the country, sending along biological, chemical and nuclear weapons units to search for the equipment.

They came up dry.

Delta Force units were also sent out and found nothing.

Bush has remained sort of cheerfully confident, meeting this week with David Kay, a former U.N. weapons inspector who then went to Capitol Hill and gave an encouraging report to Congress.

But there are holes in this donut: the British said Saddam could launch a chemical attack in 45 minutes and it issued a report about African uranium which ended up in Bush's State of the Union Address.

Not only are American congressional committees looking into the derivation of these reports, but a British commission studying the death of a man accused of leaking government information may get into it.

When Bush finishes his August vacation, he will have 14 months to re-election.

Analysis: Soaring costs of 'rescuing' Iraq

By Martin Sieff
UPI Senior News Analyst

WASHINGTON --

The liberation of Iraq was to have been the war that paid for itself in spades, and gave U.S. corporations the inside track on the greatest energy bonanza of the 21st century.

Instead, it has become a fiscal nightmare, a monetary Vietnam that already accounts for around 15 percent of the U.S. annual budget deficit, a figure likely to only grow remorselessly into the unforeseeable future.

The unforeseen cost of the war is already attracting powerful and influential critics, most worryingly to U.S. President George W. Bush, from within the GOP itself.

On July 26, Republican Sen. Richard Lugar of Indiana, chairman of the Senate Foreign Relations Committee, told National Public Radio that rebuilding Iraq is certain to cost U.S. taxpayers tens of billions of dollars over the next few years.

He estimated the rebuilding costs alone at $30 billion.

"But they do not wish to discuss that," he said.

http://talkingpointsmemo.com/july0304.html#072803228pm

7/28/03

By Josh Marshall

The trio of quotations listed below called attention to the growing popularity of what conservatives are now calling the "flypaper" theory of our presence in Iraq.

The thinking goes something like this.

These guerilla engagements we're seeing in Iraq may not be such a bad thing.

What we're doing is attracting all the terrorists to Iraq (i.e., like "flypaper") so that

a) they won't be attacking us in America and

b) we can fight them there on our own terms.

As Andrew Sullivan put it early this month, "Continued conflict in Iraq, in other words, needn't always be bad news.It may be a sign that we are drawing the terrorists out of the woodwork and tackling them in the open."

Now I can imagine a number of problems with this approach -- moral, tactical and strategic.

But isn't the main fallacy that there isn't some finite number of "terrorists" out there whom we can draw to one place, kill or arrest, and then be done with it?

I mean, let's be honest:

Is there really any shortage of these dudes?

Are they gonna run out?

Do you remember Afghanistan?

Not this 'Afghanistan', but the last 'Afghanistan.'

The US-Pakistan-backed jihad against the Soviets made Afghanistan into a sort of jihad Club-Med where young Saudis could go for a few weeks or months of firing guns and fighting for God.

(Of course, some stayed on rather longer.)

The idea is supposed to be to drain the swamp, not create a new swamp and spend all your time swatting all the mosquitoes that come to hang out and breed.

As a reader (Tom R.) wrote last night in an email to TPM, the "flypaper" theory makes about as much sense as a public health director saying "By creating a dirty hospital, we're going to create a place where we can fight the germs on our terms."

But doing it as the Bush administration now intends is something like going outside and giving a few good whacks to a hornets' nest because you want to get them out in the open and have it out with them once and for all.

"Practice to Deceive"
Joshua Micah Marshall
Washington Monthly
April 2003

Being based in Iraq helps us not only because of actual bases; but because the American presence there diverts terrorist attention away from elsewhere. By confronting them directly in Iraq, we get to engage them in a military setting that plays to our strengths rather than to theirs'. Continued conflict in Iraq, in other words, needn't always be bad news. It may be a sign that we are drawing the terrorists out of the woodwork and tackling them in the open.

"Bring Them On"
Andrew Sullivan
andrewsullivan.com
July 3rd, 2003

Separately, Gen. Ricardo S. Sanchez, commander of coalition ground forces, told CNN that "we still have a long way to go" before eliminating resistance.

Iraq had become "a terrorist magnet," drawing some anti-American extremists from abroad to "a target of opportunity."

"But this," General Sanchez added, "is exactly where we want to fight them."

From The BBC, 8/2/03:
http://news.bbc.co.uk/2/hi/uk_news/politics/3118625.stm

MoD denies trying to burn Kelly plan

The Ministry of Defence has denied newspaper suggestions that it sought to destroy a document relating to Dr David Kelly.

According to the Daily Telegraph, officials were preparing to incinerate a "media plan" about the government weapons expert when they were stopped by security guards.

It is alleged that three days after Dr Kelly was found dead, the document was placed in a sack of material due to be burnt.

The guards became aware of this and alerted the police.

On Saturday, MoD sources conceded to the BBC there had been a "security breach" on 20 July when a bag of confidential material due for incineration was left out overnight.

However the sources said they were not aware that any of the material in the bag, which was taken away by Thames Valley Police, related to Dr Kelly.

Blair evidence

The BBC's political correspondent Norman Smith said it seemed unavoidable that Lord Hutton, who is carrying out an inquiry into Dr Kelly's death, would want to know if the police still have the bag and if so whether it does contain any relevant material.

He said the allegation raises the spectre of a potential cover-up by government officials whose evidence is likely to form a key part of the inquiry.

Lord Hutton opened the inquiry on Friday, setting out its parameters and indicating that he would call the prime minister, Defence Secretary Geoff Hoon and BBC journalist Andrew Gilligan to give evidence.

Other witnesses would include Dr Kelly's widow, Janice, MoD officials, the BBC Chairman Gavyn Davies and the chair of the Foreign Affairs Select Committee, Donald Anderson.

The inquiry has been adjourned until 11 August, to avoid clashing with the scientist's funeral next Wednesday.

Dr Kelly was found dead in woods near his Oxfordshire home on 18 July, having apparently committed suicide by slitting his wrist.

Three days earlier, he had given evidence to the Foreign Affairs Select Committee after being named as the source for a BBC report that a government dossier on Iraq's weapons of mass destruction had been "sexed up".

by Greg Palast

Well, well, well. President George was in one hell of bind this week when it turned that that Saudi Arabia funded Al Qaeda, not Iraq.

Realizing we'd invaded the wrong country, Bush did the honorable thing: he's come out against gay marriages.

This caused some real confusion in my staff where a gay member of our investigations team announced he was changing his allegiance from Howard Dean to George Bush.

"Bush Saves Gays from Marriage! Bush Saves Gays!" he rushed around the office beaming.

"Gay people exempt from going to in-laws for Thanksgiving dinner! Gay-mericans exempt from PTA meetings and hiring divorce lawyers!"

But then I had to bring him down to earth.

('Had to' because, while Bush announced last month that our conquest of Iraq had made 'the world a safer place', our President mentioned THIS week there's now a 'real threat' of new Al Qaeda hijackings. So America is safer? As long as one stays indoors.)

But here's the real kick in the head.

Turns out that unlike the 18 minutes missing from the Nixon tape, the 28 pages missing from Congress' publicly released report on the September 11 attack has been found.

And it turns out to be a summary of Saudi Arabia's financing of terrorist fronts including the 'charities' supporting Al Qaeda.

And now, the New York Times tells us, the US Senate has been embarrassed into holding hearings on those Saudi charity fronts including one named WAMY.

Of course, this is ancient news to those who watched my report on WAMY and Saudi funding of terror -- broadcast on BBC's evening news on November 9, 2001.

(In the USA, that report earned me the title of 'conspiracy nut.' In America, a 'conspiracy nut' is defined as a journalist who reports the news two years before the New York Times.)

And here's the ugly little punchline to the story you WON'T read in the Times.

Why has the Bush Administration covered up for WAMY and the Saudi's other blood-soaked 'charity' operations?

For the answer, let me take you back to Midland, Texas, 1986.

A young old man, George W. Bush, seems to have trouble finding oil.

But he strikes it rich when his flailing drilling partnership is bought out by Harken Oil.

Despite the addition of the business acumen of Bush Jr., Harken faces collapse; but is pulled from the brink by a cash infusion from a Saudi, Sheik Bakhsh.

The money from Arabia has nothing to do, we must assume, with Dubya's daddy at the time holding the post of Vice-President of the Free World.

The Bakhsh booty continued a pattern of the young Bush being saved from his dire business decisions by a line of Sheik angels.

His first oil company, Arbusto, going bust-o, was aided by the American financial representative of the bin Ladin family.

And on BBC TV last month, I reported this: following the bombing of our embassies, the Clinton Administration sent two delegations to Saudi Arabia to tell their royal highnesses to stop giving money to the guys who are killing us.

But Mr. Bush, once in office, put the kibosh on unfriendly words to the Saudis.

Furthermore, in the summer of 2001, Mr. Bush disbanded the US intelligence unit tracking funding of Al Qaeda.

What is it our G-men were uncovering?

According to two separate sources speaking to BBC, the funders of Al Qaeda fronts include those who have previously funded Bush family business and political ventures.

Now that's a wee bit embarrassing.

Something you wouldn't want in a congressional report.

Something you may not want the FBI to dwell on.

(And you can unlock the womens and children: the BBC reports will NOT be broadcast on US television.)

And there's this: a document marked "Secret" and "199I" (meaning 'national security') which found its way out of the offices of the FBI in into the office of our BBC/Guardian newspaper team.

It indicates (and whistleblowers confirmed) that, prior to the September 11 attack, the Bush Administration held back agents of the FBI from tracking two members of the bin Laden family.

According to the buried FBI report, the bin Laden lads were operating in the USA for "a suspected terrorist organization", WAMY.

But we mustn't ask too many questions of the Bush Administration's blindfolding the FBI, nor, Heaven forbid, discomfit the Saudis over their contributions to Terror-R-Us.

After all, in BushWorld, Saudi Arabia and America have shared values: we want our boys to kill, not to kiss.

Bush 'Fit For Duty'

(CBS/AP)

President Bush had his annual medical checkup Saturday before getting
a start on his month-long vacation at his Texas ranch.

The president spent about 3ï¿½ hours at the National Naval Medical
Center for the physical exam, his third as president.

Afterwards, according to CBS News Correspondent Mark Knoller, doctors
said the president is in "excellent health" and "fit for duty."

Courageous librarians, protecting America's libraries from the scourge of the Bush administration. I wonder though, if Bill Clinton was still president, would the librarians still have the balls to resist the administration if the same demands were made of them? Likely not! Just as those people who so vociferously demand equal rights for women were willing to look the other way when it came to Bill Boy's antics, the same must be construed about the latest inane gesture from the liberal world.

Liberal librarians, certainly not you say. But I say otherwise. Librarians have consistently endeavored to assure children the right to access pornography on library computers, it's a First Amendment issue you see. Problem is that these same librarians feel free to violate the First Amendment when it comes to religious matters, you see they need to enforce the non-existent separation of church and state, on a mini scale, mind you.

Porno is good, religion is bad. Great people.

http://www.registerguard.com/news/20020127/1a.citysurfing.0127.html

http://www.lifesite.net/interim/2002/feb/11novascotia.html

"After careful consideration of the material you donated, we have decided that they are specialized materials and therefore not suited to our collection. This material would be more appropriate for a church library, spiritual centre or other specialized collection."

You see, religion is a specialized collection, pornography is for all.

Porno is good, religion is bad. Librarians are assholes.

Janeane Garofalo, the comedian, not a librarian, vehemently condemned Bush bringing us into war with Iraq, this is laudable, I'm finally on a liberal's side, (not). My reverie broke when Jeanane went on to explain that though Clinton's involvement in Bosnia et al. was equally unjust, it wasn't "hip" to protest Bill. This is the liberal mindset.

http://www.newsmax.com/showinsidecover.shtml?a=2003/2/23/151110

Though I no longer support Bush, I feel that he has done too little too late concerning that issues on which he ran and perhaps too much to soon when it comes to policing the rest of the world using our men and women as targets, I am smart enough to see through the criticisms that many of his so called detractors level. They are democrats, liberals, or just debased scum in general (I know, I know, the last two terms are synonymous for debased scum, but I did it for emphasis).

So fuck the librarians and their pious desire to protect their dwindling patron's privacy, if Clinton has asked the same they would have wet their panties complying.

Dave, I've got two things to say:

1: If you are genuinely so stupid as to post your phone number in a
public, uncensored forum that's potentially viewed by millions, then
you deserve every prank phone call, every telemarketer and every
fucker that steals your identity and thrashes your credit rating. I
hope it doesn't happen, but if it does, it's certainly deserved...

2: Why the fuck are you crossposting this to alt.drugs.pot? OK, sure
maybe some older hioppes into ham radio might be interested, but do
you really think that you're going to get a lot of respons, aside from
people like myself pointing out what a FUCKING IDIOT you are?

I turned out great. A couple of extra teeth is all. I even passed my
entrance physical, and served honorably for 20+ years.

Anyway, that's what I like about you; you get all of your exercise
dodging the draft and jumping to conclusions.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL DX Bulletin, K1XN & GoList, N1WON, W2CE, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, K8YSE, CO8TW, DL/VE3ZIK & Contesting.info, DL1EK/DL7VOA & DX Newsletter, F5NQL & UFT, F8BBL, FJ5DX & La Gazette du DX, GM3WOJ, I1JQJ & IK1ADH - 425 DX News, JI6KVR & JA-IOTA Islands News, LA7QI, OM3JW, RW3RN, TA3YJ, UA3SGV and VA3RJ & ICPO for the following DX information.

*** SPECIAL ADVANCE NOTICE FROM THE EDITOR (by KB8NW): There will be "NO BULLETIN" for August 18th and (probably) 25th. Linda and I will be heading south first to Tennesee to drop-off/move my daughter to Middle Tennesee State University (MTSU) and then off to Biloxi, Mississippi. I really need this break to rest up and I hope that lying in the sun on the beach will help bring back some of my strength. However, PLEASE continue to send your DX info to me..... TNXS and GUD DX de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 27th/July, through Sunday, 3rd/August there were 209 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5R, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9V, 9Y, A4, A6, A7, AP, BV, BY, C3, C6, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, ER, ES, ET, EU, EX, EZ, F, FG, FJ, FK, FM, FO, FP, FR, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J3, J5, J6, JA, JD/m, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, T9, TA, TF, TG, TI, TK, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP6, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3XY, GUINEA. Leo, 3XY1L, continues to be active. This past week he was mainly on 15 meters usually between 21280-21285 kHz (sometimes lower around 21208 kHz) as early as 1230z and as late as 1900z. He has also been heard on 7060 kHz after 2100z. QSL via UY5XE.

5H, TANZANIA (Help Needed). Paul/K1XM (5H1F) and Charlotte/KQ1F will be active and will try to have many radio club students at Dar es Salaam Institute of Technology (DIT) join them in this year's CQWW SSB Contest as 5I3A. They will be a Multi-Multi entry. Charlotte and Paul will arrive a few days early, set up stations, and start educating students as they have time. Paul figures they will need to teach a bit of geography, propagation, operating, contest rules, how to use the contesting software, strategy, pile-up handling, phonetics, etc.... They will have three radios with them. They will bring extra headphones and splitters, so they can operate with the students listening and then swap off and have a student operate while they listen. However, Paul is looking for other "stuff" and some ideas. They don't have enough headsets. Does anyone have a Heil headset they are interested in selling? This is a good opportunity to buy a new Proset + and unload your old set. They could also use a stand-alone voice keyer or two. He is also in need of some ideas for antennas. The existing log periodic is a good start, but he needs enough for six bands and three radios. Any aluminum must fit in a 4' golf club carrying case. He thinks they will be using the top of a building. Rotators are probably too heavy. If someone is interested in joining this operation, that is a possibility. The safari opportunities in Tanzania are incredible. Check out the following Web page to see some of the photos Paul and Charlotte took during their 2001 operation. They plan to leave the antennas and enough accessories that the TS-140S can be used as a contest station. Paul states, "There are a group of college students who were enthusiastic enough that they got licenses. They are young and learn fast. If our operation is succesful we hope that the DIT club will continue to operate in contests and the members will be comfortable getting on the air." If you can help Paul out with accessories/antennas, send an E-mail to: youngp@hp.com

5W, SAMOA. By the time you read this, look for operators 9A6XX, M0GMT, K9YO, N1SNB and 9K2RR to be active from now through August 14th. Their callsigns were not yet known as this was being typed. They will have two stations active with activity on 160-6 meters, SSB, CW, RTTY and PSK31. QSL via N1SNB.

7Q, MALAWI. Nick, G4FAL, will be on a family holiday and will be active during short periods as 7Q7NT from Blantyre, August 13-30th. Most of his activity will be mainly on 20 and 15 meters CW/SSB.

8Q, MALDIVES. Uwe, DJ9HX, will be active as 8Q7HX from Lhaviyani Atoll, now through August 16th. Activity will be on 40-10 meters. QSL via his home callsign. E-mail requests for bureau cards are welcome by sending QSO info to: dj9hx@darc.de

BQ9P, PRATAS ISLAND. The Chinese Taipei Amateur Radio League (CTARL) is planning to head back to Pratas Island in coming October. Paul, BV4FH, reports that they need 4 experienced foreign operator for this DXpedition. If anyone is interested, please contact Paul, BV4FH, as soon as possible for more details and freight schedule arrangements for Pratas Island. His E-mail address is: bv4fh@ms2.hinet.net

CO0, CUBA (Special Event). Look for special event station CO0R to be on the air from Santiago de Cuba City, August 9-10th, to celebrate the 150th anniversary of the birth of Cuban national hero Jose Marti. Activity will be on CW, SSB and digital modes (bands of activity were not provided). All QSLs will be sent automtically via bureau.

FG, GUADELOUPE. A group of Spanish operators will be active from here between September 23rd and October 9th. Activity will include an entry in the CQWW RTTY Contest. Before and after the contest, operators will be on SSB/RTTY/PSK31/SSTV. Operators will be EB2DTP, EA2RU and EA2RY. Look for them to sign homecall/FG or FG/homecall. QSL via EA2RY.

IOTA NEWS.....
EU-030. Ric, DL2VFR, will be active as OZ/DL2VFR from Bornholm Island (BO-001 for the Danish Islands Award) between now and August 15th. Activity will be mainly CW on the HF bands with some SSB and 6 meters. QSL via his home callsign, direct or bureau.

EU-123. Derek/GM0HLV and Chris/GM3WOJ will be active as GS2MP/P on Saturday/Sunday, August 16-17th, from the Island of Stroma, off the coast of Orkney (58.7N, 3.1W; IOSA ref. SC02, and Scotia ref. DI34). Operation will be from the Stroma Lighthouse (SCO228) to coincide with the Lighthouses weekend. Activity will be on 80-10 meters SSB/CW, including the WARC bands, with 2 separate stations active. No skeds or lists or "last two" callers please. QSL via N3SL.

EU-166. Operators IK8PGM/9, IT9EJE/P, IT9EJW/P, IT9HLN/P and IW9HDS/P were expected to be active this past weekend from Pietra di Patti (IIA ME-030). However, due to bad weather conditions this operations has been rescheduled for August 9-10th. Operator IW9HDS/P is expected to be on AO-40 and other satellites. The team was also try to activate IT9FCC/P from Scoglio di Patti (EU-166, new one for the Italian Islands Award: ME-038). The Web page for this operation is at:
http://www.printed.it/patti.html
QSLs are via IT9EJW: Alfio Bonanno. P. O. Box 18 - 95028, Valverde (CT), Italy (or via bureau).

JW, SVALBARD. Operators LA7QI and LA8AW will operate from Spitsbergen as JW7QI and JW8AW, respectively, from September 16-22nd. Also, look for them to be in the SAC CW Contest as JW8D. QSLs for JW7QI and JW8D are via LA7QI and JW8AW via LA8AW, bureau or direct. Remember, that SASE requires 2 USD or 1 IRC (new).

JX, JAN MAYEN (Update/Op Cancelled!). Ove, LA2IJ, informs OPDX that he is sorry to announce that his trip to JX-land has been cancelled because of transportation problems. The plane has not been able to land at Jan Mayen airfield the last two weeks due to thick fog. He states, "I did see the island quite well on Thursday, but the plane could not come down... It is almost sure that I will not go to JX this year, but hope to be able to go next year." Ove also states that there are only eight (8) flights going to Jan Mayen during one year. His possible next trip will be announced when plans are final. Ove's visit to JX is not a DXpedition; he has work to do and only operates ham radio in his spare time.

KG4, GUANTANAMO BAY. Cory/N1WON and David/WA4ET will be active as KG4CM and KG4DP, respectively, from Guantanamo Bay, Cuba (NA-015), from August 14-21st. Activity will be 80-6 meters, SSB, RTTY and PSK. Please QSL KG4CM to N5FTR and KG4DP to WA4ET. Reminder: Please do not send cards for this event to the bureau. There is no KG4 bureau for Guantanamo Bay. Please QSL as directed to receive QSL cards.

KH9, WAKE ISLAND. Jake, N6XIV/KH9, was quite active this past weekend on 40 meters. He used several frequencies (7085, 7227-28, 7231 and 7243 kHz) between 7000-0845z. QSL via K2FF.

LIGHTHOUSE ACTIVITY.....
Operators from Gainesville, FL, area ham clubs and the University of Florida will activate the Cedar Key Lighthouse (WLH# 2741, USA #745) on Seahorse Key (IOTA NA-076) in Levy County using the call W4L during the International Lighthouse/Lightship weekend, August 16-17th. There will be SSB/CW activity mainly on the HF bands with a possibility of some 6 meters. This is only the second time that a radio operation has been allowed from the Cedar Key lighthouse at Seahorse Key which is a closed wildlife sanctuary. QSL via W4DFU: University of Florida, Box J-12 JHMHC, Gainesville, FL 32610 USA.

Look for Dov, 4Z4DX, to be active during the International Lighthouse/ Lightship Weekend (August 16-17th) as 4Z4DX/LH from Jaffa Lighthouse (ARLHS ISR-005, Grid Loc. KM72). QSL via his home callsign (QRZ.com).

MOUNTAIN POLAR RADIO EXPEDITION. The Russian Robinson Club (RRC) plans to be active as R3RRC/9 from August 14-25th, from the Polar Ural Mountains (RM-02-01 for Russian Mountains Award). Their activity will be on HF and VHF bands. For more information regarding Russian Mountains Award, please visit the Web page (in Russian) at:
http://www.hamradio.ru/rrc/AWARDS/rma.htm
QSL via UA3SGV: Andy Blinushov, P.B. 180, Ryazan-35, Russia, 390035.

PACIFIC OPERATION (H44/H40/P29). Dan, JA1PBV, will be active as H44V from Guadalcanal (OC-047), Solomon Islands, between August 5-9th. He will team up with Kazuo, P29KM, as H40V from Temotu Province (OC-100), August 11-16th. Dan will also sign P29SI from Port Moresby, Papua New Guinea (OC-034) before going back to Japan around August 20th.

QSL INFO AND NEWS.....
QSL 5B4AGM via RW3RN (only for 2003 IOTA Contest). RW3RN's address

is: Alex Kuznetsov, Box 57, Tambov-23, 392023 Russia.

A photo gallery of the recent CS4B IOTA DXpedition to EU-040 is now available at: http://www3.ocn.ne.jp/~iota/newpage63.htm

Information, pictures and logs of the IL7M EU-050 operation are now available at: http://www.mdxc.org/il7m/index.htm

Nilay, TA3YJ, informs OPDX that she has sent out QSL cards for TA3YJ, TA3YJ/0, TA3YJ/3, TA3YJ/4, TA3YJ/LH, SV1/TA3YJ, LZ2/TA3YJ, TA3J, TA3J/0, TA3J/1, TA3J/3, TA3J/4, TA3J/LH, SV1/TA3J, LZ1/TA3J, LZ2/TA3J, YM3BU, YM3ATA, YM3SV, YM75TA, YM21TA, YM3LZ/WPX2000 and YM3LZ/WAE2000 to the QSL Bureaus of Austria, Belarus, Canada (RAC National Incoming QSL Bureau), Denmark, Finland, Georgia, Greece, Israel, Hungary, Lithuania, Norway, Poland, Serbia & Montenegro, Slovakia, Sweden, Switzerland and U.S.A. (W1, W2,W3, W4, WA4, W5, W6, W7, W8, W9, W0, KH6, Alaska, Puerto Rico and US Virgin Islands) direct July 29th.

SV5, DODECANESE. Uli, DJ9XB, will be active as J45XB in the CQ/RJ Worldwide DX RTTY Contest (September 27-28th) as a Single-Op/Single Band (15m) entry. QSL via DJ9XB.

T33, BANABA ISLAND (Update). An international team of 20 operators will be active as T33C during the first two weeks of April 2004 (April 4-16th). They will have 6 HF stations on the air (3 CW and 3 SSB), plus a separate 6 meter/AO-40 and separate HF digital mode station. Activity will be on 160-6 meters, satellite, CW, SSB, RTTY, PSK and some SSTV. They have arranged a suitable vessel named "Te Toobe" to take the equipment and them safely to and from Banaba Island (a 2 day trip from Tarawa, Kiribati). The T33C license and landing permission has been granted. Operators are: Frank/DL4KQ, Greg/DF2IC, Bernd/DL5OAB, Rob/PA5ET, Ronald/PA3EWP, Alan/AD6E, Bill/AK0A, Richard/N6KT, Flo/F5CWU, Bob/N4CD, Eugene/RK3AD, Tom/GM4FDM, Hrane/YT1AD, Krassimir/K1LZ, Doug/N6TQS, Jeff/K1ZM, Vojislav, Will/K6ND and Andrea/IK1PMR. QSL Manager will be Rob Snieder, PA5ET. Some of the team members will arrive early and enter the CQ WPX SSB Contest from T30-land in March 2004. For updates, visit the Web page at:
http://www.dx-pedition.de/banaba2004
Contributions may be made to the "Island DXpedition" fund via:
1) Bob Voss, N4CD, 3133 Charring Cross, Plano, TX 75025 USA
2) Flo Moudar, F5CWU, 25 Rue Du Castel Salis, 37100 Tours, France
3) Via wire-transfer, ask Flo, F5CWU at: f5cwu@qsl.net
4) Individual contributions can be done using PAYPAL:
Account: pa5et@muurkrant.com

V4, ST. KITTS AND NEVIS. Joe, VE3BW, will be active as V47CA from St. Kitts (NA-104) between October 18-26th. His activity will include an entry in the CQWW SSB Contest (Oct 25-26th). QSL via VE3BW, using the address on QRZ.com.

VP5, TURKS AND CAICOS ISLANDS. Matt, IK2SGC, will be active as VP5/IK2SGC from North Caicos Island from August 9-19th. Activity will be on 160-10 meters SSB and 6 meters. QSL via the bureau.

YI, IRAQ. Steve, OM3JW, informs OPDX that his son Mike, OM2DX, has obtained from the Iraqi PTT (thanks to Fred Matos, W3ICM) his personal callsign YI/OM2DX and the special callsign YI2X only for contests. He will be active for the next three years from the Slovak Ambassy in Baghdad. Mike has with him two transceivers: TS-850SAT and IC-706. Also, a power amplifier, L4B, is on the way to Baghdad. He is currently only using 100 watts and a FD4 antenna. Mike has also erected a 20m high vertical for 80 and 160 meters and a 8 element LP for 20-10 meters. He will be active on CW/SSB/RTTY/PSK31 on 160-6 meters. He was heard over the past week on 40/30/17 meters CW between 1345-1800z. QSL for both callsigns (also his activity as YI1BGD) is via his father OM3JW.

YI, IRAQ. Plenty of activity from here over the last week. Willie, YI/KV4EB, provided some SSB QSOs on 17 meters and some SSTV pictures on 20/15 meters. Activity is on at various times. QSL via K0JN. Operator Abel, YI/KC0LEK, near Baghdad was active mainly on 15 meters SSB (between 21250-21302 kHz), again at various times. Also, active was YI/AD8DY, YI/NG5L, YI/SM7WZA, YI1EM and YI1BGD.

Z3100, MACEDONIA (Special Activity). Look for stations from this country to be active using the special prefix "Z3100" during the month of August to celebrate 100 years of Macedonia. Here is a list of some of the operators that will be active: Z3100A (Z31A), Z3100B (Z31B), Z3100C (Z32UC), Z3100D (Z32DY), Z3100E (Z32AU), Z3100F (Z33F), Z3100G (Z33A), Z3100I (Z31CZ), Z3100K (Z34M), Z3100M (Z35M), Z3100O (Z36A), Z3100R (Z33AA), Z3100S (Z32ZM), Z3100T (Z31CQ), Z3100W (Z35W), Z3100X (Z32XX), Z3100Z (Z33Z), Z3100IL (Z37M), Z3100KR (Z32BF) and Z3100MK (Z37FAD).

ZF, CAYMAN ISLAND. Steve, K8FFO, will be active as ZF2FF from Grand Cayman (NA-016), August 5-11th. Activity will be on 20 and 17 meters CW/SSB. QSL via his home callsign.

-=-=-=

same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

i am grown up and i think most canadians are stupid.....and have
a stupid country full of illegal aliens......down here, we are still
free enough to speak our minds and can carry and own guns, which is
more than i can say for your pitiful little country.....you
pricks have always, and i do mean, always, been a stain on our
collective levi's good buddy....so there little dickie, ...put that
in your crack pipe and smoke it.....

1st point: Gov. Warner is RIGHT on target.

As a current tenured 15-yr employee of IBM, I and several
of my colleagues are facing the VERY real
prospect of seeing our positions being sent to India in 6 to 8
Months time. (we're talking about White Collar positions
here folks) This is NOT what I expected when
I pulled George W Bush's lever in the voting booth last time.

2nd Point: The proper spelling is "Liberal"

3rd Point: I will NEVER make the mistake of
voting for the GOP ever again. I hope that Howard
Dean is the DEM. Candidate in 2004 and Nader
stays home next time around.

Am I the ONLY one who thinks that people who think their opinion is so
damn important thay they have spout it everywhere whether it is an
appropriate venue or not, are insecure idiots? I have as strong
opinions as anybody and like to express that opinion as much as
anybody, but I have the courtesy to do so in appropriate areas.

Remember, opinions are like assholes, everybody has them and most of
them stink.

Comment On This News Group

There is a lot of good stuff here, but also an incredible amount of junk.

Another place to reasonably discuss Amateur Radio is at the Yahoo Groups.

http://groups.yahoo.com/

Search for "Amateur Radio" get over 1200 places to discuss your interests, mostly without flames, insults, off-topics, false information, and the stupidity that is prevalent here. Some are moderated, some public.

Lots of Elmers have left here and are now on Yahoo Groups.

Just FYI

GW, What makes you believe we can't speak our minds? I can freely discuss topics like marijuana with employers without worrying about being fired. I can say I'm opposed to gay marriage without being locked up. There ARE restrictions on inciting hatred (as an example) which happens quite often anyways, but everyone has their day in court and you are free to think what you want.
As well, we can still own guns- you just have to get an F.A.C. (Firearms Acquisition Certificate) or whatever the government is pushing towards now. When I left the military I thought about getting an FAC just for the hell of it, but what would I use it for? Perhaps hunting, or if I lived in the rural areas (I'm from Alberta) protecting your livestock from coyotes, wolves, etc. In the city, that's not an issue.To protect ourselves on the street from criminals, we just don't need them. I hope that the reason Americans own guns is merely to assert their constitutional rights and not out of fear of walking down their own streets.
Yes, we have a lot of illegal aliens here and so do you, huh hombre? I know that you are trying to make a 9-11 connection here but you are beating a dead horse-and you know it. It's not up to Canada to determine who enters the United States, and it sure wasn't Canada that gave them flight lessons. Hopefully in the near future, you should be able to leave "the land of the free" on a vacation and smoke a nice LEGAL joint without fear of persecution. Perhaps you will eventually get similar freedoms in the States but until then our door is open, no hard feelings eh?

That is only 500pep in ssb! Set it to 400pep max in ssb
and it will work better.
Check the Ameritron web site to download the manual.

Look at the facts, (I know, Liberals don't like to let facts get in the
way).....

Clintoon reaped the benefits from the Reagan/Bush Sr. years. Then he and his antichrist lesbian wife tore all that up and helped our kids re-define adultery, not to mention killed off 666Hillary's enemies and 911.

Now Bush Jr. is having to re-build what KKKlintoon has destroyed so the next Liberal Nitwit can destroy it.

Keep them welfare checks rolling boys, the Liberals need voters!

Well, no surprise there. India has some of the best programmers in the
industry. Sorry I can't lend you any sympathy here, I work for a competitor
who is doing quite well. But if you are worth your salt, you'll find another
job. And white collar work by it's very definition is a cut throat business,
this you should know.

Howard Dean will lose as will anyone the DNC has. Only welfare mothers and
displaced autoworkers vote DNC any damn way.

i am not reaching for nuttin on the 911 thing.....i realize you
cannucks had nothing to do with that.....and i did not say it either
but you seem to be so willing to accept the world's
refugees.....sooooooooo.....all i am saying is why not accept
ours too and then you guys can do what you want up
there.....since you have absolutely about zero for a defense
budget, you can continue play acting as socialist
do-gooders.....and incidentally who says those idiots flew those
planes into those skyscrapers.....they made intricate turns before
crashing them.....their supposed flight instructors have
emphatically stated for anyone that is listening, that none of those
pinheads could poor piss out of a boot much less fly a plane of that
size and weight into a target such as those buildings.....you
say, well those buildings are so big....well they are but when you are
flying a plane like that, it is like hitting a needle on the
dime.....tell me,.....how does anyone after taking a few flying
lessons, hope to somehow fly boering 727's much less , crash them into

something....no, on that subject, i will have to say that something smells.....besides the buildings were built to withstand being crashed into by 707's.....and they crumble anyways.....hmmmm.....doesn't add up..... if you have seen the pics of those planes crashing into those buildings you will notice that most of the fire ball , which includes the fuel .....goes through the buildings and out the other side.....and in any case would have been burned up shortly, long before getting the metal in those buildings got hot enough to melt.....no, this situation does not add up in my book.....from where i sit, i think that it was done by radio control.....the arabs were patsies.....and used to blame this on.....so.....well so those that want such a thing, will continue to wrestle control of whatever freedom we have left to do what they want, which is.....one world government.....i read one time .....that there is not such organization as al quaeda.....it was just made up for the masses.....and let us not forget that bin laden's relatives.....are very close business associates with the bushes.....food for thought.....so have another labatt and put on your hockey helment and think this thing through.....mr gw beckwith is off the key.....

I would like to mess with phased arrays but I don't want to cut
transmission lines. Is there any device that will act as a virtual
delay line? It's okay if this only works for reception but it would
be a bonus if it worked for transmission as well.

Jack.

Until you have to find a job and then we will see who is crying. Or perhaps when you are living in your Hooverville or now what would be called Dubyaville. For your information, I know a lot of people outside of your classification that voted Democratic not just your welfare mothers and displaced autoworkers. Considering that manufacturing has in the past been a prime employer in this country and the fact that one manufacturing job creates four secondary jobs should concern you. However, I doubt if it will hit home until you get bit in the ass yourself which I sincerely hope happens. Actually, keep us up to date if you do lose your job that way we can all give you the sympathy you will seek when you do so. I guess when your company decides to give your job to a Indian or other foreigner, then I suspect that you will be crying the blues. Just remember to fill out your ballot for King George in November 2004 to further ensure your future poverty.

But of course, it is the Republican Reprobates in charge now who have caused a massive budget deficit for the current year and since Sept. 11. It has been the Republicans in charge of both the House and Senate and not the Democrats. It is the Republican adminstration which is clueless to job creation for millions of average Americans while their fat cat buddies at Enron got away free. Not been hearing much about Enron lately have you, because its been swept under the rug. It is the Republicans who continue to be clueless as usual while millions of American jobs are going south or overseas. That includes the white collar employment too and when you lose your job, here is hoping you will have to get your hands dirty and actually get what you deserve. However, I doubt if you have the intestinal fortitiude to be a man and actually do some dirty work.

Here is the deal,
I follow the conservative motto of "my country does not owe me a living, my country does not owe me happiness, my country does not owe me anything".

I know Liberals can not understand this, you feel that the country should take care of you, make sure you have food and shelter and keep you warm and dry. Well guess what, the country does not owe you jack shit!

I have what is called an education, I have not wasted away in a job for 15 years waiting for uncle sucker to pay for my cat food and flu shots when I'm old. I have worked hard, saved money (in solid investments) and if I choose can retire today at only 41 years old. I did all this without one Liberal signing a check or paying any of my bills. So if your going to wait for me to "go hungry" don't waste your time.

You call yourself a Constitutionalist, that's just a Libertarian in Liberal clothing. Read what you preach, read the writing of our founding fathers, they hated Liberals too.

I have done a lot of "dirty" work in my day. It was while I was working my way through college. Now I have the degrees and training so I do not have to shovel horse shit to feed my family. But should I have to, I damn sure can.

Don't be jealous because people get an education and get easy clean jobs. It's never too late to learn new skills.

And before you state it, I had to pay my way, not a family member or "old money". I was born dirt poor but had better plans! :-)

I have been studying to pass the gerneral license but have no manual
or study guide except the questions and answers. I truly would like to
understand what it all means. However, I am stuck in Africa until
November and can't buy a manual. Is there some site ti download it?
Thanks,
Carolyn

1176. CT and post contest logging

Hi,

is it possible to use CT for post contest logging? Transfer the log
from paper to computer setting the time for each qso after the contest
took place?

Thanks

Gerhard

???

It doesn't look that way. The domain admins are on opposite coasts
of the U.S. The Bonsai Kitten site was first started by some MIT
students. Did they move West?

I do not want to get into an argument over a Pussy goverment that does
not allow their countryman to have handguns. I am DAM GLAD that
I live in a country where I am given the means to Defend myself..
Because you have the same type of idiot in canada AND all you can
do is yell cop. Would not you feel more comfortable with a handgun??

"when guns are outlawed, only outlaws will have guns"

Just My Opinion..

Bob

Also the number is real, the address is real, the gear is real. Some
people are leaving some weird messages, but I've given away a few radios
already. It is quite a drive up to my home.

Dave

Mr. Mcferrin,

You sir are a prime example of why the world is going to "pot". You
simply refuse to believe that a new Christian would want to make
amends for all of the wrongs that he has done in the past. I am not
going to be number one on the
Darwin awards simply to piss you off.

Jesus was not an alien. I have it on good authority that he had two
arms and two legs just like you guys. But I think he had bigger balls.
He didn't hide behind a gun, he used his flame thrower that he kept
hidden under his cape. You know the "hell fire" that the Bible talks
about. I mean come on, how can you possibly think that he had big
bugger eyes, had grey skin, and flew
around in a saucer. Good grief. Thats quite a fairy tale.

Amateur Radio Newsline™ Report 1355 – August 1 2003

A NOTE TO THOSE WHO ONLY “READ” AMATEUR RADIO NEWSLINE(tm)

For those of you who only know of the Amateur Radio Newsline (tm) as a text newsletter we would like to invite you to listen to the audio version. This Amateur Radio Newsline (tm) script is actually written for the “spoken word.” It is recorded each by professional broadcasters and is available for private listening or rebroadcast over your repeater. Two methods of delivery are available: FTP MP3 or dial-in telephone. Please visit our website at http://www.arnewsline.org for a list of telephone numbers (you have to pay your own long distance charges) and links to our voice newscast. On site free FTP Downloads are available at our site by clicking on the newscast number at the top of the page.

de
The Newsline Production Team

Amateur Radio Newsline report number 1355 with a release date of Friday, August 1 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Amateur Radio helps solve a murder by tracking down one of its own. Get to know about the ham radio heroes involved in the hunt for a cop killer on Amateur Radio Newsline report number 1355 coming your way right now.

(Billboard Cart Here)

**

ENFORCEMENT OF A DIFFERENT KIND: AMATEUR RADIO HELPS HUNT HAM WHO KILLED MICHIGAN COP

Hams in Michigan were called on to help track down a cop killer after what should have been a routine arrest became a grusome homicide scene. It happened on July 6th. Amateur Radio Newsline’s David Black, KB4KCH, is here with the rest of the story:

--

Never in Michigan's ham radio history has there been a case like Scott Woodring's. It began July 6th. That's when Woodring, KC8JNG, a member of the

Christian Identity movement and described as a survivalist, shot and killed a Michigan state police officer. It happened while Woodring was being arrested for solicitation of a minor.

A stand-off ensues and lasts nearly a day. During a law enforcement shift change, Woodring manages to escape, triggering an extensive manhunt throughout western lower Michigan. That's when ham radio operators became involved, since it was suspected that Woodring had been using amateur radio equipment to communicate with other members of his group.

James Wades, WB8SIW, is Michigan's RACES Officer and Section Emergency Coordinator:

--

Wades: “I directed the EC for Newago Co. to establish an intercept peratio in the area and monitor seldom used frequencies in and about he VHF 2 meter band. And, additionally, we sent out a broadcast nouncemnt to selected areas to selected area RACES members thrughout Michigan, essentially asking them to listen for conversations between Mr. Wodring and whomever else he might speak with.”

--

That paid off. A ham in Holton, Michigan reported monitoring Woodring and another operator talking on the air. The intercept was reported to state police they then asked government agencies including the FCC to provide direction finding assistance to find Woodring. But it was a Friday night and police couldn't get any response from the federal agencies. So Wades says investigators turned to radio amateurs for help:

--

Wades: “We deployed amateur radio teams from several counties in the area, and had pretty much a continuous radio direction finding occurring throughout the weekend, with teams from from Kent, Ottawa and Musquogen Counties. We also had teams on standby in Kalamazoo County as well as the Civil Air Patrol team – which weren’t utilized, but it was reassuring to know that they were there”

--

Hams and the police knew the general area where Woodring was believed to be hiding. Wades says it was an eyewitness who ultimately led to Woodring being found:

--

Wades: “Mr. Woodring was discovered through a tip from a citizen who saw him essentially taking shelter in a non working vehicle. When Michigan state police officers approached, he leveled an assault rifle at them and he was subsequently shot to death when he refused t comply with orders or lower the rifle.”

--

Wades says police were hesitant at first to work with radio amateurs. But he says the hams' efforts made a powerful and positive impact with law enforcement agencies.

--

Wades: “When all was said and done the feedback has been incredabally positive. Tremendously good comments about the professionalism and the skills of the radio amateurs involved. And basically I think that they were somewhat – almost shocked at the capabilities and the skill level of our ARES and RACES members in Michigan, which, of course was highly complimentary”

--

Around 40 radio amateurs took part in the effort to help find Woodring. Wades says the hams involved coordinated their work with police carefully, even establishing a dress code for hams reporting on scene with investigators. The professionalism Michigan hams showed has given law officers a new appreciation for the kind of help radio amateurs can provide when it's needed.

From Birmingham Alabama, I’m avid Black, KB4KCH, reporting for the Amateur Radio Newsline.

--

In all, RACES members provided 494 staff-hours to the man hunt. Most of this was contributed during the 36-hour period when radio direction finding activites to locate Woodring were being conducted. (ARNewsline(tm) from lead provided at www.qrz.com)

**

THE FIGHT FOR OUR SPECTRUM: HAM RADO VS. BPL

If you think that the term Broadband Over Powerlines and its acronym BPL will never afect you, guess again. BPL could effectively spell and end to ham radio as we know it. This, if it is ever approved by the FCC and popularized across our nation.

Just how real is the chalange to the survival of the Amateur Radio Service? ARRL Southwestern Division Director Art Goddard, W6XD, gave some graphic details at last weeks Fort Tuthill Hamfest in Arizona based on test data collected by Ed Hare, W1RFI, of the ARRL Lab:

--

Goddard: “If you are an engineer, anywhere from 33 to 63 decibels increase in the noise level thatr you will see at your reciever due to BPL run in the power lines in your neighborhod. If you are into S-Meter readings, thats somewhere between an S-6 and 10 over S-9.”

--

For those unaware, Broadband over Powerlines is a scheme to give consumers and businesses high speed Internet connections using the existing power distribution grid. This would put the power providers in the position of also being broadband internet providers as well. The problem is that powerlines are not shielded. They will act as much like giant antennas as they will a closed carrier of the broadband connection. In other words, whatever is on the power lines will be radiated and heard by your ham band reciever. And Art Goddard says that the Broadband Over Powerline signals will occupy the spectrum from 2 through 80 MHz, meaning every band from 75 meters through 6 meters will be affected.

According to Goddard, BPL has the backing of the White House which views the increased use of unlicensed devices as being good for the U-S economy. He also notes that the FCC – which is supposed to be neutral and regulating in the public interest, is – in this case -- actng like cheerleaders for the proposed service.

Goddard says that this is an issue that the ARRL is keeping a very close eye on. He also indicates that the League may soon be asking ham radio operators to lend their voice in opposition to BPL. (ARNewsline(tm))

**

RESTRUCTURING: NCVEC FILES TO END CW TESTING IN THE USA

The National Conference of Volunteer Examination Coordinators has filed a Petition for Rule Making before the FCC to end Morse testing in the United States. In its July 29th request, the NCVEC asks the FCC for an immediate end of CW testing of applicants.

The NCVEC request is based primarily on the action taken in Geneva at last months World Radiocommunications Conference. At that time, Morse testing as a world standard was abolished, leaving it to individual nations to decide whether or not to continue to administer CW exams.

The NCVEC petition concurs with the WRC findings. It notes an appearance that most of today’s radio amateurs want to communicate using voice. Because of this, the NCVEC says that it makes no sense from a regulatory standpoint to require hams to be Morse proficient when the greater majority of radio amateurs show no desire to use the mode. The petition also notes that the future of the hobby now encompasses many new modes that were undreamed of only a few short years ago. It adds that while manual telegraphy is a noble part of Amateur Radio’s past, it is no longer the services prime emission mode.

The NCVEC approach will still requires all applicants for an Amateur Service license or upgrade to pass the current written exams. Only Morse testing would be eliminated.

As we go to air no Rule Making designation has been assigned to this request by the FCC. The full text of the petition can be found on our website at www.arnewsline.org (ARNewsline(tm) from NCVEC release)

**

HAM RADIO TESTING: QPC RECALLS QUESTION

Also from the National Conference of Volunteer Examiners Coordinators word that its Question Pool Committee of has withdrawn question T5B04 from the Element 2 Question Pool. This, effective July 27th. This question is withdrawn due to the changes in Part 97 of the Amateur Service rules dealing with the new 60 Meter amateur allocation. (NCVEC)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WR9ARC repeater of the Riverland Amateur Radio Club serving La Crosse, Wisconsin.

(5 sec pause here)

**

HAM SPECTRUM: ARRL & CQ PRESENTS A PRIMER ON 5 MHZ

And speaking about 60 meters, want to know just about everything there is to know about how to operate legally in this new 5 MHz spot frequencies? Walk, run or drive to your news stand and buy a copy of the August issues of both QST and CQ Magazines. Then go home, settle down and read the articles titled 60 Meters Frequently Asked Questions by Rick Lindquist N1RL and Ed Hare W1RFI in QST and Getting Ready For 60 by Gordon West, WB6NOA. Both are a wealth of information on how to approach this rather specialized allocation and handily compliment one another. We asked Gordo to explain what readers will find in his:

--

West: “One of the things that my CQ Magazine article talked about was the Amateur frequencies And tuning in. There was allot of confusion about what exact frequency one uses for upper sideband on the 60 meter band. As long as everybody remembers that 60 meters – 5 MHz – point 5 -- all of the upper sideband frequencies end with point 5.”

--

And why did her write the article?

--

West: “When I first heard about the band it immediately came to mind as channelized operation that many new hams are not used to. Well, growing up on 10 meter FM as well as 6 meter FM, I knew what channelized operation was all about. And the key word is “sharing.” There’s no QSY'ing – at least not easily on the 60 meter band beyond the 5 channels, so its going to be up to all hams to sort of take turns in using this exciting 60 meter – 5 MHz band.”

--

Where Gordon takes the story telling approach, Lindquist and Hare present their material in pure Question and Answer form. A style of writing that computer

enthusiasts call a FAQ. That's an acronym for the words "Frequently Asked Questions" and the answers that they provide is fact filled, precise and right to the point.

Taken together, "60 Meters Frequently Asked Questions" and "Getting Ready for 60" are the most complete operating guide for the 5 MHz band penned to date. Hams contemplating operation on the five channels that make up the 60 meter allocation would be well advised to read both before hitting the transmit switch.

For more information about subscribing to CQ, visit www.cq-amateur-radio on the world wide web. You can join the ARRL, support its work and begin receiving QST by signing up at www.arrl.org. (ARNewsline(tm))

**

THE WAR ON TERROR: TWO HAMS KILLED IN IRAQ

Two recent casualties of the war in Iraq were amateur radio operators, one American and one from Sri Lanka. The ARRL Letter reports that Specialist Jon Fettig, KCZ0HSQ, of Dickinson, North Dakota, was killed in an ambush on July 22nd.

The following day, Nadisha Yassari Ranmuthu, 4S7NR, an International Red Cross aid worker, was killed and his Iraqi driver was wounded after their vehicle, marked with the Red Cross emblem, came under fire south of Baghdad. Ranmuthu was 37 and well-known in the Sri Lankin ham radio community. (ARRL)

**

ENFORCEMENT: HAM TOLD HE MUST RESPOND TO FCC QUERRY

A California ham has been told that he had better respond to an earlier FCC letter to him regarding a pair of uncoordinated repeaters that he allegedly operates. Otherwise it could cost him his ham ticket. The agency's Daryl Duckworth, NN0W, explains:

--

Duckworth: "The Enforcement Bureau has sent a warning letter to WA6SEK, Thomas De Lasaux, of Stockton California, concerning uncoordinated repeaters on 224.660 Mhz and 441.275 Mhz. There has been no response to a letter of May 5th where he had 20 days to reply. He is being afforded an additional 20 days to respond."

--

According to Duckwoth, if there was no resolution by July 25th, the agency planned to initiate enforcement action against WA6SEK's Amateur Service license. Its now past that date and we are awaiting word from the FCC as to wheter or not De Lasaux has filed the required reply. (FCC, RAIN)

**

ENFORCEMENT: TRUCKING COMPANY WARNED ABOUT UNLICENSED 10 METER OPERATION

Also receiving a letter from the FCC is the Tidewater Transit Company, Inc. of Kinston, North Carolina. This one warns the company to stop using the 10 meter ham band for its communications or face some rather severe consequences.

In his letter to Tidewather, the FCC's Riley Hollingsworth notes that information before the Commission indicates that a 2002 Volvo truck belonging to Tidewater and bearing North Carolina license plate LK 4130, was the source of radio transmissions on the Ten Meter Amateur Radio band on July 8th. This while it was driving on Interstate 20 near the city of Lexington, South Carolina.

The Letter warned Tidewater that continued unlicensed operation could bring with it a fine of up to $10,000. The owners of Tidewater Transit were also instructed to contact Hollingsworth to discuss the matter with him. (FCC)

**

RESCUE RADIO: HAMS TO THE RESCUE AS CELL PHONES FAIL

Interlinked emergency repeaters played a key role in providing communications during the recent Arizona wildfires.

As learned at last weekends Ft. Tuthill Hamfest, radio amateurs in Navajo County set up repeater links to allow contact between the Red Cross communications center and a number of evacuation sites. This, after it was found that cellular telephone coverage across the area was inadaquite.

The hams stepped in when the walkie-talkie feature of the cellular telephones failed to operate as advertised. The reason appears to have been the small number of relay sites available in the isolated areas where the fires were burning.

The hastilly assembled Amateur Radio relay system along with existing high level Amateur service repeaters are reported to have performed flawlessly. This made possible an ongoing exchange of vital evacuation information. (ARNewsline (tm) from information gathered at Ft. Tuthill Hamfest)

**

RESCUE RADIO: E-911 KIND OF ON HOLD

A lack of funding from cash-strapped state and local governments appears to be slowing the rollout of enhanced 911 services. And in some areas it has put the new wireless emergency phone location service on what appears to be an indefinite hold.

--
Under FCC regulations, wireless companies were required to respond to 911 center requests within six months by providing technology that can locate any individual on a given wireless phone networks who is using a phone equipped to gather information from the global positioning satellite system. This technology lets emergency operators locate cell phone users in need of assistance, but only one in ten emergency call centers has access to it.

But John Melcher, who is the president of the National Emergency Number Association says that moneys earmarked for Enhanced 911 are being spent on other needs. In a recent press statement Melcher charged that some states have diverted millions of dollars
in Enhanced 911 funds collected from consumers and have used the money to subsidize budget shortfalls. This says Melcher puts the public in danger, adding that moneys earmarked on customer billing for Enhanced 911 services should be spent only on Enhanced 911 and nothing else.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The FCC set specific deadlines for implementing this new service back in 1966. To date, many providers have yet to meet that implementation goal. (Published news reports)

**

RESCUE RADIO: THE INTERNATIONAL AREN NET

Still with rescue radio and emergency communications news, word that the Irish Amateur Radio Emergency Network takes to the air for its regularly scheduled drill session the first Tuesday of each month. The net is at 21:45 local Ireland time. Thats pretty close to UTC, with the net operating on 7 point 043 Mhz on SSB. (Q-News)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: WI-FI SPEED INCREASED 4X

The most widely used wireless local area network protocol, IEEE Standard 802.11, also known as Wi-Fi, was extended last month to make it four times faster. The CGC Communicator reports that the new standard, IEEE 802.11g transmits data at up to 54 Megabits per second. Thats up from 11 megabytes per second as was called for in Wi-Fi standard 802.11b. (CGC Communicator)

**

INTERNATIONAL - ASIA: NON HAMS INVADING THE 7, 10 AND 14 MHz HANDS

The increasing use of more frequencies on various ham radio bands by the Indonesians and other South East Asian non amateurs for their personal or business traffic, is becoming a very serious problem. Q-News reports that the

Indonesians are using the lower 40 kHz of 40 meters, and frequencies around 14 point 100 MHz in the 20 Meter band most of the time.

Nor have they spared the 10 MHz allocation. There unlicensed oprators are regularly heard in the 10.0 to 10.1 MHz segment which primarily carries international air traffic control communications.

Q-News notes that this is a very serious situation. One which could endanger the lives and safety of air travelers in ITU Region 3 and a situation that needs to be to be dealt with quickly at the highest levels of international diplomacy. (Q-News)

**

INTERNATIONAL - UK: BBC HELPS THE BLIND

The British Broadcasting Company is playing a crucial role in developing new radio equipment that could help increase number of visually-impaired people working at the organization. Across the UK, BBC local radio stations are converrting from analog to digital equipment. The digital equipment is designed to make life easy for full-sighted broadcast journalists, using a visual touch-screen system, which is why it needs to be adapted for visually-impaired people.

Now comes word that Claire Jennings, who is the the BBC’s Disability Advisor for Technology, has been working alongside technology company Calrec. This, to design a digital radio broadcast mixing console that is user-friendly for visually-impaired radio producers

The BBC has spent the past few months working with Calrec to adapt the broadcast desk and with BBC Technology to extend the touch-screen control system so that it can convert text into speech and be controlled using a standard keyboard. As well as controlling sources to faders on the Calrec, the BBC system can control most other hardware in a similar manner.

The entire story may be found in cyberspace www.bbctechnology.com/newsarchive4.htm. (Media Network)

SPACE: NASA TEAMS WITH LOCAL LIBRARIES TO DELIVER -- SPACE

NASA and the American Library Association have partnered to create a one-of-a-kind interactive space research exhibit. This, as part of a new program called NASA @ your library.

The unique exhibit will tour 120 public libraries in five regions across the nation for the next two years. It will feature special presentations specifically created to expose people of all ages to NASA research in the areas of health, home and transportation, agriculture and environment, and commerce.

The program was recently launched at the Enoch Pratt Free Library in Baltimore. NASA @ your library was created to inspire more participation at public libraries, raise awareness and encourage interest in science. (NASA)

CONTEST CALENDAR: FISTS C2C IN SEPTEMBER

Mark September 13th and 14th on your calendar for the third outing of the annual Fists Coast to Coast contest. This year the contest will run a full 24 hours beginning at 5 P.M. Pacific Daylight Time on September 13th and concluding at 5 P.M. on the 14th. That corresponds 0000 to 2400 UTC on September 14.

This year the rules are easier to understand and the sponsors say that there is the potential for higher scores due to the use of multipliers. The URL for rules and awards is complex and appears in the print edition of this report. If you have questions, please e-mail them to Paul Beringer NG7Z at fistsc2c@yahoo.com. On-line information is at www.tomochka.com/k7fff/fnw_c2c03.html. (FISTS)

**

DX

In D-X, word that two separate groups will be operating from Swaziland through the 3rd of August. K4SV and VA7DX will be active as 3DA0SV and 3DA0WC. Four South African operators will be on as 3DA0DX between the same dates. QSL each group as directed on the air. (GB2RS)

**

THAT FINAL ITEM: ARNEWSLINE TAKES YOU TO A HAM RADIO BALLON LAUNCH

And finally this week, take a listen to this:

--
“15,790 feet. Course 44 degrees moving at 10 miles an hour.”
--

That’s the report of one of the controllers tracking a high altitude ham radio balloon launch that took place Saturday, July 26th at the Fort Tuthill Hamfest just outside of Flagstaff Arizona.

The launch was sponsored by hams belonging to Arizona Near Space Research. Brian Bingham is a Physics teacher from Deer Valley High School in Glendale, Arizona, who came out to take part in the launch. He says that many of those assisting are also educators who want to bring space a bit closer to their classrooms:

--
Bingham: “Most of the people you see out here helping are that group and a group of Arizona high school teachers that are going to be taking on some of the balloon launches. They will have teams from their schools do balloon launches through the NASA Arizona Space Grant.”

--

Bingham, who was a radio amateur many years ago described the system being readied to be sent aloft:

--

Bingham: “You can see a small package down here. It was built by one of the teams from a workshop and contains temperature sensors, humidity sensors, a small still camera, solar cells all in something just a little over a pound in weight. It has telemetry equipment with GPS position via satellite and transmits it back so that we an track it on the ground and recover the equipment.”

--

And how high will it all go?

--

Bingham: The balloon will go up to somewhere in the neighborhood of 100,000 feet. The balloon will also swell to somewhere about forty feet in diameter before it finally bursts. And then the parachute will bring it back down to Earth.

--

Brian Bingham says that his students will soon be choosing a project of their own to launch to the edge of space on a future balloon flight. It will be another educational experience made possible through the cooperative efforts of NASA, the educational community and ham radio. (ARNewsline(tm))

That's right. I am a Time Lord. Kept the secret for many many years. 345 years to be exact.

I have lived on Earth since the 1880's. Saw many things you have not. Met some great people not excluding: Adolf Hitler, Joe Stalin, Churchill, Albert Einstein (How do you think he got his theories from?) I've met Elvis in the 1950's and helped him along early in his carrer. I've met the founders of the ARRL. I've watched Babe Ruth play baseball. Been to every Presidental Inaguration since the 1900's I've met Henry Ford. I helped Von Braun down here in Huntsville after the war. I was "the man behind the scenes" for many others too. Tried to help Joe Macarthy in the 1950's in his battles - he was too arrogant and impulsive. Went to Roswell in the late 40's to assist in the UFO too. Art Bell is not lying. There is a UFO there!

Been "taking it easy" the last 30 years or so. I did meet Ronald Reagan back in the 50's

Lloyd Davies - Time Lord - Talk Show Host.

Pappy,

I get a kick out of these high school dropouts who call Bush stupid.

Here's you: high school.
Here's Bush: Yale graduate (history), jet pilot (National Guard),
Governor (Texas), President (USA). Still married to the woman he met
and married in 1977. Gave up booze at age 40. Stuck with it. In
office, signed a law allowing Texans to obtain permits to carry
concealed weapons. Crime dropped drastically.

Message to 'Crazy Taxi': Have you done any of those things? No? Oh,
OK. But good for you, you learned how to post to the internet over and
over and over and over. And over.

Over and out, loser.

plonk

yeh a lot of canadians have minimum wage jobs due mainly to their
inabilities to function in a highly technological society brought on
by rampant drug abuse........hell look at tom greene.........what a
pinhead!!!! probably tokes up a doob before each show.....but you
know, he is perfect for the m tv generation.......by the way how much
is eighty percent of $5.50 anyways????

"most canadians are real, but some are a little stupid"

Money alone does not get you into Yale. You have to have a very good GPA and
score high on the SAT.

People like you usually drop out of Community College and find lucrative
work in the food dispensation industry.

plonk

I said "a pussy goverment" . I made NO inference that the
people were pussys, just the goverment.

Mixed up Mountie
He jumped on his whistle and blew his horse

After reading the following paragraph I would definitely say that
President Bush is fit for duty. We don't need to send Bush to Iraq.
He has Generals to take care of that for him. For you, I only have
one question: "would you like fries with that?"

>The London Sunday Telegraph recently reported that, soon after the
war began, >Uday was deeply depressed. According to the former
director of Iraqi >television quoted in the Telegraph, the last words
he heard Uday speak were >these: "This time I think the Americans are
serious. Bush is not like Clinton. >I think this is the end."

The American Comedian George Carlin put it all very well.

Here is what he said:

"When it comes to bullshit, big-time, major league bullshit, you have to stand in awe of the all-time champion of false promises and exaggerated claims, religion. No contest. No contest. Religion. Religion easily has the greatest bullshit story ever told. Think about it. Religion has actually convinced people that there's an invisible man living in the sky who watches everything you do, every minute of every day. And the invisible man has a special list of ten things he does not want you to do. And if you do any of these ten things, he has a special place, full of fire and smoke and burning and torture and anguish, where he will send you to live and suffer and burn and choke and scream and cry forever and ever 'til the end of time!"

"Environmentalists estimate that, at the present rate of consumption, the world will have depleted its present supply of bullshit by the year 2005. Increasingly, synthetic bullshit is seen as the only answer. Therefore, the leading religions, in cooperation with big business and the major political parties, are working hard to beat the deadline."

"Who can I convert?" "Let's go to this country and make them christians." "Wear this." "Do that." "No, don't worship that way. Worship this way or I'll kill you - for the good of your soul, of course." Meanwhile, followers of Eastern religions are sitting in the middle of their minds, experiencing a bliss and a level of consciousness that Western man can't begin to approach. Christianity is all external, all material. Gold. War. Murder. The big churches operate, morally and economically, just like the big corporations. Yet they don't pay taxes. Let them pay their fair share, those fucking religions."

"And the belief that there's a man in the sky watching us, watching everything we do, is so ingrained: First thing they do is tell you there's an invisible man in the sky who's going to march you down to a burning place if he doesn't like you. If they can get you to believe that, it's all over. Before you're six years old, they've got you thinking that, they've got you forever on anything else they want. There's no real education. It's an indoctrination training little producers of goods who will also be consumers of goods. Some will be on the producer side, and more will be on the consumer side. But you're all being trained to be a part of this big circle of goods being pumped out and everyone buying them and everyone going to work to help make more of them for other people to buy."

>More Bush propaganda.

what a revisionist lie. i guess those who cant do hate those who can.

1. she was not in command of the unit. it was not her fault about the wrong turn

2. she was in battle.

3. she knew that was a risk. she was in the army.

4. she didnt risk anyone's life. it's standard policy to retrieve wounded.

in fact, every word you've written, including 'and', and 'the' is a lie.

other than that it's a great post.

greetings Dave:

since you have the extra gear you are giving away, why not send me a radio to replace my 756 you got,.. my address is still good on qrz. so, send me , heck, just about any radio, as long as its decent, and working and we will call it even, and a lesson learned.

N5XXM, Ken.

If you were completely paranoid like gw, probably yes. There is little need for "protection" if the crime rate is low. Besides, what makes you think gun ownership is illegal in Canada? You don't think that mental case knows what he's talking about, do you?

>he's talking about, do you?

NO! BUT I can remember going over to canada many times and if I were
lucky I would get a customs agent who new how to fill out the paper
work to take custody of my handguns until I came back to the USA.

They were not very knowledgeable about the custody form. They would on
occassion try to sneak through the form that says you are surrendering
them to the Crown.. Screw the crown.

If you guys are lucky they may let you keep black powder muzzel
loading Long guns.

Like Sheep to the slaughter.

Back in the 1930s or 40s a federal law was enacted that made Automatic
Weapons a federal offense to possess without a 3rd class firearms
dealers license. MANDATORY 20 year sentence for possession without
the license. Any Felon can go to Miami or Toronto and within 24 hours
find somebody who will sell him an AK47, FULL AUTO.
FELONS do not care about Anti Gun Laws.. and the canadian goverment
won't even let you have a handgun for self protection.

Your goverment must be composed of gutless frogs like the cowards from
their homeland who wussed out when we went after the Iraqi's..
After the war they want to run things. Screw them..

Just My Opinion

Bob

Your own King James version of the bible says:

"Thou shalt not lie with mankind, as with womankind: it is
abomination." -- Leviticus 18:22

"If a man also lie with mankind, as he lieth with a woman, both of
them have committed an abomination: they shall surely be put to death;
their blood shall be upon them." -- Leviticus 20:13

Ignore the bible; ignore the word of God.

Ignore the word of God; do the work of Satan.

>From Reuters, 8/2/03:
http://www.nytimes.com/reuters/politics/politics-politics-economy.html

By REUTERS

WASHINGTON (Reuters) -

Democrats on Saturday said President Bush's economic policies have done little to create jobs and have forced many state and local governments to raise taxes and cut spending for education, public safety and health care.

Virginia Gov. Mark Warner said in the weekly Democratic radio address that while Bush and his Republican allies in Congress voice support for popular education and health care programs, they have not backed it up with federal financing.

``So while the president pats himself on the back for cutting taxes, the hard reality is that his political victory ends up simply passing the burden down to your state and local governments,'' Warner said.

Warner criticized Bush's economic policies saying the president is now on track for the worst job creation record since Herbert Hoover was president during the Great Depression.

Bush has been touting his policies; and members of his economic team, including Treasury Secretary John Snow, have been traveling around the country talking up the benefits of his tax cuts.

Warner said the economy has lost some 3.1 million jobs and that a $236 billion surplus inherited by Bush has been turning into a record $455 billion deficit.

He noted that leading sheet and towel maker Pillowtex Corp. shut all of its 16 plants just this week and terminated thousands of jobs, many in Virginia.

``The administration's tax cut policies offer little for these workers and millions of other men and women like them,'' Warner said.

Facing a Second Nuclear Age

By WILLIAM J. BROAD

This week, ten minutes by car south of Omaha, Neb., the United States Strategic Command is holding a little-advertised meeting at which the Bush administration is to solidify its plans for acquiring a new generation of nuclear arms.

Topping the wish list are weapons meant to penetrate deep into the earth to destroy enemy bunkers.

The Pentagon believes that more than 70 nations, big and small, now have some 1,400 underground command posts and sites for ballistic missiles and weapons of mass destruction.

Determined to fight fire with fire, the Defense Department wants bomb makers to develop a class of relatively small nuclear arms -- ranging from a fraction the size of the Hiroshima bomb to several times as large -- that could pierce rock and reinforced concrete and turn strongholds into radioactive dust.

Jobless Say Economic Recovery Is a Mirage

By ADAM GELLER
AP Business Writer

NEW YORK --

Six days before Christmas, Antonio Tirado called his wife with the news -- he'd just been laid off.

The next morning, Martha Tirado had to return the favor.

Me too, she said.

Seven months later, the couple -- she's an accountant, he worked for a commercial mover -- are certain they're just as unemployed as when it was cold outside.

So forgive the Tirados for doubting analysts who say the economy began to warm up well over a year ago.

"These experts, where do they get that information?" says Martha Tirado, who's been sending out about 40 resumes a week with no takers.

"They're probably going to places where people are working. They're probably not talking to little people like us."

The frustrations of the New York couple and other jobhunters were confirmed Friday when the government reported that, despite a dip in the unemployment rate, the economy shed more jobs in July and thousands of those without work got so discouraged they gave up searching.

That stretched to 20 months the lag between the official end of the recession and the recovery of the labor market, making this the longest such lag in memory.

It is longer even than the so-called "jobless recovery" of the early 1990s when it took 15 months after the overall economy started expanding before unemployment began to turn around.

"We've actually seen declines in employment levels that have lasted far longer than in the early 90s," said Josh Bivens, an economist with the Economic Policy Institute, a think tank with ties to organized

labor.

"You just didn't see the sustained job shedding that you've seen in this recession. Compared to the current recession, it was nowhere near as jobless."

Despite the lagging job market, a panel of academic economists at the National Bureau of Economic Research concluded recently that the recession ended in November 2001 -- more than a year and half ago.

Since then, unemployment -- which hit a low of 3.8 percent in early 2000 -- has risen substantially.

In March of 2001, when the recession began, it hit 4.2 percent.

By November of that year, when the economy hit bottom, it was at 5.6 percent.

In June of this year it rose to 6.4 percent, a nine-year high.

And despite the dip in July to 6.2 percent, many economists called the report weaker than expected and say the jobless rate could rise again later this year.

Employers cut their payrolls for the sixth month in a row in July, a sign that businesses remain cautious about the long-awaited turnaround.

The economy bled another 44,000 jobs in July, despite forecasts by analysts who expected positions would be added.

Meanwhile, 470,000 workers were so convinced of the lack of jobs, they didn't bother searching.

Those discouraged workers are not counted in the official unemployment figure.

Despite the job losses, analysts agree the economy continues to grow.

But they are divided in their assessments of the labor market and how much of a risk a sustained lack of jobs pose to the recovery.

"I think there is definitely that risk and my concern is that economic growth certainly can peter out," said Sung Won Sohn, an economist with Wells Fargo & Co. in Minneapolis.

"Consumers are the ones who spend money and they need jobs. You cannot continue on with economic growth without employment gains."

Sohn and others say some gains are the natural course of any economic cycle.

But this cycle is different because there is a fundamental restructuring going on, with employers shifting manufacturing jobs to China and software jobs to India, rather than hiring in the United States.

Disdain for Bush Simmers in Democratic Strongholds

By ROBIN TONER

DES MOINES --

While Democratic leaders in Washington debate strategy and demographics for the 2004 election -- the wisdom of campaigning from the left, right or center -- something far more visceral is at work in the first caucus state, and in other Democratic redoubts.

There is a powerful disdain for the Bush administration, stoked by the aftermath of the war in Iraq and the continuing lag in the economy.

Human Rights Watch released a report this past week saying that warlords, whom the U.S. military helped put in power so they could fight the Taliban and al Qaeda, are terrorizing much of the country.

Their gunmen are intimidating journalists and political opponents as well as robbing, detaining and raping ordinary Afghans with impunity, the report said.

At the same time, cooperation between the U.S. military and regional leaders has not always succeeded in thwarting the Taliban and al Qaeda -- notably in Kandahar.

Twice in recent months, large Taliban groups have attacked U.S. or allied forces, and Kandaharis are increasingly critical of the United States for not acting more aggressively to stop terrorism and protect the populace.

Recent efforts to flush out Taliban forces have brought some tangible results, but have failed to stop them from regrouping over the Pakistani border, beyond the reach of coalition forces.

In early June, Kandahar provincial soldiers killed about 40 people they identified as pro-Taliban fighters during a clash six miles north of Spin Boldak, near the Pakistani border.

Afghan Interior Minister Ali Ahmad Jalali later said many of the dead carried Pakistani identification cards or mobile phones.

On July 19, a large group of pro-Taliban fighters fired on a convoy of U.S. Special Forces and other coalition soldiers patrolling near Spin Boldak.

The coalition soldiers returned fire and called in AH-64 Apache helicopters, killing between 22 to 24 enemy fighters, the U.S. military said.

A Kandahar police official said the dead men were killed as they fled over the border into Pakistan.

Mohammad Anwar, an Afghan trader who grew up in Spin Boldak and now lives in the Pakistani town of Chaman, said he is perplexed that high-ranking Taliban officials live openly in his prosperous neighborhood.

In late June, he saw guns, money and motorbikes being dispensed at a local mosque, he said.

"Everybody knows there are terrorists there, but they don't take action," Anwar said.

"It scares me."

Gen. Mohammad Akram Khakrizwal, the Afghan central government's highest-ranking police official in Kandahar, said he too has watched with alarm as remnants of the Taliban grow more visible and active.

After coalition forces routed them, Taliban leaders fled and hid for six months, he said.

Then they started appearing openly in Pakistan.

"They wanted to know what the reaction would be," Akram said.

"After there was no reaction from the coalition or the government, they started regrouping."

Before long, he said, the Taliban and its allies began slipping into Afghanistan to disseminate anti-government, anti-coalition propaganda fliers, which Afghans call "night letters."

"Then they started burning schools and, again, no one said anything," he said.

"The third phase was explosions. . . . Now they are targeting mullahs and police officials."

To Akram, who fought the Soviet occupation of Afghanistan, the progression looks ominously familiar.

"It is dangerous," he said.

"During the Russian invasion, we did the same thing: step by step. These Taliban have been organizing step by step.

"Now that they have not been stopped and they are in larger numbers, they will make the situation worse for the coalition forces and the Afghan government."

Afghan Political Violence on the Rise

Instability in South Grows as Pro-Taliban Fighters Attack Allies of U.S.-Led Forces

By April Witt
Washington Post Staff Writer

Sunday, August 3, 2003; Page A01

KANDAHAR, Afghanistan --

There is an armed guard in the house of God.

At the front gate of the Abdurrad Akhunzada mosque, a turbaned watchman paces warily in the dusty twilight, hiding his Kalashnikov beneath an outsized scarf so he doesn't frighten men arriving for evening prayers.

A remote-controlled bomb exploded at the mosque last month, injuring the mullah and 24 worshippers as they knelt, hands outstretched in supplication.

Two days later, a mullah, who had hung the Afghan flag in his mosque and said good Muslims support the nation's central government, was shot to death as he sat praying, a book open in his hand.

A third Kandahar mullah was attacked this week, executed outside his mosque by gunmen on a motorcycle.

All three clerics served on a religious council that recently decreed that, contrary to pronouncements by the Taliban Islamic movement, there is no legitimate jihad, or holy war, against the central government or the foreign troops that support it.

A year and a half after the United States and its allies drove the Taliban from power, acts of politically motivated violence have become frequent and fierce in the key southern province of Kandahar, the birthplace of the Taliban and the source of countless shifts in Afghan politics and culture over the centuries.

Bands of 50 or more pro-Taliban fighters have begun appearing around Kandahar, both along the border with Pakistan and in the interior of the province.

Just over the border in the Pakistani town of Chaman, high-ranking Taliban officials are meeting openly and handing out guns, money and motorbikes, according to a witness and Afghan police officials.

Poor Afghans who don't share the Taliban's strict interpretation of Islam or its mission of jihad are nevertheless accepting Pakistani money to plant land mines and bombs in Afghanistan, they said.

In addition to Taliban fighters, other men with guns -- warlords -- dominate much of Kandahar, allowing the trade in illegal drugs to flourish.

Civic activists who once hoped to provide an alternative to both radical fundamentalists and marauding militiamen feel silenced and afraid.

"If someone rises up to say something about democracy or social equality, then tomorrow he won't exist anymore," said Mohammad Wali Hotek, head of one of the largest tribes in the Pashtun ethnic group, which is predominant in the south.

"As there is no rule of law in Afghanistan, the gunmen can do anything they want.

"We are tough people," said Hotek, who was praying at the Abdurrad Akhunzada mosque when the bomb exploded there last month.

"The experiences we are having now make us lose our hope for the future."

Kandahar police also say they feel demoralized and targeted.

In July alone, one district police chief was shot to death on his way home from work and another was killed along with five of his officers when a band of about 20 armed men stormed their compound, police officials said.

This past week, five or six government officials were ambushed and killed along the same isolated road where a Red Cross water engineer was executed in late March.

The mood in the province is so tense that when a major dust storm developed earlier last week, blotting out the sky with mustard-colored sand, some Kandaharis read it as a portent.

"It just feels like something is building," said Sarah Chayes, an American former journalist who now runs a pro-democracy group called Afghans for Civil Society.

"One year ago I didn't have any problem driving around Kandahar by myself. Now I feel it is a lot more dangerous."

Kandahar's mounting security problems have dire consequences for the province's poorest people.

In the four months since the execution of the Red Cross engineer, the number of nongovernmental organizations with foreign workers in Kandahar has dropped from 22 to just seven or eight, said Talatbek Masadykov, head of the Kandahar office of U.N. Assistance Mission in Afghanistan.

Those who have remained often stick close to the city of Kandahar rather than risk traveling to outlying districts. Crucial reconstruction and humanitarian aid, from bridge repairs to food distribution, have slowed or stopped as a result, he said.

The growing instability in Kandahar has ominous implications for the rest of Afghanistan.

As the heartland of the Pashtuns, whose monarchs ruled Afghanistan for much of the past three centuries, and the place where the Taliban began its rise to power in the early 1990s, Kandahar has long been the trendsetter for the rest of the country.

"Kandahar was the first capital of Afghanistan," said Masadykov.

"Historically, those who know Afghanistan say that if you can solve the political issues in Kandahar, you can solve the issues in the whole country. If you can't do it in Kandahar, it means that you are lost."

If there are, they won't be able to do so legally unless the
output power gets stepped down to FRS levels when the FRS channel is
selected.

That is one issue, but if they are not type accepted with all of the
limitations intended for FRS, it is not legal to transmit, no matter
how modified.

I'm curious,

What are the frequencies or frequency range for FRS and GMRS?
I am already receiving cordless phones and baby monitors on one of my receivers.
I would like to check the activity on FRS and GMRS.
Who knows, I might get entered in the Guinness (sp?) Book of World Records! HAH! Fat chance.

<<In part of the message By. Spongeboy Bucketmouth>>
>>false promises and exaggerated claims, religion.<<

(None of this had ever been a $ thing, or at least not when it began.)
Politicians use it for power, they will use anything they can find to get
their way. Speak of the devil, I'm almost there if I wanted
To run for anything. (But I don't want to end up on the dark side of this
thing.) The Wars of this thing are here, and you have to ask yourself,
What Side Do I Want To Be On.
Don't you think it's at least a little strange that everything that's
happening today is in the Bible? Written 1000s of Years Ago.
Everyone is starting to dumbly follow everything the UN Says to do. This
would be the beast the Bible says that
Everyone starts to follow.
And there's also the chip they want to put in our heads or in our right
hands. The speed of this chip is 6.66Mhz, but when a computer starts
working with it, or runs programs on it, the computer takes the (.) and
turns it to numbers kind of like this. 010001101010 and the number
Becomes 666
But I forgot, your a pure atheist, and none of this will make any sense to
you.

Dennis E Strausser Jr (Raichu!!), don't fear my electric : I won't use
it if I feel safe.

>> >From Reuters, 8/2/03:
>> http://www.nytimes.com/reuters/politics/politics-politics-economy.html
>>
>> By REUTERS
>>
>>
>> WASHINGTON (Reuters) -
>>
>> Democrats on Saturday said President Bush's economic policies have
>> done little to create jobs and have forced many state and local
>> governments to raise taxes and cut spending for education, public
>> safety and health care.
>>
>> Virginia Gov. Mark Warner said in the weekly Democratic radio address
>> that while Bush and his Republican allies in Congress voice support
>> for popular education and health care programs, they have not backed
>> it up with federal financing.
>>
>> ``So while the president pats himself on the back for cutting taxes,
>> the hard reality is that his political victory ends up simply passing
>> the burden down to your state and local governments,'' Warner said.
>>
>> Warner criticized Bush's economic policies saying the president is now
>> on track for the worst job creation record since Herbert Hoover was
>> president during the Great Depression.
>>
>> Bush has been touting his policies; and members of his economic team,
>> including Treasury Secretary John Snow, have been traveling around the
>> country talking up the benefits of his tax cuts.
>>
>> Warner said the economy has lost some 3.1 million jobs and that a $236
>> billion surplus inherited by Bush has been turning into a record $455
>> billion deficit.
>>
>> He noted that leading sheet and towel maker Pillowtex Corp. shut all

>> of its 16 plants just this week and terminated thousands of jobs, many
>> in Virginia.
>>
>> ``The administration's tax cut policies offer little for these workers
>> and millions of other men and women like them,'' Warner said.

>> Sunday, August 3, 2003; Page A01
>>
>>
>> KANDAHAR, Afghanistan --
>>
>> There is an armed guard in the house of God.
>>
>> At the front gate of the Abdurrad Akhunzada mosque, a turbaned
>> watchman paces warily in the dusty twilight, hiding his Kalashnikov
>> beneath an outsized scarf so he doesn't frighten men arriving for
>> evening prayers.
>>
>> A remote-controlled bomb exploded at the mosque last month, injuring
>> the mullah and 24 worshippers as they knelt, hands outstretched in
>> supplication.
>>
>> Two days later, a mullah, who had hung the Afghan flag in his mosque
>> and said good Muslims support the nation's central government, was
>> shot to death as he sat praying, a book open in his hand.
>>
>> A third Kandahar mullah was attacked this week, executed outside his
>> mosque by gunmen on a motorcycle.
>>
>> All three clerics served on a religious council that recently decreed
>> that, contrary to pronouncements by the Taliban Islamic movement,
>> there is no legitimate jihad, or holy war, against the central
>> government or the foreign troops that support it.
>>
>> A year and a half after the United States and its allies drove the
>> Taliban from power, acts of politically motivated violence have become
>> frequent and fierce in the key southern province of Kandahar, the
>> birthplace of the Taliban and the source of countless shifts in Afghan
>> politics and culture over the centuries.
>>

>> Bands of 50 or more pro-Taliban fighters have begun appearing around
>> Kandahar, both along the border with Pakistan and in the interior of
>> the province.
>>
>> Just over the border in the Pakistani town of Chaman, high-ranking
>> Taliban officials are meeting openly and handing out guns, money and
>> motorbikes, according to a witness and Afghan police officials.
>>
>> Poor Afghans who don't share the Taliban's strict interpretation of
>> Islam or its mission of jihad are nevertheless accepting Pakistani
>> money to plant land mines and bombs in Afghanistan, they said.
>>
>> In addition to Taliban fighters, other men with guns -- warlords --
>> dominate much of Kandahar, allowing the trade in illegal drugs to
>> flourish.
>>
>> Civic activists who once hoped to provide an alternative to both
>> radical fundamentalists and marauding militiamen feel silenced and
>> afraid.
>>
>> "If someone rises up to say something about democracy or social
>> equality, then tomorrow he won't exist anymore," said Mohammad Wali
>> Hotek, head of one of the largest tribes in the Pashtun ethnic group,
>> which is predominant in the south.
>>
>> "As there is no rule of law in Afghanistan, the gunmen can do anything
>> they want.
>>
>> "We are tough people," said Hotek, who was praying at the Abdurrad
>> Akhunzada mosque when the bomb exploded there last month.
>>
>> "The experiences we are having now make us lose our hope for the
>> future."
>>
>> Kandahar police also say they feel demoralized and targeted.
>>
>> In July alone, one district police chief was shot to death on his way
>> home from work and another was killed along with five of his officers
>> when a band of about 20 armed men stormed their compound, police
>> officials said.
>>
>> This past week, five or six government officials were ambushed and
>> killed along the same isolated road where a Red Cross water engineer
>> was executed in late March.
>>
>> The mood in the province is so tense that when a major dust storm
>> developed earlier last week, blotting out the sky with mustard-colored
>> sand, some Kandaharis read it as a portent.
>>
>> "It just feels like something is building," said Sarah Chayes, an

>> American former journalist who now runs a pro-democracy group called
>> Afghans for Civil Society.
>>
>> "One year ago I didn't have any problem driving around Kandahar by
>> myself. Now I feel it is a lot more dangerous."
>>
>> Kandahar's mounting security problems have dire consequences for the
>> province's poorest people.
>>
>> In the four months since the execution of the Red Cross engineer, the
>> number of nongovernmental organizations with foreign workers in
>> Kandahar has dropped from 22 to just seven or eight, said Talatbek
>> Masadykov, head of the Kandahar office of U.N. Assistance Mission in
>> Afghanistan.
>>
>> Those who have remained often stick close to the city of Kandahar

Yep. And we thought Reagan was a moron. As bad as he was, he was no
where near as dangerous to democracy as Bush/Cheney/Ashcroft.

I can't believe there are conservatives who think that because that
triumvirate are "Republicans," that they are good for the United
States and its ideals. Those conservatives are losing every bit as
much of their civil liberties as liberals are.

Wake up, all of you.

Recently, Reuters reported a loss of $631
million, the largest in its 150-year history.
In addition, Reuters announced 3,000 job
cuts, along with the 3,200 jobs cut over
the past two years. Reuters' market
capitalization has plunged by almost 90
percent from its peak, and Reuters' stock
has fallen to a 14-year low.

Do a Google search on "Ralph Boyd" sometime, Skippy. He's a Clinton-appointed Assistant Attorney General, who stayed on with the Bush Administration, and was the one who investigated Palast's "fixed election" in Florida.

Mr. Boyd, who FYI is himself black, found that Palast was, in fact, LYING.

Where's your cite Skippy?

> Analysis:

And nothing more.

BTW, I lost some recent newsgroup messages from you idiots re. the 2000 Florida recount. Please accept this as my response.

You're asking all of us rational people here to IGNORE the findings of a *Clinton* appointee to the Justice Department (Assistant Attorney General Ralph Boyd, whose resume speaks for itself. Look it up some time), and instead ACCEPT the findings of ONE leftist reporter who can't even get a job in the United States (Palast). You're telling us that Boyd is lying and Palast is telling the truth, which is a laugh and a half.

I have a couple of questions for you.

First of all, how come Palast is the ONLY "source" you howler monkeys can repeatedly cite on this issue to support your side of the 2000 Florida story? And please don't reply with a question, namely why I am accepting the findings of Boyd and Boyd alone. *His* investigation employed more than one person, and his credibility is not in doubt, except to you idiots who call him a liar and worse (one idiot I debated with even called him an "Uncle Tom"). Meanwhile, Palast has been exposed in the past for lying in print about Cynthia McKinney.

Secondly, why didn't you guys complain about the alleged scrubbing of felons from the Florida voting rolls BEFORE the election? Because you knew you would win anyway via vote fraud?

Which leads us to question #3. How come the Democratic Party, either nationally or locally, NEVER sued for alleged vote fraud in Florida, or anywhere else for that matter, after the 2000 election? I'll tell you why. Because they were AFRAID to do so.

"You can change the outcome of any election you want" -Bill Clinton

Ahhhhh, the smell of a nearing election season.
The first sign is the endless flood of anti-Republican messages to newsgroups.
A really quaint practice the DNC has been promoting for the past few elections, it's very ineffectual but it does make for some rather humorous reading from time to time.

Next we'll see the DNC standard talking heads ramble on ad-nausea about the big three "topics", health care, Medicare, and jobs. We'll hear from the poor auto workers who can't make ends meet, the DNC will clean up a few crack whores and parade them and their "home-less chil'ren". For the finale, the ever popular Dot-Comer who's job is going to India!

Get ready kids, the DNC has no real candidate this time around and they are going to pull out all the stops.
Oh, and as for Dean, don't get your hopes up just yet. A REAL big bomb is going to be dropped on his campaign later this fall. Poor fella.

Anyway, have fun hipsters and get out there and vote, vote twice if your a Dem!

Yeasu VX-5R and VX-1R I know for sure, and probably the VX-7R and VX2R as well. The VX-5R can transmit on MURS and 49 MHz walkie-talkie channels, too. Probably the vast majority of dual-banders can be modded for MURS and FRS use. Be advised that using them to transmit within those services is illegal.

What's that got to do with anything? No country in the world will let you
bring in weapons as a visitor, much like visitors to the US are not allowed
to carry weapons.

As I pointed out before, gun ownership is perfectly legal in Canada. Don't
make up stuff as you go. As far as felons buying AK47's in Miami, when was
the last time you or anyone you know was assaulted with it? An overwhelming
majority of assault and property crimes are committed with simple or no

weapons. The AK47 parable is an NRA bedtime story for little DC congressmen.

> Your goverment must be composed of gutless frogs like the cowards from
> their homeland who wussed out when we went after the Iraqi's..

"You" went after the Iraqi's (sic) only because that was the order that came from Tel Aviv. Wolfovitz and Rumsfeld arranged it and Cheney and other assholes got rich(er) on the deal. Ordinary Americans got fucked in the process and young boys are still dying there as a result of the bullshit propaganda about a Nigerian nuclear connection, non-existing WMD's, alleged and laughable imminent threat to the US and a made up Al Qaeda connection.

> After the war they want to run things. Screw them..

You think there's going to be anything similar in North Korea which actually *is* a threat to US security, unlike the stupid-ass Ude and Kuse? No fucking way - they're not a threat to Israel.

Ah! Thanks, Gary, excellent point. I'd forgotten that FRS radios
need to be type accepted as well.

Dave, get a clue! YOU posted HERE at ADP, not the other way
around. The "wierd messages" you refer to were, therefore, earned and
deserved. As both a fellow ham radio enthusiast *and* cannabis smoker,
I do know what your "free gear hamfest" comes across as. One word.
SPAM! You've probably been plonked by other amateur radio operators in
the ham newsgroups as well as here at ADP.
In short, you broke a few cardinal rules of Usenet; don't post
personal information and don't post off-topic! Yes, I am well aware
that a quick trip to www.qrz.com will yield the name and address of
anyone who posts their ham callsign (notice I don't post mine, for
obvious reasons!), but that fact is known to few others outside of the
hobby of ham radio and shortwave listening.
So, my advice to you is skip posting ham radio articles to
alt.drugs.pot. You don't see me posting articles on the ham groups,
like "I irradiated my Sensimillia crop with 1294 MHz at 1 KW and
produced the most potent strain of pot known to mankind!", so just let
it go, Dave. Post in on-topic groups. And don't forget, Dave, I walk
among you. I've been licensed in both amateur radio, and commercial
radiotelephone (broadcast, radar, and FAA endorsements) for more years
than I care to recall. I've also been a cannabis activist for a long
time, as well as a frequent smoker for both recreational and medical
reasons.
To my fellow amateurs who have read this post, my apologies if
my off-topicness has upset anyone. This post is to show Dave the error
of his ways in the most friendly and direct way possible. I'm sure he
has learned a valuable lesson today and will go forth and sin no more.
To my fellow smokers here at ADP......well.......smoke 'em if
you got 'em!
73 es cul,

You're really a work of art you arrogant son of a bitch. I guess all of these automotive workers should find other better employment which would be a good thing for assholes like you since you wouldn't have the skill to even put together an automobile. Its the corporatists such as yourself who have screwing over the masses for years and thats why you vote for the Republicans. The Republicans are no better than the Democrats because both parties screw the general population. It was some of your Enron types that filled the Republicans pockets just like the big oil monopolists and the banksters who are screwing over the majority of the American populace. Of course, you have your head shoved so far up Rush Windbags ass that you couldn't see reality.

Power has nothing really to do with it to make it legal.
Any ham radio is not FCC type accepted to transmit on FRS.

I beg to differ. FRS is, by FCC regulation, limited to a maximum
of 500mW ERP, and an antenna that is fixed/non-modifiable. Any
transmitter above that power level on FRS frequencies is very much
illegal.

> Any ham radio is not FCC type accepted to transmit on FRS.

As I found out later after reading the FRS page at the FCC. I had
neglected to mention it before because I was unaware of it.

Do a Google search on "Ralph Boyd" sometime, Skippy. He's a Clinton-appointed Assistant Attorney General, who stayed on with the Bush Administration, and was the one who investigated Palast's "fixed election" in Florida.

Mr. Boyd, who FYI is himself black, found that Palast was, in fact, LYING.

Where's your cite Skippy?

I work in a totally different industry but I did work at one time in an automotive plant. In fact, we weren't unionized and the people in that plant were treated no better than most Southern blacks 50 years ago. The unions are what gave the middle class in this country a voice. Now that all is being taken away and its no wonder why there is so much poverty and problems in the country. Its because the govt and corporates have declared war on the common man.

He is the President of the United States. Not Dubya.

Did you not complete the 4th grade where they taught you how to address the President?

Its also interesting that the State of Texas passed a right to carry concealed weapons law while he was the Governor. Doesn't seem like he is interested in confiscating firearms.

Your story also forgot about how Hitler disbanded the German legislature and he declared himself supreme dictator. As far as I have heard the US congress is still in session, the supreme court is still operating and the armed forces are sworn to uphold and defend the constitution (not just the orders of president).

Of course you should never let the facts get in the way of your conspiracy theories.

George Bush was lawfully elected president of the United States in the electoral college according to the constitution. No president has ever been elected by "majority vote" in this country. Are you suggesting that we ignore the constitution and elect a president by majority vote instead? You complain about rights being violated but clearly you have never read the constitution which gives you those rights.

The Constitution of the United States:
Article II

Section 1. The executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and, together with the Vice President, chosen for the same term, be elected, as follows:

Each state shall appoint, in such manner as the Legislature thereof may direct, a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress: ...

The electors shall meet in their respective states and vote by ballot for President and Vice-President, one of whom, at least, shall not be an inhabitant of the same state with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President, and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice-President, and of the number of votes for each, which lists they shall sign and certify, and transmit sealed to the seat of the government of the United States, directed to the President of the Senate;--The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates and the votes shall then be counted;--the person having the greatest number of votes for President, shall be the President...

Waste of Bandwidth "Agent Smith" <th@t.other.george.sucks.com> wrote in message news:3f8a938b.870867981@feednread...

> Where's your cite Skippy?

From a leak from a Democrat. First, some background on the Dem who did the leaking:

"CNN obtained a copy of the letter Boyd sent to Sen. Patrick Leahy, D-Vermont,"

Remember, Leahy was also cited and punished for leaking CLASSIFED intelligence info back in the 1990s.

"Sen. Patrick Leahy, D-Vt., (then-)vice chairman of the Senate Intelligence Committee, inadvertently disclosed a top secret communications intercept during a [1985] television interview," reported the San Diego Union-Tribune in a 1987 editorial criticizing Congress' penchant for partisan leaks.

"The intercept, apparently of Egyptian President Hosni Mubarak's telephone conversations, made possible the capture of the Arab terrorists who had hijacked the cruise ship Achille Lauro and murdered American citizens," the paper said, adding, "The reports cost the life of at least one Egyptian operative involved in the operation."

In July 1987, the Washington Times reported that Leahy leaked secret information about a 1986 covert operation planned by the Reagan administration to topple Lybian strongman Moammar Gaddhafi.

"I thought [the operation] was probably the most ridiculous thing I had seen, and also the most irresponsible," the leading Intelligence Committee Democrat allegedly said of the secret plan.

Unidentified U.S. intelligence officials told the Times that Leahy, along with Republican panel chairman Sen. Dave Durenberger, communicated a written threat to expose the operation directly to then-CIA Director William Casey.

Weeks later, news of the secret plan turned up in the Washington Post, causing it to be aborted.

Leahy vehemently denied he talked to the press about any of the administration's covert operations, saying, "I never have, and I'm not going to start now."

But just a year later, as the Senate was preparing to hold hearings on the Iran-Contra scandal, the Vermont senator had to resign his Intelligence Committee post after he was caught leaking secret information to a reporter.

The ranking Intelligence Committee Democrat decided to let an NBC reporter comb through the committee's confidential draft report on the scandal. The network aired a report based on the inside information on Jan. 11, 1987.

After a six-month internal investigation, Leahy "voluntarily" stepped down from his committee post, releasing a statement calling his resignation "a suitable way to express ... anger and regret" over his lapse.

Leahy's anger, he said, was at himself, "for carelessly allowing the press person to examine the unclassified draft and to be alone with it."

The Vermont Democrat's Iran-Contra leak was considered to be one of the most serious breaches of secrecy in the committee's 10-year history.

After Leahy's resignation, the Senate Intelligence Committee decided to restrict access to committee documents to a security-enhanced meeting room.

In fact, the final committee report turned out to be considerably different from Leahy's leaked draft.

NewsMax.com first reported those inconvenient details from Leahy's resume in January, when he was leading the charge against Bush Attorney General nominee John Ashcroft.

Now that the Vermont Democrat is up to his hold tricks again, trying to scuttle Mr. Olson's nomination despite stellar character references from Democratic Party legal stars Laurence Tribe and Robert Bennett, perhaps Landmark's request will prompt Chairman Shelby to consider filling in the blanks in Leahy's record.

And this is from a liberal news outlet, no less. When will you idiots ever learn?

http://www.cnn.com/2002/ALLPOLITICS/05/28/justice.florida.voting/

WASHINGTON (CNN) -- The Justice Department has concluded that the vast majority of Floridians were not denied their right to vote during the 2000 presidential elections, and that the few problems that did exist could not have affected George W. Bush's victory, CNN has learned.

"The Civil Rights Division found no credible evidence in our investigations that Floridians were intentionally denied their right to vote during the November 2000 election," Assistant Attorney General Ralph Boyd wrote in a letter to Capitol Hill on Tuesday.

CNN obtained a copy of the letter Boyd sent to Sen. Patrick Leahy, D-Vermont, chairman of the Senate Judiciary Committee. The letter was sent in response to questions submitted following Boyd's appearance before the panel last week.

Justice Department officials declined comment, but confirmed Boyd had sent a letter to the Senate committee.

Boyd appeared May 21 before the committee and disclosed that lawsuits will likely be brought against three Florida counties following an 18-month investigation.

"Let me be clear, the Civil Rights Division's investigations identified only a limited number of Floridians who were unable to vote, a number that does not reasonably cast any doubt on President Bush's several hundred vote margin of victory in Florida," Boyd said.

"We did identify and speak with voters who told us they experienced difficulty while voting," Boyd said. "We also found some localized, but significant pockets of confusion and delay in certain counties, often resulting from lack of language assistance," Boyd said.

"I want to emphasize however that while these conditions may have been significant in some areas, the Civil Rights Division has identified very few voters who actually were prevented from voting or left the polls because of these conditions," he concluded.

The civil rights chief did not identify the three counties where lawsuits are expected to be filed, but said most of the difficulties involved language problems and lack of assistance for Spanish-speaking voters. In one county, two Haitian-speaking voters were denied language assistance, Boyd said.

"I am pleased to say that these three jurisdictions are cooperating in our efforts to address deficiencies in their voting procedures," Boyd said.

"You can change the outcome of any election you want" -Bill Clinton

1310. The Bush Regime is Shortchanging Our Security

Newsgroup: rec.radio.amateur.misc
Date: 2003-08-07 13:51:20 UTC

August 6, 2003
Shortchanging Security

The Associated Press headline picked up by newspapers across the country last week said it all: "Air Marshal Program Could Be Cut, Despite Hijacking Threat." That was not exactly welcome news to millions of Americans at the height of the summer travel season, and the ensuing uproar helped kill the proposed spending cuts. Yet sadly enough, the story line was all too familiar. The Bush administration and Congressional leaders in Washington have been too reluctant to devote enough resources to protect the nation against terrorism.

A sense of complacency at this time would be inexcusable under any circumstances, but it is reckless when intelligence points to the likelihood
of more terrorist attacks on aviation. President Bush called it a "real threat" at his press conference last week. The government is so concerned, it now requires travelers who need a visa to visit the United States to obtain one when merely changing planes here, say, en route to Paris from Rio.

Federal airport screeners and airlines have also been put on notice that Al Qaeda terrorists may be adapting cameras or other electronic devices into weapons. Aviation security has been substantially upgraded since the Sept. 11 attacks, but airliners remain the most alluring terrorist target all the same.

That is why it would be so wrong to roll back the air marshal program now. As the mounting threats were disclosed, a leaked memo from an official with the federal air marshal service cited budgetary concerns in urging regional offices to drop flights requiring overnight stays. The war on terror, apparently, must be waged on a day trip.

On Sunday, appearing on the NBC News program "Meet the Press," Tom Ridge, Homeland Security Secretary, conceded that the juxtaposition of proposed spending cuts and new threats amounted to an "unusual sequence of events." We'll say. He then reassured viewers that there would be no curtailment in the air marshal program that puts thousands of undercover law-enforcement agents on an undisclosed number of flights.

Mr. Ridge did not address the budgetary constraints faced by the Transportation Security Administration, the agency within his department established in the aftermath of the Sept. 11 attacks. The agency has received nearly $1 billion less than it has sought from Congress, forcing layoffs and the postponement of air marshal training.

Inadequate resources have also been devoted to the securing of airport perimeters and cargo facilities, not to mention ports and energy plants. These needs must be addressed.

Wow Great Amateur Radio Topics below
Any chance you all can take this stuff to politics.rant+bash ??
In so much as the FAQ's for this NG states:

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio
was renamed to during the first major reorganization. Any amateur radio-
related message that's not more appropriate in one of the other groups
belongs here, from contesting to DX to ragchewing on VHF to information on
becoming a ham.

(Note the words "AMATEUR RADIO-RELATED"

FAQ's http://faqs.jmas.co.jp/FAQs/radio/personal-intro

Signed
TOROT (Tired Of Reading Off Topics)
Yeah I know -- then don't read them, but it is very disappointing to look at
this NG and see hundreds of OT's and nothing of value for Amateur Radio plus
it gives Amateur Radio a very poor image. For sincere and serious
Amateurs --- Think about it !!

1313. Memo Reveals California Recall as Bush Strategy

Newsgroup: rec.radio.amateur.misc
Date: 2003-08-07 15:02:52 UTC
From: Sidewinder@bush.sucks
Message-ID: <e99f844f6e5822cc9ed6497678cde98d@remailer.frell.eu.org>

While White House and national GOP officials insist they won't get involved in the California recall, a memo obtained by The Chronicle outlines a Republican strategy to oust Gov. Gray Davis and help President Bush before the 2004 presidential election.

The memo by California GOP organizer Julie Leitzell, who heads a political action committee called CommonSense Direction, says the Oct. 7 recall election presents an opportunity to target disaffected voters -- particularly women.

"We will work outside of the campaigns and outside of the party," the memo to Republican activists says. "None of the candidates will be attending, as we want to make sure the media are steered toward the 'common sense women against Davis' angle."

Leitzell's memo clearly suggests the imprimatur of the White House.

"Mindy Tucker, former Bush campaign spokesperson and current Bush campaign operative in California, has the White House's blessing to set the record straight: The person responsible for this recall is sitting behind the governor's desk," the memo says.

Both Tucker and officials at the Republican National Committee denied Tuesday direct involvement and -- mirroring earlier statements by the White House -- said the recall election is "a matter to be decided by the people of California."

A high-level GOP official, speaking not for attribution, characterized the plan by Leitzell, a former communications adviser to 2002 gubernatorial candidate Bill Simon, as the work of an enthusiastic -- but unofficial -- party volunteer.

"To suggest that there is White House involvement in this particular activity would be incorrect," said Tucker, a spokeswoman for Bush's 2000 presidential campaign and former high-level Republican National Committee staff member who is now working full time for the GOP in California.

But, she added, "the president has given everybody in California his blessing to take a position on this . . . and as a Republican woman in California, I feel strongly that Gray Davis has been an awful governor."

Leitzell, reached Tuesday night, downplayed her role in a larger GOP strategy, saying she was a grassroots volunteer who had no connection to the
White House or the Republican National Committee.

But her memo says Tucker, California Republican Party spokeswoman Karen Hanretty, and Tracy Schmitt -- formerly with the RNC and now with the Bush-Cheney 2004 campaign -- "will be coordinating seven simultaneous media-friendly events throughout California, (and) we have been asked to call the Bay Area's attention to just how much Gray Davis will cost us if he were left in office."

The memo states "the resulting issue-oriented and image-enhancing coverage will benefit the image of the Republican Party, the recall candidates, and will benefit President Bush as we remind the public of who is to blame for the mess in this state."

RECEIVES GUIDANCE
Though she said her work is separate from party operations, Leitzell acknowledged she has received guidance from GOP decisionmakers.

"Mindy (Tucker) talks to us occasionally, and she's there to guide us as far
as what we can do, as far as organizing events," she said. "She's there for us, so is Karen (Hanretty) . . . and Tracy (Schmitt)."

With just four days left to file as replacement candidates in the recall election -- and a week before Bush arrives in California for two days of official business and fund raising -- the memo reflects what many Republicans say should be an active approach to take advantage of the recall
in a state that has been dominated recently by Democrats.

While the White House and Bush's chief political adviser Karl Rove "don't have to get involved, they can tell Republicans: Send money, open up your checkbooks," said a senior Republican Party strategist. "Give to Tom, Dick and Harry. Give to (Hustler publisher) Larry Flynt, for all I care. Just give."

Said GOP strategist Sean Walsh: "The Democrats (in California) are going to come unglued, and it's going to bleed over into the presidential race. You can either let the recall drive you -- or you can drive elements of the recall to your advantage."

TRYING TO PICK UP GROUND
Walsh added: "If this recall is going to happen, and Gray has alienated women, you can't fault Republicans for trying to pick up some ground."

The White House and the Republican National Committee leadership have taken pains to distance themselves from the recall because "any involvement . . . would give the Democrats opportunity to tie the White House to this, and say
'it's a Karl Rove-driven conspiracy,' " said a GOP adviser to the White House.

White House advisers and insiders have stressed repeatedly that neither the president nor high-level party officials intend to endorse any candidate in the recall race.

One reason for caution: In the 2002 California's governor's race, the White House backed former Los Angeles Mayor Richard Riordan, only to be embarrassed when the moderate mayor was handily defeated in the GOP primary by Simon, a conservative who was then defeated in November 2002 by Davis.

TIMELY MESSAGE
But Republicans strategists -- including Tucker and Hanretty -- acknowledge the statewide recall will provide an unexpectedly rich, and timely, opportunity to get out the party's message on a stage before California's 15.2 million registered voters as they begin to turn their attention to the next presidential race.

Bush will draw that contrast in campaign events and official visits to San Diego on Aug. 14 and the Los Angeles area on Aug. 15.

"Nothing defines the difference in leadership between Democrats and Republicans than a comparison between the weak, failed leadership of Gray Davis and the very successful leadership of George W. Bush," Hanretty said. "And certainly, every day that Gray is in office is one more day to draw the
distinct comparison with voters."

And Tucker said, "We've identified some areas where the recall will help us build the party -- not only for the recall, but also for '04, which everyone
believes is important."

GOP's strategy memo seeks women's vote
Excerpts from a memo by California GOP organizer Julie Leitzell, outlining Republican strategies to oust Gov. Gray Davis in the recall election:

"How much has Gray Davis cost every family and taxpayer in California? How much more will the bill come to if he is left in office? Whether we were for
or against the recall as a political strategy, it's important that we use this opportunity (and hot news hook) to present an image of diverse Republican women (moms, educators, business owners, students, working women)
united around fiscal responsibility and against the job-killing policies of Davis' regime."

"We will work outside of the campaigns and outside of the party. None of the
candidates will be attending as we want to make sure the media are steered toward the 'common-sense women against Davis' angle. The resulting issue-oriented and image-enhancing coverage will benefit the image of the Republican Party, the recall candidates, and will benefit President Bush as we remind the public of who is to blame for the mess in this state. We are working on getting a big-name female draw for each local event."

I agree. For the political (and other OT posters), you will get a much more sympathetic audience elsewhere.
In fact you might well alienate your cause by repeated OT posting.

Moderated news groups prevent the OT's, at the peril of restricting freedom of speech and stifling creativity -- but all the OT's here is a good example why group moderation is becoming more popular -- see Yahoo groups URL: http://groups.yahoo.com/

For the real Radio Types here, I would suggest not responding to the OT's, otherwise the News Group will end up with no or very little Radio related content -- which this morning it did !!

If you really want to be the envy of all your friends, go to a hearing specialist in your area and have them order you a wireless one - it fits in your ear like a tiny hearing aid - you can hardly see it. It has a bluetooth transmitter that connects to your headphone jack on your radio. It transmits to the hearing aid so you can be listening to your scanner or ham radio and no one will know! Great for church! I'm just kidding...sorta.

Pentagon makes moves to contain complaints from US troops in Iraq
Written by Douglas Quenqua
Published on August 04 2003

WASHINGTON: After several troops made some highly publicized negative comments to the media about the war effort in Iraq, the Pentagon has taken steps to keep the frustrations of both soldiers and their families out of reports.

According to a story in the July 25 edition of Stars and Stripes, the military appears to be curtailing its much-touted embedded-journalist program, which has allowed reporters almost unfettered access to military units throughout the war and occupation.

The 3rd Infantry Division, from where many complaints have arisen, has expelled many of its embedded reporters, and its troops are no longer allowed to talk to the media outside of pre-approved news features.

Lt. Col. Michael Birmingham, 3rd ID spokesman in Baghdad, told the military paper that the division is "no longer embedding for short stays." According to the report, exceptions to the policy have been made for three journalists
who were embedded during the war and have returned to Iraq.

Soldiers' families are also being advised not to complain to the media, according to news reports.

After being told that 3rd ID soldiers would be staying in Iraq longer than expected, families received an e-mail message from a rear-detachment commander warning against contacting the press "in a negative manner regarding the military and this deployment."

The sharpest and most widely reported criticism by troops came on July 16, when a handful of tired and seemingly disillusioned troops from the 3rd ID offered scathing remarks about top Pentagon brass to an ABC News reporter. One called on Secretary of Defense Donald Rumsfeld to resign, and another said, "I've got my own most-wanted list," which included Rumsfeld and President Bush.

Back in the US, there have been several accounts of frustrated military families who are upset about their loved ones' long deployments in Iraq.

Democrats bash Bush in Chicago

August 6, 2003

BY SCOTT FORNEK Political Reporter

Former House Minority Leader Dick Gephardt reminded the crowd at Navy Pier that his father was a Teamster and milk truck driver. North Carolina Sen. John Edwards told them of toiling next to mill workers with "lint in their hair and grease on their faces."

And Massachusetts Sen. John Kerry stressed that he was the only Vietnam veteran among the Democrats hoping to oust President Bush.

"I cannot wait to stand up and remind him that having a skilled Navy pilot land you on an aircraft carrier in a borrowed suit does not make up for losing 3 million jobs," Kerry said. "It does not make up for going back on civil rights. It does not make up for failed economic policies."

BEST AD LIB

"I had a non-union cab driver."
--The Rev. Al Sharpton, explaining to the 2,000 union members in the audience why he arrived at the forum after it had already begun.

WORST AD LIB

"Maybe the first thing I should say, the first thing I will do if I'm elected president is not re-appoint John Ashcroft attorney general of the United States." --Sen. Joseph Lieberman, after Sharpton delivered an impassioned attack on Ashcroft.

The Democratic presidential sweepstakes rolled back into Chicago on Tuesday,
providing nine hopefuls a chance to stress their union credentials, take a few jabs at one another and a lot more at Bush.

"This is the president who has lost the trust of the American people," said Florida Sen. Bob Graham. "This is a president who repeatedly used misleading
information to make the case for a war in Iraq--that I opposed. Some others on this stage tonight supported it. ... Are we really surprised that the man
who as president of the Texas Rangers traded Sammy Sosa is having such trouble running our national economy?"

The Democratic presidential forum, held by the AFL-CIO, was the first time all nine Democrats appeared together in Chicago. In June, seven of the nine appeared at a Rainbow/PUSH forum.

On Tuesday, labor issues were front and center as an estimated 2,000 union members listened to the Democrats square off.

"We must have a commitment from this party that labor will not be treated as
a special interest," said the Rev. Al Sharpton. "Labor is the interest of this party."

Former Illinois Sen. Carol Braun said "organized labor has given us the middle class, and if we're going to fight for the middle class, we've got to
fight for unions."

Gephardt had the most riding on Tuesday's gathering. A fierce opponent of free-trade pacts, the Missouri congressman is considered the only one of the
Democrats with a shot of picking up the labor organization's early backing.

"This administration has declared war on the middle class in this country--83,000 jobs have been lost a month," Gephardt said. "This president
is the Houdini of economics. Three million jobs have disappeared. He's got the worst record since Herbert Hoover."

The AFL-CIO Executive Council will meet today to discuss whether the organization will make an endorsement before the primary.

It has only done so twice in the past 20 years, and both of those Democrats wound up losing the White House, Walter Mondale in 1984 and Al Gore in 2000.

Earlier in the day, Gephardt picked up the endorsement of the United Steelworkers of America, his ninth from a major labor organization. An AFL-CIO endorsement would require the support of two-thirds of its 13 million members.

Singling out unions in the crowd by the color of their T-shirts and touting his role in leading the fight against the North American Free Trade Agreement, Gephardt said "check our records.''

"Check who was there when the fat was in the fire," he said.

But Ohio Congressman Dennis Kucinich pledged to cancel NAFTA and U.S. involvement in the World Trade Organization if he is elected, and he challenged others to make the same pledge.

"My good friend, Dick Gephardt, will you cancel NAFTA? Will you cancel the WTO, which you voted for?" Kucinich asked. "[Former Vermont Gov.] Howard Dean, will you cancel NAFTA? Will you cancel the WTO? ... Answer the question."

Sharpton feigned surprise at the attacks.

"I thought we weren't going to get nasty until at least September," he said.

Asked about his state's right-to-work laws, Edwards went into an emotional description of his family's work in unions.

"My younger brother is a member of the IBEW," he said. "His wife and his family have health insurance because of a union. My mother is a retired member of the letter carriers union. ... This is personal for me."

He closed by telling of working in a mill in North Carolina.

"My father worked in a mill all his life," he said. "I was the first person in my family to go to college, and when I was young, I myself worked in the mills with my father. I will never forget the men and women I saw there with
lint in their hair and grease on their faces, proud of what they were doing--working hard to try to build a better life for their families."

But it was Sharpton who got the only standing ovation, when he told the crowd, "We have an attorney general that can't find corporate-greed criminals but can put every union leader under investigation in the labor movement."

Calling himself "an independent-minded Democrat who wants to pick up the torch of Bill Clinton and Al Gore," Connecticut Sen. Joseph Lieberman defended his support for free trade and drew boos for backing school vouchers.

"I'm going to speak the truth," the former vice presidential nominee said. "I'm going to say what I think is best for America."

The moderate Lieberman attacked Dean as being too liberal on Monday. And on Tuesday, Dean answered by emphasizing his opposition to the war in Iraq, Bush's tax cuts and other GOP policies.

"You can't beat President Bush by trying to be like him," he said. "We tried
that in 2002, and it doesn't work."

I kind of agree with you. Add to this, "fornicators, men who lie with men, kidnappers, liars, false swearers, and whatever other thing is in opposition to the healthful teaching" 1Timothy 1:10"

So murderers are right up there with homos.

The issue is that the Bible says certain things are condemned. If you have a religion that is based on the Bible, then you presumably follow the rules in the Bible.

If your religion doesn't use the Bible, that is OK also.

If you claim to use the Bible as a basis for your religion, and then only use what parts are convenient, then you are an "a la carte" religion, where you pick and choose what you like and what you don't.

Engineers don't like that. That is why most of us here don't like hypocrisy, even if we don't know (or care) what the issue is.

(http://www.m-w.com/cgi-bin/dictionary?va=hypocrisy)

Comments?

And to be faithful to the FAQ of this group, I want to know if anyone has really modeled their own antenna for 60 meters. The FCC requires some records in your "station records." I have done so (I'm using an inverted L for 160).

Is anyone really using a dipole for 60M? Probably ten guys, max. How many QSO's have anyone made? Is it worth the trouble? Follow up to this posting (but change the subject, please).

--
This has to be in the "Subj" for me to get it: 84KJVM7E 08/12/2003

Followups to the group don't need it, any SUBJ works fine.

1327. HELP: Daiwa CN-410 M

Newsgroup: rec.radio.amateur.misc

From: Zeca <peixoto@ispwest.com>
Message-ID: <3F32B5A2.AE4FCAF1@ispwest.com>
Source record: 64297

Hi all,

Picked up a 2nd hand Daiwa CN-410m crossed needle SWR
meter the other day.
I want to re-calabrate it and check it out.
Can anyone help with a circuit diagram or know where I
can get one from?
Maybe the original manual had it in?

Tnx and 73

That's correct! A group of people come here because this place has alot ol likeminded people. I agree!

>
>That's the way Usenet works.

It's more than that Skippy You are over simplifying it.

When a group of likeminded people gets together they are free to share their points of view with the other members of the group. It stimulates healthy
conversation. You may not agree with the conversation or want to get involved. In that case you are free to ignore any posts that intimidate you or
make you uneasy. On the other hand there are people responding to these news bits because it tweaks something in them to respond. Those responses are
what make up conversation Skippy. It's just healthy conversation. If you are not interested, don't respond.....

>If you want to diss President Bush, then go to one of the following:

No, if someone wants to diss President Bush he or she can diss him anywhere they choose. Remember, this is Usenet. The Bush regime hasn't taken it
over yet.

Oh please stop it your making me laugh. Also, be careful, you sound like a Marxist, Mr. Constitutionalist1!

The "common worker" is slitting his/her own throat by demanding higher wages for what is in MOST cases (including the auto industry) a mindless job that takes absolutely NO talent or teachable skill.

They want to make the same money turning bolts that someone with a degree makes. Now let's put this into prospective:
Auto worker = HSD/GED = $40,000 year
Network Engineer = 2 year degree = $28K-$40K
You Liberals are as they say in the ghetto, "off da hook".

This is why the auto industry is outing you old timers and hiring in people at what the job is worth.

Get a grip and look at your own sorry self to find the answers why your a loser and stop blaming others because your too damn lazy!

And by the way, I agree that Rush is a blowhard, but he's pretty much right on target!

Gun, handgun, what's the difference? You can have either or both - they're all legal. What's your fucking problem, anyway? As if a measure of personal freedoms in a country is measured by the amount of thermonuclear weaponry a person can legally own.

What about drugs in the US? Can you legally own ten ounces of Marijuana? No? What about heroin? No? LSD? No? Of course, these are all "bad" and "evil" just like alcohol was in the Al Capone days. Or so your politicians want you to believe. Well, guess what... if you're not free to inject a substance of your own choosing into your own goddamn vein, you don't have much of a freedom, do you? Forfuckssake, even a consensual sex between two adult fags was a crime until a few weeks ago. Prostitution is illegal. Patriot Acts I and II are taking away your personal liberties as we speak. And you keep harping on handguns. Ts, ts, ts...

> Now you Bullsh*t artist, Address my statement above and respond..

You probably mean to say that nobody is addressing the president in
first person where the proper form is to say: "Mr. President".

When talking about the President (addressing him in third person), it
is proper to say: "President Bush", or "the President of the United
States". Never say: "Mr Bush".

Using the term "Dubya" will only show that you are an uneducated hack.
If you want any respect at all you must first show respect for others,
even when you disagree.

The United States of America was not created by the people directly
but rather it was created by consent of the 13 original states. The
number of States has expanded to 50 but the president is still
selected by the states through the electoral college, not by majority
vote of the people. Your vote is still important because it decides
how your State will vote in the electoral college. President Bush won
the majority of the States in the last election. Because some of the
more populated states voted for Gore, he ended up getting slightly
more than 50 percent of the total votes cast in the whole country. As
far as I'm concerned, anyone who says that President Bush was not
properly elected is going against the Constitution and thus is

speaking Treason.

Former Vice President Al Gore
Remarks to MoveOn.org
New York University
August 7, 2003

-AS PREPARED-

Ladies and Gentlemen:

Thank you for your investment of time and energy in gathering here today. I would especially like to thank Moveon.org for sponsoring this event, and the
NYU College Democrats for co-sponsoring the speech and for hosting us.

Some of you may remember that my last formal public address on these topics was delivered in San Francisco, a little less than a year ago, when I argued
that the President's case for urgent, unilateral, pre-emptive war in Iraq was less than convincing and needed to be challenged more effectively by the
Congress.

In light of developments since then, you might assume that my purpose today is to revisit the manner in which we were led into war. To some extent, that
will be the case - but only as part of a larger theme that I feel should now
be explored on an urgent basis.

The direction in which our nation is being led is deeply troubling to me -- not only in Iraq but also here at home on economic policy, social policy and
environmental policy.

Millions of Americans now share a feeling that something pretty basic has gone wrong in our country and that some important American values are being placed at risk. And they want to set it right.

The way we went to war in Iraq illustrates this larger problem. Normally, we
Americans lay the facts on the table, talk through the choices before us and
make a decision. But that didn't really happen with this war -- not the way it should have. And as a result, too many of our soldiers are paying the highest price, for the strategic miscalculations, serious misjudgments, and historic mistakes that have put them and our nation in harm's way.

I'm convinced that one of the reasons that we didn't have a better public debate before the Iraq War started is because so many of the impressions that the majority of the country had back then turn out to have been completely wrong. Leaving aside for the moment the question of how these false impressions got into the public's mind, it might be healthy to take a hard look at the ones we now know were wrong and clear the air so that we can better see exactly where we are now and what changes might need to be made.

In any case, what we now know to have been false impressions include the following:

(1) Saddam Hussein was partly responsible for the attack against us on September 11th, 2001, so a good way to respond to that attack would be to invade his country and forcibly remove him from power.

(2) Saddam was working closely with Osama Bin Laden and was actively supporting members of the Al Qaeda terrorist group, giving them weapons and money and bases and training, so launching a war against Iraq would be a good way to stop Al Qaeda from attacking us again.

(3) Saddam was about to give the terrorists poison gas and deadly germs that
he had made into weapons which they could use to kill millions of Americans.
Therefore common sense alone dictated that we should send our military into Iraq in order to protect our loved ones and ourselves against a grave threat.

(4) Saddam was on the verge of building nuclear bombs and giving them to the
terrorists. And since the only thing preventing Saddam from acquiring a nuclear arsenal was access to enriched uranium, once our spies found out that he had bought the enrichment technology he needed and was actively trying to buy uranium from Africa, we had very little time left. Therefore it seemed imperative during last Fall's election campaign to set aside less urgent issues like the economy and instead focus on the congressional resolution approving war against Iraq.

(5) Our GI's would be welcomed with open arms by cheering Iraqis who would help them quickly establish public safety, free markets and Representative Democracy, so there wouldn't be that much risk that US soldiers would get bogged down in a guerrilla war.

(6) Even though the rest of the world was mostly opposed to the war, they would quickly fall in line after we won and then contribute lots of money and soldiers to help out, so there wouldn't be that much risk that US taxpayers would get stuck with a huge bill.

Now, of course, everybody knows that every single one of these impressions was just dead wrong.

For example, according to the just-released Congressional investigation, Saddam had nothing whatsoever to do with the attacks of Sept. 11.

Therefore,
whatever other goals it served -- and it did serve some other goals -- the decision to invade Iraq made no sense as a way of exacting revenge for 9/11.
To the contrary, the US pulled significant intelligence resources out of Pakistan and Afghanistan in order to get ready for the rushed invasion of Iraq and that disrupted the search for Osama at a critical time. And the indifference we showed to the rest of the world's opinion in the process undermined the global cooperation we need to win the war against terrorism.

In the same way, the evidence now shows clearly that Saddam did not want to work with Osama Bin Laden at all, much less give him weapons of mass destruction. So our invasion of Iraq had no effect on Al Qaeda, other than to boost their recruiting efforts.

And on the nuclear issue of course, it turned out that those documents were actually forged by somebody -- though we don't know who.

As for the cheering Iraqi crowds we anticipated, unfortunately, that didn't pan out either, so now our troops are in an ugly and dangerous situation.

Moreover, the rest of the world certainly isn't jumping in to help out very much the way we expected, so US taxpayers are now having to spend a billion dollars a week.

In other words, when you put it all together, it was just one mistaken impression after another. Lots of them.

And it's not just in foreign policy. The same thing has been happening in economic policy, where we've also got another huge and threatening mess on our hands. I'm convinced that one reason we've had so many nasty surprises in our economy is that the country somehow got lots of false impressions about what we could expect from the big tax cuts that were enacted, including:

(1) The tax cuts would unleash a lot of new investment that would create lots of new jobs.

(2) We wouldn't have to worry about a return to big budget deficits -- because all the new growth in the economy caused by the tax cuts would lead to a lot of new revenue.

(3) Most of the benefits would go to average middle-income families, not to the wealthy, as some partisans claimed.

Unfortunately, here too, every single one of these impressions turned out to
be wrong. Instead of creating jobs, for example, we are losing millions of jobs -- net losses for three years in a row. That hasn't happened since the Great Depression. As I've noted before, I was the first one laid off.

And it turns out that most of the benefits actually are going to the highest
income Americans, who unfortunately are the least likely group to spend

money in ways that create jobs during times when the economy is weak and unemployment is rising.

And of course the budget deficits are already the biggest ever - with the worst still due to hit us. As a percentage of our economy, we've had bigger ones -- but these are by far the most dangerous we've ever had for two reasons: first, they're not temporary; they're structural and long-term; second, they are going to get even bigger just at the time when the big baby-boomer retirement surge starts.

Moreover, the global capital markets have begun to recognize the unprecedented size of this emerging fiscal catastrophe. In truth, the current Executive Branch of the U.S. Government is radically different from any since the McKinley Administration 100 years ago.

The 2001 winner of the Nobel Prize for Economics, George Akerlof, went even further last week in Germany when he told Der Spiegel, "This is the worst government the US has ever had in its more than 200 years of history...This is not normal government policy." In describing the impact of the Bush policies on America's future, Akerloff added, "What we have here is a form of looting."

Ominously, the capital markets have just pushed U.S. long-term mortgage rates higher soon after the Federal Reserve Board once again reduced discount rates. Monetary policy loses some of its potency when fiscal policy
comes unglued. And after three years of rate cuts in a row, Alan Greenspan and his colleagues simply don't have much room left for further reductions.

This situation is particularly dangerous right now for several reasons: first because home-buying fueled by low rates (along with car-buying, also a
rate-sensitive industry) have been just about the only reliable engines pulling the economy forward; second, because so many Americans now have Variable Rate Mortgages; and third, because average personal debt is now at an all-time high -- a lot of Americans are living on the edge.

It seems obvious that big and important issues like the Bush economic policy
and the first Pre-emptive War in U.S. history should have been debated more thoroughly in the Congress, covered more extensively in the news media, and better presented to the American people before our nation made such fateful choices. But that didn't happen, and in both cases, reality is turning out to be very different from the impression that was given when the votes -- and the die -- were cast.

Since this curious mismatch between myth and reality has suddenly become commonplace and is causing such extreme difficulty for the nation's ability to make good choices about our future, maybe it is time to focus on how in the world we could have gotten so many false impressions in such a short period of time.

At first, I thought maybe the President's advisers were a big part of the problem. Last fall, in a speech on economic policy at the Brookings Institution, I called on the President to get rid of his whole economic team
and pick a new group. And a few weeks later, damned if he didn't do just that - and at least one of the new advisers had written eloquently about the
very problems in the Bush economic policy that I was calling upon the President to fix.

But now, a year later, we still have the same bad economic policies and the problems have, if anything, gotten worse. So obviously I was wrong: changing
all the president's advisers didn't work as a way of changing the policy.

I remembered all that last month when everybody was looking for who ought to
be held responsible for the false statements in the President's State of the
Union Address. And I've just about concluded that the real problem may be the President himself and that next year we ought to fire him and get a new one.

But whether you agree with that conclusion or not, whether you're a Democrat
or a Republican -- or an Independent, a Libertarian, a Green or a Mugwump --
you've got a big stake in making sure that Representative Democracy works the way it is supposed to. And today, it just isn't working very well. We all need to figure out how to fix it because we simply cannot keep on making
such bad decisions on the basis of false impressions and mistaken assumptions.

Earlier, I mentioned the feeling many have that something basic has gone wrong. Whatever it is, I think it has a lot to do with the way we seek the truth and try in good faith to use facts as the basis for debates about our future -- allowing for the unavoidable tendency we all have to get swept up in our enthusiasms.

That last point is worth highlighting. Robust debate in a democracy will almost always involve occasional rhetorical excesses and leaps of faith, and
we're all used to that. I've even been guilty of it myself on occasion. But there is a big difference between that and a systematic effort to manipulate
facts in service to a totalistic ideology that is felt to be more important than the mandates of basic honesty.

Unfortunately, I think it is no longer possible to avoid the conclusion that
what the country is dealing with in the Bush Presidency is the latter. That is really the nub of the problem -- the common source for most of the false

impressions that have been frustrating the normal and healthy workings of our democracy.

Americans have always believed that we the people have a right to know the truth and that the truth will set us free. The very idea of self-government depends upon honest and open debate as the preferred method for pursuing the truth -- and a shared respect for the Rule of Reason as the best way to establish the truth.

The Bush Administration routinely shows disrespect for that whole basic process, and I think it's partly because they feel as if they already know the truth and aren't very curious to learn about any facts that might contradict it. They and the members of groups that belong to their ideological coalition are true believers in each other's agendas.

There are at least a couple of problems with this approach:

First, powerful and wealthy groups and individuals who work their way into the inner circle -- with political support or large campaign contributions -- are able to add their own narrow special interests to the list of favored goals without having them weighed against the public interest or subjected to the rule of reason. And the greater the conflict between what they want and what's good for the rest of us, the greater incentive they have to bypass the normal procedures and keep it secret.

That's what happened, for example, when Vice President Cheney invited all of those oil and gas industry executives to meet in secret sessions with him and his staff to put their wish lists into the administration's legislative package in early 2001.

That group wanted to get rid of the Kyoto Treaty on Global Warming, of course, and the Administration pulled out of it first thing. The list of people who helped write our nation's new environmental and energy policies is still secret, and the Vice President won't say whether or not his former company, Halliburton, was included. But of course, as practically everybody in the world knows, Halliburton was given a huge open-ended contract to take over and run the Iraqi oil fields-- without having to bid against any other companies.

Secondly, when leaders make up their minds on a policy without ever having to answer hard questions about whether or not it's good or bad for the American people as a whole, they can pretty quickly get into situations where it's really uncomfortable for them to defend what they've done with simple and truthful explanations. That's when they're tempted to fuzz up the facts and create false impressions. And when other facts start to come out that undermine the impression they're trying to maintain, they have a big incentive to try to keep the truth bottled up if -- they can -- or distort it.

For example, a couple of weeks ago, the White House ordered its own EPA to strip important scientific information about the dangers of global warming out of a public report. Instead, the White House substituted information that was partly paid for by the American Petroleum Institute. This week, analysts at the Treasury Department told a reporter that they're now being routinely ordered to change their best analysis of what the consequences of the Bush tax laws are likely to be for the average person.

Here is the pattern that I see: the President's mishandling of and selective
use of the best evidence available on the threat posed by Iraq is pretty much the same as the way he intentionally distorted the best available evidence on climate change, and rejected the best available evidence on the threat posed to America's economy by his tax and budget proposals.

In each case, the President seems to have been pursuing policies chosen in advance of the facts -- policies designed to benefit friends and supporters -- and has used tactics that deprived the American people of any opportunity to effectively subject his arguments to the kind of informed scrutiny that is essential in our system of checks and balances.

The administration has developed a highly effective propaganda machine to imbed in the public mind mythologies that grow out of the one central doctrine that all of the special interests agree on, which -- in its purest form -- is that government is very bad and should be done away with as much as possible -- except the parts of it that redirect money through big contracts to industries that have won their way into the inner circle.

For the same reasons they push the impression that government is bad, they also promote the myth that there really is no such thing as the public interest. What's important to them is private interests. And what they really mean is that those who have a lot of wealth should be left alone, rather than be called upon to reinvest in society through taxes.

Perhaps the biggest false impression of all lies in the hidden social objectives of this Administration that are advertised with the phrase "compassionate conservatism" -- which they claim is a new departure with substantive meaning. But in reality, to be compassionate is meaningless, if compassion is limited to the mere awareness of the suffering of others. The test of compassion is action. What the administration offers with one hand is the rhetoric of compassion; what it takes away with the other hand are the financial resources necessary to make compassion something more than an empty and fading impression.

Maybe one reason that false impressions have a played a bigger role than they should is that both Congress and the news media have been less vigilant
and exacting than they should have been in the way they have tried to hold the Administration accountable.

Whenever both houses of Congress are controlled by the President's party, there is a danger of passivity and a temptation for the legislative branch to abdicate its constitutional role. If the party in question is unusually

fierce in demanding ideological uniformity and obedience, then this problem can become even worse and prevent the Congress from properly exercising oversight. Under these circumstances, the majority party in the Congress has
a special obligation to the people to permit full Congressional inquiry and oversight rather than to constantly frustrate and prevent it.

Whatever the reasons for the recent failures to hold the President properly accountable, America has a compelling need to quickly breathe new life into our founders' system of checks and balances -- because some extremely important choices about our future are going to be made shortly, and it is imperative that we avoid basing them on more false impressions.

One thing the President could do to facilitate the restoration of checks and
balances is to stop blocking reasonable efforts from the Congress to play its rightful role. For example, he could order his appointees to cooperate fully with the bipartisan National Commission on Terrorist Attacks, headed by former Republican Governor Tom Kean. And he should let them examine how the White House handled the warnings that are said to have been given to the
President by the intelligence community.

Two years ago yesterday, for example, according to the Wall Street Journal, the President was apparently advised in specific language that Al Qaeda was going to hijack some airplanes to conduct a terrorist strike inside the U.S.

I understand his concern about people knowing exactly what he read in the privacy of the Oval Office, and there is a legitimate reason for treating such memos to the President with care. But that concern has to be balanced against the national interest in improving the way America deals with such information. And the apparently chaotic procedures that were used to handle the forged nuclear documents from Niger certainly show evidence that there is room for improvement in the way the White House is dealing with intelligence memos. Along with other members of the previous administration,
I certainly want the commission to have access to any and all documents sent
to the White House while we were there that have any bearing on this issue. And President Bush should let the commission see the ones that he read too.

After all, this President has claimed the right for his executive branch to send his assistants into every public library in America and secretly monitor what the rest of us are reading. That's been the law ever since the Patriot Act was enacted. If we have to put up with such a broad and extreme invasion of our privacy rights in the name of terrorism prevention, surely he can find a way to let this National Commission know how he and his staff handled a highly specific warning of terrorism just 36 days before 9/11.

And speaking of the Patriot Act, the president ought to reign in John Ashcroft and stop the gross abuses of civil rights that twice have been

documented by his own Inspector General. And while he's at it, he needs to reign in Donald Rumsfeld and get rid of that DoD "Total Information Awareness" program that's right out of George Orwell's 1984.

The administration hastened from the beginning to persuade us that defending
America against terror cannot be done without seriously abridging the protections of the Constitution for American citizens, up to and including an asserted right to place them in a form of limbo totally beyond the authority of our courts. And that view is both wrong and fundamentally un-American.

But the most urgent need for new oversight of the Executive Branch and the restoration of checks and balances is in the realm of our security, where the Administration is asking that we accept a whole cluster of new myths:

For example, the Comprehensive Nuclear Test Ban Treaty was an effort to strike a bargain between states possessing nuclear weapons and all others who had pledged to refrain from developing them. This administration has rejected it and now, incredibly, wants to embark on a new program to build a
brand new generation of smaller (and it hopes, more usable) nuclear bombs. In my opinion, this would be true madness -- and the point of no return to the Comprehensive Test Ban Treaty -- even as we and our allies are trying to
prevent a nuclear testing breakout by North Korea and Iran.

Similarly, the Kyoto treaty is an historic effort to strike a grand bargain between free-market capitalism and the protection of the global environment,
now gravely threatened by rapidly accelerating warming of the Earth's atmosphere and the consequent disruption of climate patterns that have persisted throughout the entire history of civilization as we know it. This administration has tried to protect the oil and coal industries from any restrictions at all -- though Kyoto may become legally effective for global relations even without U.S. participation.

Ironically, the principal cause of global warming is our civilization's addiction to burning massive quantities carbon-based fuels, including principally oil -- the most important source of which is the Persian Gulf, where our soldiers have been sent for the second war in a dozen years -- at least partly to ensure our continued access to oil.

We need to face the fact that our dangerous and unsustainable consumption of
oil from a highly unstable part of the world is similar in its consequences to all other addictions. As it becomes worse, the consequences get more severe and you have to pay the dealer more.

And by now, it is obvious to most Americans that we have had one too many wars in the Persian Gulf and that we need an urgent effort to develop environmentally sustainable substitutes for fossil fuels and a truly

international effort to stabilize the Persian Gulf and rebuild Iraq.

The removal of Saddam from power is a positive accomplishment in its own right for which the President deserves credit, just as he deserves credit for removing the Taliban from power in Afghanistan. But in the case of Iraq,
we have suffered enormous collateral damage because of the manner in which the Administration went about the invasion. And in both cases, the aftermath
has been badly mishandled.

The administration is now trying to give the impression that it is in favor of NATO and UN participation in such an effort. But it is not willing to pay
the necessary price, which is support of a new UN Resolution and genuine sharing of control inside Iraq.

If the 21st century is to be well started, we need a national agenda that is
worked out in concert with the people, a healing agenda that is built on a true national consensus. Millions of Americans got the impression that George W. Bush wanted to be a "healer, not a divider", a president devoted first and foremost to "honor and integrity." Yet far from uniting the people, the president's ideologically narrow agenda has seriously divided America. His most partisan supporters have launched a kind of 'civil cold war' against those with whom they disagree.

And as for honor and integrity, let me say this: we know what that was all about, but hear me well, not as a candidate for any office, but as an American citizen who loves my country:

For eight years, the Clinton-Gore Administration gave this nation honest budget numbers; an economic plan with integrity that rescued the nation from
debt and stagnation; honest advocacy for the environment; real compassion for the poor; a strengthening of our military -- as recently proven -- and a
foreign policy whose purposes were elevated, candidly presented and courageously pursued, in the face of scorched-earth tactics by the opposition. That is also a form of honor and integrity, and not every administration in recent memory has displayed it.

So I would say to those who have found the issue of honor and integrity so useful as a political tool, that the people are also looking for these virtues in the execution of public policy on their behalf, and will judge whether they are present or absent.

I am proud that my party has candidates for president committed to those values. I admire the effort and skill they are putting into their campaigns.
I am not going to join them, but later in the political cycle I will endorse

one of them, because I believe that we must stand for a future in which the United States will again be feared only by its enemies; in which our country
will again lead the effort to create an international order based on the rule of law; a nation which upholds fundamental rights even for those it believes to be its captured enemies; a nation whose financial house is in order; a nation where the market place is kept healthy by effective government scrutiny; a country which does what is necessary to provide for the health, education, and welfare of our people; a society in which citizens of all faiths enjoy equal standing; a republic once again comfortable that its chief executive knows the limits as well as the powers of the presidency; a nation that places the highest value on facts, not ideology, as the basis for all its great debates and decisions.

Desperate DNC Socialist Hack "Sidewinder" <Sidewinder@DUHBYA.sucks> wrote in message news:77e8075d44ab50ec8c7e7d9c6e96f70d@remailer.frell.eu.org...

> Former Vice President Al Gore

LOL. At least THIS part is the truth. Albie's teaching college now...

> Remarks to MoveOn.org

MoveOn.org, the group which Al Gore spoke before on Thursday in railing against President Bush, is a far-left organization founded to fight against President Clinton's impeachment which later supported only liberal Democrats for office in 2000, protested against the war with Iraq and opposed removing Saddam Hussein, but is all for "regime change" in the U.S., and held an online primary which the liberal Howard Dean won.

But if you rely on CNN, MSNBC, the Washington Post or the New York Times for your news, you'd have no idea about MoveOn.org's ideology since those outlets deliberately disguised it with misleadingly incomplete descriptions of the group.

CNN's Judy Woodruff tagged it simply as an "Internet political group" and the Washington Post generously relayed how it "advertises itself as an 'online grassroots democracy group.""

FNC, AP and even Reuters, however, on Thursday managed to offer accurate ideological descriptions.

On FNC's Special Report with Brit Hume, Carl Cameron asserted: "Al Gore insists he's not running, but he was ranting to a liberal audience from the left-leaning Internet group MoveOn.org, saying that President Bush has deliberately deceived the American people."

The AP's Richard Pyle wrote: "Gore addressed some 600 members of the liberal activist group MoveOn.org, which earlier this year held an online presidential primary in which Howard Dean, a staunch foe of the war, finished first." See: story.news.yahoo.com

Dane Hamilton of Reuters explained: "Speaking at New York University at an event sponsored by liberal political advocacy group MoveOn.org, Gore said Bush deserved credit for removing Iraqi leader Saddam Hussein from power. But he said the war had no effect on the al-Qaeda network, accused of masterminding the Sept. 11 attacks, except to boost the group's "recruiting activities." See: story.news.yahoo.com

The New York Times avoided an ideological description, but at least reporter Randal Archibald, in a story posted Thursday evening, clued in readers on the group's pro-Clinton origins: "Mr. Gore's advisers said he chose to speak out now to fulfill his vow when he bowed out in December to continue expressing concern about the direction of the country. He asked MoveOn.org, an Internet-based policy group born to rebut the Clinton impeachment, to sponsor the speech several weeks ago, his assistants said."
See: www.nytimes.com

But not even that made it into Washington Post reporter Edward Walsh's August 8 story in which he relayed a very laudatory description: "Gore spoke to an enthusiastic audience of mostly young people who were invited by MoveOn.org, which advertises itself as an 'online grassroots democracy group."" See: www.washingtonpost.com

MSNBC's David Shuster, in a piece which aired Thursday night on a bunch of MSNBC shows, didn't even mention the name of the group before whom Gore spoke and the ABC, CBS and NBC evening shows held themselves to brief summaries of Gore's points without going into anything about MoveOn.org.

On CNN's Inside Politics, however, the group was twice described simply as an "Internet political group." Judy Woodruff set up CNN's August 7 story at the very end of a special Schwarzenegger-inspired 90-minute Inside Politics:
"Well, there is one other story we want to share with you, and that is that Al Gore still says he will not seek a rematch against President Bush. But he is sounding more and more like a man who's running for office. He addressed the Internet political group known as MoveOn.org today and he pulled no punches during his speech."

CNN's Maria Hinojosa played a series of Gore soundbites and then observed: "The audience, members of an Internet activist group called MoveOn.org, say they want more Gore."
Eli Pariser, MoveOn.org: "I think it validates the concern that so many Americans are feeling."
Hinojosa: "And there was at least one person still has hopes the former VP will change his mind."
Sherri Rosen, MoveOn.org member: "I mean, Schwarzenegger just did it. He just changed his mind. And so did Jerry Springer. So why can't he change his mind and say he's going to run?"

If you have any doubts about MoveOn.org's liberalness, just check their home page: www.moveon.org

One section highlights their latest crusade:
"The President took the nation to war based on his assertion that Iraq posed an imminent threat to our country. Now central pieces of that evidence have turned out to be false, but many Members of Congress are refusing to seriously investigate.
"Three weeks ago, MoveOn launched a petition asking Congress to create an independent commission to investigate whether the Bush Administration manipulated and distorted evidence to take the country to war in Iraq. Now

Congress is literally taking up our call: Rep. Henry Waxman (D-CA) has written a bill that would create just such a commission, and it's already co-sponsored by a wide array of moderate Democrats -- including many who voted for the war. This commission can really happen -- and the truth about the Bush Administration's manipulation of evidence can really come out -- but we'll need your help...

For their Regime Change Begins at Home poster: www.moveon.org

And for a list of the candidates their PAC supported in 2000, all liberal Democrats: www.moveon.org

Despair of the Jobless

By BOB HERBERT

The folks who put the voodoo back in economics keep telling us that prosperity is just around the corner.

For the unemployed, that would mean more jobs.

Are there more jobs just around the corner?

This alleged economic upturn is not just a jobless recovery, it's a job loss recovery.

The hemorrhaging of jobs in the aftermath of the recent "mild" recession is like nothing the U.S. has seen in more than half a century.

Millions continue to look desperately for work, and millions more have given up in despair.

The stories have been rolling in for some time about the stresses and misfortunes that are inevitably associated with long-term joblessness: the bankruptcies, foreclosures and evictions, the dreams deferred, the mental difficulties -- anxiety, depression -- the excessive drinking and abuse of drugs, the family violence.

There are few things more miserable than to need a job and be unable to find one.

How bad is it?

The Economic Policy Institute in Washington reported last week that "since the business cycle expansion began in November 2001, payrolls have contracted by 1 million (1.2 million in the private sector), making this the weakest recovery in terms of employment since the [Bureau of Labor Statistics] began tracking monthly data in 1939."

John A. Challenger, who runs the outplacement firm Challenger, Gray & Christmas, said it is taking an average of 20 weeks for job seekers to find employment, and many are unable to match their previous salary. "Employers have all the cards," he said.

"Not only are they sharpening their salary pencils, but the screening of candidates is probably the toughest it has ever been."

The official jobless rate, now 6.2 percent, does not come close to reflecting how grim the employment situation really is.

The official rate refers only to those actively seeking work.

It does not count the "discouraged" workers, who have looked for jobs within the last 12 months but have given up because of the lack of offers.

Then there are the involuntary part-timers, who would like full-time jobs but cannot find them.

And there are people who have had to settle for jobs that pay significantly less than jobs they once held.

When you combine the unemployed and the underemployed, you are talking about a percentage of the work force that is in double digits.

That's an awful lot of lost purchasing power for a society that needs broad-based wage growth among its consumers to remain economically viable.

Most Americans depend on their paychecks to get from one week to the next. If you cut off that paycheck, everything tends to go haywire.

Right now there is no plan, no strategy for turning this employment crisis around.

There is not even a sense of urgency.

At the end of July the Bush administration sent its secretaries of commerce, labor and treasury on a bus tour of Wisconsin and Minnesota to tell workers that better days are coming.

But they offered no real remedies, and the president himself went on a monthlong vacation.

The simple truth is that the interests of the Bush administration's primary constituency, corporate America, do not coincide with the fundamental interests of workaday Americans.

On the business side of this divide, increased profits are realized by showing the door to as many workers as possible, and squeezing the remainder to the bursting point.

Productivity (based primarily on improvements in technology) is way up. Hiring, of course, is down.

Part-time and temporary workers are in; full-time workers with benefits are out.

And then there's the ominous trend of sending higher-skilled jobs overseas to low-wage places like India and China, an upscale reprise of the sweatshop phenomenon that erased so many U.S. manufacturing jobs over the past quarter century.

Working Americans need jobs just to survive.

But the Bush administration equates the national interest with
corporate interests, and in that equation workers can only lose.

There are ways to spark the creation of good jobs on a large scale in
the U.S. (I will explore some of them in a future column.)

But that would require vision, a long-term financial investment and,
most important, a commitment at the federal level to the idea that it
is truly in the nation's interest to keep as many Americans as
possible gainfully employed.

1351. "Mission Accomplished" At least 11 People Killed by Truck Bomb in Baghdad

Newsgroup: rec.radio.amateur.misc
Date: 2003-08-08 18:46:26 UTC
From: Sidewinder@DUHBYA.sucks
Message-ID: <8a5f68cd45d68c374dcea6214f0e8bf6@remailer.frell.eu.org>
Source record: 64321
Cross-posted to: rec.radio.amateur.misc,rec.radio.scanner,rec.radio.shortwave

Jordan's Iraq embassy attacked
At least 11 people have been killed by a truck bomb outside the Jordanian embassy in Baghdad.
Some of those killed are thought to have been in cars parked close to the embassy.

The Jordanian Information Minister, Nabil al-Sharif, called the attack - in which the bomb appears to have been concealed inside a minibus or sports utility vehicle - a "cowardly terrorist" act.

In a separate incident on Thursday an American forces Humvee vehicle was blown up by what was reported to be a rocket-propelled grenade.

A firefight broke out between US troops and unknown attackers and one injured American soldier was seen being carried from the scene.

On Wednesday two American soldiers died in a firefight in the al-Rashid district of Baghdad.

In Washington, Secretary of State Colin Powell admitted US troops still had much to do bring the situation under control in Baghdad and blamed Iraqi fighters loyal to ousted leader Saddam Hussein and "some from the outside" for the unrest.

'Very hard'

The attack on the Jordanian embassy reduced the front of the building to rubble and shrapnel was found as far as 1,000 metres from the scene and on nearby rooftops. Human remains were visible in a compound close to the embassy.

A Jordanian official said he thought a missile was fired at a car to set off
a load of explosives packed inside.
It is unclear how many people were injured in the blast, with reports suggesting about 50 people were rushed to hospital.

A US army spokesman said 130-230 kilograms (300-500lb) of explosives were probably used in the bomb.

"I saw a long vehicle approach the embassy," police officer Hekmat Ibrahim told the AFP news agency as he was leaving the nearby Iskan children's hospital, his head bandaged.

"I heard a huge explosion. I was blown back and I fell unconscious."

An Iraqi embassy guard being treated at another hospital, Shaheed Mazloum, said he had heard two explosions.

"I was sitting in the reception," he told news agency AP.

"I heard the first explosion. I ran out and then there was another explosion. Many employees were inside the embassy as well as Iraqis and Jordanians. Smoke filled the street," he said.

After the embassy explosion, dozens of angry Iraqis stormed the building, smashing portraits of Jordan's King Abdullah II and his father King Hussein.
The crowd was quickly dispersed by US soldiers and Iraqi police.

No one has claimed responsibility for the attack but an investigation has begun.

Correspondents say the groups responsible for the regular attacks against US
troops in Iraq are almost certainly behind this incident.

Iraqi resentment

In past years Jordan has found itself caught in the middle of Iraq's relations with the West, says our Baghdad correspondent Matthew Price.

Many Iraqis believe Jordan took advantage of tough UN sanctions on Iraq, acquiring cheap oil from the oil-for-food programme, while offering tacit support to Saddam Hussein's regime.

Last week Jordan granted refuge to two of Saddam's daughters and their children. However, it has frequently been reluctant to offer fleeing Iraqis similar sanctuary, Iraqis complain.

Jordan also supported the recent US-led war in Iraq. US troops used Jordanian territory for bases.

Jordan is thus resented both by Iraqis who opposed Saddam's regime and those
who supported it, our correspondent says.

1358. Bush Approval Slips to 53% - Fix Economy, Say Voters

Newsgroup: rec.radio.amateur.misc
Date: 2003-08-08 20:43:15 UTC
From: Sidewinder@DUHBYA.sucks
Message-ID: <f15ba97f386ff15f542d46f76ee667db@remailer.frell.eu.org>
Source record: 64328
Cross-posted to: rec.radio.amateur.misc,rec.radio.scanner,rec.radio.shortwave

Released: August 7, 2003

War Bounce Smaller Than for Bush Sr.

A 53% majority approves of the job George W. Bush is doing as president while 37% disapprove.

That is the highest negative rating the president has received since taking office.

After reaching a peak of 86% just after the Sept. 11, 2001 terrorist attacks, the president's approval rating declined through much of 2002 and early 2003, before rallying to 74% during the war in Iraq.

This spike was shorter in duration and smaller in size than the one experienced by Bush's father, former President George H. W. Bush, after the 1991 Persian Gulf War.

Prior to the start of the war in December 1990, Bush Sr. was at 61% in the polls, and rose to a peak of 86% after the conclusion of hostilities.

His approval rating fell afterwards, but did not reach prewar levels until November of 1991.

By contrast, George W. Bush was at 55% in mid-March and rose to 74% approval around the time of the fall of Baghdad in early April.

He has now fallen back to prewar levels, five months later.

Republicans remain steadfast in their support of the president, with 91% approving of his performance and only 6% disapproving.

But ratings among both Democrats and independents have continued their downward slide.

Just 30% of Democrats say they approve of the president's performance, the lowest level since before Sept. 11, 2001.

Independents are more positive than Democrats, but they are closer in their views to the Democrats than to Republicans.

Just under half of independents now approve (48%), which also is their lowest level in the post-9/11 period.

As recently as June, nearly six-in-ten independents (59%) approved of the Bush's job performance.

The president's approval ratings showed no significant uptick as a result of the U.S. military raid in Iraq in which Saddam Hussein's sons, Uday and Qusay, were killed.

Along with increasing disapproval of his job performance, the president is facing a public expressing a growing degree of dissatisfaction with the way things are going in the country.

The poll finds 53% dissatisfied with the state of the nation, while 40% are satisfied.

The 40% satisfaction essentially matches the low points in the national mood experienced just prior to Sept. 11, 2001 and again in September 2002.

There is a strong partisan tilt to these results; 64% of Republicans are satisfied with the way things are going, compared with only 25% of Democrats.

More Want Greater Focus on Economy

The survey also finds a dramatic increase in the percentage of the public who say that it is more important for Bush to focus on the economy rather than on the war on terrorism.

Growth in the importance of the economy in the public's mind has occurred across the political and economic spectrum.

More than two-thirds of blacks (69%) rate the economy a more important presidential priority than terrorism compared with 55% of whites.

But concern among both groups grew by nearly 20 points since January.

Similarly, more Republicans and Democrats say Bush should focus more attention on the economy than did so in January, but large partisan differences persist.

Republicans are divided on the question (43% say it is more important for the president to focus on the economy, 40% say war on terrorism) while Democrats overwhelmingly say the economy should be the focus (70% economy/ 18% war on terrorism).

Opinion that the president should focus on the economy grew 28 points among young people (age 18-29); they are now the age group with the greatest concern about the economy.

Bush's Lead Slips

A plurality of registered voters say they would like to see the president reelected in 2004, but his advantage over a hypothetical Democrat is declining.

In the current poll, 43% say they prefer Bush compared with 38% who prefer a Democrat.

Bush led by 47%-37% in a poll taken last month.

In April, just after the fall of Baghdad, Bush's lead stood at 14 points (48%-34%).

Bush is still doing better among Republicans than the hypothetical Democrat is doing among Democrats, but there is evidence that Democratic voters - and traditional Democrat-leaning demographic groups - are coming home.

In addition, the president has lost ground among independents, who are now divided between Bush and a Democratic candidate (34% for Bush, 33% for a Democrat).

Women, especially older women, liberals and middle- and low-income Americans have moved away from Bush.

In April there was no gender gap in preferences for 2004, with men favoring Bush by 48% to 35% and women favoring him 48% to 34%.

Today, the preferences of men are nearly unchanged (49% Bush, 32% a Democrat), while a plurality of women now support a Democrat (44% Democrat vs. 37% Bush).

Much of the shift has come from women age 50 and older.

In April, a 52% majority of women age 50 and older favored Bush's reelection.

In the current survey, only about a third (35%) support his reelection while 45% prefer a Democrat.

Similarly, the economic gap in presidential preferences is now much wider than in April.

A solid majority (55%) of voters with annual family incomes of greater than $50,000 continue to support Bush's reelection.

That compares with only about a third (34%) of voters with annual household incomes of less than $50,000.

In April, a 46% plurality of this group backed Bush's reelection; today, a comparable plurality (45%) backs the Democrat.

Iraq: Growing Pessimism

Faced with a steady stream of reports of American casualties in Iraq, an increasing percentage of the public thinks the military effort is not going well.

The belief that the U.S. made a mistake in launching the war also has grown, though much more slowly.

More than a third of the public (35%) now believes the military effort is going "not too well" (24%) or "not at all well" (11%).

This total is up 14 points from a survey conducted June 19-July 2 (21%).

Currently, only 19% say the war is going "very well," though 43% say it is going "fairly well."

But a large majority of the public continues to regard the decision to go to war as a sound one.

By more than two-to-one (63% to 30%), respondents say that using military force in Iraq was the right decision.

The number who say that the war was the wrong decision has risen six points since the early July survey (from 24% to 30%).

Republicans continue to believe that the war was the right thing to do; 90% still feel that way, compared with 93% in late April.

But many more Democrats and independents express reservations about the war.

After the fall of Baghdad in April, a majority of Democrats (59%) felt that the war was the right decision; now just 46% feel this way.

A majority of independents continue to say the U.S. did the right thing (61%), but this is down 12 points since April, when 73% felt this way.

The current survey was underway when American military forces killed Saddam Hussein's sons on July 22; respondents interviewed after this event were somewhat more positive about the progress of the war: prior to the event, 36% said the war is not going well, compared with 31% who felt this way after the news reports about it.

Attitudes about the wisdom of the decision to go to war were unaffected by the killing of the Hussein sons.

Head on over to news.admin.net-abuse.usenet and check out the Subject "Speaking of Usenet Abuse by Cotse users" or click here news:iMSdnVChLu5qvq6iXTWJkA@comcast.com and then click here news:MPG.199d2461826bb125989b57@news.supernews.com for Steve's response.

You'll see that the troll who was posting the off-topic political articles in these groups has been warned by Cotse to stop disrupting these groups or get their account termed.

This proves that if people are truely serious about ridding these groups of this troll, it can be done if it's done in appropriate ways.

As of 8/8/03 the troll is posting off-topic political articles to rec.radio.scanner, rec.radio.shortwave & rec.radio.amateur.misc impersonating as 'Sidewinder' via the frell.eu.org remailer and responding to his own posts impersonating as 'GM' via Altopia.

All abuse to these groups by the troll should be refered to abuse@remailer.frell.eu.org and abuse@alt.net, plus bringing attention to all of the trolls posts in news.admin.net-abuse.usenet should clear the problem up, but only if you're serious about it and only if the admin's of these remailers are as serious about the problem as Mr. Gielda is.

'We don't feel like heroes anymore'

08/05/03

Isaac Kindblade

I am a private first class in the Army's 671st Engineer Company out of Portland. I just wanted to let you know a little bit of what we are up to, maybe so that you can have another opinion of what's going on over here in Iraq.

We have been in country since Feb. 14 and were a part of the Third Infantry Division's march into Baghdad. In fact, as a result of some serious miscommunications, we were the front line of the charge on two very distinct
occasions.

We haven't been a huge part of the war. We are bridge builders, and we were here in the event that the Iraqis blew up the bridges on their retreat. They
didn't, so we didn't have to do much.

We were scheduled for 13 missions at the start of the war. We did three or four bridge-related missions. We fill in where we are needed, whether it be guarding enemy prisoners of war, operating traffic control points, patrols on the Tigris River or guard duty of police stations. Our primary mission at
this point is transportation, because we happen to drive very large trucks.

A lot is being said about poor morale. That seems to be the case all over the place. It's hot, we've been here for a long time, it's dangerous, we haven't had any real down time in months and we don't know when we're going home.

I think a big aspect has been the people here. When the war had just ended, we were the liberators, and all the people loved us. Convoys were like one long parade. Somewhere down the line, we became an occupation force in their
eyes. We don't feel like heroes anymore.

We are doing the best we can, trying to get this place back on its feet so we can go home -- making friends with the locals and trying to enforce peace
and stability.

A lot is made of our military's might. Our Abrams tanks, our Apache helicopters, computers, satellites, this and that. All that stuff is great, but it's essentially useless in peacekeeping ops. It is up to the soldiers on the ground armed with M-16s and a precious few words of Arabic.

The task is daunting, and the conditions are frightening. We can't help but think of "Black Hawk Down" when we're in Baghdad surrounded by swarms of people. Soldiers are being attacked, injured and killed every day. The rules
of engagement are crippling. We are outnumbered. We are exhausted. We are in
over our heads.

The president says, "Bring 'em on." The generals say we don't need more troops. Well, they're not over here.

It would take a group of supermen to do what's been asked of us. Maybe people back home think we are. Hell, maybe we are. I'm 20, and I can't help but think that serving in a war is a rite of passage, earning my generation a place in the history books.

I'm honored to be over here, and I realize that this is the experience of a lifetime. All the same, we are ready to come home. Pfc. Isaac Kindblade of Cornelius enlisted in the Army at age 17 before his graduation from Valley Catholic High School in Beaverton.

> Released: August 7, 2003

LOL. "Released", he says. Yet he provides NO cite for the poll, like who conducted it. Nor does he provide a link. You really should do those two things in the future. Otherwise, you look like a dumb Algore voter. Did you know Al won the high school dropout vote convincingly in 2000?

> A 53% majority approves of the job George W. Bush is doing as
> president while 37% disapprove.

Ahh, OK. This is the PEW poll. Sorry to say, this is NOT the most RECENT poll. That would be the new Gallup Poll, done August 6-8, which has him at 60%-up 2 from their previous. The most recent Fox News Poll (and before you start with the "Faux News" bullshit, need I remind you that FNC routinely had Bill Clinton's job approval HIGHER than Gallup) had him at 59% on July 28-29. NBC had him at 56% as of the same date, Newsweek had him at 57%, and even French pollsters Ipsos-Reid, who historically poll at least 5 points below all the others, had him at 54.

http://www.pollingreport.com/BushJob.htm

In addition, normally the public opinion polls are done over a 2 or 3 day period. ALL of the ones in the url above, with the exception of Pew, were in fact conducted over 2 to 3 day periods.

But this Pew poll was done over a period of 3 WEEKS (July 14 to August 5th). Different methodology equals different results. A poll is supposed to be a "snapshot in time", but Pew obviously decided the results they were getting weren't what they wanted them to be, so they extended the time span of their polling until they got the results they wanted. Shame on them, they used to be one of the better polling outlets out there.

"You can change the outcome of any election you want" -Bill Clinton

That is actually not correct. GMRS licensees routinely use 5w on many
FRS frequencies. See http://www.gmrsweb.com/gmrsinter.html

>
>
>>Any ham radio is not FCC type accepted to transmit on FRS.

That is true.

August 7, 2003
Despair of the Jobless
By BOB HERBERT

The folks who put the voodoo back in economics keep telling us that prosperity is just around the corner. For the unemployed, that would mean more jobs. Are there more jobs just around the corner?

This alleged economic upturn is not just a jobless recovery, it's a job loss
recovery. The hemorrhaging of jobs in the aftermath of the recent "mild" recession is like nothing the U.S. has seen in more than half a century. Millions continue to look desperately for work, and millions more have given
up in despair.

The stories have been rolling in for some time about the stresses and misfortunes that are inevitably associated with long-term joblessness: the bankruptcies, foreclosures and evictions, the dreams deferred, the mental difficulties - anxiety, depression - the excessive drinking and abuse of drugs, the family violence. There are few things more miserable than to need
a job and be unable to find one.

How bad is it? The Economic Policy Institute in Washington reported last week that "since the business cycle expansion began in November 2001, payrolls have contracted by 1 million (1.2 million in the private sector), making this the weakest recovery in terms of employment since the [Bureau of
Labor Statistics] began tracking monthly data in 1939."

John A. Challenger, who runs the outplacement firm Challenger, Gray & Christmas, said it is taking an average of 20 weeks for job seekers to find employment, and many are unable to match their previous salary. "Employers have all the cards," he said. "Not only are they sharpening their salary pencils, but the screening of candidates is probably the toughest it has ever been."

The official jobless rate, now 6.2 percent, does not come close to reflecting how grim the employment situation really is. The official rate refers only to those actively seeking work. It does not count the "discouraged" workers, who have looked for jobs within the last 12 months but have given up because of the lack of offers. Then there are the involuntary part-timers, who would like full-time jobs but cannot find them.

And there are people who have had to settle for jobs that pay significantly less than jobs they once held.

When you combine the unemployed and the underemployed, you are talking about a percentage of the work force that is in double digits. That's an awful lot of lost purchasing power for a society that needs broad-based wage growth among its consumers to remain economically viable. Most Americans depend on their paychecks to get from one week to the next. If you cut off that paycheck, everything tends to go haywire.

Right now there is no plan, no strategy for turning this employment crisis around. There is not even a sense of urgency. At the end of July the Bush administration sent its secretaries of commerce, labor and treasury on a bus tour of Wisconsin and Minnesota to tell workers that better days are coming.
But they offered no real remedies, and the president himself went on a monthlong vacation.

The simple truth is that the interests of the Bush administration's primary constituency, corporate America, do not coincide with the fundamental interests of workaday Americans. On the business side of this divide, increased profits are realized by showing the door to as many workers as possible, and squeezing the remainder to the bursting point. Productivity (based primarily on improvements in technology) is way up. Hiring, of course, is down. Part-time and temporary workers are in; full-time workers with benefits are out.

And then there's the ominous trend of sending higher-skilled jobs overseas to low-wage places like India and China, an upscale reprise of the sweatshop phenomenon that erased so many U.S. manufacturing jobs over the past quarter century.

Working Americans need jobs just to survive. But the Bush administration equates the national interest with corporate interests, and in that equation workers can only lose.

There are ways to spark the creation of good jobs on a large scale in the U.S. (I will explore some of them in a future column.) But that would require vision, a long-term financial investment and, most important, a commitment at the federal level to the idea that it is truly in the nation's interest to keep as many Americans as possible gainfully employed.

Ask him personally, I believe his email address is president@whitehouse.gov

Or, alternatively you might wish to contact the Secret Service.

Don't ask us, we don't know.

Congrats on killing another one of the troll's abuse channels. Now
that he's been blocked by the Frog remailer and by Cotse, things are
slowly getting tougher for him. It's like slowly choking off a
terrorist network; it takes time and patience. His Altopia channel
should be next.

For those of you who missed the post by Gielda, here it is again:

Actually this one is beyond a troll. Excessive morphing and posting
substantively identical articles. Granted each one is a news story, but
the articles contain only text from news stories and if the user wants
that posted he should post it as links all in a single post rather than
as 20 separate posts each just containing a news story. It's a slightly

gray issue of BI, but we decided that it was abusive if continued and because it is gray warned our user first.

I believe he has people to do his scanning for him.

the group is called the NSA. I hear they give him a daily report on
what they heard.

Her "cover" must have not been too good if everyone in the Executive
Branch knew who she was. If the mission was properly
"compartmentalized" then no one would know who she was except the
people who needed to know. Senior White House Officials don't need to
know the names of spies. They just need the information collected.
Either Wilson and Valerie Plame are outrageously incompetent or this
is yet another internet conspiracy theory.

1381. TS-830s to VFO-230

Hi All:

I have a Kenwood TS-830s and the matching VFO-230, but I don't have the cable to connect them. Does anyone know where I can get the cable to connect them, or where I can get the pin out and connectors so I can make my own cable.

Please remove the obvious when responding directly.

Thanks in advance,
Bob--KD8WU

Yes, that would be him. The same guy who would have been president
but couldn't even carry his own home state. The people who know him
best wouldn't even vote for him. he's irrelevant.

Oh, I see. They're no longer relevant either.

"When a reputable newspaper lies, it
poisons the community. Every other
newspaper story becomes suspect.
Anyone stung by a newspaper story feels
emboldened to call it a lie. Facts are not
only impugned but made impotent. . . .
The lie--the fabricated event, the made-up
quote, the fictitious source--is the
nightmare of any respected newsroom.
It is intolerable not only because it
discredits publications but because it
debases communication, and democracy."

The New York Times - April 17, 1981

No, GMRS uses 5W on GMRS frequencies that happen to be
SHARED with FRS. The radios that cover both the GMRS unique
and FRS unique frequencies will ONLY use FRS power levels on
the FRS unique frequencies.

that is a common misconception, most retail place sell what they call frs
when if fact the are gmrs..but correct you are .... gmrs channel 1 thru 7
are used as gmrs radio. with a diffrent deveiation that is why frs does not
sound as good a gmrs radio.

Bob,

Martin has the service manual for the TS-830 and the TS-230 on his web site, which you can down load. These will give you all the details and more. His web site is http://myweb.tiscali.co.uk/martin.atwsm/TS830S.html

Hope it helps.

PS: I am still on the look out for a VFO-230 myself, there seem to be rare this side of the pond.

Greg (G1CPU)

Voices of Freedom: 100 Liberation Quotes:

"I can honestly say now that I'm proud to be an Iraqi. Because of what
has happened, because there is freedom here like I have not known
before. Now I can talk-to you, to people I could never talk to before.
I am a simple man. I am just a worker. But even these simple
things-talking-give me hope."
Khalid Nemah, an Iraqi taxi driver, Chicago Tribune, 8/05/03

"Iraqis are very thirsty to learn what is happening outside of Iraq."
Abbas Darwish, owner of a Baghdad shop that sells newspapers, The New
York Times, 8/05/03

"You never knew who was sitting next to you. In the past no one would
dare to just speak out. Now everybody is talking. About federalism,
about a monarchy. ... I think our aims are just one, to eliminate
persecution for anyone ever again."
Jafar Adel Amr, a tool salesman in Iraq, Chicago Tribune, 8/05/03

"Freedom is much sweeter. I can get up in the morning and decide
whether I want to shave or not; if someone in my family is sick, I can
stay home with them. I don't need to ask permission."
Salim Kasim, one of Uday's chief mechanics, Los Angeles Times, 8/02/03

"We didn't believe these things, but we had to say them. Saddam was
there in all the books, even the math books."
Ghada Jassen, a fifth grade teacher in Iraq, Chicago Tribune, 7/31/03

"We don't want patriotic education anymore. Nothing about war. We want
flowers and springtime in the texts, not rifles and tanks."
Dunia Nabel, a teacher in Baghdad, Chicago Tribune, 7/31/03

"We have full freedom to print anything we want. The coalition doesn't
interfere in our work but, of course, we have our own red lines."
Ishtar el Yassiri, editor of the new satirical Iraqi newspaper Habez
Bouz, Financial Times (London), 7/31/03

"It is like the soul coming back to the body."
Ibrahim Abdullah, a refugee returning to Iraq, The Times (London),
7/31/03

"The tension is reducing every day. We are seeing a change. People are starting to realize that the soldiers are not here to occupy Fallujah forever-they're here to help us rebuild."
Taha Bedawi, mayor of Fallujah, The Washington Post, 7/29/03

"It's a chance to defend our country for our people. It's good to work with the American soldiers. They give us new training and a mutual respect."
Omar Abdullah, a recruit for Mosul's newly formed joint security group, Associated Press, 7/29/03

"We're happy, we're rid of Saddam Hussein; the torture and executions of 35 years are over. We should wait to see what the Americans will do."
Ahmed Abdel-Sahib, in Najaf, The Washington Post, 7/28/03

"There is a certain harmony. But you can not rebuild a city or country-a country destroyed by war-in one month."
Mohammed Tahar al-Abid Rabu, a member of the Mosul city council, Agence France Presse, 7/28/03

"For the first time I feel really free."
Latif Yahia, Uday's former double, after hearing of Uday's death, Agence France Presse, 7/26/03

"The Iraqi people have got rid of two of the biggest criminals in history. Their victims and the sons of their victims, who lived for 35 years under oppression, are feeling proud and happy."
Muwaffak al-Rubaiei, a member of the Iraqi Governing Council, Agence France Presse and Reuters, 7/25/03

"We are more free nowadays. My father gave me the full freedom to marry whom I choose."
Raina Nuri, a woman in Baghdad, Christian Science Monitor, 7/25/03

"We felt better after the regime fell, now we are really happy-we have been freed from our nightmare."
Alaa' Kathem, an Iraqi soccer player who had been punished for losing games, Financial Times (London), 7/24/03

"Iraq is now free from torture. Free from Uday."
Amu Baba, a legendary soccer star in Iraq, Los Angeles Times, 7/24/03

"We feel safer now because we used to hear lots of stories about girls. We were so afraid to go out in case Uday saw us."
Farrah, a 15-year-old Iraqi girl, Newsday (New York), 7/24/03

"My father died because of Saddam. I don't want to speak about the reasons. But I was so happy. I was at home when I saw it on the TV. I woke up my aunts and told them the good news. I used to hate those guys so much and so I felt so at ease in my heart."
Osama Zaid, a distant cousin of Uday, after learning of Uday's death, Newsday (New York), 7/24/03

"Even the blind can see what Saddam Hussein did, taking Iraq into so many wars and doing little even for this town, no sports club, no decent hotels."
Wail al-Ali, Tikrit's new mayor, The Guardian, 7/22/03

"We are flying with happiness since Saddam is gone."
Zahar Hassan, in Iraq, Agence France Presse, 7/21/03

"There's more opportunity, more chances to earn money."
Um Khalid, on life in post-Saddam Baghdad, The Christian Science Monitor, 7/21/03

"[Uday] was a bad man, and he used to beat the soccer players if they lost a game. I think he used to treat the lions better than the people."
Mussab Ismas, a 13-year old boy, viewing Uday's lions at the Baghdad zoo, The Washington Post, 7/21/03

"Let the Americans stay, they protect us. I don't see them hurting anyone."
A mother living in Baghdad, The Christian Science Monitor, 7/21/03

"He [Uday] was a sick man, and he kept lions and tigers just to show his manhood, to show everyone that he cared more about animals than people. But he amputated their claws, and he took away their freedom, just like the people."
Alaa Karim, a Baghdad zoo employee, The Washington Post, 7/21/03

"I can see that the American soldiers are free. In our old army, we were always under pressure and strict military orders. There was tough punishment."
Raad Mamoud, a former Iraqi soldier, USA Today, 7/21/03

"I hope Iraq comes back strong. I am in favor of the new government."
Uday Kadhu, a Baghdad car salesman on the Iraqi archery team, Agence France Presse, 7/16/03

"In our opinion, the most significant thing about the formation of the transitional Governing Council is that it includes important personalities that are known to the masses and that represent the different political, national, democratic and progressive forces, as well as independent political organizations and religious denominations."
Iraqi newspaper Al-Manar, 7/15/03

"I felt that we had gone back to the year 1930. I feel that Iraq has started back from zero. We have wasted 75 years waiting to taste freedom."
Hadid al-Gailani, after the Governing Council announced the abolition of Baathist holidays, The Boston Globe, 7/14/03

"I helped deliver thousands of Iraqi babies, and now I am taking part in the birth of a new country and a new rule based on women's rights, humanity, unity and freedom."

Raja Habib al-Khaza'i, the director of an Iraqi maternity hospital and a member of the Governing Council, Associated Press, 7/13/03

"The formation of this council which represents all sectors of Iraqi society is the birth of democracy in the country. It is better than Saddam's government of destruction and dictatorship."
Razzak Abdul-Zahra, a 35-year-old engineer in Baghad, Associated Press, 7/13/03

"The establishment of this council represents the Iraqi national will after the collapse of the dictatorial regime."
Muhammad Bahr al-Ulum, a Shiite cleric on the Governing Council, Associated Press, 7/13/03

"It's a hard situation. But now that Saddam has fallen, it's OK. We can wait for the future now."
Muhammed Abdul al Sudani, the night watchman at a school in Baghdad, Baltimore Sun, 7/13/03

"Iraqis are looking forward to this day. They have been dreaming for so many years to have a government run by not only one man."
Sherwan Dizayee, a member of the Kurdistan Democratic Party, Los Angeles Times, 7/13/03

"He [Saddam] occupied Iraq for 25 years. It's not important that the Americans are here. What is important is that they got rid of Saddam Hussein. Now I feel free."
Fadil Emara, a shopkeeper in Baghdad, Agence France Presse, 7/12/03

"I want to help my country to make a new life, to get human rights, and also to get modern life, especially because we are a rich country."
An Iraqi translator for the Allied forces, The New York Times, 7/08/03

"We can't train staff fast enough. People are desperate here for a neutral free press after 30 years of a totalitarian state."
Saad al-Bazzaz, editor of the Azzaman Daily in Baghdad, The Independent (London), 7/08/03

"The Americans did a very good thing when they crushed Saddam for the Iraqis."
Khither Jaafar, a member of a Shiite party outlawed by Saddam, Los Angeles Times, 7/08/03

"U.S.-U.K., Liberators of Iraq from Saddam's Terror."
A banner hanging outside the entrance to central Suleimaniyah in Iraq, Chicago Tribune, 7/05/03

"We as a council were chosen by the people. God willing we will work to achieve the hopes and wishes of the people."
Mohammed al-Assadi, a representative on the new Najaf City Council, Associated Press, 7/07/03

"We were like a tightly covered pot which no one knew what it contained. Now that the cover has been removed, you can't imagine what you will discover."
Majed al-Ghazali, who now dreams of setting up a children's music school in Iraq, Associated Press, 7/07/03

"We feel liberated. We're very very happy."
Dana Mohammed, manager of a fast food restaurant in Suleimaniyah, Chicago Tribune, 7/05/03

"I can feel it inside. All Iraqis are feeling freedom. This is a good start of a new Iraq."
Saniya al-Raheem, a 56-year-old housewife in Baghdad, Agence France Presse, 7/03/03

"It was a cruel system. We were living under terror and we all suffered from it. It was for our own survival not to talk about politics. We could not even discuss our personal problems openly."
Balkis Al-Shamary, a clerk in an Iraqi shop, Agence France Presse, 7/03/03

"During the Saddam years, we did not even have hopes. We were living only to survive. Now I have lots of dreams and hopes."
Hansam Hassan, a pediatrician at Baghdad's Al-Alwiya Children's Hospital, Agence France Presse, 7/03/03

"I like free discussions. I talk about these issues with my families and friends. This could never happen during the Saddam years."
Maha Abrahim, owner of a wedding dress shop in Baghdad, Agence France Presse, 7/03/03

"A thousand thanks to Bush!"
Abdel Karim Hassan, in Basra, The New York Times, 6/27/03

"When I see my female students, I see hopes in them. They will have more opportunities to travel and learn and have more control of their lives."
Bushra Jani, a professor at Baghdad's Al-Mustansiriya University, Agence France Presse, 7/03/03

"The Americans liberated the Iraqi people from a despotic regime from which they suffered a lot. The Iraqi people could not change that regime with their own hands or overthrow it with their available means. The Americans came and solved this problem quickly and easily and in a way that gladdened the Iraqis."
Baghdad Al-Balat, an Iraqi newspaper, 6/18/03

"It gives me an immense sense of hope. Being here and seeing so many other people here signifies that, despite everything, life goes on."
Shafeeq al-Mahdi, an Iraqi playwright at a performance at the al-Rashid Theater in Baghdad, Associated Press, 6/25/03

"I will run for mayor. Because we have freedom."
Dhirgham Najem, a 23-year-old busboy in Najaf, The New York Times,

6/22/03

"They're buying them [satellites] like they buy bread. They say they're buying freedom."
Mohammed al-Mulla, a worker at an Iraqi electronics store, Associated Press, 6/25/03

"This is the first time we as Shiites can represent ourselves and talk with a loud voice. They never let us express our feelings."
Akil Dair, a part-time student at Baghdad University, The New York Times, 6/21/03

"Look at Saddam here, they have painted his eyes. Now he cannot see anymore. We also tore all his pictures from our textbooks. I only left one portrait on my math textbook as a souvenir, but I put mascara on his eyes and colored his lips in red."
Salam, a 10-year-old boy pointing to an old mural of Saddam in Baghdad, Agence France Presse, 6/21/03

"Owning or selling such songs was punishable by a one-and-a-half year prison sentence under Saddam. After being oppressed for 35 years, we are now scrambling to grab these songs, to which we listen with impunity."
Ahmad, whose shop in Baghdad is selling large amounts of previously banned Shiite music, Agence France Presse, 6/18/03

"This is the freedom exhibition. I'm flying now."
Mohammed Rasim, a 29-year-old Iraqi artist who was finally able to show his paintings in an exhibit once Saddam fell, Associated Press, 6/18/03

"We are so glad to be rid of Saddam Hussein."
Habid Khanger, who waited to marry until Saddam fell and his policies ended, USA Today, 6/17/03

"Why call us occupied? We are liberated."
Mohammed Hanash Abbas, co-owner of Iqra'a bookstore in Baghdad, Associated Press, 6/17/03

"Saddam would not allow us here; he would slay whoever came here. It's freedom now!"
Salah Maadi Khafaji, an Iraqi swimming in a part of the Tigris that had been off limits to ordinary Iraqis, Los Angeles Times, 6/17/03

"America has shown us compassion we never had from Saddam or fellow Arabs."
Attallah Zeidan, co-owner of a small bookstore in Baghdad, Associated Press, 6/17/03

"I should have freedom to wear or not to wear the veil. I don't want to let these people dictate my thoughts. I am an educated woman. I am a religious woman. I know my duties to God."
Kawkab Jalil, a woman in Baghdad who decided to take off her veil, The

Washington Post, 6/17/03

"When I leave my job at night, I am very happy, very proud about myself. We must help the Americans, and show them our traditions."
Suhair Karmasha, the first Iraqi woman to work with the Americans at Baghdad's city hall, The Washington Post, 6/17/03

"We are like newborn children. We are very, very happy."
Ali Hashem Jasim, in Iraq, Chicago Tribune, 6/13/03

"We broke the dams when the Iraqi army left. We want to teach our children how to fish, how to move on the water again."
Qasim Shalgan Lafta, a Marsh Arab and former fisherman who helped restore the water to the Iraqi wetlands that Saddam had destroyed, Chicago Tribune, 6/13/03

"Before, we saw Saddam on one channel, then we saw Saddam on another channel. When the signal went off, we'd hear Saddam. Even in our dreams, we heard his voice. It's better than before."
Tahir Sadeq, an Iraqi hotel manager, The Washington Post, 6/13/03

"Before, we couldn't speak. Before, we couldn't live. But life has changed from bad to best in Sulaymaniyah. I hope everyone in Iraq can live like us soon."
Abdul Karim, a 70-year-old Iraqi, The Atlanta Journal-Constitution, 6/12/03

"The name of Saddam had a value among us, but now, I do not love Saddam. I feel I have been deceived. I am shocked to hear about his crimes against our people."
Yaaser Akram, an 11th-grade student in Baghdad, Associated Press, 6/12/03

"I want to know the secrets of Saddam. Before, we couldn't even say his name, and now we can know the truth."
Abdul, who bought a copy of one of Saddam's home movies, Associated Press, 6/12/03

"I have no more fear now. From the moment Iraq was liberated I felt as though my two sons had been brought back to me."
A woman whose 17-year-old son, Sardar Osman Faraj, was executed in Iraq in 1985 and another was killed by unknown assassins in 1992. Los Angeles Times, 6/8/03

"It's a big change. We used to get central instructions from the Ministry of Information. Now we no longer do. Azzaman is independent. It lets the readers learn and decide the political currents."
Abdel-Majid, of the Azzaman newspaper in Iraq, Washington Post, 6/8/03

"Things have changed. There's not the same fear. I didn't see my future here before. Now, maybe I do."
Ardelan Karim, who unsuccessfully attempted to flee Iraq four times after escaping Saddam's executioners, The New York Times, 06/05/03

"We are all very happy and comfortable. This is the freedom we want."
Yizmak Askander Abu, a teacher in Rassalin, The Times (London), 06/05/03

"I never allowed myself to live all these years. Every day I thought, now they're going to come and take me. I was always waiting."
Nasir al-Husseini, 22, who survived a mass execution at age 10, The New York Times, 06/01/03

"Freedom means that Saddam is no longer around."
Firas al-Dujaili, an Iraqi doctor, Associated Press, 5/29/03

"This is like a dream for us. The Americans liberated us and gave us our freedom. We hope they stay to protect the minorities like us."
Emir Farooq Saeed Ali Beg, a member of the formerly persecuted Yazidi tribe, The Times (London), 06/05/03

"For the first time in Iraq, democratic processes are put in place to elect government officials. Democratic elections are a new phenomenon in today's Iraq. True democracy appears with the absence of dictatorships and tyranny."
The Iraqi newspaper Al Naba, 06/01/03

"...[T]he Iraqi people are too happy that Saddam is gone. Too happy."
Salim, a citizen of Baghdad, Milwaukee Journal Sentinel, 06/01/03

"We are so happy, not just for the contract, but to work again in our country with our people and our equipment to help rebuild our country."
Loay Ibrahim Al-Saied, an Iraqi engineer whose company received a contract to construct a highway bypass, PR Newswire European, 5/30/03

"Freedom means to travel, to get the job I want, to study in the college I want."
Ahmed al-Samarai, a citizen of Iraq, Associated Press, 5/29/03

"I couldn't teach the students the truth. I was unable to tell them that we were ruled by a dictator. If I did, my neck would be on the line."
Wijda Khalidi, an Iraqi schoolteacher, Associated Press, 5/29/03

"I cannot describe how I am glad. After so many years of dictatorship, we have chosen our own leader."
Kemal Kerkuki, after participating in the election of Kirkuk's new mayor, The New York Times, 5/29/03

"Now that Iraq is free, we are demanding freedom and equal rights that Iraqi women have always been deprived of."
Eman Ahmed, member of the Rising Iraqi Women's Organization, Associated Press, 5/21/03

"I can tell you all these things now because we are free. Before, we lived like exiles in our own country."
Suhaib Abbas Majeed, an Iraqi medical student, The Atlanta Journal-Constitution, 5/21/03

"This is the first time in our lives we have experienced democracy. It is a beautiful thing. Everyone is excited. Everyone is here. ...Not complaining. Coming to vote."
Rabaab Mahmoud Kassar, a female attorney in Najaf who participated in the election of the town's new judges, The Washington Post, 5/21/03

"We've been living in jail for three decades. Now, we are free. Help is coming. Day by day, life is for the better."
Saddam Agil, grandfather of five and resident of Basra, USA Today, 5/20/03

"Before we used to commemorate the day hidden at home, we were afraid of Saddam's agents who were everywhere and spied on us. Today I feel happy."
Faithela Asam, an Iraqi Shiite, on publicly celebrating the birthday of Mohamed for the first time in decades, Agence France Presse, 5/19/03

"We are a free voice that does not belong to any party. We wanted this channel to be free and speak in the name of all Iraqi people."
Khalil al-Tayar, director of the new Karbala Television station, Associated Press, 5/19/03

"Most Iraqis did not know what freedom was, but have shown they prefer it after finding it now. Most Iraqis do not know what democracy is, but they will certainly love it once they taste it."
Amir Taheri, Al-Sharq al-Awsat, 5/19/03

"We can say anything we want in public. Now we're free."
Safaz al Hellou, an Iraqi teenager, The Philadelphia Inquirer, 5/19/03

"This is the first attempt for us to run our town by ourselves. We are ready to rebuild our town, and we are ready to rebuild our country."
Najim Abed Mahdi, a chairman of the Umm Qasr interim town council, The Guardian (London), 5/15/03

"This is the happiest moment we all felt. It's a primordial feeling -- this tyrant coming down."
Yussra Hussen, San Francisco Chronicle, 5/12/03

"I am happy that Saddam is gone. The teachers told me to love Saddam. My parents told me he was a bad man."
Dina, 7, U.S. News & World Report, 5/12/03

"We are not fighting anybody. We will not raise our weapons because freedom is within our sight. We want an Iraqi government that represents all Iraqis. Sunni and Shia Muslims, Kurds, Turcomans and religious minorities -- they will have their rights in this land."
Returned Iraqi exile Ayatollah Hakim, speech to Iraqis in Najaf, London Daily Telegraph, 5/12/03

"(April 9th was) a good day for all Iraqis. The people of Iraq want democracy. They lived without it for 35 years. It was like Russians under Stalin."

Ministry Engineer Ghassan Yassin, 53, Victoria Times-Colonist (Canada), 5/11/03

"Beautiful, beautiful. Not Iraqi TV. Not Saddam Hussein TV. Beautiful."
Akhbal Ibrahim Rashid watching her satellite dish-equipped television, Los Angeles Times, 5/9/03

"All my life I have been escaping. So I have dreamed of freedom, of traveling abroad, of feeling life the way all young people do. Maybe now I will."
Mohammed Khadum, 28, in Baghdad, Washington Post, 5/8/03

"You cannot imagine what it means for us to be here on this national stage, where everything we stand for was forbidden. Now it is ours."
Oday Rashid, an Iraqi musician and documentary filmmaker, Los Angeles Times, 5/5/03

"I saw the world for the first time. I saw where we were. I saw presidents and cities and people from everywhere! The whole world!"
School Principal Bushra Cesar, after buying a satellite TV dish, New York Times, 5/4/03

"We will keep on somehow. Now we have the most important thing that we need. There is no one to stop us from saying anything we want onstage."
Basim Hajar, coauthor and director of a play criticizing Saddam Hussein's regime performed in a building where -- before the war -- only works sanctioned by the government were allowed. Los Angeles Times, 5/5/03

"Before, if I had sold this, they would have cut my head from my body."
Imad Saad, selling a copy of an opposition-run paper, Los Angeles, 5/3/03

1393. Re: College Teacher Blasts Bush

The DNC doesn't care anymore about Iraqi citizens then they care about the American working class voter. They are only interested in consolidating political power for themselves as the lights go out in California and the budget soars over 35 Billion and the people can't find jobs. If you want a job next year, vote Republican.

Voices of Freedom: 100 Iraqi's speak out:

"I can honestly say now that I'm proud to be an Iraqi. Because of what has happened, because there is freedom here like I have not known before. Now I can talk-to you, to people I could never talk to before. I am a simple man. I am just a worker. But even these simple things-talking-give me hope."
Khalid Nemah, an Iraqi taxi driver, Chicago Tribune, 8/05/03

"Iraqis are very thirsty to learn what is happening outside of Iraq."
Abbas Darwish, owner of a Baghdad shop that sells newspapers, The New York Times, 8/05/03

"You never knew who was sitting next to you. In the past no one would dare to just speak out. Now everybody is talking. About federalism, about a monarchy. ... I think our aims are just one, to eliminate persecution for anyone ever again."
Jafar Adel Amr, a tool salesman in Iraq, Chicago Tribune, 8/05/03

"Freedom is much sweeter. I can get up in the morning and decide whether I want to shave or not; if someone in my family is sick, I can stay home with them. I don't need to ask permission."
Salim Kasim, one of Uday's chief mechanics, Los Angeles Times, 8/02/03

"We didn't believe these things, but we had to say them. Saddam was there in all the books, even the math books."
Ghada Jassen, a fifth grade teacher in Iraq, Chicago Tribune, 7/31/03

"We don't want patriotic education anymore. Nothing about war. We want flowers and springtime in the texts, not rifles and tanks."
Dunia Nabel, a teacher in Baghdad, Chicago Tribune, 7/31/03

"We have full freedom to print anything we want. The coalition doesn't interfere in our work but, of course, we have our own red lines."
Ishtar el Yassiri, editor of the new satirical Iraqi newspaper Habez Bouz, Financial Times (London), 7/31/03

"It is like the soul coming back to the body."
Ibrahim Abdullah, a refugee returning to Iraq, The Times (London), 7/31/03

"The tension is reducing every day. We are seeing a change. People are starting to realize that the soldiers are not here to occupy Fallujah forever-they're here to help us rebuild."
Taha Bedawi, mayor of Fallujah, The Washington Post, 7/29/03

"It's a chance to defend our country for our people. It's good to work with the American soldiers. They give us new training and a mutual respect."
Omar Abdullah, a recruit for Mosul's newly formed joint security group, Associated Press, 7/29/03

"We're happy, we're rid of Saddam Hussein; the torture and executions of 35 years are over. We should wait to see what the Americans will do."
Ahmed Abdel-Sahib, in Najaf, The Washington Post, 7/28/03

"There is a certain harmony. But you can not rebuild a city or country-a country destroyed by war-in one month."
Mohammed Tahar al-Abid Rabu, a member of the Mosul city council, Agence France Presse, 7/28/03

"For the first time I feel really free."
Latif Yahia, Uday's former double, after hearing of Uday's death, Agence France Presse, 7/26/03

"The Iraqi people have got rid of two of the biggest criminals in history. Their victims and the sons of their victims, who lived for 35 years under oppression, are feeling proud and happy."
Muwaffak al-Rubaiei, a member of the Iraqi Governing Council, Agence France Presse and Reuters, 7/25/03

"We are more free nowadays. My father gave me the full freedom to marry whom I choose."
Raina Nuri, a woman in Baghdad, Christian Science Monitor, 7/25/03

"We felt better after the regime fell, now we are really happy-we have been freed from our nightmare."
Alaa' Kathem, an Iraqi soccer player who had been punished for losing games, Financial Times (London), 7/24/03

"Iraq is now free from torture. Free from Uday."
Amu Baba, a legendary soccer star in Iraq, Los Angeles Times, 7/24/03

"We feel safer now because we used to hear lots of stories about girls. We were so afraid to go out in case Uday saw us."
Farrah, a 15-year-old Iraqi girl, Newsday (New York), 7/24/03

"My father died because of Saddam. I don't want to speak about the reasons. But I was so happy. I was at home when I saw it on the TV. I woke up my aunts and told them the good news. I used to hate those guys so much and so I felt so at ease in my heart."

Osama Zaid, a distant cousin of Uday, after learning of Uday's death, Newsday (New York), 7/24/03

"Even the blind can see what Saddam Hussein did, taking Iraq into so many wars and doing little even for this town, no sports club, no decent hotels."
Wail al-Ali, Tikrit's new mayor, The Guardian, 7/22/03

"We are flying with happiness since Saddam is gone."
Zahar Hassan, in Iraq, Agence France Presse, 7/21/03

"There's more opportunity, more chances to earn money."
Um Khalid, on life in post-Saddam Baghdad, The Christian Science Monitor, 7/21/03

"[Uday] was a bad man, and he used to beat the soccer players if they lost a game. I think he used to treat the lions better than the people."
Mussab Ismas, a 13-year old boy, viewing Uday's lions at the Baghdad zoo, The Washington Post, 7/21/03

"Let the Americans stay, they protect us. I don't see them hurting anyone."
A mother living in Baghdad, The Christian Science Monitor, 7/21/03

"He [Uday] was a sick man, and he kept lions and tigers just to show his manhood, to show everyone that he cared more about animals than people. But he amputated their claws, and he took away their freedom, just like the people."
Alaa Karim, a Baghdad zoo employee, The Washington Post, 7/21/03

"I can see that the American soldiers are free. In our old army, we were always under pressure and strict military orders. There was tough punishment."
Raad Mamoud, a former Iraqi soldier, USA Today, 7/21/03

"I hope Iraq comes back strong. I am in favor of the new government."
Uday Kadhu, a Baghdad car salesman on the Iraqi archery team, Agence France Presse, 7/16/03

"In our opinion, the most significant thing about the formation of the transitional Governing Council is that it includes important personalities that are known to the masses and that represent the different political, national, democratic and progressive forces, as well as independent political organizations and religious denominations."
Iraqi newspaper Al-Manar, 7/15/03

"I felt that we had gone back to the year 1930. I feel that Iraq has started back from zero. We have wasted 75 years waiting to taste freedom."
Hadid al-Gailani, after the Governing Council announced the abolition of Baathist holidays, The Boston Globe, 7/14/03

"I helped deliver thousands of Iraqi babies, and now I am taking part in the birth of a new country and a new rule based on women's rights, humanity, unity and freedom."
Raja Habib al-Khaza'i, the director of an Iraqi maternity hospital and a member of the Governing Council, Associated Press, 7/13/03

"The formation of this council which represents all sectors of Iraqi society is the birth of democracy in the country. It is better than Saddam's government of destruction and dictatorship."
Razzak Abdul-Zahra, a 35-year-old engineer in Baghad, Associated Press, 7/13/03

"The establishment of this council represents the Iraqi national will after the collapse of the dictatorial regime."
Muhammad Bahr al-Ulum, a Shiite cleric on the Governing Council, Associated Press, 7/13/03

"It's a hard situation. But now that Saddam has fallen, it's OK. We can wait for the future now."
Muhammed Abdul al Sudani, the night watchman at a school in Baghdad, Baltimore Sun, 7/13/03

"Iraqis are looking forward to this day. They have been dreaming for so many years to have a government run by not only one man."
Sherwan Dizayee, a member of the Kurdistan Democratic Party, Los Angeles Times, 7/13/03

"He [Saddam] occupied Iraq for 25 years. It's not important that the Americans are here. What is important is that they got rid of Saddam Hussein. Now I feel free."
Fadil Emara, a shopkeeper in Baghdad, Agence France Presse, 7/12/03

"I want to help my country to make a new life, to get human rights, and also to get modern life, especially because we are a rich country."
An Iraqi translator for the Allied forces, The New York Times, 7/08/03

"We can't train staff fast enough. People are desperate here for a neutral free press after 30 years of a totalitarian state."
Saad al-Bazzaz, editor of the Azzaman Daily in Baghdad, The Independent (London), 7/08/03

"The Americans did a very good thing when they crushed Saddam for the Iraqis."
Khither Jaafar, a member of a Shiite party outlawed by Saddam, Los Angeles Times, 7/08/03

"U.S.-U.K., Liberators of Iraq from Saddam's Terror."
A banner hanging outside the entrance to central Suleimaniyah in Iraq, Chicago Tribune, 7/05/03

"We as a council were chosen by the people. God willing we will work to achieve the hopes and wishes of the people."
Mohammed al-Assadi, a representative on the new Najaf City Council,

Associated Press, 7/07/03

"We were like a tightly covered pot which no one knew what it contained. Now that the cover has been removed, you can't imagine what you will discover."
Majed al-Ghazali, who now dreams of setting up a children's music school in Iraq, Associated Press, 7/07/03

"We feel liberated. We're very very happy."
Dana Mohammed, manager of a fast food restaurant in Suleimaniyah, Chicago Tribune, 7/05/03

"I can feel it inside. All Iraqis are feeling freedom. This is a good start of a new Iraq."
Saniya al-Raheem, a 56-year-old housewife in Baghdad, Agence France Presse, 7/03/03

"It was a cruel system. We were living under terror and we all suffered from it. It was for our own survival not to talk about politics. We could not even discuss our personal problems openly."
Balkis Al-Shamary, a clerk in an Iraqi shop, Agence France Presse, 7/03/03

"During the Saddam years, we did not even have hopes. We were living only to survive. Now I have lots of dreams and hopes."

Ali Hashem Jasim, in Iraq, Chicago Tribune, 6/13/03

"We broke the dams when the Iraqi army left. We want to teach our children how to fish, how to move on the water again."
Qasim Shalgan Lafta, a Marsh Arab and former fisherman who helped restore the water to the Iraqi wetlands that Saddam had destroyed, Chicago Tribune, 6/13/03

"Before, we saw Saddam on one channel, then we saw Saddam on another channel. When the signal went off, we'd hear Saddam. Even in our dreams, we heard his voice. It's better than before."
Tahir Sadeq, an Iraqi hotel manager, The Washington Post, 6/13/03

"Before, we couldn't speak. Before, we couldn't live. But life has changed from bad to best in Sulaymaniyah. I hope everyone in Iraq can live like us soon."
Abdul Karim, a 70-year-old Iraqi, The Atlanta Journal-Constitution, 6/12/03

"The name of Saddam had a value among us, but now, I do not love Saddam. I feel I have been deceived. I am shocked to hear about his crimes against our people."
Yaaser Akram, an 11th-grade student in Baghdad, Associated Press, 6/12/03

"I want to know the secrets of Saddam. Before, we couldn't even say his name, and now we can know the truth."
Abdul, who bought a copy of one of Saddam's home movies, Associated Press, 6/12/03

"I have no more fear now. From the moment Iraq was liberated I felt as though my two sons had been brought back to me."
A woman whose 17-year-old son, Sardar Osman Faraj, was executed in Iraq in 1985 and another was killed by unknown assassins in 1992. Los Angeles Times, 6/8/03

"It's a big change. We used to get central instructions from the Ministry of Information. Now we no longer do. Azzaman is independent. It lets the readers learn and decide the political currents."
Abdel-Majid, of the Azzaman newspaper in Iraq, Washington Post, 6/8/03

"Things have changed. There's not the same fear. I didn't see my future here before. Now, maybe I do."
Ardelan Karim, who unsuccessfully attempted to flee Iraq four times

after escaping Saddam's executioners, The New York Times, 06/05/03

"We are all very happy and comfortable. This is the freedom we want."
Yizmak Askander Abu, a teacher in Rassalin, The Times (London), 06/05/03

"I never allowed myself to live all these years. Every day I thought, now they're going to come and take me. I was always waiting."
Nasir al-Husseini, 22, who survived a mass execution at age 10, The New York Times, 06/01/03

"Freedom means that Saddam is no longer around."
Firas al-Dujaili, an Iraqi doctor, Associated Press, 5/29/03

"This is like a dream for us. The Americans liberated us and gave us our freedom. We hope they stay to protect the minorities like us."
Emir Farooq Saeed Ali Beg, a member of the formerly persecuted Yazidi tribe, The Times (London), 06/05/03

"For the first time in Iraq, democratic processes are put in place to elect government officials. Democratic elections are a new phenomenon in today's Iraq. True democracy appears with the absence of dictatorships and tyranny."
The Iraqi newspaper Al Naba, 06/01/03

"...[T]he Iraqi people are too happy that Saddam is gone. Too happy."
Salim, a citizen of Baghdad, Milwaukee Journal Sentinel, 06/01/03

"We are so happy, not just for the contract, but to work again in our country with our people and our equipment to help rebuild our country."
Loay Ibrahim Al-Saied, an Iraqi engineer whose company received a contract to construct a highway bypass, PR Newswire European, 5/30/03

"Freedom means to travel, to get the job I want, to study in the college I want."
Ahmed al-Samarai, a citizen of Iraq, Associated Press, 5/29/03

"I couldn't teach the students the truth. I was unable to tell them that we were ruled by a dictator. If I did, my neck would be on the line."
Wijda Khalidi, an Iraqi schoolteacher, Associated Press, 5/29/03

"I cannot describe how I am glad. After so many years of dictatorship, we have chosen our own leader."
Kemal Kerkuki, after participating in the election of Kirkuk's new mayor, The New York Times, 5/29/03

"Now that Iraq is free, we are demanding freedom and equal rights that Iraqi women have always been deprived of."
Eman Ahmed, member of the Rising Iraqi Women's Organization, Associated Press, 5/21/03

"I can tell you all these things now because we are free. Before, we lived like exiles in our own country."
Suhaib Abbas Majeed, an Iraqi medical student, The Atlanta Journal-Constitution, 5/21/03

"This is the first time in our lives we have experienced democracy. It is a beautiful thing. Everyone is excited. Everyone is here. ...Not complaining. Coming to vote."
Rabaab Mahmoud Kassar, a female attorney in Najaf who participated in the election of the town's new judges, The Washington Post, 5/21/03

"We've been living in jail for three decades. Now, we are free. Help is coming. Day by day, life is for the better."
Saddam Agil, grandfather of five and resident of Basra, USA Today, 5/20/03

"Before we used to commemorate the day hidden at home, we were afraid of Saddam's agents who were everywhere and spied on us. Today I feel happy."
Faithela Asam, an Iraqi Shiite, on publicly celebrating the birthday of Mohamed for the first time in decades, Agence France Presse, 5/19/03

"We are a free voice that does not belong to any party. We wanted this channel to be free and speak in the name of all Iraqi people."
Khalil al-Tayar, director of the new Karbala Television station, Associated Press, 5/19/03

"Most Iraqis did not know what freedom was, but have shown they prefer it after finding it now. Most Iraqis do not know what democracy is, but they will certainly love it once they taste it."
Amir Taheri, Al-Sharq al-Awsat, 5/19/03

"We can say anything we want in public. Now we're free."
Safaz al Hellou, an Iraqi teenager, The Philadelphia Inquirer, 5/19/03

"This is the first attempt for us to run our town by ourselves. We are ready to rebuild our town, and we are ready to rebuild our country."
Najim Abed Mahdi, a chairman of the Umm Qasr interim town council, The Guardian (London), 5/15/03

"This is the happiest moment we all felt. It's a primordial feeling -- this tyrant coming down."
Yussra Hussen, San Francisco Chronicle, 5/12/03

"I am happy that Saddam is gone. The teachers told me to love Saddam. My parents told me he was a bad man."
Dina, 7, U.S. News & World Report, 5/12/03

"We are not fighting anybody. We will not raise our weapons because freedom is within our sight. We want an Iraqi government that represents all Iraqis. Sunni and Shia Muslims, Kurds, Turcomans and religious minorities -- they will have their rights in this land."
Returned Iraqi exile Ayatollah Hakim, speech to Iraqis in Najaf,

London Daily Telegraph, 5/12/03

"(April 9th was) a good day for all Iraqis. The people of Iraq want democracy. They lived without it for 35 years. It was like Russians under Stalin."
Ministry Engineer Ghassan Yassin, 53, Victoria Times-Colonist (Canada), 5/11/03

"Beautiful, beautiful. Not Iraqi TV. Not Saddam Hussein TV. Beautiful."
Akhbal Ibrahim Rashid watching her satellite dish-equipped television, Los Angeles Times, 5/9/03

"All my life I have been escaping. So I have dreamed of freedom, of traveling abroad, of feeling life the way all young people do. Maybe now I will."
Mohammed Khadum, 28, in Baghdad, Washington Post, 5/8/03

"You cannot imagine what it means for us to be here on this national stage, where everything we stand for was forbidden. Now it is ours."
Oday Rashid, an Iraqi musician and documentary filmmaker, Los Angeles Times, 5/5/03

"I saw the world for the first time. I saw where we were. I saw presidents and cities and people from everywhere! The whole world!"
School Principal Bushra Cesar, after buying a satellite TV dish, New York Times, 5/4/03

"We will keep on somehow. Now we have the most important thing that we need. There is no one to stop us from saying anything we want onstage."
Basim Hajar, coauthor and director of a play criticizing Saddam Hussein's regime performed in a building where -- before the war -- only works sanctioned by the government were allowed. Los Angeles Times, 5/5/03

"Before, if I had sold this, they would have cut my head from my body."
Imad Saad, selling a copy of an opposition-run paper, Los Angeles, 5/3/03

1394. Re: Bush fit for duty.. Send him over therre

August 8, 2003, marks the hundredth day since the end of major combat operations in Iraq. Results in Iraq: 100 Days Toward Security and Freedom presents highlights of the successes shared by post-Saddam Iraqis and their partners in the renewal of their nation. Under the leadership of the Coalition Provisional Authority (CPA) and the new Iraqi Governing Council, major strides are being planned and made in three key areas: security, economic stability and growth, and democracy. As this report is issued, the CPA is working with Iraqis to implement a strategic plan with measurable goals. Outside observers and coalition leaders agree that much remains to be done to restore order and bring prosperity to a brutalized society and an infrastructure suffering from decades of malign neglect. The steps toward sovereignty and democracy will be difficult and require patience and time. Substantial progress is being made on all fronts. As President Bush said last week, the "success of a free Iraq will ... demonstrate to other countries in that region that national prosperity and dignity are found in representative government and free institutions.... As freedom advances in the Middle East, those societies will be less likely to produce ideologies of hatred and produce recruits for terror." This report focuses on 10 areas where the liberation of Iraq has improved the lives of Iraqis and the safety and security of the world. Some examples in this report include:

For the first time in the lives of most Iraqis, a representative government is being established and human rights and freedom are being enshrined.

Nearly 3 dozen countries are contributing financially to the renewal of Iraq, and 19 countries are providing personnel for Operation Iraqi Freedom.

The food distribution system is functioning, based on equitable needs rather than cronyism.

Nearly all Iraqi children have finished exams from last year. All universities are open.

A $53 million program to rehabilitate more than 100 schools and clinics is underway.

10 Ways the Liberation of Iraq Supports the War on Terror:

With the fall of Saddam Hussein's regime, Iraq is no longer a state sponsor of terror. According to State Department reports on terrorism,

before the removal of Saddam's regime, Iraq was one of seven state sponsors of terror.

Saddam Hussein's regime posed a threat to the security of the United States and the world. With the removal of Saddam Hussein's regime, a leader who pursued, used, and possessed weapons of mass destruction is no longer in power.

Saddam Hussein would not uphold his international commitments, and now that he is no longer in power, the world is safe from this tyrant. The old Iraqi regime defied the international community and seventeen UN resolutions for twelve years and gave every indication that it would never disarm and never comply with the just demands of the world.

A senior al Qaida terrorist, now detained, who had been responsible for al Qaida training camps in Afghanistan, reports that al Qaida was intent on obtaining WMD assistance from Iraq. According to a credible, high-level al Qaida source, Usama Bin Laden and deceased al Qaida leader Muhammad Atif did not believe that al Qaida labs in Afghanistan were capable of manufacturing chemical and biological weapons, so they turned to Iraq for assistance. Iraq agreed to provide chemical and biological weapons training for two al Qaida associates starting in December 2000.

Senior al Qaida associate Abu Musab al-Zarqawi came to Baghdad in May 2002 for medical treatment along with approximately two dozen al Qaida terrorist associates. This group stayed in Baghdad and other parts of Iraq and plotted terrorist attacks around the world.

A safe haven in Iraq belonging to Ansar al-Islam -- a terrorist group closely associated with Zarqawi and al Qaida -- was destroyed during Operation Iraqi Freedom. In March 2003, during a raid on the compound controlled by the terrorists in northeastern Iraq, a cache of documents was discovered, including computer discs and foreign passports belonging to fighters from various Middle East nationalities.

The al Qaida affiliate Ansar al-Islam is known to still be present in Iraq. Such terrorist groups are now plotting against U.S. forces in Iraq.

Law enforcement and intelligence operations have disrupted al Qaida associate Abu Musab Zarqawi's poison plotting in France, Britain, Spain, Italy, Germany, and Russia. The facilities in Northern Iraq, set up by Zarqawi and Ansar al-Islam were, before the war, an al Qaida's poisons/toxins laboratory.

Abu Musa Zarqawi, the al Qaida associate with direct links to Iraq, oversaw those responsible for the assassination of USAID officer Laurence Foley in Amman, Jordan last October.

Saddam Hussein's Iraq provided material assistance to Palestinian terrorist groups, including the Popular Front for the Liberation of

Palestine-General Command, HAMAS, and the Palestine Islamic Jihad, according to a State Department report. This included paying the families of Palestinian suicide bombers, according to testimonials from Palestinians and cancelled checks. Also, according to State Department reports, terrorist groups the Iranian Mujahedin-e-Khalq and the Abu Nidal organization were protected by the Iraqi regime protected by the Iraqi regime.

10 Signs of Better Security:

The Coalition is working with Iraqis to improve internal security throughout the country. While the security situation is improving, dangerous remnants of the former regime and others continue to target progress and success.

New Iraqi army and police forces are being recruited, trained, and equipped. Some 1,200 Iraqis will be trained this year for the new Iraqi army, and in two years, 40,000 army recruits will be trained.

Fifty-eight of 89 Iraqi cities have hired police forces. In total, 34,000 Iraqis are employed in patrolling the streets of their country, and of these, 30,000 Iraqis are currently patrolling with coalition forces.

More than 8,200 tons of ammunition, thousands of AK-47s, grenades, and other weapons have been seized throughout Iraq -- much of which was stored by the Hussein regime in hospitals, schools, and mosques.

The CPA has hired more than 11,000 Iraqis to guard key facilities around the country.

Coalition forces, with information from an Iraqi, conducted operations that lead to the deaths of Uday and Qusay Hussein following their refusal to surrender. To date, 37 of the top 55 most wanted Iraqis have been captured or killed. With the deaths of Uday and Qusay, more and more Iraqis are freed from their fear and are volunteering their services and information.

Coalition forces continue to take the offensive against the remnants of the Ba'athist regime who are targeting the sites and symbols of reconstruction and stabilization successes.

An Iraqi Civil Defense Force will help U.S. and Coalition forces in rooting out Saddam loyalists and criminal gangs who have been attacking military forces and obstructing reconstruction efforts. Four thousand Iraqi militiamen will be trained by U.S. troops over the next eight weeks.

In Basra, 500 river police have been patrolling since June 19.

Some 148,000 U.S. service members and more than 13,000 Coalition troops from 19 countries are serving in Iraq.

Most of Iraq is calm and progress on the road to democracy and freedom not experienced in decades continues. Only in isolated areas are there still attacks.

10 Signs of Better Infrastructure and Basic Services:

Electricity: Electricity is now more equitably distributed and more stable, instead of, as during Saddam Hussein's rule, being supplied to Baghdad at the expense of the rest of the country. For the rest of 2003, $294 million is budgeted to improve electrical systems.

Water Systems: Water supply in many areas is now at pre-conflict levels. Over 2000 repairs have been made to 143 water networks, and water quality sampling has restarted. There are plans to add 450 million liters of capacity to Baghdad's system.

Healthcare: Iraqi hospitals are up and running, and healthcare, previously available only for Ba'athist elite, is now available to all Iraqis. Drugs are being supplied to hospitals and clinics, and medical worker salaries are being paid regularly, ensuring employees attend work. Vaccinations are available across the country, and anti-malarial spraying will take place this autumn.

Returning Refugees: Refugees began returning from Saudi Arabia and the United Arab Emirates. UNHCR and the Coalition are working together to ensure that groups of refugees in Jordan and Iran can return to Iraq safely and comfortably in the near future.

Revitalizing Oil Production and Distribution: Repairs and modernizations are being made to the antiquated and neglected oil production and distribution systems. Oil will provide the future wealth of the country but was severely misappropriated by the former regime.

Police: There are 6,000 police on the streets of Baghdad and 34 out of 60 police stations are currently operational. Throughout Iraq, there are some 30,000 police patrolling the streets.

Road Repairs: Emergency road repairs, underway throughout Iraq now, will employ even more Iraqis in the coming weeks.

Airports: The Baghdad and Basra airports are ready to open, and the airport in Basra is expected to begin commercial operations in August. Several airlines are likely to start regular air service to Iraq.

Major Bridges: $4.3 million has been provided to repair the Tikrit Bridge; $4.4 million to rebuild the Al Mat Bridge; and $3.2 million to rebuild the Khazir Bridge.

Port at Umm Qasr: The port at Umm Qasr is open and functioning again, and customs and port authority agents are being trained.

10 Signs of Democracy:

A 25-member national Governing Council includes three women and Kurdish, Sunni, Christian, Turkmen, and Shi'ia representatives. The establishment of this body is a first and important move toward Iraqi self-government.

The Governing Council is creating a Preparatory Commission to write a constitution. After a constitution is approved, elections will lead to a fully sovereign Iraqi government.

There are municipal councils in all major cities and 85 percent of towns, enabling Iraqis to take responsibility for management of local matters like healthcare, water, and electricity.

Provisional councils have been formed in Najaf, Al Anbar, and Basra.

The Baghdad City Advisory Council was inaugurated on July 7, 2003. Its 37 members were selected by members of the city's nine district councils, who themselves were selected by Baghdad citizens in 88 neighborhoods throughout the city.

Local governance councils are robust in Basra and Umm Qasr, helping to identify areas for immediate humanitarian and reconstruction assistance.

The Office of Human Rights and Transitional Justice is working to locate missing persons, investigate, analyze, and exhume mass graves, archive past human rights abuses and promote civic education/public awareness about human rights.

To facilitate voluntary resolutions of property claims, the Property Reconciliation Facility is being created.

The Coalition is helping fund and train Iraqis wanting to create their own non-governmental organizations. These new NGOs include public policy think tanks and an association of former political prisoners.

More than 150 newspapers are now published in Iraq offering Iraqis access to many different kinds of information. Foreign publications, radio, and television broadcasts are also available.

10 Improvements in the Lives of Iraqi Children:

A "back to school" campaign delivered 1,500 kits with book bags, notebooks, pens and pencils that helped 120,000 students in Baghdad return to their classrooms in May 2003. In preparation for the new school year, 1.2 million kits for secondary school students and 4,000 kits for their schools including desks, chairs, blackboards, and bookshelves are arriving in Iraq.

Malnutrition contributed to high mortality rates in Iraq during Saddam's rule. The food aid for Iraq has continued to supply the public distribution system and has allowed the majority of Iraqis access to food rations. On July 15, the World Food Program reported that nearly 1.5 million metric tons of food, or more than the three months supply required to keep the distribution system operating, have

been dispatched to Iraq. An additional 2.2 million metric tons of food will arrive by the end of October. These steps will contribute to reversing malnutrition.

To date, 22.3 million doses of measles, tuberculosis, hepatitis B, diphtheria, whooping cough, tetanus, and polio vaccines have been provided, enough to vaccinate 4.2 million children.

Nearly all Iraqi children have finished their exams from last year and are ready to start a new school year in the fall. All universities are reopened.

A $53 million program to rehabilitate more than 100 schools and clinics is underway. In the southern region, more than 50 schools are in various stages of rehabilitation. More than 600 schools will be in "like new" condition in time for the beginning of classes.

Five million revised math and science textbooks will be ready before the start of the school year.

Saddam Hussein's rhetoric is being removed from Iraqi schoolchildren's textbooks. In the words of Dunia Nabel, a teacher in Baghdad: "We want flowers and springtime in the texts, not rifles and tanks." (The Chicago Tribune, July 31, 2003).

Ten delivery rooms in hospitals and primary healthcare centers in Basra have been rehabilitated and stocked with essential drugs and medical supplies.

The juvenile institution for children that was the subject of reports of abuse and appalling conditions under Saddam Hussein has been replaced by a project run by UNICEF and NGOs. Seven orphanages have undergone major building renovations and training for staff.

Nearly 3,000 soccer balls were shipped on May 30 and another 60,000 balls on their way to Iraq through a private/public partnership and the U.S. soccer community.

10 Signs of Economic Renewal:

A New Economy: A new Iraqi economy is being built on the principles of market economics, respect for the rule of law, and transparency.

Salaries: The CPA regularly pays salaries to those teachers, healthcare workers, soldiers, police, and other public sector employees who have returned to work. Payments of pensions and other emergency payments have also helped to avert a humanitarian crisis. Teachers' salaries, and other key employees' salaries, have increased four-fold over their pay under Saddam Hussein. Some 39,000 electrical workers are back at work. Other sectors show similar encouraging signs.

Commerce: The marketplace in Baghdad has many goods that were previously unavailable because of sanctions or because they were

forbidden under the previous regime. Items such as satellite dishes are now readily available to Iraqis.

Banks: Banks are open in Baghdad. The CPA is working with Iraqis outside of Baghdad to open banks across the country as soon as possible. In addition, international interest in establishing an Iraqi trade bank has been strong, and proposals from foreign banks are under review for creating this trade facility.

Food: The CPA has purchased the upcoming wheat and barley crops, helping to meet the country's food needs while supporting farmers. These crops include over 600,000 metric tons of Iraqi wheat and more than 300,000 metric tons of Iraqi barley.

Loans for Entrepreneurs: A micro-credit facility is now being set up in the South. Credit facilities for the rest of the country are also planned. Iraq's two major banks will start making small and medium sized business loans to help Iraqi entrepreneurs restart their businesses.

Currency: A unified currency for Iraq has been announced. The exchange of old banknotes for new ones is set to begin October 15.

Iraqis' Savings: The dinar has maintained its value against the dollar, preserving the dinar-dominated savings of Iraqi citizens.

Natural Resources: Oil production is increasing, with daily production of crude averaging 1 million barrels in recent days.

Budget: The budget for the last six months of 2003 is now being executed, and the 2004 budget formulation process has begun. Of the 2003 budget, more than $400 million has been released to Ministries in July and August alone. The 2004 budget process, to be run by Iraqis, will target the most important priorities for the country's reconstruction and build on the spending commitments of the budget for the last six months of 2003.

10 Examples of International Support for the Renewal of Iraq:

The United Nations Secretary General Kofi Annan said of the Iraqi Governing Council: "[The Council's] formation is an important first step towards the full restoration of Iraqi sovereignty." The UN is supporting the renewal of Iraq through the Oil for Food program, and by providing humanitarian assistance, promoting human rights, and assisting the Iraqi Governing Council in rejoining the international community.

The United Nations Security Council passed, without opposition, Resolution 1483, lifting sanctions against the Iraqi regime.

The top 12 financial supporters for the renewal of Iraq are (in descending order): the United States, United Kingdom, Canada, Japan, Australia, Germany, Norway, Denmark, United Arab Emirates, Saudi Arabia, Spain, and Kuwait.

The UN reports that its total humanitarian assistance for the people of Iraq is $2.2 billion, of which $1.2 billion is pledged or contributed from the international community and $1 billion is funded through the Oil for Food program.

In addition, several countries have pledged $800 million to UN programs. Nearly three dozen countries have made pledges or contributions to the renewal of Iraq.

There are now 34 foreign missions in Baghdad. Kuwait has reestablished relations with Iraq.

International pledges for reconstruction assistance are almost $3 billion, and an international conference to discuss additional funding for Iraq is scheduled for the fall.

More than 45 countries have offered military forces. The United Kingdom and Poland are each leading multinational divisions.

Numerous countries have contributed to the Coalition by providing basing and fly-over rights, as well as logistical support.

A total of 19 countries providing more than 13,000 troops in Iraq are supporting Operation Iraqi Freedom, and 14 countries are committed to deploying additional troops.

10 Signs of Cultural Rebirth:

Iraqi Olympic Committee is reconstituted without fear from Uday Hussein: The new President of the Free Iraq Olympic group said, "The Iraqi teams used to produce the champions of Asia in many sports. They have declined since the arrival of Uday. Now we want to rebuild them with the help of the international community." -- Sharar Haydar, one of Uday Hussein's former torture victims, The Guardian (London), May 15, 2003.

The Baghdad symphony is performing, and their concerts are also being televised. The conductor of the symphony said, "We're trying to show the world that Iraqis have a great culture." -- Hisham Sharaf, at a performance of the Baghdad Symphony, Agence France Presse, June 12, 2003.

Theaters are quickly reopening. In the words of one filmmaker: "You cannot imagine what it means for us to be here on this national stage, where everything we stand for was forbidden. Now it is ours."-- Oday Rashid, Los Angeles Times, May 5, 2003.

Religious rites are being reestablished. As one Iraqi said: "I can't express my feelings. All I feel is joy. This is the first time I've seen this (Shiite celebrations) for 30 years. Saddam forbade everything. He forced us underground." -- Sami Abbas, a Shia at the holy shrine of Kadhimiy, The Washington Post, April 16, 2003.

150 newspapers on the streets of Baghdad help get out the news of a free Iraq. Ali Jabar is quoted as saying, "Every day I buy a different

paper. I like them all." Says a newspaper editor: "We can't train staff fast enough. People are desperate here for a neutral free press after 30 years of a totalitarian state." -- Saad al-Bazzaz, editor of the Azzaman Daily in Baghdad, The Independent (London), July 8, 2003.

Satellite dishes are the most popular items for sale in Baghdad. "I want to watch all of the world, all channels in the world. I want to watch freedom." -- Mohammed al-Khayat, an Iraqi who just purchased his first satellite dish, The Baltimore Sun, April 26, 2003.

Banned books are now available in the market. A teacher selling books in Baghdad said: "Before, so many books were forbidden -- anything that didn't agree with the regime. Which means practically everything that was ever printed!" -- Imad Saad, Los Angeles Times, May 3, 2003.

Artists are free to display their works and poets are free to write. As one poet said: "For decades, we were used to watching ourselves. Now you can think with words. But to talk loudly and to think loudly takes time. Freedom needs practice, and it takes practice to be free." -- Mohammed Thamer, The Washington Post, April 22, 2003.

Education is being revitalized. As a member of Baghdad's city council pointed out, "We want to have a real education, to be a progressive country. Education is very important to the reconstruction of our society. If you want to civilize society, you must care about education." -- Al Sa'ad Majid al Musowi, The Chicago Tribune, July 31, 2003.

The Marshlands are being rehabilitated. In the words of one Iraqi, "We broke the dams when the Iraqi army left. We want to teach our children how to fish, how to move on the water again." -- Qasim Shalgan Lafta, a former fisherman who helped restore the water to the Iraqi wetlands that Saddam had destroyed, The Chicago Tribune, June 13, 2003.

10 Steps to Improve the Lives of Iraqi Women:

The Coalition is working to ensure that women play an important role in all parts of the government.

Three Iraqi women who are members of the new Governing Council are fully engaged in promoting the involvement of women in Iraq's future.

An esteemed former female Iraqi judge in the Ministry of Justice is undertaking a review of laws, legal practices, and the legal profession in Iraq for ways to increase equality and participation of women.

The Ministry of Interior conducted an assessment of the former Iraqi Police Force in early April. This resulted in a requirement to target recruitment of women and their inclusion in training offered at all academies. The program will become a reality August 15 when the recruiting drive begins with women as one of the groups targeted for selection.

The Ministry of Labor and Social Affairs has adopted a policy of equal access to services and benefits for all those eligible, and this policy will ultimately expand services as well as quality to larger numbers of Iraqis including women.

Iraqi women will have a role in the development of democracy and civil society. A senior administration official from the CPA Democracy and Governance team is conducting outreach activities to involve Iraqi women.

The Coalition team has held numerous meetings with Iraqi women from all walks of life to hear their concerns and to listen to their ideas for the future development of democracy in their country. In addition, the CPA has met with various women's groups and with international organizations regarding their ideas and efforts to meet the needs of Iraqi women.

The Coalition helped a group of Iraqi women conduct a conference July 9 that included workshops on the constitution and democracy, legal reform, education, health and social affairs, and economic and employment issues. More than 70 women attended, the majority of whom were Iraqi women experts in such fields as law, academia, medicine, and business.

Quotas restricting the entry of women into certain university courses have been raised or lifted altogether.

Iraqi women's organizations are being created to expand opportunities for women to improve their lives and those of their families.

10 Voices of Liberation:

"We want to have a real education, to be a progressive country. Education is very important to the reconstruction of our society. If you want to civilize society, you must care about education." -- Al Sa'ad Majid al Musowi, a businessman on Baghdad's city council, The Chicago Tribune, July 31, 2003.

"We have full freedom to print anything we want. The coalition doesn't interfere in our work but, of course, we have our own red lines." -- Ishtar el Yassiri, editor of the new satirical Iraqi newspaper Habez Bouz, Financial Times (London), July 31, 2003.

"The tension is reducing every day. We are seeing a change. People are starting to realize that the soldiers are not here to occupy Fallujah forever-they're here to help us rebuild." -- Taha Bedawi, mayor of Fallujah, The Washington Post, July 29, 2003.

"It's a chance to defend our country for our people. It's good to work with the American soldiers. They give us new training and a mutual respect." -- Omar Abdullah, a recruit for Mosul's newly formed joint security group, Associated Press, July 29, 2003.

"I want to serve a new Iraq." -- Shevin Majid, a former Kurdish fighter who is now a recruit in the Mosul joint security force,

Associated Press, July 29, 2003.

"More and more businessmen are coming to Iraq. It is a rich country and the Iraqi market is enormous. All the world wants to come and do business here." -- Captain Adel Khalaf, director of the port at Umm Qasr, Agence France Presse, July 27, 2003.

"For the first time I feel really free." -- Latif Yahia, Uday's former double, after hearing of Uday's death, Agence France Presse, July 26, 2003.

"The Iraqi people have got rid of two of the biggest criminals in history. Their victims and the sons of their victims, who lived for 35 years under oppression, are feeling proud and happy." -- Muwaffak al-Rubaiei, a member of the Iraqi Governing Council, Agence France Presse and Reuters, July 25, 2003.

"I couldn't show it to the people in the past because of the regime. Now I hang it up to show respect." -- Abbas Fadel, who displays a picture of his brother, tortured and murdered by Saddam Hussein, Knight Ridder, July 24, 2003.

"I can see that the American soldiers are free. In our old army, we were always under pressure and strict military orders. There was tough punishment." -- Raad Mamoud, a former Iraqi soldier, USA Today, July 21, 2003.

1395. Re: "Mission Accomplished" At least 11 People Killed by Truck Bomb in Baghdad

Now that the cowardly murderers hiding in Iraq find that they can't
change the Will of the American People for Peace and Prosperity they
are taking to murdering their fellow Muslims. So its not a religious
war after all. Its just murder by masked blood thirsty killers.

I'm sure glad that President Bush is working hard to protect us!

> > Crazy Taxi wrote:

August 8, 2003, marks the hundredth day since the end of major combat
operations in Iraq. Results in Iraq: 100 Days Toward Security and
Freedom presents highlights of the successes shared by post-Saddam
Iraqis and their partners in the renewal of their nation. Under the
leadership of the Coalition Provisional Authority (CPA) and the new
Iraqi Governing Council, major strides are being planned and made in
three key areas: security, economic stability and growth, and
democracy. As this report is issued, the CPA is working with Iraqis to
implement a strategic plan with measurable goals. Outside observers
and coalition leaders agree that much remains to be done to restore
order and bring prosperity to a brutalized society and an
infrastructure suffering from decades of malign neglect. The steps
toward sovereignty and democracy will be difficult and require
patience and time. Substantial progress is being made on all fronts.
As President Bush said last week, the "success of a free Iraq will ...
demonstrate to other countries in that region that national prosperity
and dignity are found in representative government and free
institutions.... As freedom advances in the Middle East, those
societies will be less likely to produce ideologies of hatred and
produce recruits for terror." This report focuses on 10 areas where
the liberation of Iraq has improved the lives of Iraqis and the safety
and security of the world. Some examples in this report include:

For the first time in the lives of most Iraqis, a representative government is being established and human rights and freedom are being enshrined.

Nearly 3 dozen countries are contributing financially to the renewal of Iraq, and 19 countries are providing personnel for Operation Iraqi Freedom.

The food distribution system is functioning, based on equitable needs rather than cronyism.

Nearly all Iraqi children have finished exams from last year. All universities are open.

A $53 million program to rehabilitate more than 100 schools and clinics is underway.

10 Ways the Liberation of Iraq Supports the War on Terror:

With the fall of Saddam Hussein's regime, Iraq is no longer a state sponsor of terror. According to State Department reports on terrorism, before the removal of Saddam's regime, Iraq was one of seven state sponsors of terror.

Saddam Hussein's regime posed a threat to the security of the United States and the world. With the removal of Saddam Hussein's regime, a leader who pursued, used, and possessed weapons of mass destruction is no longer in power.

Saddam Hussein would not uphold his international commitments, and now that he is no longer in power, the world is safe from this tyrant. The old Iraqi regime defied the international community and seventeen UN resolutions for twelve years and gave every indication that it would never disarm and never comply with the just demands of the world.

A senior al Qaida terrorist, now detained, who had been responsible for al Qaida training camps in Afghanistan, reports that al Qaida was intent on obtaining WMD assistance from Iraq. According to a credible, high-level al Qaida source, Usama Bin Laden and deceased al Qaida leader Muhammad Atif did not believe that al Qaida labs in Afghanistan were capable of manufacturing chemical and biological weapons, so they turned to Iraq for assistance. Iraq agreed to provide chemical and biological weapons training for two al Qaida associates starting in December 2000.

Senior al Qaida associate Abu Musab al-Zarqawi came to Baghdad in May 2002 for medical treatment along with approximately two dozen al Qaida terrorist associates. This group stayed in Baghdad and other parts of Iraq and plotted terrorist attacks around the world.

A safe haven in Iraq belonging to Ansar al-Islam -- a terrorist group closely associated with Zarqawi and al Qaida -- was destroyed during Operation Iraqi Freedom. In March 2003, during a raid on the compound controlled by the terrorists in northeastern Iraq, a cache of documents was discovered, including computer discs and foreign

passports belonging to fighters from various Middle East nationalities.

The al Qaida affiliate Ansar al-Islam is known to still be present in Iraq. Such terrorist groups are now plotting against U.S. forces in Iraq.

Law enforcement and intelligence operations have disrupted al Qaida associate Abu Musab Zarqawi's poison plotting in France, Britain, Spain, Italy, Germany, and Russia. The facilities in Northern Iraq, set up by Zarqawi and Ansar al-Islam were, before the war, an al Qaida's poisons/toxins laboratory.

Abu Musa Zarqawi, the al Qaida associate with direct links to Iraq, oversaw those responsible for the assassination of USAID officer Laurence Foley in Amman, Jordan last October.

Saddam Hussein's Iraq provided material assistance to Palestinian terrorist groups, including the Popular Front for the Liberation of Palestine-General Command, HAMAS, and the Palestine Islamic Jihad, according to a State Department report. This included paying the families of Palestinian suicide bombers, according to testimonials from Palestinians and cancelled checks. Also, according to State Department reports, terrorist groups the Iranian Mujahedin-e-Khalq and the Abu Nidal organization were protected by the Iraqi regime protected by the Iraqi regime.

10 Signs of Better Security:

The Coalition is working with Iraqis to improve internal security throughout the country. While the security situation is improving, dangerous remnants of the former regime and others continue to target progress and success.

New Iraqi army and police forces are being recruited, trained, and equipped. Some 1,200 Iraqis will be trained this year for the new Iraqi army, and in two years, 40,000 army recruits will be trained.

Fifty-eight of 89 Iraqi cities have hired police forces. In total, 34,000 Iraqis are employed in patrolling the streets of their country, and of these, 30,000 Iraqis are currently patrolling with coalition forces.

More than 8,200 tons of ammunition, thousands of AK-47s, grenades, and other weapons have been seized throughout Iraq -- much of which was stored by the Hussein regime in hospitals, schools, and mosques.

The CPA has hired more than 11,000 Iraqis to guard key facilities around the country.

Coalition forces, with information from an Iraqi, conducted operations that lead to the deaths of Uday and Qusay Hussein following their refusal to surrender. To date, 37 of the top 55 most wanted Iraqis have been captured or killed. With the deaths of Uday and Qusay, more

and more Iraqis are freed from their fear and are volunteering their services and information.

Coalition forces continue to take the offensive against the remnants of the Ba'athist regime who are targeting the sites and symbols of reconstruction and stabilization successes.

An Iraqi Civil Defense Force will help U.S. and Coalition forces in rooting out Saddam loyalists and criminal gangs who have been attacking military forces and obstructing reconstruction efforts. Four thousand Iraqi militiamen will be trained by U.S. troops over the next eight weeks.

In Basra, 500 river police have been patrolling since June 19.

Some 148,000 U.S. service members and more than 13,000 Coalition troops from 19 countries are serving in Iraq.

Most of Iraq is calm and progress on the road to democracy and freedom not experienced in decades continues. Only in isolated areas are there still attacks.

10 Signs of Better Infrastructure and Basic Services:

Electricity: Electricity is now more equitably distributed and more stable, instead of, as during Saddam Hussein's rule, being supplied to Baghdad at the expense of the rest of the country. For the rest of 2003, $294 million is budgeted to improve electrical systems.

Water Systems: Water supply in many areas is now at pre-conflict levels. Over 2000 repairs have been made to 143 water networks, and water quality sampling has restarted. There are plans to add 450 million liters of capacity to Baghdad's system.

Healthcare: Iraqi hospitals are up and running, and healthcare, previously available only for Ba'athist elite, is now available to all Iraqis. Drugs are being supplied to hospitals and clinics, and medical worker salaries are being paid regularly, ensuring employees attend work. Vaccinations are available across the country, and anti-malarial spraying will take place this autumn.

Returning Refugees: Refugees began returning from Saudi Arabia and the United Arab Emirates. UNHCR and the Coalition are working together to ensure that groups of refugees in Jordan and Iran can return to Iraq safely and comfortably in the near future.

Revitalizing Oil Production and Distribution: Repairs and modernizations are being made to the antiquated and neglected oil production and distribution systems. Oil will provide the future wealth of the country but was severely misappropriated by the former regime.

Police: There are 6,000 police on the streets of Baghdad and 34 out of 60 police stations are currently operational. Throughout Iraq, there

are some 30,000 police patrolling the streets.

Road Repairs: Emergency road repairs, underway throughout Iraq now, will employ even more Iraqis in the coming weeks.

Airports: The Baghdad and Basra airports are ready to open, and the airport in Basra is expected to begin commercial operations in August. Several airlines are likely to start regular air service to Iraq.

Major Bridges: $4.3 million has been provided to repair the Tikrit Bridge; $4.4 million to rebuild the Al Mat Bridge; and $3.2 million to rebuild the Khazir Bridge.

Port at Umm Qasr: The port at Umm Qasr is open and functioning again, and customs and port authority agents are being trained.

10 Signs of Democracy:

A 25-member national Governing Council includes three women and Kurdish, Sunni, Christian, Turkmen, and Shi'ia representatives. The establishment of this body is a first and important move toward Iraqi self-government.

The Governing Council is creating a Preparatory Commission to write a constitution. After a constitution is approved, elections will lead to a fully sovereign Iraqi government.

There are municipal councils in all major cities and 85 percent of towns, enabling Iraqis to take responsibility for management of local matters like healthcare, water, and electricity.

Provisional councils have been formed in Najaf, Al Anbar, and Basra.

The Baghdad City Advisory Council was inaugurated on July 7, 2003. Its 37 members were selected by members of the city's nine district councils, who themselves were selected by Baghdad citizens in 88 neighborhoods throughout the city.

Local governance councils are robust in Basra and Umm Qasr, helping to identify areas for immediate humanitarian and reconstruction assistance.

The Office of Human Rights and Transitional Justice is working to locate missing persons, investigate, analyze, and exhume mass graves, archive past human rights abuses and promote civic education/public awareness about human rights.

To facilitate voluntary resolutions of property claims, the Property Reconciliation Facility is being created.

The Coalition is helping fund and train Iraqis wanting to create their own non-governmental organizations. These new NGOs include public policy think tanks and an association of former political prisoners.

More than 150 newspapers are now published in Iraq offering Iraqis access to many different kinds of information. Foreign publications, radio, and television broadcasts are also available.

10 Improvements in the Lives of Iraqi Children:

A "back to school" campaign delivered 1,500 kits with book bags, notebooks, pens and pencils that helped 120,000 students in Baghdad return to their classrooms in May 2003. In preparation for the new school year, 1.2 million kits for secondary school students and 4,000 kits for their schools including desks, chairs, blackboards, and bookshelves are arriving in Iraq.

Malnutrition contributed to high mortality rates in Iraq during Saddam's rule. The food aid for Iraq has continued to supply the public distribution system and has allowed the majority of Iraqis access to food rations. On July 15, the World Food Program reported that nearly 1.5 million metric tons of food, or more than the three months supply required to keep the distribution system operating, have been dispatched to Iraq. An additional 2.2 million metric tons of food will arrive by the end of October. These steps will contribute to reversing malnutrition.

To date, 22.3 million doses of measles, tuberculosis, hepatitis B, diphtheria, whooping cough, tetanus, and polio vaccines have been provided, enough to vaccinate 4.2 million children.

Nearly all Iraqi children have finished their exams from last year and are ready to start a new school year in the fall. All universities are reopened.

A $53 million program to rehabilitate more than 100 schools and clinics is underway. In the southern region, more than 50 schools are in various stages of rehabilitation. More than 600 schools will be in "like new" condition in time for the beginning of classes.

Five million revised math and science textbooks will be ready before the start of the school year.

Saddam Hussein's rhetoric is being removed from Iraqi schoolchildren's textbooks. In the words of Dunia Nabel, a teacher in Baghdad: "We want flowers and springtime in the texts, not rifles and tanks." (The Chicago Tribune, July 31, 2003).

Ten delivery rooms in hospitals and primary healthcare centers in Basra have been rehabilitated and stocked with essential drugs and medical supplies.

The juvenile institution for children that was the subject of reports of abuse and appalling conditions under Saddam Hussein has been replaced by a project run by UNICEF and NGOs. Seven orphanages have undergone major building renovations and training for staff.

Nearly 3,000 soccer balls were shipped on May 30 and another 60,000 balls on their way to Iraq through a private/public partnership and

the U.S. soccer community.

10 Signs of Economic Renewal:

A New Economy: A new Iraqi economy is being built on the principles of market economics, respect for the rule of law, and transparency.

Salaries: The CPA regularly pays salaries to those teachers, healthcare workers, soldiers, police, and other public sector employees who have returned to work. Payments of pensions and other emergency payments have also helped to avert a humanitarian crisis. Teachers' salaries, and other key employees' salaries, have increased four-fold over their pay under Saddam Hussein. Some 39,000 electrical workers are back at work. Other sectors show similar encouraging signs.

Commerce: The marketplace in Baghdad has many goods that were previously unavailable because of sanctions or because they were forbidden under the previous regime. Items such as satellite dishes are now readily available to Iraqis.

Banks: Banks are open in Baghdad. The CPA is working with Iraqis outside of Baghdad to open banks across the country as soon as possible. In addition, international interest in establishing an Iraqi trade bank has been strong, and proposals from foreign banks are under review for creating this trade facility.

Food: The CPA has purchased the upcoming wheat and barley crops, helping to meet the country's food needs while supporting farmers. These crops include over 600,000 metric tons of Iraqi wheat and more than 300,000 metric tons of Iraqi barley.

Loans for Entrepreneurs: A micro-credit facility is now being set up in the South. Credit facilities for the rest of the country are also planned. Iraq's two major banks will start making small and medium sized business loans to help Iraqi entrepreneurs restart their businesses.

Currency: A unified currency for Iraq has been announced. The exchange of old banknotes for new ones is set to begin October 15.

Iraqis' Savings: The dinar has maintained its value against the dollar, preserving the dinar-dominated savings of Iraqi citizens.

Natural Resources: Oil production is increasing, with daily production of crude averaging 1 million barrels in recent days.

Budget: The budget for the last six months of 2003 is now being executed, and the 2004 budget formulation process has begun. Of the 2003 budget, more than $400 million has been released to Ministries in July and August alone. The 2004 budget process, to be run by Iraqis, will target the most important priorities for the country's reconstruction and build on the spending commitments of the budget for the last six months of 2003.

10 Examples of International Support for the Renewal of Iraq:

The United Nations Secretary General Kofi Annan said of the Iraqi Governing Council: "[The Council's] formation is an important first step towards the full restoration of Iraqi sovereignty." The UN is supporting the renewal of Iraq through the Oil for Food program, and by providing humanitarian assistance, promoting human rights, and assisting the Iraqi Governing Council in rejoining the international community.

The United Nations Security Council passed, without opposition, Resolution 1483, lifting sanctions against the Iraqi regime.

The top 12 financial supporters for the renewal of Iraq are (in descending order): the United States, United Kingdom, Canada, Japan, Australia, Germany, Norway, Denmark, United Arab Emirates, Saudi Arabia, Spain, and Kuwait.

The UN reports that its total humanitarian assistance for the people of Iraq is $2.2 billion, of which $1.2 billion is pledged or contributed from the international community and $1 billion is funded through the Oil for Food program.

In addition, several countries have pledged $800 million to UN programs. Nearly three dozen countries have made pledges or contributions to the renewal of Iraq.

There are now 34 foreign missions in Baghdad. Kuwait has reestablished relations with Iraq.

International pledges for reconstruction assistance are almost $3 billion, and an international conference to discuss additional funding for Iraq is scheduled for the fall.

More than 45 countries have offered military forces. The United Kingdom and Poland are each leading multinational divisions.

Numerous countries have contributed to the Coalition by providing basing and fly-over rights, as well as logistical support.

A total of 19 countries providing more than 13,000 troops in Iraq are supporting Operation Iraqi Freedom, and 14 countries are committed to deploying additional troops.

10 Signs of Cultural Rebirth:

Iraqi Olympic Committee is reconstituted without fear from Uday Hussein: The new President of the Free Iraq Olympic group said, "The Iraqi teams used to produce the champions of Asia in many sports. They have declined since the arrival of Uday. Now we want to rebuild them with the help of the international community." -- Sharar Haydar, one of Uday Hussein's former torture victims, The Guardian (London), May 15, 2003.

The Baghdad symphony is performing, and their concerts are also being televised. The conductor of the symphony said, "We're trying to show the world that Iraqis have a great culture." -- Hisham Sharaf, at a performance of the Baghdad Symphony, Agence France Presse, June 12, 2003.

Theaters are quickly reopening. In the words of one filmmaker: "You cannot imagine what it means for us to be here on this national stage, where everything we stand for was forbidden. Now it is ours."-- Oday Rashid, Los Angeles Times, May 5, 2003.

Religious rites are being reestablished. As one Iraqi said: "I can't express my feelings. All I feel is joy. This is the first time I've seen this (Shiite celebrations) for 30 years. Saddam forbade everything. He forced us underground." -- Sami Abbas, a Shia at the holy shrine of Kadhimiy, The Washington Post, April 16, 2003.

150 newspapers on the streets of Baghdad help get out the news of a free Iraq. Ali Jabar is quoted as saying, "Every day I buy a different paper. I like them all." Says a newspaper editor: "We can't train staff fast enough. People are desperate here for a neutral free press after 30 years of a totalitarian state." -- Saad al-Bazzaz, editor of the Azzaman Daily in Baghdad, The Independent (London), July 8, 2003.

Satellite dishes are the most popular items for sale in Baghdad. "I want to watch all of the world, all channels in the world. I want to watch freedom." -- Mohammed al-Khayat, an Iraqi who just purchased his first satellite dish, The Baltimore Sun, April 26, 2003.

Banned books are now available in the market. A teacher selling books in Baghdad said: "Before, so many books were forbidden -- anything that didn't agree with the regime. Which means practically everything that was ever printed!" -- Imad Saad, Los Angeles Times, May 3, 2003.

Artists are free to display their works and poets are free to write. As one poet said: "For decades, we were used to watching ourselves. Now you can think with words. But to talk loudly and to think loudly takes time. Freedom needs practice, and it takes practice to be free." -- Mohammed Thamer, The Washington Post, April 22, 2003.

Education is being revitalized. As a member of Baghdad's city council pointed out, "We want to have a real education, to be a progressive country. Education is very important to the reconstruction of our society. If you want to civilize society, you must care about education." -- Al Sa'ad Majid al Musowi, The Chicago Tribune, July 31, 2003.

The Marshlands are being rehabilitated. In the words of one Iraqi, "We broke the dams when the Iraqi army left. We want to teach our children how to fish, how to move on the water again." -- Qasim Shalgan Lafta, a former fisherman who helped restore the water to the Iraqi wetlands that Saddam had destroyed, The Chicago Tribune, June 13, 2003.

10 Steps to Improve the Lives of Iraqi Women:

The Coalition is working to ensure that women play an important role in all parts of the government.

Three Iraqi women who are members of the new Governing Council are fully engaged in promoting the involvement of women in Iraq's future.

An esteemed former female Iraqi judge in the Ministry of Justice is undertaking a review of laws, legal practices, and the legal profession in Iraq for ways to increase equality and participation of women.

The Ministry of Interior conducted an assessment of the former Iraqi Police Force in early April. This resulted in a requirement to target recruitment of women and their inclusion in training offered at all academies. The program will become a reality August 15 when the recruiting drive begins with women as one of the groups targeted for selection.

The Ministry of Labor and Social Affairs has adopted a policy of equal access to services and benefits for all those eligible, and this policy will ultimately expand services as well as quality to larger numbers of Iraqis including women.

Iraqi women will have a role in the development of democracy and civil society. A senior administration official from the CPA Democracy and Governance team is conducting outreach activities to involve Iraqi women.

The Coalition team has held numerous meetings with Iraqi women from all walks of life to hear their concerns and to listen to their ideas for the future development of democracy in their country. In addition, the CPA has met with various women's groups and with international organizations regarding their ideas and efforts to meet the needs of Iraqi women.

The Coalition helped a group of Iraqi women conduct a conference July 9 that included workshops on the constitution and democracy, legal reform, education, health and social affairs, and economic and employment issues. More than 70 women attended, the majority of whom were Iraqi women experts in such fields as law, academia, medicine, and business.

Quotas restricting the entry of women into certain university courses have been raised or lifted altogether.

Iraqi women's organizations are being created to expand opportunities for women to improve their lives and those of their families.

10 Voices of Liberation:

"We want to have a real education, to be a progressive country. Education is very important to the reconstruction of our society. If you want to civilize society, you must care about education." -- Al Sa'ad Majid al Musowi, a businessman on Baghdad's city council, The Chicago Tribune, July 31, 2003.

"We have full freedom to print anything we want. The coalition doesn't interfere in our work but, of course, we have our own red lines." -- Ishtar el Yassiri, editor of the new satirical Iraqi newspaper Habez Bouz, Financial Times (London), July 31, 2003.

"The tension is reducing every day. We are seeing a change. People are starting to realize that the soldiers are not here to occupy Fallujah forever-they're here to help us rebuild." -- Taha Bedawi, mayor of Fallujah, The Washington Post, July 29, 2003.

"It's a chance to defend our country for our people. It's good to work with the American soldiers. They give us new training and a mutual respect." -- Omar Abdullah, a recruit for Mosul's newly formed joint security group, Associated Press, July 29, 2003.

"I want to serve a new Iraq." -- Shevin Majid, a former Kurdish fighter who is now a recruit in the Mosul joint security force, Associated Press, July 29, 2003.

"More and more businessmen are coming to Iraq. It is a rich country and the Iraqi market is enormous. All the world wants to come and do business here." -- Captain Adel Khalaf, director of the port at Umm Qasr, Agence France Presse, July 27, 2003.

"For the first time I feel really free." -- Latif Yahia, Uday's former double, after hearing of Uday's death, Agence France Presse, July 26, 2003.

"The Iraqi people have got rid of two of the biggest criminals in history. Their victims and the sons of their victims, who lived for 35 years under oppression, are feeling proud and happy." -- Muwaffak al-Rubaiei, a member of the Iraqi Governing Council, Agence France Presse and Reuters, July 25, 2003.

"I couldn't show it to the people in the past because of the regime. Now I hang it up to show respect." -- Abbas Fadel, who displays a picture of his brother, tortured and murdered by Saddam Hussein, Knight Ridder, July 24, 2003.

"I can see that the American soldiers are free. In our old army, we were always under pressure and strict military orders. There was tough punishment." -- Raad Mamoud, a former Iraqi soldier, USA Today, July 21, 2003.

Sorta like the Democrats insisting that Florida keep on counting the
votes over and over again until the liberals get the results they
want?

Former Vice President Al Gore
Remarks to the New York Times
August 7, 2003

As reported by Jayson Blair

-AS PREPARED-

August 8, 2003, marks the hundredth day since the end of major combat operations in Iraq. Results in Iraq: 100 Days Toward Security and Freedom presents highlights of the successes shared by post-Saddam Iraqis and their partners in the renewal of their nation. Under the leadership of the Coalition Provisional Authority (CPA) and the new Iraqi Governing Council, major strides are being planned and made in three key areas: security, economic stability and growth, and democracy. As this report is issued, the CPA is working with Iraqis to implement a strategic plan with measurable goals. Outside observers and coalition leaders agree that much remains to be done to restore order and bring prosperity to a brutalized society and an infrastructure suffering from decades of malign neglect. The steps toward sovereignty and democracy will be difficult and require patience and time. Substantial progress is being made on all fronts. As President Bush said last week, the "success of a free Iraq will ... demonstrate to other countries in that region that national prosperity and dignity are found in representative government and free institutions.... As freedom advances in the Middle East, those societies will be less likely to produce ideologies of hatred and produce recruits for terror." This report focuses on 10 areas where the liberation of Iraq has improved the lives of Iraqis and the safety and security of the world. Some examples in this report include:

For the first time in the lives of most Iraqis, a representative government is being established and human rights and freedom are being enshrined.

Nearly 3 dozen countries are contributing financially to the renewal of Iraq, and 19 countries are providing personnel for Operation Iraqi Freedom.

The food distribution system is functioning, based on equitable needs rather than cronyism.

Nearly all Iraqi children have finished exams from last year. All universities are open.

A $53 million program to rehabilitate more than 100 schools and clinics is underway.

10 Ways the Liberation of Iraq Supports the War on Terror:

With the fall of Saddam Hussein's regime, Iraq is no longer a state sponsor of terror. According to State Department reports on terrorism, before the removal of Saddam's regime, Iraq was one of seven state sponsors of terror.

Saddam Hussein's regime posed a threat to the security of the United States and the world. With the removal of Saddam Hussein's regime, a leader who pursued, used, and possessed weapons of mass destruction is no longer in power.

Saddam Hussein would not uphold his international commitments, and now that he is no longer in power, the world is safe from this tyrant. The old Iraqi regime defied the international community and seventeen UN resolutions for twelve years and gave every indication that it would never disarm and never comply with the just demands of the world.

A senior al Qaida terrorist, now detained, who had been responsible for al Qaida training camps in Afghanistan, reports that al Qaida was intent on obtaining WMD assistance from Iraq. According to a credible, high-level al Qaida source, Usama Bin Laden and deceased al Qaida leader Muhammad Atif did not believe that al Qaida labs in Afghanistan were capable of manufacturing chemical and biological weapons, so they turned to Iraq for assistance. Iraq agreed to provide chemical and biological weapons training for two al Qaida associates starting in December 2000.

Senior al Qaida associate Abu Musab al-Zarqawi came to Baghdad in May 2002 for medical treatment along with approximately two dozen al Qaida terrorist associates. This group stayed in Baghdad and other parts of Iraq and plotted terrorist attacks around the world.

A safe haven in Iraq belonging to Ansar al-Islam -- a terrorist group closely associated with Zarqawi and al Qaida -- was destroyed during Operation Iraqi Freedom. In March 2003, during a raid on the compound controlled by the terrorists in northeastern Iraq, a cache of documents was discovered, including computer discs and foreign passports belonging to fighters from various Middle East nationalities.

The al Qaida affiliate Ansar al-Islam is known to still be present in Iraq. Such terrorist groups are now plotting against U.S. forces in Iraq.

Law enforcement and intelligence operations have disrupted al Qaida associate Abu Musab Zarqawi's poison plotting in France, Britain, Spain, Italy, Germany, and Russia. The facilities in Northern Iraq, set up by Zarqawi and Ansar al-Islam were, before the war, an al Qaida's poisons/toxins laboratory.

Abu Musa Zarqawi, the al Qaida associate with direct links to Iraq, oversaw those responsible for the assassination of USAID officer Laurence Foley in Amman, Jordan last October.

Saddam Hussein's Iraq provided material assistance to Palestinian terrorist groups, including the Popular Front for the Liberation of Palestine-General Command, HAMAS, and the Palestine Islamic Jihad, according to a State Department report. This included paying the families of Palestinian suicide bombers, according to testimonials from Palestinians and cancelled checks. Also, according to State Department reports, terrorist groups the Iranian Mujahedin-e-Khalq and the Abu Nidal organization were protected by the Iraqi regime protected by the Iraqi regime.

10 Signs of Better Security:

The Coalition is working with Iraqis to improve internal security throughout the country. While the security situation is improving, dangerous remnants of the former regime and others continue to target progress and success.

New Iraqi army and police forces are being recruited, trained, and equipped. Some 1,200 Iraqis will be trained this year for the new Iraqi army, and in two years, 40,000 army recruits will be trained.

Fifty-eight of 89 Iraqi cities have hired police forces. In total, 34,000 Iraqis are employed in patrolling the streets of their country, and of these, 30,000 Iraqis are currently patrolling with coalition forces.

More than 8,200 tons of ammunition, thousands of AK-47s, grenades, and other weapons have been seized throughout Iraq -- much of which was stored by the Hussein regime in hospitals, schools, and mosques.

The CPA has hired more than 11,000 Iraqis to guard key facilities around the country.

Coalition forces, with information from an Iraqi, conducted operations that lead to the deaths of Uday and Qusay Hussein following their refusal to surrender. To date, 37 of the top 55 most wanted Iraqis have been captured or killed. With the deaths of Uday and Qusay, more and more Iraqis are freed from their fear and are volunteering their services and information.

Coalition forces continue to take the offensive against the remnants of the Ba'athist regime who are targeting the sites and symbols of reconstruction and stabilization successes.

An Iraqi Civil Defense Force will help U.S. and Coalition forces in rooting out Saddam loyalists and criminal gangs who have been attacking military forces and obstructing reconstruction efforts. Four thousand Iraqi militiamen will be trained by U.S. troops over the next eight weeks.

In Basra, 500 river police have been patrolling since June 19.

Some 148,000 U.S. service members and more than 13,000 Coalition troops from 19 countries are serving in Iraq.

Most of Iraq is calm and progress on the road to democracy and freedom not experienced in decades continues. Only in isolated areas are there still attacks.

10 Signs of Better Infrastructure and Basic Services:

Electricity: Electricity is now more equitably distributed and more stable, instead of, as during Saddam Hussein's rule, being supplied to Baghdad at the expense of the rest of the country. For the rest of 2003, $294 million is budgeted to improve electrical systems.

Water Systems: Water supply in many areas is now at pre-conflict levels. Over 2000 repairs have been made to 143 water networks, and water quality sampling has restarted. There are plans to add 450 million liters of capacity to Baghdad's system.

Healthcare: Iraqi hospitals are up and running, and healthcare, previously available only for Ba'athist elite, is now available to all Iraqis. Drugs are being supplied to hospitals and clinics, and medical worker salaries are being paid regularly, ensuring employees attend work. Vaccinations are available across the country, and anti-malarial spraying will take place this autumn.

Returning Refugees: Refugees began returning from Saudi Arabia and the United Arab Emirates. UNHCR and the Coalition are working together to ensure that groups of refugees in Jordan and Iran can return to Iraq safely and comfortably in the near future.

Revitalizing Oil Production and Distribution: Repairs and modernizations are being made to the antiquated and neglected oil production and distribution systems. Oil will provide the future wealth of the country but was severely misappropriated by the former regime.

Police: There are 6,000 police on the streets of Baghdad and 34 out of 60 police stations are currently operational. Throughout Iraq, there are some 30,000 police patrolling the streets.

Road Repairs: Emergency road repairs, underway throughout Iraq now, will employ even more Iraqis in the coming weeks.

Airports: The Baghdad and Basra airports are ready to open, and the airport in Basra is expected to begin commercial operations in August. Several airlines are likely to start regular air service to Iraq.

Major Bridges: $4.3 million has been provided to repair the Tikrit Bridge; $4.4 million to rebuild the Al Mat Bridge; and $3.2 million to rebuild the Khazir Bridge.

Port at Umm Qasr: The port at Umm Qasr is open and functioning again, and customs and port authority agents are being trained.

10 Signs of Democracy:

A 25-member national Governing Council includes three women and Kurdish, Sunni, Christian, Turkmen, and Shi'ia representatives. The establishment of this body is a first and important move toward Iraqi self-government.

The Governing Council is creating a Preparatory Commission to write a constitution. After a constitution is approved, elections will lead to a fully sovereign Iraqi government.

There are municipal councils in all major cities and 85 percent of towns, enabling Iraqis to take responsibility for management of local matters like healthcare, water, and electricity.

Provisional councils have been formed in Najaf, Al Anbar, and Basra.

The Baghdad City Advisory Council was inaugurated on July 7, 2003. Its 37 members were selected by members of the city's nine district councils, who themselves were selected by Baghdad citizens in 88 neighborhoods throughout the city.

Local governance councils are robust in Basra and Umm Qasr, helping to identify areas for immediate humanitarian and reconstruction assistance.

The Office of Human Rights and Transitional Justice is working to locate missing persons, investigate, analyze, and exhume mass graves, archive past human rights abuses and promote civic education/public awareness about human rights.

To facilitate voluntary resolutions of property claims, the Property Reconciliation Facility is being created.

The Coalition is helping fund and train Iraqis wanting to create their own non-governmental organizations. These new NGOs include public policy think tanks and an association of former political prisoners.

More than 150 newspapers are now published in Iraq offering Iraqis access to many different kinds of information. Foreign publications, radio, and television broadcasts are also available.

10 Improvements in the Lives of Iraqi Children:

A "back to school" campaign delivered 1,500 kits with book bags, notebooks, pens and pencils that helped 120,000 students in Baghdad return to their classrooms in May 2003. In preparation for the new school year, 1.2 million kits for secondary school students and 4,000 kits for their schools including desks, chairs, blackboards, and bookshelves are arriving in Iraq.

Malnutrition contributed to high mortality rates in Iraq during Saddam's rule. The food aid for Iraq has continued to supply the public distribution system and has allowed the majority of Iraqis access to food rations. On July 15, the World Food Program reported

that nearly 1.5 million metric tons of food, or more than the three months supply required to keep the distribution system operating, have been dispatched to Iraq. An additional 2.2 million metric tons of food will arrive by the end of October. These steps will contribute to reversing malnutrition.

To date, 22.3 million doses of measles, tuberculosis, hepatitis B, diphtheria, whooping cough, tetanus, and polio vaccines have been provided, enough to vaccinate 4.2 million children.

Nearly all Iraqi children have finished their exams from last year and are ready to start a new school year in the fall. All universities are reopened.

A $53 million program to rehabilitate more than 100 schools and clinics is underway. In the southern region, more than 50 schools are in various stages of rehabilitation. More than 600 schools will be in "like new" condition in time for the beginning of classes.

Five million revised math and science textbooks will be ready before the start of the school year.

Saddam Hussein's rhetoric is being removed from Iraqi schoolchildren's textbooks. In the words of Dunia Nabel, a teacher in Baghdad: "We want flowers and springtime in the texts, not rifles and tanks." (The Chicago Tribune, July 31, 2003).

Ten delivery rooms in hospitals and primary healthcare centers in Basra have been rehabilitated and stocked with essential drugs and medical supplies.

The juvenile institution for children that was the subject of reports of abuse and appalling conditions under Saddam Hussein has been replaced by a project run by UNICEF and NGOs. Seven orphanages have undergone major building renovations and training for staff.

Nearly 3,000 soccer balls were shipped on May 30 and another 60,000 balls on their way to Iraq through a private/public partnership and the U.S. soccer community.

10 Signs of Economic Renewal:

A New Economy: A new Iraqi economy is being built on the principles of market economics, respect for the rule of law, and transparency.

Salaries: The CPA regularly pays salaries to those teachers, healthcare workers, soldiers, police, and other public sector employees who have returned to work. Payments of pensions and other emergency payments have also helped to avert a humanitarian crisis. Teachers' salaries, and other key employees' salaries, have increased four-fold over their pay under Saddam Hussein. Some 39,000 electrical workers are back at work. Other sectors show similar encouraging signs.

Commerce: The marketplace in Baghdad has many goods that were previously unavailable because of sanctions or because they were forbidden under the previous regime. Items such as satellite dishes are now readily available to Iraqis.

Banks: Banks are open in Baghdad. The CPA is working with Iraqis outside of Baghdad to open banks across the country as soon as possible. In addition, international interest in establishing an Iraqi trade bank has been strong, and proposals from foreign banks are under review for creating this trade facility.

Food: The CPA has purchased the upcoming wheat and barley crops, helping to meet the country's food needs while supporting farmers. These crops include over 600,000 metric tons of Iraqi wheat and more than 300,000 metric tons of Iraqi barley.

Loans for Entrepreneurs: A micro-credit facility is now being set up in the South. Credit facilities for the rest of the country are also planned. Iraq's two major banks will start making small and medium sized business loans to help Iraqi entrepreneurs restart their businesses.

Currency: A unified currency for Iraq has been announced. The exchange of old banknotes for new ones is set to begin October 15.

Iraqis' Savings: The dinar has maintained its value against the dollar, preserving the dinar-dominated savings of Iraqi citizens.

Natural Resources: Oil production is increasing, with daily production of crude averaging 1 million barrels in recent days.

Budget: The budget for the last six months of 2003 is now being executed, and the 2004 budget formulation process has begun. Of the 2003 budget, more than $400 million has been released to Ministries in July and August alone. The 2004 budget process, to be run by Iraqis, will target the most important priorities for the country's reconstruction and build on the spending commitments of the budget for the last six months of 2003.

10 Examples of International Support for the Renewal of Iraq:

The United Nations Secretary General Kofi Annan said of the Iraqi Governing Council: "[The Council's] formation is an important first step towards the full restoration of Iraqi sovereignty." The UN is supporting the renewal of Iraq through the Oil for Food program, and by providing humanitarian assistance, promoting human rights, and assisting the Iraqi Governing Council in rejoining the international community.

The United Nations Security Council passed, without opposition, Resolution 1483, lifting sanctions against the Iraqi regime.

The top 12 financial supporters for the renewal of Iraq are (in descending order): the United States, United Kingdom, Canada, Japan, Australia, Germany, Norway, Denmark, United Arab Emirates, Saudi

Arabia, Spain, and Kuwait.

The UN reports that its total humanitarian assistance for the people of Iraq is $2.2 billion, of which $1.2 billion is pledged or contributed from the international community and $1 billion is funded through the Oil for Food program.

In addition, several countries have pledged $800 million to UN programs. Nearly three dozen countries have made pledges or contributions to the renewal of Iraq.

There are now 34 foreign missions in Baghdad. Kuwait has reestablished relations with Iraq.

International pledges for reconstruction assistance are almost $3 billion, and an international conference to discuss additional funding for Iraq is scheduled for the fall.

More than 45 countries have offered military forces. The United Kingdom and Poland are each leading multinational divisions.

Numerous countries have contributed to the Coalition by providing basing and fly-over rights, as well as logistical support.

A total of 19 countries providing more than 13,000 troops in Iraq are supporting Operation Iraqi Freedom, and 14 countries are committed to deploying additional troops.

10 Signs of Cultural Rebirth:

Iraqi Olympic Committee is reconstituted without fear from Uday Hussein: The new President of the Free Iraq Olympic group said, "The Iraqi teams used to produce the champions of Asia in many sports. They have declined since the arrival of Uday. Now we want to rebuild them with the help of the international community." -- Sharar Haydar, one of Uday Hussein's former torture victims, The Guardian (London), May 15, 2003.

The Baghdad symphony is performing, and their concerts are also being televised. The conductor of the symphony said, "We're trying to show the world that Iraqis have a great culture." -- Hisham Sharaf, at a performance of the Baghdad Symphony, Agence France Presse, June 12, 2003.

Theaters are quickly reopening. In the words of one filmmaker: "You cannot imagine what it means for us to be here on this national stage, where everything we stand for was forbidden. Now it is ours."-- Oday Rashid, Los Angeles Times, May 5, 2003.

Religious rites are being reestablished. As one Iraqi said: "I can't express my feelings. All I feel is joy. This is the first time I've seen this (Shiite celebrations) for 30 years. Saddam forbade everything. He forced us underground." -- Sami Abbas, a Shia at the holy shrine of Kadhimiy, The Washington Post, April 16, 2003.

150 newspapers on the streets of Baghdad help get out the news of a free Iraq. Ali Jabar is quoted as saying, "Every day I buy a different paper. I like them all." Says a newspaper editor: "We can't train staff fast enough. People are desperate here for a neutral free press after 30 years of a totalitarian state." -- Saad al-Bazzaz, editor of the Azzaman Daily in Baghdad, The Independent (London), July 8, 2003.

Satellite dishes are the most popular items for sale in Baghdad. "I want to watch all of the world, all channels in the world. I want to watch freedom." -- Mohammed al-Khayat, an Iraqi who just purchased his first satellite dish, The Baltimore Sun, April 26, 2003.

Banned books are now available in the market. A teacher selling books in Baghdad said: "Before, so many books were forbidden -- anything that didn't agree with the regime. Which means practically everything that was ever printed!" -- Imad Saad, Los Angeles Times, May 3, 2003.

Artists are free to display their works and poets are free to write. As one poet said: "For decades, we were used to watching ourselves. Now you can think with words. But to talk loudly and to think loudly takes time. Freedom needs practice, and it takes practice to be free." -- Mohammed Thamer, The Washington Post, April 22, 2003.

Education is being revitalized. As a member of Baghdad's city council pointed out, "We want to have a real education, to be a progressive country. Education is very important to the reconstruction of our society. If you want to civilize society, you must care about education." -- Al Sa'ad Majid al Musowi, The Chicago Tribune, July 31, 2003.

The Marshlands are being rehabilitated. In the words of one Iraqi, "We broke the dams when the Iraqi army left. We want to teach our children how to fish, how to move on the water again." -- Qasim Shalgan Lafta, a former fisherman who helped restore the water to the Iraqi wetlands that Saddam had destroyed, The Chicago Tribune, June 13, 2003.

10 Steps to Improve the Lives of Iraqi Women:

The Coalition is working to ensure that women play an important role in all parts of the government.

Three Iraqi women who are members of the new Governing Council are fully engaged in promoting the involvement of women in Iraq's future.

An esteemed former female Iraqi judge in the Ministry of Justice is undertaking a review of laws, legal practices, and the legal profession in Iraq for ways to increase equality and participation of women.

The Ministry of Interior conducted an assessment of the former Iraqi Police Force in early April. This resulted in a requirement to target recruitment of women and their inclusion in training offered at all academies. The program will become a reality August 15 when the recruiting drive begins with women as one of the groups targeted for

selection.

The Ministry of Labor and Social Affairs has adopted a policy of equal access to services and benefits for all those eligible, and this policy will ultimately expand services as well as quality to larger numbers of Iraqis including women.

Iraqi women will have a role in the development of democracy and civil society. A senior administration official from the CPA Democracy and Governance team is conducting outreach activities to involve Iraqi women.

The Coalition team has held numerous meetings with Iraqi women from all walks of life to hear their concerns and to listen to their ideas for the future development of democracy in their country. In addition, the CPA has met with various women's groups and with international organizations regarding their ideas and efforts to meet the needs of Iraqi women.

The Coalition helped a group of Iraqi women conduct a conference July 9 that included workshops on the constitution and democracy, legal reform, education, health and social affairs, and economic and employment issues. More than 70 women attended, the majority of whom were Iraqi women experts in such fields as law, academia, medicine, and business.

Quotas restricting the entry of women into certain university courses have been raised or lifted altogether.

Iraqi women's organizations are being created to expand opportunities for women to improve their lives and those of their families.

10 Voices of Liberation:

"We want to have a real education, to be a progressive country. Education is very important to the reconstruction of our society. If you want to civilize society, you must care about education." -- Al Sa'ad Majid al Musowi, a businessman on Baghdad's city council, The Chicago Tribune, July 31, 2003.

"We have full freedom to print anything we want. The coalition doesn't interfere in our work but, of course, we have our own red lines." -- Ishtar el Yassiri, editor of the new satirical Iraqi newspaper Habez Bouz, Financial Times (London), July 31, 2003.

"The tension is reducing every day. We are seeing a change. People are starting to realize that the soldiers are not here to occupy Fallujah forever-they're here to help us rebuild." -- Taha Bedawi, mayor of Fallujah, The Washington Post, July 29, 2003.

"It's a chance to defend our country for our people. It's good to work with the American soldiers. They give us new training and a mutual respect." -- Omar Abdullah, a recruit for Mosul's newly formed joint security group, Associated Press, July 29, 2003.

"I want to serve a new Iraq." -- Shevin Majid, a former Kurdish fighter who is now a recruit in the Mosul joint security force, Associated Press, July 29, 2003.

"More and more businessmen are coming to Iraq. It is a rich country and the Iraqi market is enormous. All the world wants to come and do business here." -- Captain Adel Khalaf, director of the port at Umm Qasr, Agence France Presse, July 27, 2003.

"For the first time I feel really free." -- Latif Yahia, Uday's former double, after hearing of Uday's death, Agence France Presse, July 26, 2003.

"The Iraqi people have got rid of two of the biggest criminals in history. Their victims and the sons of their victims, who lived for 35 years under oppression, are feeling proud and happy." -- Muwaffak al-Rubaiei, a member of the Iraqi Governing Council, Agence France Presse and Reuters, July 25, 2003.

"I couldn't show it to the people in the past because of the regime. Now I hang it up to show respect." -- Abbas Fadel, who displays a picture of his brother, tortured and murdered by Saddam Hussein, Knight Ridder, July 24, 2003.

"I can see that the American soldiers are free. In our old army, we were always under pressure and strict military orders. There was tough punishment." -- Raad Mamoud, a former Iraqi soldier, USA Today, July 21, 2003.

1398. Re: dual band radios that transmit frs channels

Well, if you want to put a fine point on it, FRS actually shares the
GMRS frequencies, not the other way around. GMRS is the primary user.
FRS must not cause, and must accept, any interference with GMRS.
Obviously, if a transmitter uses a frequency that is not a allocated for
GMRS, then it must use power settings that are appropriate for that
particular service.

All the best, and 73,
Dave KZ1O

*** NO BULLETIN ***
*** SPECIAL NOTICE FROM THE EDITOR (by KB8NW): There will be "NO BULLETIN" for August 18th and (probably) 25th. Linda and I will be heading south, first to Tennesee to drop-off/move my daughter at Middle Tennesee State University (MTSU) and then off to Biloxi, Mississippi. I really need this break to rest up, and I hope that lying in the sun on the beach will help bring back some of my strength. However, PLEASE continue to send your DX info to me..... TNXS and GUD DX de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 3rd/August, through Sunday, 10th/August there were 209 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9V, 9Y, A3, A4, A5, A6, A7, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D6, DL, DU, E3, E4, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J6, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T9, TA, TF, TG, TI, TK, TR, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, VE, VK, VK9N, VP2M, VP5, VP8, VP8/h, VP8/o, VP9, VQ9, VR, VU, XE, XU, XZ, YA,

YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4K, AZERBAIJAN. Axel, DL6KVA, now active as 4K0CW from Baku until August 17th, was heard this past week on 17 meters CW. Watch around 18075-80 kHz after 1130z. QSL via DL6KVA (Bureau OK).

7Q, MALAWI. Harry, G0JMU, will once again be back in Malawi from August 10th for about 2 months as 7Q7HB. Look for him to be very active on 30 meters. QSL direct to G0IAS with return postage please.

9Y, TRINIDAD AND TOBAGO. Look for DL1MGB to be active as 9Y4TBG in the WAEDC SSB Contest (September 13-14th) and the IARU Region 1 Field Day SSB Contest as a Single-Op. QSL via DL4MDO.

BQ9P, PRATAS ISLAND. The BQ9P 2003 Web site is now available at: http://www3.ocn.ne.jp/~iota/newpage64.htm

C5, THE GAMBIA. Holger/DL5XAT and Matthias/DL5OB will be active from here October 21st and November 2nd. Callsign(s) is/are not yet known, but they plan to be active in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi-2 entry. QSL via DL5XAT. Outside of the contest, they will be active mainly on CW.

DU2, PHILIPPINES. Look for PA0CYW to be active as PA0CYW/DU2 in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band entry. He will be active 5 days before and after the contest using the same callsign. QSL via his home callsign (Bureau is OK).

DXCC LISTING. The "ARRL Letter" reminds everyone: "DXCC Annual List deadline approaching: The ARRL DXCC Desk says the deadline to submit applications for the 2003 DXCC Annual List is rapidly approaching. Applications must be postmarked no later than September 30, 2003. For more information, contact DXCC Manager Bill More, NC1L, dxcc@arrl.org."

F6, FRANCE. A team of members from the F6KNL Radio Club of Cenon (REF33) will be active on Oiseaux Island (Arcachon Bay, Sud Ouest France) as F6KNL/p from Friday, August 15th (0800-1700 local time). Activity will be on 40/20/15/10/2 meters CW/SSB. QSL via Laurent, F8BBL, by the Bureau (100%) or direct. Reference numbers of island: DIFM - AT-028 and Grid SQ: IN94JQ.

H40, TEMOTU PROVINCE. Kazuo, P29KM, informs OPDX that on Saturday, August 9th, they (Dan - H40V and JA1PBV; Kazuo - H40H and P29KM) were in Honiara and will arrive at Lata, Temotu Province (H40) Sunday, August 10th, as long as their Solair flight is OK/on schedule. They will be there for one week, leaving Lata on August 17th. They are planning to operate CW, PSK3, RTTY, SSB, SSTV on 6-160(!) meter bands there. Their activity depends on location and the local power. As this was being typed, activity by H40H was on 18070 and 14014 kHz; H40V was on 10107 and 14083 kHz. QSL info is

via the address on www.QRZ.com.

IOTA MICROLITE TOUR 2003. Vincenzo, IZ0FKE, a member of the ARI Frascati DX Team (http://www.arifrascati.it) plans to activate the following islands and is calling the operation the "Microlite IOTA Tour". He will use a Yaesu FT100D and a short one G5RV antenna 40-10 meters (and possibly a simple monoband dipole for 20 meters). He will operate first as OH0/IZ0FKE from a cottage on the Baltic Sea from Aland Islands (EU-002 - Finstrom is the location - the first Italian operating from Aland Island) from August 16-23rd. He will then be active as OH1/IZ0FKE from a private home located on a small island in the Lansi-Suomi (Turku) Province Group (IOTA EU-096) from August 23-27th. Acvtivity will be mainly SSB, especially on 20/17/10 meters. QSL via IZ0FMA. Vincenzo will use a Photo Cellular Phone (largely used in Europe), so everyday he will post pictures on the 425dxn Web page. He will also use a cam-recorder to record some movies to post later online on his Web site at: http://www.iz0fke.com

IOTA NEWS.....
AS-060. Look for 6L0NJ/4 to be active from Choyal Island from August 15-17th. Activity will be on 160-6 meters, including the WARC bands, on SSB/CW/RTTY/PSK31. QSL Manager is DS4AEN. A log search will be availale at: http://www.dx.or.kr

AS-085. Operators Kim/HL1OYF, Kwon/HL1SRJ, Ryu/DS4NYE and possibly others will be active from Soan Island between August 14-17th. Activity will be barefoot on 40-10 meters CW/SSB into a vertical pharastic array. QSL via HL1OYF.

AS-101. Choon, E20HHK, will go to work in the south of Thailand. He will use E20HHK/P on Samui Island from August 14-17th. After his operation he will operate as E20HHK/8 in the SEANET Contest. QSL via E21EIC

KH7K, KURE ATOLL. Kimo Chun, KH7U, has informed OPDX that he is organizing a DXpedition to Kure Atoll. He states, "Kure is in demand within the top 20 or so around the world and even as high as number 2 in Europe by some accounts. We hope to provide many QSOs and cards to as many people as possible with special emphasis on Europe as they have the highest need. We are hoping to be on the air for two full weekends (in EU) and the intervening week. If possible, we will end with participation in the CQWW-SSB contest. Operation on other modes and bands during the contest is intended." Here are some of the details:
Team Leaders: Kimo Chun, KH7U, and Pat Guerin, NH6UY. Experienced operators - many from Kingman K5K trip.
Tentative operating period: Latter half of October 2003. With attempt at participation in CQWW-SSB.
Team size: Between 12 and 15.
Stations: 4 to 6 plus 6m. Most with linears. Icom will be providing equipment.
Antennas: Force 12 Vertical Dipole Arrays; HF Yagis; 2 Titanex V-160E Verticals; M2 6M Yagi.
Modes: CW/SSB/RTTY. Other modes under consideration.

Satellite: Under consideration.
Transportation: Air and Boat (still in negotiations).
QSL: A manager will be announced.
Web Page: Will announce if they have one. They will not likely have
"on-line" logs.
Target: The emphasis will be Europe but they will be working the world.
Call Sign: To be determined.

LIGHTHOUSE ACTIVITY.....
** Remember ****
** International Lighthouse/Lightship Weekend (ILLW), August 16-17th **

Cory/N1WON and David/WA4ET will be active as KG4LH, from Guantanamo Bay, Cuba (NA-015) and Windward Lighthouse (GTM-01), August 16/17th for the International Lighthouse Weekend. Activity will be on 80-6 meters SSB, RTTY and PSK, including 5 MHz USB. Please QSL KG4LH to N1WON or WA4ET, as listed in QRZ. Reminder: Please do not send cards for this event to the bureau. There is no KG4 bureau for Guantanamo Bay. Please QSL as directed to receive QSL cards.

Operators from Gainesville, FL, area ham clubs and the University of Florida will activate the Cedar Key Lighthouse (WLH# 2741, USA #745) on Seahorse Key (IOTA NA-076) in Levy County using the call W4L during the International Lighthouse/Lightship Weekend, August 16-17th. There will be SSB/CW activity mainly on the HF bands with a possibility of some 6 meters. This is only the second time that a radio operation has been allowed from the Cedar Key lighthouse at Seahorse Key which is a closed wildlife sanctuary. QSL via W4DFU: University of Florida, Box J-12 JHMHC, Gainesville, FL 32610 USA.

From Eagle Harbor, Michigan, look for the Eagle Harbor Lighthouse (USA-253) to be activated in the ILLW, August 15-16th, using the special 1x1 callsign, K8E. Modes of operation include HF/VHF, CW/SSB, FM Satellite and possible HF digital. Collectors of ARLHS numbers can get credit for three upon request: Eagle Harbor Lighthouse USA-253, Front Range Light USA-254 and Rear Range Light USA-255. QSL via bureau or direct to N8MR with #10 SASE. The Web page for this operation is available at: http://www.kc8nah.com/Interests/illw03.htm

Berkin, TA3J/4, will be active only on SSB on 40, 20, 15 and 10 meters from Antalya Bababurnu Lighthouse (TUR-???) (KM56JU) on August 16-17th for the International Lighthouse/Lightship Weekend. QSL via his home callsign, direct (SASE+New IRC only, no greenstamp please) or bureau. SWL QSL cards are OK. Further information is available at: http://www.qsl.net/ta3j

Look for VK3BV to be active from the Macquarie Lighthouse (ARLHS AUS-105, Grid Loc. QF56), Australia's first lighthouse. Activation will be between 0300-0700z on August 16th. QSL via QRZ.com.

Look for ZV7AA to be active on all bands and modes from Tamandare Lighthouse (ARLHS BRA-102, DFB PE-07) August 15-17th, including an

entry in the International Lighthouse/Lightship Weekend (August 16-17th). Activity will be on all bands 160-10 meter SSB, CW, RTTY and PSK31. QSL via PY7AA: P. O. Box 1043, 51001-970 Recife - PE, Brazil.

OFFICERS FOR 2003/2004. Members of the CDXC (Chiltern DX Club) - The UK DX Foundation held their annunal general meeting on July 19th and the following were elected to the 2003/2004 committee:
President: Neville Cheadle, G3NUG Committee Members:
Chairman : John Butcher, G3LAS Jim Kellaway, G3RTE
Secretary: Shaun Jarvis, M0BJL Mark Haynes, M0DXR
Treasurer: Nigel Cawthorne, G3TXF
Digest Editor: Martyn Phillips, G3RFX

CDXC contributes around 4,000 USD each year to DXpeditions and has supported 84 DXpeditions since 1992. The club also supports IREF in recognition of the interest in IOTA activities. There are now over 600 members. The CDXC web page can be found at: http://www.cdxc.co.uk

OJ0, MARKET REEF. The QLF DX Team will be active from Market Reef (EU-053) as OJ0LA between September 19-26th. This operation is good for the following Lighthouse Award's: ARLHS MAR-001 and WLH-0542. Operators are: LA5UKA, LA6MP, LA8AJA, LA8SDA and LA9VDA. Also, OH0RJ will join the group as OJ0RJ. They are expected to be active on all bands, CW/SSB/RTTY and will be looking especially for NA and JA stations. The plan is to be active in the SAC CW Contest with one station. Due to possible bad WX conditions in the fall, they might use an expensive helicopter. They need financial support for this. QSL for OJ0LA via LA9VDA. For direct cards please add SAE + 2 USD or 1 IRC. QSL OJ0RJ via OH0RJ, only direct. More info can be found on their homepage at: http://www.qsl.net/la8aja/oj0la/

PA-PH, NETHERLANDS (New Prefixes To Be Heard!). As of August 4th, we should begin to hear new prefixes on all bands from The Netherlands. JanJaap, PG7V, informs OPDX that all prefixes from PA-PH can be used now, choice of prefix and suffix is free. Suffix has to be 1-3 letters long. PD is novice (2m/70cm), PE and PH is VHF and higher. You can find a list of all Dutch prefixes on his Web site. He is also keeping a list of new callsigns, together with the former calls. You can find this on: http://www.pg7v.net/english

QSL INFO AND NEWS.....
4W1BK QSLS. Stu, WA2MOE, reports that all QSLs cards received by Saturday, August 2nd, have been answered and are in the mail.

Alex, RW3RN, reports that he made a mistake last week. QSL 5B4AGM via RW3RN (only for 2003 EU HF Championship QSOs, not the 2003 IOTA Contest). He is sorry for the mistake.

Carlos Nora, CT1END, reports that information and photographs of the recent activities by CS4B (EU-040, QSL via CS1GDX) and CS5F (EU-145, Lighthouse Cabo de Santa Maria, QSL via HB9CRV/CT3FN) were updated at the following Web pages: http://ct1end.netpower.pt
http://www.portal-dx.web.pt

The log for EG9IC is now available at the following Web pages:
http://WWW.URE.ES/hf/eadx/expediciones/chafarinas/log/log.htm
http://www.ure.es/hf/eadx/expediciones/chafarinas/chafarinas.htm

George, K8GG, has recently sent QSLs via the ARRL outgoing bureau to all non-US contacts from PJ2/K8GG (Jan 2003), and KP2/K8GG (Jan 2001). PJ9/K8GG QSLs for all non-US contacts were previously sent via the bureau. All direct QSLs with return postage were answered within a week of being received. There is no need to answer these bureau QSLs. U.S. stations needing a QSL card can send direct with SASE or use a forwarding service for these callsigns. The address is correct on all web sites such as Buckmaster, E-ham.net and QRZ.com. George still has logs for K8GG/VP2M (Oct 1986), K8GG/PA (Dec 1987 & Jan 1988), J3/K8GG (Jan-Feb 1990), VP2M/K8GG (Oct 1986) and P4/K8GG & P40GG (Jan-Feb 1994) and will answer direct and bureau QSL requests.

Nilay, TA3YJ, informs OPDX that she sent QSL cards for TA3YJ, TA3YJ/0, TA3YJ/3, TA3YJ/4, TA3YJ/LH, SV1/TA3YJ, LZ2/TA3YJ, TA3J, TA3J/0, TA3J/1, TA3J/3, TA3J/4, TA3J/LH, SV1/TA3J, LZ1/TA3J, LZ2/TA3J, YM3BU, YM3ATA, YM3SV, YM75TA, YM21TA, YM3LZ/WPX2000 and YM3LZ/WAE2000 to the QSL Bureaus of China, Iraq, Quatar, Sierra Leone, Tanzania, Uzbekistan direct on August 6th.

Alan, VK4AAR, informs OPDX, "I wish to advise that logs for the stations for which I am the manager are still open with the exception of YJ8AA. I have received information that many people have been sending QSLs via the bureau for these stations. It is only possible DIRECT. People can still send to me direct (PO Box 421, Gatton 4343, Australia with S.A.E. and greenstamp)."
DX stations VK4AAR manages are: C21RH, P29RH, KH2VM, V63PD, VI0ANARE, VK0MM, VU3RSB, ZK2JJ and ZK2PJ (Also, a couple of 4W in the near future).
IOTA stations VK4AAR manages are: VK6BM (OC-234), VK6BSI (OC-243), VK8AN/6 (OC-154), VK8AN/8 (OC-229), VK8AV/3 (OC-136) and VK8MI (OC-173).
Plus Australian mainland stations are: VK8AN, VK8DP, VK8RH and VK8XC.

The YI/KV4EB logs through the end of July (states Joe Nemecek, K0JN) are now online at: http://dx.qsl.net/logs/

SPECIAL EVENT. Look for special event station TM5GAP to be active from September 6-14th, from GAP/TALLARD airfield during the "World Parachuting Championship". Activity will be on the air on all HF bands, 6 meters and 2 meters. The Department of Hautes Alpes hams are awaiting for your QSO. Those who will be vacationning near this area are welcome to the station settled on the airfield. QSL per operator's instructions.

SRM 2003. The Scottish-Russian ARS introduces Scottish-Russian Marathon to encourage activity by all radio amateurs worldwide to contact areas of Scotland and Russia. This is purely an activity week and will enable participants to pursue the CAOSA Award Scheme, WAB Scotland Award Scheme, IOSA Award Scheme, SOTA Award Scheme, ARLHS Award Scheme, RDA Award Scheme, RRA Award Scheme, RIIA Award Scheme, RMA Award Scheme, RFFA Award Scheme,

RLHA Award Scheme, RABA Award Scheme, and provide an interest in contacting different areas of Scotland and Russia. The event is to be held on the full second week in August each year. The 2003 Marathon will start at 0000z on Monday, August 11th, and last until 2400z on Sunday, August 17th. Activity is encouraged on all HF bands by individual licensees and club stations or the use of a special event callsign from radio amateurs in Scotland and Russia. For more details on this SRM award and others, please contact: Jurij Phunkner, MMODFV, P.O. Box 7469, Glasgow, G42 0YD, Scotland, U.K. (E-mail: jurij@phunkner.freeserve.co.uk) or visit the following Web page at: http://www.qsl.net/mm0dfv/index.htm

T33, BANABA ISLAND (OOOPSS!! Correction). There are two corrections to last week's bulletin (OPDX.621). The most important one is the QSL Manager. Your editor misread the announcement, please note that the QSL Manager for the T33C operation is F5CWU and not PA5ET. Also, the vessel's name is "Te Taobe" and not "Te Toobe". Remember, the international team of 20 operators will be active as T33C during the first two weeks of April 2004 (April 4-16th). They will have 6 HF stations on the air (3 CW and 3 SSB), plus a separate 6 meter/AO-40 and separate HF digital mode station. Activity will be on 160-6 meters, satellite, CW, SSB, RTTY, PSK and some SSTV. For updates and more information, visit their Web page at: http://www.dx-pedition.de/banaba2004

TZ, MALI (Update). The TZ6RD Team announced that everything is "OK" for their operation this week. They also announced that Angel, EA1QF, President of URE (the Spanish National Bureau) and a very well known Dxpeditoner has joined their Mali 2003 team. They state he is a great SSB operator. The TZ6RD team is now confirmed and is expected to be active this week between August 12-21st from Bamako, Mali. The operators confirmed are: XE1L, N6TQS, EA1QF, EA5KM, EA5RD, EA5RM and EA5XX. They also announced their PILOT STATION will be Max, I8NHJ, and you can reach him at: i8nhj@pagus.it
The new and tiny light-weight Spanish-made amplifiers had been tested by EA5RM last week, and they seem to put out 400 watts. They are going to feed vertical, dipoles in this all bands, all modes operation. The QSL Manager will be EA4URE, the Spanish Bureau, and the online logs will be available on the WEB page: http://www.pagus.it/tz6rd

Z3100, MACEDONIA. Vlado, Z35M now signing Z3100M (QSL via his original callsign Z35M), wants to remind everyone that in celebration of 100 years of Macedonian statehood and 100 years since the Ilinden Uprising (August 2, 1903, against Othoman's slavery, and formation of Republic of Krushevo, the first Republic in the Blacans), Z3 stations will be active with the special event prefix "Z3100" between August 1-31st. Please refer to OPDX.621 for a list of stations.

ZK1/S, SOUTH COOK ISLANDS. "Team Vertical" is on the DX trail again. This time they are headed to Rarotonga, South Cook Islands (OC-013), and will be active between August 18-27th. Operators will be: Bill/K6KM (ZK1TOO), Mark/AG9A (ZK1KAT), Ralph/K9ZO (ZK1ZOO) and Kenny/K2KW (ZK1TTT). Activity is limited to 40-10 meters on CW/SSB. Two stations will be active when

snorkeling permits, using 2 x Elecraft K2/100, and Force 12 vertical antennas on the beach. The station is on the northeast side of the island, with water paths to all the major population centers. The team will make extra efforts to work Europeans, since ZK1/s is a difficult path for them. QSL all ops via Kappy, WA4WTG.

ZM4, NEW ZEALAND (Special Event). Look for ZM4A to be activated during the month of August by the Otago branch of the New Zealand Association of Radio Transmitters to celebrate its 75th anniversary. Activity so far has been on 14205 kHz (also 14219, and 14230 kHz SSTV) between 0330-0600z. QSL via bureau.

Excerpts and distribution of The OPDX Bulletin are granted as long as KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access: 1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

1400. Question about sending QSL direct to Brazil

Newsgroup: rec.radio.amateur.misc
Date: 2003-08-10 21:14:03 UTC
From: ku4uvham@aol.com
Message-ID: <20030810171403.01007.00000852@mb-m22.aol.com>
Source record: 64270

I am trying to mail a QSL card direct to Brazil and was wondering about the postage requirements for the envelope. Can I just use regular U.S. postage stamps, or will that no work? Please e-mail me and let me know. Thanks!

73,
Mike KU4UV

1401. Re: Question about sending QSL direct to Brazil

Newsgroup: rec.radio.amateur.misc
Date: 2003-08-10 22:37:06 UTC
From: Keyboard In The Wilderness <KITW@forest.com>
Message-ID: <mOzZa.31834$ff.8197@fed1read01>
Source record: 64271

Go To USPS URL:
http://ircalc.usps.gov/
Use Calculator to determine overseas postage (not the same as domestic)

To Brazil
Airmail Letter Post 4 - 7 Days $0.80 Max. length 24", Max. length,
height, depth combined 36"

If you want to include return postage - tis a different problem.
Because the USA has 600,000 Amateurs and Brazil has only about 27,000
many USA DXers send return postage to help from driving the DX stations
broke.

Without the return postage the DX may send it via the bureau. See bureaus
below:

For return postage --- See URL:
http://www.qsl.net/n6dhz/irc-chart.html

Has how many dollar bills to send or how many IRC's, so the DX has
sufficient postage to return your card. For Brazil, a dollar or one IRC will
be sufficient.

An IRC is available at the US Post Offices (Main and Big ones) and an
explanation of what they are is at URL:
http://www.upu.int/irc/en/index.html

Another way is:

You will likely work many Brazilian Stations so a better way is to work a
dozen or more and send them via the ARRL outgoing Bureau -- URL:
http://www.arrl.org/qsl/qslout.html
There you can send 10 cards or less for just $1.00
But you must be an ARRL Member

The incoming ARRL Bureau system (no ARRL Membership required) can be found
at URL:
http://www.arrl.org/qsl/qslin.html

If you work even a few DX stations and want the cards -- then join the ARRL
incoming bureau system.

Lot more to QSLing

AC6V Has a book on DXing and devotes a whole Chapter to QSLing -- See his site at URL:
http://ac6v.com/DXSAMPLE.htm

1405. Will my HT make it through airport security?

Newsgroup: rec.radio.amateur.misc
Date: 2003-08-11 18:23:34 UTC
From: AB7RU <ab7ru@monkeyisland.com>
Message-ID: <chnfjv410ssbmtvuc256qs3bbgud980nsd@4ax.com>
Source record: 64275

I am flying out tomorrow on a vactiontion and want to take along my
FT-50 ... I had repacked the battery case on it with new AA nimh cells
and just have it taped back together. I am wondering if security might
wonder why its taped up. Anyone have experience with trying to fly
with amateur gear thats not exactly off the shelf condition if you
know what I mean (ie homebrew gear, qrp etc)
THanks for any advice, Mike AB7RU
PS I am not checking in luggage - just carry on.

I think most of the dual band HT can cover the FRS frequencies. I have TH-F6A and VX-5R and they have this coverage for T/RX. The models that I mentioned belongs to Kenwood and Yaesu respectively. Also Motorola, Icom, Uniden, etc. has FRS radios mainly for FRS operation. Concerning the legalities, just read the rest of the postings...

Have Fun and 73's

Source record: 64282

I have had BAD experiences with airport security...
I once brought along a couple of battery cables in my computer bag, and they stopped me, and swabbed my shoes, my computer, my computer bag, and every item in it for explosives! Then they said that my battery cables (had a bit of duct tape on them) were a "makeshift device" and weren't allowed on the plane, and therefore, for some reason I had to put the WHOLE BAG in the checked luggage. They wouldn't let me just get rid of the cables. Trust me, anything that looks at all modified or homebrewed will set them off. Unless you don't mind taking your shoes off and waiting for 20 minutes, be careful what you try to bring through security!

-Greg

I haven't traveled much in years, at least by air. But considering all this 'security' stuff I am glad they are that picky.

If you consider things. A ham radio HT could be used as a terroristic device. Without changing a thing. They need to communicate you know.

Dan/W4NTI

If you put it in your carry-on luggage and pass it throught the x-ray you should be OK ... I would have a copy of my license and allow a little extra time at the security check point in case they want you to take it out of the bag, turn it on and show them some evidence that it works as they would expect ...

I travel with a backpack station (FT-817, auto-tuner, various chargers, balun, coils of coax and wire, etc. quite frequently ... I often am asked to allow a visual inspection after the x-ray, but after that it's not a big deal. Just takes a few minutes, even with all that stuff ... an HT should not be a big deal.

As far as the tape goes, if the battery pack runs the radio as expected, doesn't look suspicious on x-ray, and you explain, I think that will be OK. (YMMV ...)

proficient
> in the mode(s) they are testing on?

At this point, it's not important or needed for morse
testing has LONG AGO deleted the "sending" part
of it and relied ONLY on the applicant decoding
pre-recorded tapes.

> Seems to me that if someone is going to
> qualify as a VE, they should be at an extreme proficiency level......

I've helped correct tests for teachers for subjects I
knew nothing about...nothing extradordinary there with
multiple choice...or checking a submitted set of
decoded morse text.

> If a VE or VE team cannot effectively send a method of communication like
> morse code as a required testing mode, it makes me wonder of the value of

> tapes, I guess that would show the "dumbing down" of amateur radio,
bringing
> it "one step further to extinction."

The reliance on tapes and CDs is because it is NOT all that
easy to be right on with sending code at any set speed (5, 13, 20
or whatever) by hand.

It is far easier to "machine generate" code text at specific speeds
and record them for a permanent use in testing.

> Seems to me it should not be a problem for the whole VE groups to have a
set
> "pre-scripted" QSO's. There could be as many as needed, 10, 20, 30 or
more
> pre-made QSO's to send.

Far better to have the 20-30 or 40 prescripted QSOs recorded
and simply play back one. I initially learned morse for the
5 wpm test using 78 rpm record set from (I think) AMECO.

But, for all this speculation, the code test is soon to be just a historic
footnote, so what's all the fuss?

Cheers,
Bill K2UNK

I had a similar problem with a "fire" pager "prior" to 9/11 - and I wasn't even flying, just going to the gate. I believe the trick was, to get it to make noise, show them what it is used for. Tell them it is in there, explain it to them... The x- rays should pick out the batteries, show they can be removed. Maybe tell them that it is similar to the radios they are holding. Show proof of your license if need be. BUT don't be expected to be allowed to use it on board. Last I recall, that was a huge NO..... C.L.

Amateur Radio Newsline™ Report 1356 - August 8 2003

Amateur Radio Newsline report number 1356 with a release date of Friday, August 8 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The ARRL tells the FCC to set R-F-I immunity standards for consumer electronic gear, the FCC says it won't decide the merits of a California frequency coordinators actions, and the price of a vanity call sign is going up again. These stories and more follow on Amateur Radio Newsline report number 1356 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: ARRL TELLS FCC TO SET INTERFERENCE REJECTION STANDARDS

The ARRL has told the FCC that improved interference standards for consumer electronic devices is among the most pressing needs being faced by the ham radio community. This, as the Commission considers the interference immunity performance of receivers. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--

The ARRL made its position known in comments July 21st in response to an FCC Notice of Inquiry titled Interference Immunity Performance Specifications for Radio Receivers. That probe was released last March as ET docket 03-65. In its filing the ARRL says that no receiver immunity standards are necessary or practical in the "essentially experimental" Amateur Service. Instead, says the ARRL, the real need for receiver immunity specifications is in the area of consumer electronics and the FCC must establish stronger interference rejection standards for such devices.

The ARRL's 21 page reply also recounted the recent history of efforts to come to grips with interference from RF sources, including amateur stations, to receivers used in other services, such as TV and radio broadcasting, and to consumer electronics. The ARRL suggested that the FCC mandate a standard for all consumer electronics or adopt a labeling or grading system. It also suggested that the FCC not rely exclusively on manufacturers to set standards as a way of lessening the problem.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The politically powerful Electronic Industries Association which represents the manufacturers of consumer electronic gear is categorically opposed mandatory RFI immunity standards. (ARRL)

**

RADIO LAW: FCC REFUSES TO DECIDE ON MERITS OF COORDINATORS ACTIONS

The FCC has told the attorney for one side in a California coordination dispute that it will not offer any opinion on the actions of the local frequency coordinator. This most likely means that a rumored law suit in the mater may now proceed to court.

Attorney Ted Smith of Santa Rosa California had written to the FCC on July 3rd. In part, Smith asked for the Commission decide if the Northern Amateur Relay Council of California's revocation of the Sonoma County Repeater Association coordination status exceeded the coordinators authority under the organizations bylaws, policies, and procedures, or if the Commission consider such an issue a local matter.

But in his July 15th reply, FCC Special Counsel for Amateur Radio Enforcement Riley Hollingswoth states that the Commission does not anticipate making a such decision on the merits of Northern Amateur Relay Council of California's action. He also stated that the Commission considers coordination in the Amateur Radio Service a matter more appropriate for the parties to resolve among themselves locally, or by mediation, dispute resolution or in the local courts.

With the FCC declining not to take any stand in regard to the merits of the Northern Amateur Relay Council position in the dispute between the W6SON and KD6LSO repeaters, it appears as if the decision of the coordination council will stand unless a expected legal challenge goes ahead. Its also a sure bet that repeater coordinators across the nation will be keeping a very close eye on what happens in Northern California if this issue actually goes into court. (FCC, ARNewsline(tm))

**

RADIO RULES: VANITY FEES GOING UP IN SEPTEMBER

The cost of getting a vanity call sign is going up again this fall. This as the FCC announces that the the ten year license term fee for a vanity call will rise to $16.30 for as of September 9th.

The action to raise the fees comes in answer to petirtions from the ham community to eliminate the fee completely. But the FCC says it expects to collect close to $160,000 from 9800 Amateur Radio vanity call sign applicants during Fiscal Year 2003. That's up by almost $30,000 and 800 applications from Fiscal Year 2002.

Applicants for vanity callsigns will continue to pay the $14.50 fee until the new fee goes into effect in September. Further details on the FCC's position and its response to amateur requests to eliminate the fee can be found in cyberspace at www.arrl.org (ARRL, FCC)

**

RESTRUCTURING: NCVEC NO-CODE PROPOSAL GETS LITTLE AIR TALK TIME

The petition by the National Conference of Volunteer Examiner Coordinators to the FCC to end Morse testing in the United States is getting allot of discussion in cycerspace, but apparently very little on the air. Over the past week the Amateur Radio Newsline team has monitored the ham bands to try to gauge on-the air reaction and so far there does not seem to be very much at all. An occasional mention of the proposal is about all thats been heard over the past 7 days.

But the opposite is true in cyberspace where the NCVEC petition has become the hot topic of discussion in places like the rec.radio.policy newsgroup and on qrz.com. As far as we can tell, qrz.com com has the most interesting discussion of all. Most of the comments are well thought out with very little in the way of rhetoric. So far close to 350 hams have dropped by to add their voice to the discussion. To read what they have to say or add your thoughts, please take your web browser over to www.qrz.com and scroll down to the topic titled NCVEC files no code petition. (ARNewsline (tm))

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W8WKY repeater of the Silvercreek Amateur Radio Association serving Doylestown, Ohio.

(5 sec pause here)

**

HAM TESTS: GUNFIRE CAUSES HAM TEST CANCELLATION

I'm Bill Pasternak, WA6ITF, with a late breaking story. Dateline Ventura County California where gunplay has caused the cancellation of a ham radio test session slated for Sunday August 10th.

The exams we to be held at the East Valley Sheriff Station in the city of Thousand Oaks. The session was canceled following an incident earlier in the week where a disgruntled man drove up and attacked Ventura County sheriff's deputies with a gun. No one in the building was injured. The deputies responded and killed the attacker.

But as a result of her gunfire the community room where the ham radio tests are held was damaged. It's also considered as a part of the crime scene and is off limits to the public until further notice.

The Conejo Valley Amateur Radio Club is the group that sponsors the bi-monthly test sessions. It says that it hopes to resume its normal exam schedule in October. (AA6JR)

**

INTRUDER WATCH: MORE CB'ERS ON 10 METERS

Sunspots activity may be down but that's not keeping rogue CB'ers and other intruders off the 10 meter band and spectrum near-by. Q-News reports that while normal ham radio activity on the 21, 24 and 28 MHz bands is down, occasional openings of the 10 meter band shows a number of unlicensed long line fishing net beacons in operation. Also being heard is Citizens Band radio type traffic in the band. Q-News also says that CODAR pulse transmissions in the region 24.950 to 24.995 MHz are continuing and are sill unidentified. (Q-News)

**

RADIO LAW: UK HAMS OBJECT TO RADIO SHOW ON BPL

Last week we reported on the signal degradation that Amateurs in the United States will face if the FCC permits power companies to become suppliers of broadband Internet. But US hams are not alone. The United Kingdom's national ham radio society is angry at a report by the BBC that touts the system without telling the other side. They say the report is not fair and balanced. RSGB news reader Jeramy Boot, G4NJH, is here with the rest of the story:

--

The RSGB has contacted the BBC to point out its objections to an item on the BBC TV 6 o'clock News on Thursday the 24th of July. The item referred to the use of the electricity supply as a medium for Internet access. This is variously referred to as PLT, PLC or Powerline Communication.

The following is a quote from the e-mail sent to the BBC TV News: "The news item was unbalanced in that no mention was made to the very serious problems of radio interference inherent in Powerline technology. At the present time there is strong disagreement as to how much radio interference should be permitted. Needless to say radio interests, which besides ourselves, include the BBC and many other organisations are anxious that radio interference should be minimised."

The e-mail went on to point out the difference between the systems based on ADSL technology, which are currently being deployed in considerable numbers, and the proposed PLT systems.

Jeramy Boot, G4NJH.
--

At airtime, it is not known if BBC 6 plans a follow up report giving the negatives of BPL. An interesting article on Broadband Over Powerline communications is available by clicking the link marked "powerline communications" on the RSGB website at www.rsgb.org. (GB2RS)

**

RESTRUCTURING: DENMARK GIVES HAMS 70 MHZ

Amateurs in Denmark have been given permission to operate on the 70 MHz band. This, according to OZ2M who says that three frequencies are available at 70.025, 70.050 and 70.100mhz.

Individual applications have to be filed for the relevant frequencies and the maximum power is 25 watts, but there are no other restrictions. In other words, the 70 MHz allocation is available to all license classes in Denmark and all modes may be used. (UBE)

**

RESCUE RADIO: FIRES DAMAGES TWO REPEATER INTERTIES

Back here in the United States, Arizona wildfires have damaged two repeater newtworks. Blazes wiped out repeater relay links on Mount Lemmon, Arizona, for both the Zia Connection and the Cactus Intertie. Both are wide area linking networks. The fires occurred in mid July. (Repeater Owners Remailer)

**

RESCUE RADIO: ECHOLINK ASSISTS DURING HURRICANE CLAUDETTE

Traditional ham radio communications during Hurricane Claudette in Texas in July were augmented by an Echolink connection keeping key players in constant contact. According to the ARRL Letter, the Nacogdoches Amateur Radio Club used Echolink to tie together coastal repeaters, the National Hurricane Center, the National Weather Service, the Texas Department of Public Safety and most coastal emergency operating centers. Club spokesman Tim Lewallen, KD5ING, said that at the height of the storm, there was "almost constant" activity on the link, mostly between the National Hurricane Center and ham spotters providing real-time, first-hand reports. (ARRL)

**

ENFORCEMENT: $8,000 FINE AFFIRMED FOR FAILURE TO INSTALL EAS EQUIPMENT

The FCC has affirmed an $8,000 fine against WENA of Yauco, Puerto Rico. This for the stations failure to install Emergency Alert System equipment. The FCC says that Puerto Rico is a possession of the U.S., and is therefore governed by the it's Regulations and rules. The complete story is in cyberspace at: http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-2360A1.doc (CGC)

**

AT THE COMMISSION: FCC OFFERS FREE WiFi TO VISITORS

The FCC says that it will provide free wireless Internet access to visitors at its Washington, D.C. office, but there are a few caviats. Visitors must bring their own hardware and software and can use the service only in two specific locations. The FCC alao says that it won't provide any technical support. More is on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-237306A1.doc (FCC)

**

RADIO POLITICS: PRINTER ERROR IN AMSAT BALLOTS

An error by AMSAT's printer has resulted in a reprinting and remailing of ballots for the amateur satellite organization's board of directors.

The CQ website reports that the mailing included biographies for candidates from a past election. As a result, the original white ballot cards sent out with the first mailing will not be counted. If you never mailed yours in simply disguard it.

Only the replacement yellow ballot cards sent in the second mailing will be accepted as valid votes by AMSAT members. These are due at AMSAT headquarters by September 15.

By the way, AMSAT is not ouut any money on this one. The printer bore the total cost of the reprinting and remailing. (ANS)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

NAMES IN THE NEWS: A WEB PAGE FOR NIKOLA TESLA HISTORIANS

In the world of electronics and telecommunications, inventor Nikola Tesla was one of the more mysterious of our early technological pioneers. His experiments and demonstrations caused some to believe he was a genius, while others had to wonder if he was engaged in witchcraft.

Much of what he wrote nearly a century ago still evades our understanding. If you're intrigued by the man and his specific visionary approaches to physics, you can visit his selected writings at www.tfcbooks.com/tesla/contents.htm (CGC)

**

NAMES IN THE NEWS: KA3HDO PROMOTED AT NASA

Amateur Radio on the International Space Station Chairman Frank Bauer, KA3HDO, has been promoted to the highest technical rank accorded a NASA scientist or engineer. Bauer, who works at NASA Goddard Space Flight Center in Maryland has been named as a Special Technical or S-T. This, in recognition of his record of exceptional technical achievement in the field of guidance, navigation and control.

KA3HDO's promotion came through in time for him to be appointed to the NASA deputy administrator's new blue ribbon panel on Alternatives to the Orbital

Space Plane. Bernard Seery, chief of the Mission Engineering and Systems Analysis Division in the Applied Engineering and Technology Directorate, said Bauer's new ST rank formally recognizes him as a lead guidance, navigation and control expert at the Agency level. (ANS)

**

HAM RADIO IN SPACE: AN ALL HAM CREW FOR ISS EDITION 8

The ARRL reports that both members of the recently-announced Expedition 8 crew for the International Space Station are hams. Astronaut Mike Foale, KB5UAC, will be the crew commander and science officer. Cosmonaut Alexander Kaleri, U8MIR, will be I-S-S flight engineer and commander of the Soyuz capsule used to transport the crew members to and from orbit.

Both Foale and Kaleri are veterans of the Mir space station. They'll be joined briefly by a third ham, Spain's Pedro Duque, licensed in the U.S. as KC5RGG, who will represent the European Space Agency. Duque will return to Earth with the departing Expedition 7 crew. The crew exchange is scheduled for mid-October. (ARRL)

**

INTERNATIONAL-UK: HAMS AT GASS 2003

Amateur Radio will be a part of a major science exhibition down-under. Q-News Graham Kemp. VK4BB, reports:

--

The Great Australian Science Show (GASS) will be held in conjunction with National Science Week at the Melbourne Museum, and amateur radio is to be on
display for three days.

WIA Victoria with the help of its member clubs are participating in the show, for three days from Saturday 16, Sunday 17, and Monday 18 of August. The Melbourne Museum is open from 10am to 5pm.

Displays of IRLP, Morse code, VHF Transceivers, Crystal sets, ARDF equipment, Satellite tracking software, Power Point Computer Displays and more are planned.

--

Again, those dates are August 16, 17 and 18 at the Melbourne Museum in Melbourne Australia. (Q-News)

**

ON THE AIR: UK HAM TO DO SUMMIT BACKPACK

On the air, word that Richard Newstead, G3CWI, is planning a long solo ham radio backpacking trip across the hills of South Wales this month. His objective is to activate 15 of the hills in the Brecon Beacons National

Park on 40-meter CW for the U-K's Summits on the Air award program.

The walk will be over 90 miles with a nearly 25,000 feet of ascent. In addition to the High Frequency radio gear, G3CWI will be carrying all his own food and camping equipment. The walk is expected to be completed by the 17th of August. (RSGB)

**

ON THE AIR: RUSSIAN POLAR MOUNTAIN EXPEDITION.

And speaking high locations, word that the Russian Robinson Club plans to be active as R3RRC/9 from August 14th to the 25th from the Polar Ural Mountains. Their operations will be on both the H-F and VHF bands. If you can read Russian, more information is available on the web page link you will find in this weeks print edition of the Amateur Radio Newsline report. More is on-line at www.hamradio.ru/rrc/AWARDS/rma.htm
QSL via UA3SGV: Andy Blinushov, P.B. 180, Ryazan-35, Russia, 390035. (OPDX)

**

DX

In D-X, word that M0GMT, and DJ9AO, are teaming up for an ambitious DXpedition to Cambodia running through the 18th of August. hey will use the callsign XU7ACT for normal operation and XU7ACU for the WAE CW Contest on August 9th and 10th. QSL's for both calls go via G3SWH. (GB2RS)

And N6XIV/KH9 is expected to be active again from Wake Island for about three weeks. This will be his last Wake Island work assignment for 2003. He operates on SSB only whenever possible during his very limited spare time. (GB2RS)

Lastly, word from Great Britain that nominations are being sought for the G5RP Trophy. This is an annual award to encourage newcomers to High Frequency D-X'ing and is awarded for making recent rapid progress in D-Xing, which only newcomers have the scope to do. Nominations should be sent to Colin Thomas, G3PSM, by e-mail to hf.chairman@rsgb.org.uk Nominations must be received by the 31st of August at the latest. (GB2RS)

**

THAT FINAL ITEM: THE NIGERERIAN SCAMMERS ARE AT IT AGAIN

And finally this week, theres another scam involving Nigeria and this one is targeting Amateur Radio. But this time a ham has outwhitted the alleged scammer. We have more in this report:

--

It all started about a month ago. That's when Jeff Novak, KB3DIV, of Lucinda, Pennsylvania, placed an ad on the QRZ dot com website to sell his Yaesu VX5 hand held. And in a follow-up posting to that website, Novak tells the story of what happened next.

KB3DIV says that he was soon contacted through e-mail by a person identifying himself as James Cruise. Cruise who stated he was from Africa and that he wanted to purchase the unit.

To make a long story short Cruise insisted that a contact here in the United States would send Novak a check for 4800 dollars. Cruise wanted Novak to deduct the purchase price of his HT along with shipping cost and send him a moneygram for the difference.

Soon, Novak received a bank draft for the 4800 dollars. Several phone messages were also left on Novak's cell phone from Cruise. These urged KB3DIV to quickly send him the difference and H-T.

But Novak became very suspicious. So he called the F.B.I. and explained what had transpired. They told KB3DIV that the supposed bank draft is a actually a credit card check and most likely already void. Also that the person calling himself James Cruise was most likely a scam artist. In other words, had he cashed it and sent Cruise the balance, the chances are that his bank would have dinged him for the amount of the bounced check and he would have been out his VX5 to boot.

But in this case the targeted victim was allot smarter than the alleged con artist. He asked the F.B.I. what to do. It advised Novak to destroy the check. He did, and also informed the person calling himself James Cruise that the deal was dead. And when it was all over, KB3DIV still had his VX5, and it was the person allegedly trying to scam him that was - proverbially -- left holding the bag.

For the Amateur Radio Newsline, I'm Mark Abramovich, NT3V, in Philadelphia.

--

Score one for a rather smart ham.

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Other side of coin is that to protect themselves, library officials shouldn't allow records to exist which would divulge identities of those authorizing purchase of books which gov't seeks identities of readers for. Conspiracy statutes - don't you know? Gov't would tie furnisher IDs to accessor IDs to establish conspiracy.

If it's the a-hole I'm thinking of... Yes he is a jerk! I'd call him a "jerk-off" but that would be an insult to masturbation. I remember listening to his bogus ranting and raving over the air. This would have been about last December through about March or April of this year. Talk about your sassy fruitcakes. Aparently he divorced his husband, since he hasn't been heard on the air in months. I understand Maine is pretty progressive when it comes to same sex marriages.

I have to say, he has tamed it down quite a bit since he came under the scrutiny of the FEDS for all his alleged nefarious activities here in the states and abroad. Unfortunatley, he still QRMS all the hams on the east coast when he fires up nightly, splattering up and down the bands with absolutely no regard for law or considerate amateur practices. Here in New England we are all still waiting for Riley to eat his lunch. Hope it happens soon!

He says he is an alternative to the ARRL. I suppose he is, in the way your hand could be an alternative to toilet paper! He is such an asshole in fact, that I call him an alternative to a MAN.

See you on the air,

Chris

Well yeah it's technically not legal with the FCC even though the radio is limited to the legal 500mW power for the FRS service. To be type accepted with the FCC the radio can't be frequency agile " i.e.. no VFO allowed." It also can't have a detachable antenna because it would allow someone to connect a 40 element yagi to the thing and get a 20 mile radius range our of the FRS radio system if they had nothing better to do with their time.

In my opinion the FCC should lighten up on the rules against using amateur radios for other services. If Hams can be trusted to own and operate radios that are capable of 1.5 Kw and to keep the power under 200W when in the Novice portions of bands and on 10 Meters, why can't we be trusted to run are rigs down at 4 watts when transmitting on CB channels? It's rather annoying that I have a top quality HF radio in my truck but was told that I would have to install a crappy CB if I wanted to participate and volunteer time to my local Hamilton/Mercer REACT teem.

just my thoughts.
David KG2LI

but dave it is still illegal to use on frs

We need our kids home. Leave the countries to the ragheads who seem quite adept at killing anyone who might attempt to sacrifice others than themselves to the ephemeral concept of justice. Especially in countries where sanctity of life is at the bottom of a very long must have list

I'll tell you why: go and listen to 14.313 any time and see how hams
have been made to look like idiots. Or if 20 isn't open, try most spots
between 3900-400 kHz.

Actually, that's not automatically true. A ham was charged with transmitting on a police frequency, using his modified ham HT, because that was the only way he felt that he could get help for a life-threatening injury (and it was probably an accurate assessment). But the police said that since he had modified the radio *before* the incident, that is when the act illegal was planned, and there is nothing in the rules per se that says that 'emergencies negate' anything.

In common law, there is the "greater good" defense, often illustrated as when you bust down a stranger's front door so that you can rescue them from the fire in their kitchen. Even though it's breaking and entering, you were pursuing the "greater good" of saving a life, and it is an affirmative defense. In the radio amateur's case, he failed to offer such as a defense, and lost the case. Interestingly, this was not an FCC (or any federal jurisdiction) case.

Personally, I would be willing to have lost my ham license as a consequence of saving a life.

Oh, and before modifying your ham gear for FRS, look at this:

http://www.eham.net/articles/4759

All the best, and 73,
Dave

Everyone is so concerned about how much trouble it is for hams
when they can't use the same rig for other services, they forget
that it works both ways. Do we really want other services using
equipment that they can turn a knob on and use on the ham frequencies?

We only have to look at threads such as this over the years to see
that hams, who should know better and follow the rules carefully,
don't always respect the law. If a ham thinks "it won't hurt anyone"
to use a ham rig in some other service, then can anyone really expect
the average person who may know none of the radio laws to not turn
the knob and make use of the ham bands?

Once you've left the ham bands, you aren't a ham anymore.
You have to be like everyone else, and that means type approved
equipment. The type approval is not merely so someone "too dumb"

won't violate the rules. It is also about higher standards that
may be required when moving into a more important radio service.

> Free Handout Ham Licenses?
>

There has been a free ham license ever since the codeless tech was introduced a few years back. The 5 wpm code requirement has further moved things in that direction. Idiots on the ham bands.

11 meters has come to the ham bands. I listen to the bands and it's certainly not the way things were in the 1980's when I got licenced. I might as well just listen to CB channel 19, it all sounds the same now.

ARRL plan back fired on them. They worked to dumb things done in order to produce more licensee's who might join the organization and fill the corporate bank accounts, but instead, they got a bunch of idiots who don't care bacause getting a license is easy now and when you don't have to work to get the benefits, the benefits you get don't mean a whole lot.

All real hams out there who remember how the bands used to be, send the ARRL a nasty-gram and cancel your League memberships. They screwed us over big time by not protecting the integrity of the Amateur radio Service.

No Code.... No Ham!

Actually, the FCC regs make allowance for emergencies in various
services.

However, you should try legal means first even in an emergency.

Modifying gear ahead of time to transmit on frequencies you are not
licensed for would be at best, a legal gray area.

Sounds like you old pro-coders are getting upset! I worked and had to pay to get my no-code ticket. Now that Im a coded tech, I still say, rid the code test. You may say it dumbs it down, to me it makes for more conversation and more to converse with. Who wants to talk on a piece of equipment that cost $1000 + but no-one to hear you? Why not let these CB'rs get there license so they can learn the principals of ham radio instead of bootlegging. I realise that you guys are all stuck in 1950, but WAKE UP!!!!!! This is 2003!!!!! This reminds me, Wasnt it quite a few years ago that a bunch of HAMS like yourselves were complaining about solid-state over tube? Oh my god! There dumbing down radio with RF transistors!!!! What is next!!!!! Quit whining and get involved in making the radio better for all. All you pro-coders are just wasting your breath. They still make tubes, but you have a choice if you want to use tube or transistor equipment. Isnt that nice, To have a choice? I chose to advance in my hobby by going to Extra soon, and I dont need a code holding me back. Do you actually think that the bad CB'rs are going to go get a license so they can JAM and CUSS at you? NO!!! The good ones will! So where is the FREE at?

Cya, wouldnt want to be ya.

Just what we need. More CB'ers on ham radio. The Ham bands have gone to hell since the ARRL BS of the seventies.
I agree, get rid of the CW but go back to the written test of the fifities. And out law the Bash crap.
But heck, I'm only dreaming. It will NEVER happen. Glad I was run off by the CB'ers. I don't miss that BS.
Your guy's loss.

No, Mopar, the VEs charge. It used to be free at the FCC, but, for me at least, that meant a 60 mile trip (120 miles round trip) to the FCC in Buffalo, NY, and one minute of perfect copy at 20 words per minute. When I had dropped my tickets and decided to retest in 1993, I believe it was under $6.00 for the session. That was 20 words per minute, but multiple guess. Now it is 5 words per minute, but the testing charge is considerably higher (don't ask me, I don't know. I simply showed up for the tests in '93. You don't have to score 100%). So, while someone may pay for the exam, that 120 mile round trip savings is worth something. Don't worry too much though. I hear the FCC is going to try to package the licenses in boxes of Cracker Jax. :)

They don't have me worried yet, Jim. Note to self: buy some
Cracker Jax stock.

Or they will come with the radio, you take the te$t and mail
it back with a check.

Hi:
I have suddenly developed a weird mobile setup problem. When
my IC-706 is in the car and antenna (HF) is hooked up, everything is
all is ok ie swr. But when I hook up the ground wire from the frame of
the car to the ground post I now get get high swr. I have checked the
antenna system with an analyzer and it appears ok. Any idea's???

You obviously don't have a common ground. The only 'ground' you have is from the antenna mount, via the coax shield, to your radio. When you hook your ground post to the chassis you have extended the 'ground' and caused a higher swr.

Try running a ground strap to a common metal point on the vehicle...if you can find one these days. Check with ohm-meter and make sure as much of the car as possible is connected together.

Of course you will probably have to retune the antenna now.

Dan/W4NTI

> threatening injury (and it was probably an accurate assessment). But
> the police said that since he had modified the radio *before* the
> incident, that is when the act illegal was planned, and there is nothing

Uh, if you continue to post this 'partial' reference, please consider
posting the WHOLE story.

The individual was in deed arrested and charged. But according to
NUMEROUS other accounts, the individual had other means to make
contact other than using his HAM radio on sheriffs frequencies. Also,
the 'incident' that this involved was NOT (allegedly) a life threatening
situation. And also according to the stories posted about this incident,
the individual had a HISTORY of doing this or similar things in the area.

My impression, and my opinion, was the guy was a little weasel and
the legal authorities just plain got fed up with the little twit and nailed
him.

If you have other facts to post about this, I'm sure people here would
love to hear facts. But in the absence of verifiable facts, I think you
chose a very poor example.

Mike

Hi:
Probably beneficial to clarify something, the antenna is a Hustler
attached to a 3 magnet mount type system. This type of system has
no physical ground, only capactive type ground.

Not everyone has or wants a license, so it's easier to carry one radio.

The use of an amateur radio on FRS is not right, but as long as it's
done on the lowest power with a rubber ducky, and you're not an a$$,
you should be OK.

Changes nothing, just enhances the problem. My info is still accurate. If you want to continue using that 'mount'. Fine. But you still need to GROUND EVERYTHING on the chasis of the vehicle. That is STILL the problem. Strap it all together.

1468. Looking for other owners of RadioShack HTX-420 dual band radio

Newsgroup: rec.radio.amateur.misc
Date: 2003-08-14 01:25:38 UTC
From: Martin@CoachingSupport.com
Message-ID: <845eaf75.0308131725.73b9bac3@posting.google.com>
Source record: 64088

I am an excited newbee to Ham! Andï¿½

I just bought a RadioShack HTX-420 and am studying to get my Tech license but am concerned that maybe I have a new defective unit. I am hoping to find someone else who owns the RadioShack HTX-420 to ask a question or two here (or respond off line).

Here is the problem, sometimes when I press SC to auto-scan stations the decimal point blinks but it does not scan, other times it seems to work fine. But the button always makes a beep noise like it is making good contact.

Thanks in advance!
Martin

The voters punched little holes in a card with a stick.

the machine counted the cards.

Representatives from both the Democratic and Republican parties
approved of the process described above.

Bush got more holes punched in the cards on the first count and also
on the two recounts.

your claim that the election was "against the will of the people" is
complete nonsense.

Do you have any other memories programmed? are they skipped?
If you press MR before SCAN, you scan memories.
If MR is not showing on the screen, you scan directly.

The beep function is working. Mine's turned off. Also, you
can't change "PS" in memory mode.

Anyone found how to make an HTX-420 work on MURS?

It does FRS with a keypad mod.

1475. Re: dual band radios that transmit frs channels

Now THERE is a legitimate response.. Great idea Bob.. If my grandkids lived around here, I'd do the same thing I guess..

Always best to have another way of looking at things. Thanks for the idea.. Cheaper than cellaphones too!!

Paul

So you're telling me they want to carry an amateur radio that will work on
FRS and NOT have an amateur radio license?? Hmm.. I don't think that works..
I think that's worse than a licensed amateur operating in the FRS bands..
Both are bad but, the 1st is more severe...

OK, Mike, here is the whole story. You will find these, as well as some
other credible references at the end of this posting. It also explains
why you may have concluded he was a "weasel".

73,
Dave

*** NO BULLETIN ***
*** SPECIAL NOTICE FROM THE EDITOR (by KB8NW) ***
"YOU ARE CRAZY!", Linda said as I told her I was writing this (minutes before leaving). Yep, I know I am crazy, but I feel obligated to send these last minute announcements before leaving to head south. So there will be "NO BULLETIN" for August 25th (I promise). Like I mentioned last week, Linda and I will be heading south, first to Tennesee to drop-off/move my daughter at Middle Tennesee State University (MTSU) and then off to Biloxi, Mississippi. I really need his break to rest up, and I hope that lying in the sun on the beach will help bring back some of my strength. However, PLEASE continue to send your DX info to me......
.. TNXS and GUD DX de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 8th/August, through Friday, 15th/August there were 214 countries active. YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

E4, PALESTINE (Good News/Bad News). Achim, DF3EC, who was in Ramallah and was active for a few days over the pass week, is apparently back in Germany. However, "The Daily DX" reported Wednesday that the Israeli security personnel confiscated his transceiver before he left. If you were lucky to work him, QSL via DF3EC direct or bureau.

HB0, LIECHTENSTEIN. Look for Gherardo, IZ1DSH, to be active now through August 19th as HB0/IZ1DSH. Activity will be on 40-10 meters SSB. QSL via the bureau or direct to IZ1DSH.

HS, THAILAND. Champ, E21EIC, informs OPDX that there will be plenty of HS-Hams active in the SEANET Contest. Stations expected to be active are:
HS4BPQ/9 ALL BAND CW
HS0XNO 40M CW
E20HHK/P 20M MIX (AS-101)
HS0EHF 20M CW
HS1JNB 20M SSB
E21EIC 15M MIX (CW,SSB,RTTY,PSK,SSTV)
HS0GBI 15M CW
HS5AYO 15M SSB
HS1PDY ALL DIGI
HS8KGG/SWL SWL
HS0ZBS ?
HS0ZDX ?
HS0ZDZ ?
HS0/OZ1HET ?
E21CJN ? BIG GUN!

IOTA NEWS.....
NA-082. MDXA member Terry Jones, W8JE, along with Mississippi Gulf Coast amateur radio operators Karolina Sarnowska, KD5SDQ and Chris Sarnowski, KB5TBB will activate Ship Island (USI MS-005S, Harrison county), Mississippi, August 16th, weather permitting. Operations are planned to begin approximately 1530z and end approximately 2100z. Activity will be on 40-6 meters, SSB, as conditions permit. Callsign for the station will be W8JE. QSL via W8JE or the operator's home call, via QRZ.com SASE required for response.

OC-NEW. Operators V73T and V73B on Kwajalein are expected to activate a new IOTA as V73T from Taongi, Monday, August 18th. The boat ride there is over 36 hours.

SA-086. The Atacama Desert DX group (Operators XQ1IDM, XQ4ZW, CE1URH, CE1RQB, CE1VBH, CE1FLS, CA2WUI, CD0906 and CE6TBN) will be on the air as 3G2D from Damas Island (DICE ICE-201), October 17th,

18th and 19th. Activity be on 160-6 meters on CW, SSB and
RTTY/PSK. They will have 3 stations running 24 hours daily
like their 3G1P DXpedition. There will be plently of CW.
QSL Manager is XQ1IDM.

LIGHTHOUSE ACTIVITY (ILLW is this weekend!).............
A full list of stations who will be participating in this weekend's ILLW
can be found at: http://lighthouses.net.au/illw/2003_list.htm

A special event station signing CQ0RLH will be active August 17th,
from Roca Ligthouse to join ARLHS ILLW. Reference numbers: ARLHS POR-007
and DFP FES-001. Activity will be on 40/20/17/15/10 meters SSB. QSL via
CT2GZB.

The Metro Amateur Radio Club of Chicago will host a special event on
Sunday, August 17th at the historic Grosse Point (Lake Michigan)
Lighthouse (ARLHS reference USA-359) in Evanston, Illinois. They will
be operating from 1700-2100z using the callsign K9Y. The suggested
frequencies are (+/-):
CW - 7125, 14125, 21125 and 28150 kHz
SSB - 7175, 14250, 21350 and 28400 MHz
QSL via N9NT (QRZ.com).

Area hams from Eastern Massachusetts working in cooperation with the
U.S. Coast Guard (USCG) and National Park Service (NPS) are happy to
announce the FIRST EVER Amateur Radio operation from Boston Light on
Little Brewster Island as N1L. Boston Light (USA # 073) was the first
lighthouse in America. It is currently the ONLY lighthouse still manned
by the USCG. This operation will be take place during this year's 2003
International Lighthouse/Lightship Weekend (ILLW) from 0000z, August
16th to 2200z, August 17th. Operation will be on all ILLW listed
frequencies which can be found at:
http://lighthouses.net.au/illw/2003.htm
N1L (NUMBER ONE LIGHTHOUSE) will also operate on IRLP Node # 4320
and Echolink Node NS1N-R to make this special operation available to
as many people as possible. This is also the first activation of USA
Island # MA-035-S (Little Brewster Island). A color photo QSL will be
via the bureau for DX stations, and the QSL manager is KB1HJO. Send a
SASE to CBA for direct QSL. For interesting reading about Boston Light,
please check out the Web page at:
http://www.lighthouse.cc/boston/index.html

CORRECTION BY Mike, N8MR: From Eagle Harbor, Michigan. Look for the
Eagle Harbor Lighthouse (USA-253) to be activated in the ILLW, August
16-17th (not 15-16th), using the special 1x1 callsign, K8E. Modes of
operation include HF/VHF, CW/SSB, FM Satellite and possible HF digital.
Collectors of ARLHS numbers can get credit for three upon request:
Eagle Harbor Lighthouse USA-253, Front Range Light USA-254 and Rear
Range Light USA-255. QSL via bureau or direct to N8MR with #10 SASE.
Web page is: http://www.kc8nah.com/Interests/illw03.htm

Look for Chris, DL9CHR, to be active as 9A/DL9CHR/p from Savudrija Lighthouse (CLHA reference CLH-073 for the Croatian lighthouse award, ARLHS reference CRO-134) located on Cape Savudrija (WW Loc. JN65rl), August 16-17th. QSL via his home callsign, direct or by the bureau.

Look for special event station CS5E to be active in ILLW, August 16-17th, from Ilha do Bugio (IOTA EU-040 and DIP ES-004) and Bugio Lighthouse (WLA LH-0647, ARLHS POR-005). Activity will be on 40/20/15/10 meters SSB. QSL via CT1CSY.

Members of the Salento DX Team (IK7JWX, I7PXV, IK7JWY, IK6CAC and IK7JPJ) will be active August 16-17th from Torre San Giovanni-Ugento (LE) Lighthouse (Wail PU-003, ARLHS ITA-171). They will be signing homecall/p. Activity will be on 40/20/15/10 meters CW/SSB. QSL via their home callsign, direct or bureau.

Look for the special callsign, LT7W, to be used by "Grupo Titan" during the International Lighthouse & Lightship Weekend from Punta Delgada Lighthouse (ARG-015), Peninsula Valdes, Patagonia. Details can be found at: http://www.LT7W.tk

Operators Simone/DJ2KS, Michael/DJ5KP and Christian/DL6KAC are currently on a Baltic Sea cruise until August 22nd. Their callsign (once in Denmark) will be OZ0AIS/mm. Their final destination will be an island which is part of EU-172 including the corresponding lighthouse. Name and exact location will be announced later due to the fact that bad weather might force them to change their plans. Activity will take place during the ILLW. Outside of the ILLW, they will use the callsign OZ0AIS/mm. 40m only, using a dipole. An APRS position report (starting August 10th/11th) can be found at:
http://www.findu.com/cgi-bin/winlink.cgi?oz0ais
QSL only via DL6KAC either direct or via the German Bureau. OZ0AIS is not member of the Danish Bureau. Make sure "via DL6KAC" is written on the card. Direct QSLs without postage will be returned via the bureau. The Lighthouse-QSLs will be printed after their return.

QSL INFO AND NEWS.....
Carlos Nora, CT1END, reports that the log is now online for the recent activity of CS4B (EU-040 Bugio Island). Also, photos of the CS4B and CS5C (EU-145 Culatra Isl.) operations can be found on the Web pages at: http://ct1end.netpower.pt/cs4b
http://ct1end.netpower.pt/eu145_culatra_2003/
http://www.portal-dx.web.pt

S61, SINGAPORE. Peter, 9V1PC, reports that the Singapore Amateur Radio Transmitting Society (SARTS) will be holding field day operations from St. John's Island off the southern coast of Singapore from the afternoon of Friday, September 5th, to midday Monday, September 8th. Two stations will be active on 160-10 meters with the special prefix S61FD. The S61FD team will have two experienced 160/80m operators: Bob Marshall-Read/G4VGO and Peter Cook/9V1PC. This team will focus on low band operations using an inverted L for transmit and a variety of loops, pennants and possibly beverages for low noise receive. They expect that 1 kW transmit power

should be available. St. John's Island is in Region 3, IOTA AS-019, CQ Zone 28 and ITU Zone 54. QSL cards should be sent to: Incoming QSL Manager, SARTS, Robinson Road P.O. Box 2728, Singapore 904728.

SPECIAL EVENT. Glyn, GW0ANA, reports: "Many Amateur Radio operators may be aware of the significance of "Flatholm Island " located in the Bristol Channel in the UK. The island has a very historic link in connection with our hobby as it was used by Marconi when he demonstrated to the British Post Office that his theory that radio waves would travel across water. He made the link via radio from Lavernock Point in south Wales to the island on Thursday, May 13th 1897. To pay homage to Marconi, the Barry Amateur Radio Society (South Wales) erected a monument on the island and each year make an annual visit to operate a special event station using the callsign "GB5FI" (Flatholm Island). This years'visit will take place between Friday, August 22nd and Wednesday, August 27th." The society will activate this very rare WAB square ST26 and operate mainly on the amateur HF bands to follow in the footsteps of the historic event. This year they also plan to operate via satellite using AO-40 and also Oscar 14 (subject to access in the short pass time). Their priority will be mainly SSB operation, but they may operate on the digital or SSTV modes. This is a very rare opportunity to add to your QSL card collection a "MARCONI EXperiment" location, Flatholm Island, via satellite! Lighthouse ref. number: 0007. QSL via GW0ANA direct CBA or via the Bureau is no problem.

T8, PALAU. Haruki, JH9URT, will be active from here as T88HO and this will be his first DXpedition. Activity will be between August 22-26th and on SSB only on all HF band and 6 meters. QSL direct to his home address below or JARL bureau. His direct address is: Haruki Ohtsubo, 1377-1 Futatsuka, Takaoka, 933-0816 JAPAN.

VK9X, CHRISTMAS ISLAND. Andy Chadwick, G3AB, informs OPDX that he will be active from Christmas Island as VK9XAB from August 30th to September 6th. Activity will be mainly CW. This is a low key DXpedition with 100w and wire antennas. QSL via G3AB.

VP5, TURKS AND CAICOS. Dennis, K7BV/1, will be operating September 9-16th from the Turks & Caicos "HAM-LET" rental QTH. Six meters will be the primary focus (including meteor scatter) with active participation in the ARRL VHF Contest, September 13-14th. There will be HF operating when the 6 meter band is closed (primarly on RTTY and CW). QSL via KU9C. Website info for VP5/K7BV is: http://www.qth.com/k7bv/TURKS

YI, IRAQ. Ghis, ON5NT, informs OPDX that he will be flying into Baghdad on Wednesday, August 13th. He will be there for about 3 weeks. His callsign will be YI/ON5NT (he has had his license since May and is already accepted by the ARRL). Ghis states to not expect big signals from YI. He is running an IC706MKIIg into wire antennas. Also, look for him on 6 meters. QSL via his homecall. Ghis also mentions that Robert, S53R, has finished his holiday time and will be active as YI/S53R (QSL via K2PF). He will be on the same flight into Baghdad with Ghis. Robert should be there for a couple of months. ADDED NOTES FROM ON5NT: Ghis also provided OPDX with his itenary after YI. He will head back to Belgium for 2 weeks, his daughter is getting

married. Then back to U.A.E (A6). He might take another 2 weeks break somewhere at the end of October, early November. Then back to A6, returning home on December 10th (this is his birthday). During the time he is back in A6 (most likely Oct/Nov), Ghis will try to activate AS-021 (this will be a new one for most of the IOTA gang, since "Abu Dhabi" was deleted) and AS-124. The only direct address to use is: Ghis Penny, P.O.Box 93, BE-9700 Oudenaarde. He adds that his YI cards, and also the 5B4/ON5NT cards (for his April 2003 operation) will be printed and answered on his return to Belgium in December. During his absence, Ghis's XYL (he states, "She became an expert in QSLing, first step to get her into ham radio and a license, hi...) answers the incoming direct cards for the stations he manages. They are also still cleaning up the bureau cards for 5X1T (ON6TT) and EL2WW (ON4WW). Since both are members of the UBA, there's no problem with cards via the bureau (only, due to the amount of cards it takes a while). Ghis made 5U7JB also a member of the UBA, so cards are also accepted via the bureau.

ZC4, UK SOVEREIGN BASE CYPRUS. Geoff, ZC4CW, will be active from the Eastern Sovereign Base, Cyprus, for the next few years. QSL via G3AB.

1484. Feeding a Dipole

Newsgroup: rec.radio.amateur.misc
Date: 2003-08-15 10:52:29 UTC
From: Stephen Saunders <kd6eut@home.com>
Message-ID: <NX2%a.20625$vo2.15150@newsread1.news.atl.earthlink.net>
Source record: 64104

I remember participating in Field Day a number of years ago where we put up a dipole and fed it with ladder line. That antenna worked great on 40, 20, 15, and 10 meters. A balun was atached between the end of the ladder line and rig. I want to do this again but am not sure what type of balun and ladder line to use. My dipole is cut for 40 meters (about 65 feet long, end to end). Should I use a 4:1 or 1:1 balun? What impedance ladder line?

regards,

Steve KD6EUT

This coming Sunday....

+++ Now even more Buyers Parking !!!
Thanks to TKT we have use of their new parking lot
across Albany St from the SWAPFEST !!!

!! ** More Buyers PARKING is available ** for details see
http://web.mit.edu/w1gsl/Public/flyer

*** !!!! In our Traditional GARAGE and the adjacent lot !!!! ****
so come rain or shine or super heat the Flea is on !!!

********* $1 buyers discount with hardcopy of this notice ********

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday August 17th 2003
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $5 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $20 for the first and
$15 for each additional at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,
will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23- (PL 88.5) W1BOS/R and
W1XM/R-449.725/444.725 (PL 114.8/2A).

Sponsors: MIT Electronics Research Society
MIT UHF Repeater Association (W1XM)
MIT Radio Society (W1MX)
Harvard Wireless Club (W1AF)

For more info / advanced reservations 617 253 3776

Go Navy?? Lets see lets put 1000 guys in a tin can and send them to sea
for months at a time, hahahaha "NOT" I was a warrant officer gun ship
driver in the army, really nice gig and thats why I stayed in. I also have
a brother that went Navy, hahaha All he did was bitch about being out in
the middle of the damn ocean with no pussy or beer in sight for months,
thanks but I'll pass on the Navy

1487. Re: Feeding a Dipole

Newsgroup: rec.radio.amateur.misc
Date: 2003-08-15 18:06:30 UTC
From: dxer@aol.com
Message-ID: <20030815140630.11472.00000697@mb-m04.aol.com>
Source record: 64107

I would imagine that they were using some sort of tuner with this setup. I cant see it working on all those bands without a tuner.
Ladder line is usually 450 ohms.
Baluns confuse me and there are several good books devoted to the balun subject alone.
If you could buy or build a balanced line tuner that would be great.
Just take the ladder line all the way from the antenna to the balanced line tuner and you can work easily 40-10 and most 80 m as well.
I had a 20 Extended Double Zepp (EDZ) up fed with ladder line to a balanced line tuner and it worked great on 40-10 and not bad at all on 80 M. That size antenna is about the same as a 40 m dipole.
Most people agree that there are no losses with the ladder line. And using coax would cause losses.

Hello-

What does it take to, is it possible to convert cellular to RF? If it is possible please post links, if this is a lame question, keep the flames to a minimum, as I transition from uninformed to simple confusion.

Thank you,

Andrew

1493. Breaking News from ARRL: Roy Neal, K6DUE, SK

Newsgroup: rec.radio.amateur.misc
Date: 2003-08-15 22:32:54 UTC
From: janorfolk@yahoo.com
Message-ID: <c6a70d55.0308151432.41e755d@posting.google.com>
Source record: 64113

** U S A. Roy Neal, K6DUE, SK (Aug 15, 2003) -- Retired NBC News space correspondent, producer and executive Roy Neal, K6DUE, died August 15 in High Point, North Carolina. He was 82. Neal underwent major heart surgery August 12 and was reported to be recovering. Recognized as a leading news expert in spaceflight and science, Neal --born Roy N. Hinkel--covered all of the Mercury missions for NBC and later reported the Gemini and Apollo missions and the space shuttle flights. Capitalizing on his space news experience, Neal became involved with the Space Amateur Radio EXperiment Working group. SAREX--now Amateur Radio on the International Space Station (ARISS)--is a joint project of ARRL, AMSAT and NASA that put Amateur Radio aboard space shuttles and developed the first permanent ham station in space aboard the ISS. Neal chaired the SAREX/ARISS Working Group and moderated ARISS international team gatherings and, quite often, school group contact teleconferences. Earlier this year, he was inducted into the CQ Amateur Radio Hall of Fame for his role in persuading NASA officials to allow Amateur Radio operation from space in the 1980s. Neal also was a regular visitor and sometime presenter at Hamvention. He hosted the 1987 ARRL video production, New World Of Amateur Radio, an overview of ham radio in space. A Pennsylvania native, Neal's broadcasting career began at WIBG radio in Philadelphia. He served as a combat infantry officer during World War II and later became a program manager for the Armed Forces Radio Network in Europe. After the war, he was a television pioneer at WPTZ-TV in Philadelphia. He subsequently set up NBC's West Coast news bureau. An ARRL member and active amateur operator all his adult life, Neal enjoyed DXing and frequented all HF bands. He also enjoyed VHF. Survivors include his wife Pat and sons David and Mark. Arrangements are pending.

Hi,
I have CEPT 2 license here in Poland, but I want to work on HF bands.
I know that cw is not required in UK, and also that CEPT 2 owners can work
on HF in UK.
I am looking for friend who can help me with making UK license for me !!!
Can I get British license based on my CEPT 2 polish license ??? Which way
??? What have I to do ???
Please help me !!!

This is directed at those who own or use the IFR FM/AM 1600S
series service monitor.

I've just become the proud owner of one. I've figured out many
functions just by futzing with the menus. However, one thing still
eludes me.

How in the Multiverse do you set the thing up to transmit a
DPL/DCS code or PL tone along with the standard 1KHz test tone?

Thanks much.

Howdy all,

I'm just looking for ideas here. Where's the best place to
sell/auction ham gear? (such as a two meter radio and mobile amp).
BESIDES E-bay I mean! I have 'issues' with E-bay and won't deal with them.
Our local two meter meeting night is kinda anemic two when it comes to
equipment buying/selling. Any thoughts?

Regards and 73,
Art

Art this group is for (from the guidelines) URL:
http://faqs.jmas.co.jp/FAQs/radio/personal-intro

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any amateur radio-related message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The proper place (which few pay any attention to) is

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

Good Luck

In old models (1200-1500) you must go: Program-2-nd-option number, and then setup tone codes. To execute option ,(in gen. mode): execute-2-nd-option number !

Maybe this will help you on this model ???

Hello-

Thank you for your reply.

> It's already RF. How do you think your signal gets to the cell tower?
Magic... Again I refer you to my qualified --> (Totally Uninformed)
Newbie disclaimer.

What I would like to know is how one would go about broadcasting from
a cradled cell phone to a standard 900MHz or 2.4GHz phone? My
assumption is that there would need to be a conversion from the cell
signal to RF and then vise versa for communication. What I would like
is for my cell phone to be the central transponder for a 2-4 phone
network with 2-way communication.

```
<---------RF---------->900MHz
phone
|
|
incoming cell signal--><-cell phone->|<--------RF---------->2.4GHz
phone
|
|
<---------RF---------->900MHz
phone
```

Is there such a device already available?

Thanks,

Andrew Maddox

There is, at least recently, a device that works on Nokia cell phones. It
connects the cell phone to your standard inside phone wiring. You can use
any standard phone device to make calls through the cell phone. You would
still need the base units for any cordless phones, connected to the phone
wiring.

Well, Nokia USED to sell a box that's almost like a micro-cell. I don't think they sell it any more, and I've never seen one in the states.

Basically, it was a box that was designed to hook into an existing phone system, like a PBX in a building. Then, whenever you were within range of the box, like in your building, you cell phone would act like an extension of your desk phone. And STILL act as your cell phone.

So, you could get incoming calls at your desk on your wire number. But you could get BOTH incoming to your desk on your cell as well as incoming to your cell.

Someone once told me that the Nokia phones that have an "i" suffix support this feature, but again, I've never seen the box so I don't know for sure.

Mike

1523. Need recommendation for 24-hour clock

> I am new to ham radios. Would someone explain to me how autopatch works and
> How I can use it in Norcross.
> I have a vertec vx150 handheld.

An autopatch connects a ham repeater to the telephone system. Usually,
autopatch privileges are limited to members of the club that operates
the repeater.

You key in certain tones (via your radio's touch tone pad) to bring up
the autopatch and dial the phone number you want. At the end of the
call, you key in other tones to disconnect the patch. Each repeater
uses unique tones (which are usually changed periodically).

Contact your local clubs for information about joining and/or using
the autopatch.

BTW, a handheld radio may give mediocre performance unless you're
close to the repeater.

What's Norcross?

Sounds like they might have been using a G5RV antenna at the field day
site. A G5RV is a dipole-like antenna that uses a specific length of
ladder line feed.

Try a Google search on "G5RV Antenna" and you'll get plenty of hits.

A better approach would be to feed your 40m dipole with any length of
450-ohm ladder line, and use an antenna tuner and SWR meter. MFJ makes
some decent low-cost tuners. That kind of set-up will work great on
40, 20, 17, 15, 12, and 10 meters. I use a similar antenna system
based on a 135-foot dipole.

>and use an antenna tuner and SWR meter. MFJ makes

Just make sure the tuner you get accepts ladder line or balanced line.
A tuner that only works with coax wont really do much here.
And those tuners usually are expensive. I am using an MFJ-986 tuner with a 40 meter dipole and ladder line all the way to the tuner and it works very well on 40-10 and very good stateside on 80m. It tunes all those bands with no trouble.
This tuner has the roller inductor in it.
There are some good plans to build your own tuner around also.

I have a KDK FM-2033 mobile rig that I just got. I need to know how to set the PL tone. Upon opening the case I can see the tone board. There is a pot next to it labeled "tone" as well as a pot on the underside of the tone board itself.
Which pot do I use?
How do I tell what the current frequency _is?_

I hope someone can help me...

Hi Art,

My solution is a $19 wall clock that uses one C-battery per year, and is sync'd to WWVH in Colorado. It has BIG digits for old farts like me (about 2" tall) plus it shows the temperature and day/date. I got mine at Sam's club.

Good luck! And 73,

Dave KZ1O

Greg,

I owned an FM-2036 (I think?). That would be from the early 1990's, right?

Almost always, the PL tone frequency is set by a switch (not an
adjustable control). The one you are looking at might be a setting for
how loud it transmits the tone, not what frequency it's at.

Look for a set of dipswitches, probably a 4-position one, might be 6- or
8-position.

All the best, and 73,
Dave KZ1O

You could always eliminate the middleman and give your paycheck directly
to people who don't feel like working. Then again, the politicians
would be out of a job of skimming the cream off the top, and they would
join the ranks of people who you would be giving your paycheck to. Oh
wait, they win either way!!! Who makes these rules? Oh, wait!!! I'm
starting to understand.

But to keep this post in line with the rules,...

Here in New Hampshire, I've noticed that there are places between
mountains that we lose cell reception but VHF/UHF is fine, and vice
versa. And 6 meters is almost always better for hilly coverage. The
state police still use low band (46 MHz or so). Anyone else notice in
hilly states (Tenn, Calif, etc.) have more 6m repeaters than usual?

Germany Joins the Switzerland, the UK, and Belgium in Dropping Morse Requirements!

Effective August 15, 2003 an estimated 33,000 German Class 2 VHF/UHF-only licensees will be permitted access to the HF bands the same as current Class 1 licensees. According to a statement from German Federal Ministry of Economy and Labor (BMWA), "Morse telegraph knowledge as a prerequisite to use the high-frequency bands is no longer required."

"These rules also apply for foreign Amateur Radio licensees with comparable privileges operating during visits in Germany."

The upgraded Class 2 licensees will use their current call signs (prefixes include DB, DC, DD and DG).

I was told (I'm the previous owner) that on this particular radio, it has
only a single tone, and that tone has to be set via the pot on the tone
board. I never attempted this, as we don't have repeaters here, hence no
need for PL's.

Normal level standard is .7 or 700 cycle deviation. Without a deviation monitor you can not set this with accuracy. Suggest you listen on the repeater with another radio. And after you get the tone frequency set you adjust one pot or the other to determine when you bring the repeater up. Adjust it for minimum needed to do this.

Now to set the tone freq you will either need a frequency counter of a system monitor. Ask around to the local hams for help on this one.

A simple way to determine which pot is the level pot is to get a thin metal screwdriver hold it in your hand. Listen to the output of the radio in another one and touch the pot on the metal connections with the screwdriver. With the rig keyed of course, and audio adjusted in the other receiver so it dont squeal. Your hand will cause a hum or a scratch sound in the OTHER receiver. That will be your LEVEL control.

Quite a common thing Dave. In fact ten meter FM is even better in hilly terrain. The higher the frequency, the smaller the wavelength. Thus it is more subject to scatter, reflection, absorption, etc. However in some cases you will find 70 cm is better for the urban city invironment.

My Radio Shack clock is only about 20 years old, and still running.

I'd suggest searching google for '24 hour digital clock' - it turns
up some interesting possibilities, including some kits.

It looks like the pot on the tone board itself is the frequency set pot.
Would it work to remove the existing pot and use a rotary switch to connect
to one of several external resistors?
I can measure the resistance sweep of the existing pot, then fabricate a PCB
with, say, 4 or 5 similar pots, so I can switch between them.
Alternatively, I could run banks of resistors thru dip-switches, to adjust
the frequency in a binary-style fashion.
Does anyone have any comments on these methods, or suggestions?

Thanks!

Well, I paid $50 for the radio itself. I'm running on a non-existent budget
here and would prefer to build, rather than buy, what I need.
My concern with running the pot lines to an external box is the possibility
of interference.
Any insight?

Greg,

I suspect that you should not have any problem with an external switching setup if you use shielded 600 ohm mic cable for your interconnect, and ground both ends of the shield. This should be no problem as long as the low end of the original pot is at chassis ground. If this is the case, run ground to shield, red to high end and white to wiper, and you can use a 12 position rotary switch and pots in an aluminum project box. Make sure you ground the project box to the shield, this will keep out RF. If you're clever, you could use a series of resistors on the switch (you want a NON-Shorting switch) with one end at ground and the other at the high end, and use the switch wiper like a pot wiper...

-Add Norway to the list. Effective this week, morse proficiency is no
longer a requirement for HF access.

All Norwegian licensees now have the same privileges.

Licensees with the LB (Former: full HF access, 100W only) prefix will be
given a choice as to whether they will keep their LB signature or be
issued a LA signature.

LC (VHF+ only) licensees will keep their existing suffix, but have the prefix
changed to LA. (ie. LC8MAT becomes LA8MAT)

Hi folks ,
can anybody help me to find a brand (i found only Rhode&Schwarz), wich will match the following crtiterias for a radio:
The radios sould be modular type with separate transceifer unit, control unit ,antenna tuning unit.The transceifer should be installt in a 19" cabinet at the office Control room.Tranceifer control unit shall be desktop type.A minimum of 100m distance shall be possible between the transceifer and control unit.The unit shall be operating with 240V AC Power.A stabdby power supply(DC or AC UPS) with capacity of one hour operation shall also supplied along with the unit.

Technical Specifikations

1.. The SSB radio supplied shall meet all relevant IMO performance standarts and ITU radio regulations.
2.. Integrated DSC function shall be available
3.. The operating frequency range shall be 1.6 - 30 Mhz
4.. Maximum Power Output of 250W shall be available with option for user programmable reduced rates.
5.. The receifer shall have frequency range from 100khz to 30Mhz
6.. The frequency generation shall be based on true digital synthesis
7.. It should be possible to directly select the frequency from the equipment keyboard At least 50 User programmable channels shall be available
8.. All relevant GMDSS Safty and Distress frequencies shall be available
9.. Frequency stability shall be minimum 0.35ppm
10.. The following operation modes shall be available
a) SSB upper side bandsuppressed carrier (J3E,USB)

b) SSB lower side band suppressed carrier (J3E,LSB)

c) AM H3E

d) R3E upper sideband Reduced carrier

11.. Backlight LED display shall be available for clear identification of transmit and receife frequencys
12.. The antenna impedance should be 50 Ohm and the antenna tuning unit should match it automaticly
13.. receifer IF Selectivity shall meet the following rating
a) SSB: 350-2700Hz

b) AM: +/- 3khz

14.. Receifer sensitivity shall meet the following levels for an input level of 10dB SINAD with 50Ohm antenna.
a) SSB: 0.6 micro Volt

b) AM: 4 micro volt

c) CW : 0.25 micro volt

15.. In band inter modulation level shall not exceed -40dB
16.. The following minimum specifications shall be met by the supplied SSB radio
a) Image rejection : >80dB

b) IF rejection : >80dB

c) Spurious Response Reaction: >80dB

d) Internal spurious signal generation < 5dB SINAD

e) Spurious Emission <20pW/ 50Ohm

f) Unwanted sideband Suppression >60dB PEP

g) Hum and Noise <-50dB PEP

17.. Operating temperature range up to +55 Deg.Celsius
18.. The supplied unit shall be either wall mountable or desktop type.All required mounting and installation accessories should be supplied along with the unit.
19.. The antenna type shall be a whip unit and shall be capable of handling the maximum output power of the radio
20.. Antenna unit shall be rugged waterproof type suitable for harsh marine enviroment
21.. Antenna should be installed at rooftop with suitable waterproof fixtures (IP66) and the feeder cable shall be low loss armored co-axial type.
Greetings
Kai

Somehow I just think that with such low level tones, and wires going to
switches
and resistors, you will have a tough time getting the accuracy required of
the tones to
be reliable.
But, I suppose everything is possible.
Let me know if you have any specific questions on the rig. I have one as
well.

1550. ARRL FUD about BPL

Newsgroup: rec.radio.amateur.misc
Date: 2003-08-19 13:04:56 UTC
From: jnye41@pavillage.netno.spam
Message-ID: <98434152.65867878@pavillage.net>
Source record: 64170
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

The claim that BPL will seriously and negatively impact amateur radio is simply fear, uncertainty, and doubt (FUD) spread by the ARRL. That organization needs to justify its existence, and the BPL issue is a convenient way for it to show its activism. The ARRL has apparently followed the path of other self-justifying organizations such as NOW and the NAACP.

Unfortunately, the technically unsophisticated do not recognize the difference between coherent and non-coherent noise, and this makes it easy for the ARRL to spread its FUD. But the fact is that, if BPL signals are heard at all, they are coherent (have a predictable phase and amplitude) and therefore can be completely removed at the receiver. This can be done in many ways, most of which amount to nulling the BPL signals by introducing an identical signal which is 180 degrees out of phase with the original. As a matter of fact, most current HF transceivers have what they call a "noise reduction" option already built into them which uses the nulling method to accomplish its goal. Therefore, many amateurs and SWLers already have the needed equipment to deal with any BPL "interference." The ARRL reports have conveniently omitted any mention of the coherency issue, and their measurements are therefore flawed, because they don't reflect real world situations.

So take the ARRL claims with a large grain of salt, and don't succumb to the FUD they are spreading. Instead, do some reading on your own by going to non-ARRL web pages such as http://www.uplc.utc.org, and http://www.wave-report.com/tutorials/bpl.htm before accepting the ARRL claims at face value.

if they are predictable then they must be constant, if they are constant
then they can't carry data, doesn't make much sense to me.

> receiver. This can be done in many ways, most of which amount to
> nulling the BPL signals by introducing an identical signal which is

now, just where do you propose getting this out of phase signal? true,
there are devices out there now that can do this, but they are fussy and
must be constantly adjusted as you change frequency or switch antennas. and
they also have problems with overloading and distortion.

> current HF transceivers have what they call a "noise reduction" option
> already built into them which uses the nulling method to accomplish
> its goal. Therefore, many amateurs and SWLers already have the needed

sorry, not with this type of signal. the common noise reduction processors
in most radios rely on the noise signal to be broadbanded, bpl is a myriad
of short narrow band bursts. the common noise reduction filter would not
only not work on these, but may be fooled into blanking what it thinks is
noise but really isn't in the rx passband, thereby causing more distortion
or false noise.

the other option, the dsp noise filter does not remove the undesired signal
from the receiver input, thus reducing sensitivity.

You clearly haven't become acquainted with the mathematical definition
of "coherent," which doesn't demaind a constant signal at all. What
it DOES demand is either a sharply peaked or a periodic
autocorrelation function -- properties which enable engineers to come
up with predictive filters.

> sorry, not with this type of signal. the common noise reduction processors

Sorry, but that's not right. The Icom 746PRO for example, has two
noise reduction functions, one of which samples slightly out-of-band
signals to come up with a time-varying estimate of the values to be

subtracted from the in-band signals. There is no need for the signal to be constant with respect to time. The second noise reduction function is directed at impulse noise and is a traditional noise blanker.

In any case, you are missing the main point of the original post, and that was that the ARRL FUD conveniently ignores the coherent nature of BPL leakage signals -- a property which makes them far less formidable than the ARRL articles would lead you to believe.

Lessee, when we have a lot of people using this, it is going to be a
coherent signal? That video of Ed Hare's certainly didn't sound like
coherent noise to me.

This can be done in many ways, most of which amount to
> nulling the BPL signals by introducing an identical signal which is
> 180 degrees out of phase with the original. As a matter of fact, most

And it makes mush out of the recieved signal. If there is an S9 signal,
will I be able to pick a weak signal out of that?

Therefore, many amateurs and SWLers already have the needed
> equipment to deal with any BPL "interference."

"many"? That's nice. That means "many" do not have the needed
equipment. And there's still that nasty little byproduct of any
filtering scheme

> The ARRL reports have
> conveniently omitted any mention of the coherency issue, and their
> measurements are therefore flawed, because they don't reflect real
> world situations.

Seems like Ed Hare's little video showed some real world situations. S9
noise and lots of it seems like a problem to me.

> So take the ARRL claims with a large grain of salt, and don't succumb
> to the FUD they are spreading. Instead, do some reading on your own
> by going to non-ARRL web pages such as http://www.uplc.utc.org,

And for a mere 900 dollars they will tell me how wonderful a thing it
is. Why don't you get a copy and share it with us?

> and http://www.wave-report.com/tutorials/bpl.htm

Hey, *there's* a technical report. I didn't know that Modems used
Silicon chips!

> before accepting the ARRL
> claims at face value.

Lessee, you just told us we have to accept these high level noise
pulses, with NR methods which nuke most of the (wanted) recieved
signals, disregarded *real* real world proof, and given us some feel
good links of no value.

It IS a good idea to take some suggestions with a grain of salt!

In my case I go camping with the wife and kids alot.
I found my Alinco mobile rig (when "opened up" via
"the mod" would TX with full power in the FRS & GMRS
band(s). This is handy when I have to leave the campsite
and if I have 2 call the wife from the quikie-mart a
couple miles down the road from the campsite on
her Motorola FRS.

i think you are missing the main point. any in band signal that is not desired is noise. if you have to do processing to get rid of it you are going to lose some of the desired signal in the process... i'm sorry, but that is a fact of life, mathematics, and electronics. if you want to ignore facts and just start making attacks against an organization that is at least trying to prevent many of us from having to deal with an avoidable noise source then it is clear that you don't care about ham radio, your agenda is simply anti-arrl.

I have one of those too. When I wanted another one they didn't have any
more. You have to be careful in shopping for $20 WWVH clocks. Some of them
can only be set to one of the U.S. time zones. Others can be set to UTC.
The last one I bought came from Radio Shack, and was more like $40.

I just went through a long process of trying to find a RC Clock that
would do UTC. I really wanted an Analog one, but couldn't find one
that would do UTC.

So I wound up with the MFJ-130RC from MFJ Enterprises. They work and
are synced. You can even turn off DST. $40.00 a pop, but they match
and do the job and that's all that matter to me.

Hope this helps,

Pete

It's also interesting that Mr. Nye points us to the websites of folks
who are advocating BPL ...

I wonder, is Mr. Nye a consultant to the utilities or BPL manufacturers?

I live just outside of Emmaus, PA, (test site #3 in Ed Hare's video).
While I am currently far enough away from the limited deployment
that I cannot detect it here at my QTH, I have gone down to the
area with my FT-817 and can verify that the noise is HORRIBLE.

I shudder to think what havoc large-scale deployments would bring.

Despite Mr. Nye's allegations of "FUD" ... the ARRL is right on
this one.

No, it's a real issue. Have you seen the video? Have you conducted
tests on the BPL demo areas?

> That

Every organization needs to justify its existence.

Are you saying we don't need the ARRL, NAACP, or NOW? How about the
NRA?
>
> Unfortunately, the technically unsophisticated do not recognize the

You admit, then, that BPL emits noise.

> world situations.

Have you actually done this? Where is your 120 page report and demo
video?

Are the BPL folks going to buy me a new transceiver if my existing one
doesn't have these alleged noise-cancelling features?

Let's get down to basics on this.

What you're saying is:

1) BPL does radiate lots of noise
2) Rather than the unlicensed BPL folks not radiating the noise, it should be up to the licensed users to filter out the noise using techniques you have not demonstrated.
3) If an amateur does not have the technology to filter out the noise, he/she is out of luck.

Let's do an analogy, shall we?

Imagine the RF spectrum as a river that is used by many different people for many different purposes - transportation, recreation, fishing, irrigation, energy generation, drinking water, etc. All are licensed and have their uses balanced against each other. Nobody is allowed to just dump trash in the river.

Along comes a group that wants to use an existing bridge over the river for transport. But the vehicles they want to use on the bridge leak and spill their contents, some of which falls into the river. They claim that:

- the spillage is harmless
- proof of harm is up to the other users
- anybody who doesn't like the spillage should simply equip themselves with filters to strain it out, rather than requiring the transport company to seal up their vehicles and not spill in the first place.

Here's another: Perhaps we should remove all air pollution devices, and simply have everyone go around wearing gas masks.
>
> So take the ARRL claims with a large grain of salt, and don't succumb
> to the FUD they are spreading.

What about the inaccuracies YOU are spreading?

> Instead, do some reading on your own
> by going to non-ARRL web pages such as http://www.uplc.utc.org, and

> claims at face value.

I did. I saw nothing about "coherent noise". I did see a lot of boosterism for a polluting technology.

DSL and cable modems don't pollute the RF spectrum. Why should BPL be allowed to do so?

A very interesting question: "Why would someone with an amateur license...?"

But when I ran numerous searches on variations on Leon, Stine, m.i. as "M", etc; there didn't
seem to be a ham operator by any name resembling these. Now I know "Why would someone with an
amateur license...?" be willing to lose it over something as trifling as running a mobile, full
power or not, on FRS & GMRS frequencies. But then, if you're not located in the U.S., I guess
it doesn't matter ;-)

Jim,

Having worked in EMC labs (electromagnetic compatibility), I've heard the signals generated by some equipment. What you fail to understand is that these signals are being modulated at very high rates of speed. Inside of your computer exist a number of oscillators. You assume that only those frequencies and their harmonics would be broadcast. Do yourself a favor and put an HF radio or HF scanner next to your computer while it is on. Turn off the monitor so you won't blame the monitor. Guess what? A ton of garbage. BPL will be worse since it will be carrying more than one signal over the power lines. These will likely carry information at a 1.5 megabaud rate. Check out the ARRL website and view (and listen to) the 26 MB video they have available showing the radio, S-meter, and the car driving around. It is a veritable cacophony of noise all over HF.

The fact is that folks such as yourself who are not particularly technically inclined make statements that other non technically inclined individuals will believe without actually studying the matter. I can assure you that your position is totally in error.

What you are proposing is to shift the cost of correcting the
interference caused by this technology from those who will profit from
it to the victims of the interference.
Do you plan to invest your BPL profits into stock in the companys
that will manufacture the new radio equipment that your technology
will force us all to buy?

The noise reduction options also distort the signal that you are trying to
hear. It makes it unpleasant to listen to. Hams and SWLs will object if
they have to use it all them time.

Turns out, as I just noticed, one of the previous owners soldered a little wire to part of the tone board as a test point. From here I've been able to probe with the o'scope and note the frequency change with adjustment of the pot. Next I'll draw up a PCB to hold a several pots and a swtich, to switch between the tones.

I'm a new Tech-class, KG6SGY, and I'd like to take a shot at DXing.
First of all, could someone reccommend a band and mode for a beginner like me to start out on? I'm willing to take the code test or even upgrade to general if need be.
Second, does anyone have an HF rig they would be willing to sell at a relatively low price? I only have a little over $55 to my name.

Thanks!

NTIA is studying BPL vis a vis USG HF ops ... the same sort of
ops that relegated us to 5 spot channels at 5 MHz instead of a band.

From talking with the folks there who are looking into it, they seem
just as concerned as we should be.

From the website:
==========
Lorentz has defined an absolute function.
But Maxwell didn't state that his laws confirms the absolute property
of space.
Maxwell defined propagation speed of EM wave relative to source.
And he did it long before Einstein has invented his absolute property
of space.
The magnetic field and electric field component in the near field
propagates
with infinite speed. The effect manifests it self in the following
way:
The EM wave's propagation speed is infinite at the center of radiation
(center of radiating antenna) and gradually
decreases into speed of c at the end of near field.
For the magnetic field emitted by coil inductor antenna which is
substantially smaller than the wavelength,
the effect of infinite speed of change of the field gradient shows no
decries throughout the near field range.
As observed in the experiment (no variation in signal phase with
distance
from the center of coil).

Greg -- I recently saw a Swan 350 on e-bay for $40. It may have required some work.

Go to swap meets or swap pages and look for one of the older rigs -- Swan 350, Yaesu FT-101's, Kenwood TS-520S, etc.

Repair or look for an Elmer to help you.

These older rigs will get you on the HF Bands (less 12M, 17M, and 30M)

You will need to take the code test (gets you on 10M SSB) but 10M is pretty poor at the moment). Technicians who pass a 5 WPM Morse code examination are entitled to limited power outputs on certain HF frequencies. "Technicians with HF" may operate on the 80, 40, and 15 meter bands using CW, and on the 10 meter band using CW, voice, and digital modes.

So a general ticket may be in order, then you can work CW or SSB on 80,40,20,15, and 10M with one of the older rigs.

Antennas are easy to homebrew for a few dollars.

Good luck and congrads on the new ticket.

DXing can be addictive but a rush for sure.

DX means different things to different people. With a Tech license,
you can operate 6 meters and up. It's possible to work a few hundred
miles on vhf/uhf using ssb with a good high antenna and favorable
conditions.

If you get your General license, you can operate all the HF bands. At
this point in the solar cycle, 15 and 10 meters aren't too great. 20
and 17 meters are the best bets for working DX on ssb. At night, you
might also try 30 and 40 meters on cw.

$55 won't get you much in the way of equipment. If you're willing to
operate CW, you may be able to pick up a vintage tube-type rig at a
hamfest. With 50-100 watts and a simple wire dipole, you will be able
to work a good amount of DX on CW.

Check out the local ham clubs in your area. Some of the old timers
will likely help you get started, and perhaps lend you a rig.

See:
http://www.qrz.com/clubs.html?

Good luck,
Art Harris N2AH

I'd appreciate any comments, pro and con, from actual users of the IC-706MKIIG. Performance, reliability, service problems, etc.

As it's described it seems to have features I'd like and need: small size, both HF and VHF, and a reasonable power level. Any suggestions as to other rigs with similar features would be appreciated also.

I had NO problem finding it, but I had the advantage that Ed Hare had told me where to look, knowing that I live not far away.

The fact that the deployment is limited makes it hard(er) to find if you don't know where to look ... and lots of the wiring in that area is underground, which makes it sort of a "best case scenario" ... with more overhead wiring, it would be a lot worse (though it's awful in the deployment area as it is ...)

Listen to Ed Hare's video on the ARRL website ... I can assure you that Ed wouldn't "doctor" things even if the ARRL tried to tell him to do so (not that I believe or am insinuating that they would).

If the trash you hear on the video for Test Area #3 (Emmaus) doesn't bother you - especially considering it's a "best case" sort of situation with a limited deployment - then you obviously don't give a damn about amateur radio.

if i'm only interested in ax.25 packet radio, is there any advantage to going with a multimode system over a simple TNC?

I don't think they would bother with a code Tech license anymore, since the
only difference between the old code Tech and the General was the difference
between 5 and 14 WPM code... now that the General only requires 5 WPM, no
point in the code Tech...

I own one of them & also a Yaesu FT 857. I think with the combination of
the 857 & the ATAS 120 antenna my choice would definately go that way.

Jim,

What electric utility do you work for? Or maybe it is the equipment manufacturer that sells the interface devices and equipment to the utility? Where they are testing BPL in Cincinnati, there is S9 noise and you can't get rid of it.

Seems to be the best deal for the money. Had mine for a couple of years and
like it for what it is. I have not sold off my other rigs but have a Yeasu
757 for the low bands and other rigs for VHF/uhf to compair it with.

I've had both the original 706 and have had the MKIIG since 2001 and the MKIIG is a great radio. I use it as my base radio. I love the radio, but the only thing it doesn't have going is the ability to be programmed by PC. At least I have yet to find a decent program for it.
There is much better software available for the Yaesu radio's. It makes it a lot easier to program all the channels, if you're using for other than HF. I use it for all the bands, so PC programming would be nice.
But like it just the same.
That's my 2 cents worth.

the deal I had with a guy for this radio fell through, and I am again looking to trade my beautiful yaesu ft-847 for a Kenwood Ts-2000, the 2000 don't have to be as beautiful as this radio is, just working like it should and looking decent.

thanks to all the guys that made offers of a trade while I was waiting on the child on the deal that fell through, I am sorry for not taking each and every one of them....but write me back, and we will see what we can do this time.

thanks very much, and I have pictures on request, this is a beautiful little rig!

73!
Ken.

I am fortunate that I am far enough from the Emmaus, PA "pilot"
area that PP&L is running (Test Site #3 on Ed Hare's video on
the ARRL web page) that I'm not noticing interference here from
that small deployment.

However, if I go down off the hill into the deployment area, the
noise is HORRIBLE throughout the HF bands ...

The ARRL is not spreading FUD about Access BPL ... it's
the truth and I've heard it for myself.

At the moment from the ARRL:

Technician Class

Hams enter the hobby as Technicians by passing a 35-question multiple-choice examination. No Morse code test is required. The exam covers basic regulations, operating practices, and electronics theory, with a focus on VHF and UHF applications.

Technician Class operators are authorized to use all amateur VHF and UHF frequencies (all frequencies above 50 MHz). Technicians who pass a 5 WPM Morse code examination are entitled to limited power outputs on certain HF frequencies. "Technicians with HF" may operate on the 80, 40, and 15 meter bands using CW, and on the 10 meter band using CW, voice, and digital modes.

May change soon or may change latter -- unknown at this time.

For the General class (From The ARRL:
General Class

The General Class is a giant step up in operating privileges. The high-power HF privileges granted to General licensees allow for cross-country and worldwide communication. Some people prefer to earn the General Class license as their first ticket, so they may operate on HF right away.

Technicians may upgrade to General Class by passing a 5 WPM Morse code test and a 35-question multiple-choice examination. The written exam covers intermediate regulations, operating practices, and electronics theory, with a focus on HF applications.

In addition to the Technician privileges, General Class operators are authorized to operate on any frequency in the 160, 30, 17, 12, and 10 meter bands. They may also use significant segments of the 80, 40, 20, and 15 meter bands.

In the olden days, the Technician and General written exam were the same.
The only difference was the step up from 5 wpm to 13 wpm in the examination.

Turns out I did locate it on my first pass but was not sure what BPL
sounded like so I kept sniffing around the town yesterday. It's only
in a specfic area in the town so I restricted my listening today to
that area once Carl alerted me to the details offline. What I heard
today can't possibly be the "fullbore" BPL others have described.
They're definitely playing with it.

I am using the 706MKII (not G model) mobile and have had great results with it.

I have used it with a Webster Bandspanner antenna and also a hamstick antenna. I am currently using it with the AH-4 antenna tuner and the 20m hamstick and results are good. The advantange, of course, to the tuner, is I can instantly change bands on the antenna system at the push of a button.

I have also used my 706 in a portable operation. Last year, I went to the island of Bonaire on vacation. I packed my 706 in a foam padded briefcase along with a small tuner, a switching power supply, and carried a homemade 20 meter dipole. Had a great time, LOTS of contacts all over the US and Europe.

Lightspeed? Oh yes, you can show kids that they have 11 fingers!

First grade kid is best.

me:
lets count your fingers. You don't mind if we count up or down?
does it matter?

kid:
no

me:
grabbing one hand of the kid
'OK, let's start. (countings slowly) 10, 9, 8, 7, 6'
'you said, doesn't matter counting up or down?'

kid:
no, does n't matter

me:
ok, let's continue, where did we stop, yeah 6,
(grabbing other hand) hmmm, let's count up now!
(counting fast) 7,8,9,10, 11 - oops, you got 11 fingers?

...faster than speed of light!

I got one a couple of months ago--they've dropped the price
and I couldn't resist. I got it really to work 6 meters but
wound up putting it in the car instead. I am REALLY impressed
with it. The DSP/auto-noise-reduction stuff seems to work
remarkably well (I've never had it before so I'm not a very
serious judge, though.) The menu system is pretty easy to use
even in the car, and the memories are darned nice--they store
power level among other parameters, so I can switch between the
local repeater and low power, and 70 watts on 20 meters, just with
the flip of the knob. VERY nice. I've only owned 4 HF rigs in my
entire 14 years as a ham, so I'm not very experienced with rigs
in general. But I've been DELIGHTED with the 706 MkIIG. If I
ever get bored with HF mobile I'll probably bring it inside for
my main SSB rig and use my FT-840 for PSK and CW. Feel free to
email me if you have any specific questions .. GOOD LUCK!

hi, marty. i've got a MKIIG in my camper and use it when
camping...not as often as i'd like. no problems with it at all. it
performs well. i guess the only "complaint' i'd have is trying to
remember all of the functions. but that's a problem with most moden
rigs.

Well, Martin, I use mine in my Semi truck, getting beat up by the Arkansas, Michigan, Pennsylvania, New Mexico, Arizona, and California roads all the time as I roll on delivering freight. It's never let me down once. One comment, though, if you plan on using it while rolling, the narrow SSB filter is almost a MUST. Makes listening through the "tire static" (yes, it really does exist. I have proof.) much easier.

Yes it does exist. I bet the greater bulk of the noise I get at road speeds is tire static. If I stop, even with the engine running, it's pretty quiet. But at highway speeds, my noise will jump up a good bit. I've heard of various cures, ranging from anti-static powder in the tires, to springs you insert in the wheel bearing caps to make a better electrical connection across the bearings I presume. I've never bothered trying any of them yet. I just turn on the NB... MK

Thanks for all of the comments and references. Obviously it's a well thought of rig. I think it will suit my needs nicely.

After 41 years of hamming I decided give it up and recently sold, gave away and junked a 50+ year accumulation of stuff. Made the xyl deliriously happy.

Here we go again!

I have used it on 40 meters successfully and on 15 and 10. The SWR is perfect. The efficiency of the system is not so good. I can do the same thing with my Webster BandSpanner. My biggest problem is being mobile when there is a band opening. Havn't found that many on 15 & 10 recently....at least when I have been in the car.

With the AH-4, it really doesn't matter what I put back on the antenna mount. It will find he L/C combination and match it to the radio (within reason of course...obviously can't use a 1/4 wave UHF spike on 40 meters). I have been looking around for a 102" CB whip. That would work as well as anything.

1625. audio quality TH-F7 HF SSB

Try Radio Shack for the 102" whip.. they still sell em

Oh, and for kicks, you might want to chuckle at my insanity while
looking at a similar setup at http://www.csotbs.org/ai8w/TruckPics

I sold that truck, and haven't had a chance to reconstruct that system
on the new truck yet, but it's coming.

I am sure RS sells them. I was just looking for one at a flea market,
or hamfest or something for a few bucks. I am not in desperate need of
one just looking to try it out for comparison purposes.

Tried the link below and it does not work.

Got the correct URL. Interesting config. I notice the antenna is pinned over, looks like either wire or string. If its wire, is that part of the radiating element???

The pic made me think of my first computer/radio setup. It was a Commodore Vic 20 with a Kantronics TU. This was when interfacing computers to radios was the newest thing. I invited a friend to the shack showing him the RTTY and CW capabilities. I tuned into a 20 meter CW QSO. As we sat there watching the message on the screen at 20 wpm, the operator was in an 18-wheeler on the interstate (somewhere). A week later, my friend had a computer hooked to his system.

Yes.. If you would read the description paragraphs, you would have found out that from the feedpoint of the one 102" whip, to the end of the other 102" whip (insulated from ground) is 40' of wire. it was all part of the radiating element.

I didn't even see the rest of the pics. When I scrolled down, I saw
them. Guess you get a lot of comments at the truckstops from the other
drivers????

Certainly not an antenna configuration for someone driving a Ford Focus.

Marty,
I had a '706 for about a year in the mobile. It did exactly
what it claimed it would do and isn't a bad radio at all. I had
a problem with the programming, etc., just too 'busy' a radio
for
~me~ to use in the mobile. There were some things that if I
wanted
to change, I had to pull over and stop to do. I also didn't
have
much use for the VHF/UHF sections, just didn't do much up
there.
So, I swapped it for another radio (like I'd had before the
'706).
The '706 is a nice little radio with the emphasis being on
little.
I was really happy with some of it's features, but just too 'fat
fingered' to keep it.
'Doc

Newsgroup: rec.radio.amateur.misc
Date: 2003-08-24 08:04:16 UTC
From: Rightrik <arararara@inwind.it>
Message-ID: <bi9rhu$6rg2d$1@ID-164697.news.uni-berlin.de>
Source record: 64010

Hello, i have a problem : i have an account on www.qsl.net and
unfortunately, due to a computer crash here, i have lost all my files,
also included my password list...

(NB : i did a backup copy of my HD, but the raid system i used as backup
system decided to loose one of the 2 striping disks, making impossible
to recover datas...)

So, to recover the necessary FTP password to access the web space on
qsl.net i have tried to follow the suggested procedure on the site
(sign in again), but nothing happens; i've tried to write an email to
Mr. Alan K3TKJ (the server maintainer), but i never received any answer.

So i've tried to register again using other email addresses, and i tried
also to write him (and to the webmaster, and all his addresses found on
the site) using my others email addresses, thinking on a filter o
something wrong between my internet provider and qsl.net domain...
Still no answer.

I've tried to donate a little amount of money to his site (10 dollars),
and i have received a kind of "thank you" email; oh, God, it's alive
:-)
I tried to reply to this email explaining my problem and asking for help
but, guess what, NO ANSWER.

I've tried to write him a "real" paper letter a few days ago, and
yesterday evening i've also called him at home, leaving a "please
contact me" message on his answering machine, and of course explaining
who i am and asking for help with my account on his server...

I hope to be able to receive this famous FTP password, one day :-(((

Does anyone can help me to contact him to understand what's going wrong,
and to have a new ftp password to update, modify and/or delete files on
my account ?
NB : In the past i've never had any kind of problem with qsl.net or
Alan, and i used the qsl.net server with great satisfaction...

Thanks very much, sorry for the long message. Suggestions/help will be
very wellcome!

73 from Riccardo IK5WQO :-(

Amateur Radio Newsline(tm) Report 1358 - August 22 2003

From the 2003 Huntsville Hamfest and from our studios in New Orleans, this is Amateur Radio Newsline report number 1358 with a release date of Friday, August 22 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. I'm Don Wilbanks, AE5DW, reporting.

We begin this weeks newscast with the sad news that one of the voices so well known to ham radio will be heard no more. This, with word that Amateur Radio Newsline's Vice President and senior anchor Roy Neal, K6DUE, has passed away.

Roy was 82 when he died on Friday, August 15th at a hospital in High Point North Carolina. He had undergone heart valve replacement surgery three days earlier. According to his family, Roy was at peace at the end and did not suffer.

In both the worlds of broadcasting and of Amateur Radio, Roy Neal was a legend. He began his career at WIBG radio in Philadelphia. After military service in World War Two, he returned and helped pioneer the emerging medium called television at station WPTZ. He then joined the National Broadcasting Company where he spent most of his career producing and reporting for Network News. His specialty was science and aerospace.

But to hams, Roy will always be remembered as the person who brought manned Amateur Radio into space through the SAREX and ARISS programs. His close friend and NBC colleague Alan Kaul, W6RCL, joins us later in the newscast with more on Roy's many contributions. (ARNewsline, Philadelphia Broadcast Pioneers)

**

IN THE NEWS: JIM HAYNIE ON BPL

Roys Death came just as the Huntsville Alabama Hamfest was getting underway. One of the major topics hams were talking about is he growing debate over B-P-L or Broadband Over Powerlines. One of the people most concerned is ARRL President Jim Haynie, W5JBP:

--

Jim Haynie, W5JBP: "Broadband Over Powerlines is important, and just as I said on our website - this is bad. This is not good for Amateur Radio and I don't know how we are going to lick it. Quite frankly, and I want to tell you that right now."

--

Haynie made his comments to a packed audience at the hamfest's ARRL Forum. He says the League is doing everything possible to try to convince the FCC to not proceed with rule making B-P-L a reality. (ARNewsline)

**

RESTRUCTURING: HAM RADIO AFTER MORSE CODE

Jim Haynie also shares his thoughts on a subject dear to many hams: Whether Amateur Radio should or should not keep Morse code. Stressing that he speaks for himself and not the League, Haynie says code should be a requirement for the Extra Class license:

--

Jim Haynie, W5JBP: "What if we were to have three classes of licenses? Entry, General and Extra and Entry got phone privileges on he current Novice bands? And that's all.

So we ask questions on the exam about just that. They could only use 100 watts store bought radio equipment. Possibly even a two-year expiration date.

Generals - same thing except no new expiration date. The same privileges they have today. But for Extra we retain the 5 words per minute code requirement."

--

Not everyone agrees with Haynie. Scotty Neustadter, W4WW, is Chairman of the Question Pool Committee for the National Conference of Volunteer Examiners and this is his personal view:

--

Scott Neustadter, W4WW: " This is not your fathers or your grandfathers ham radio. Things have changed. Technology has changed, and I think that - to an extent - that we have to change with them. We have to recognize our history and in no way am I - nor do I know of anyone else ho is advocating any abolition of the right to operate CW on any Amateur band where you can operate it today.

What I do know is that there is a whole lot of people saying that it does not make allot of sense anymore that I require that you be able to do that. I think that's the distinction that we have to keep in mind.

--

While the debate over Morse Code in amateur radio's future goes on _ Jim Haynie points out that what will be decided remains a long way off_perhaps years. (ARNewsline)

HAM RADIO HONORS: W6JAY RECEIVES 2003 YHOTY AWARD

As enthusiastic hams began pouring into Huntsville's Von Braun Civic Center Saturday morning _ one of the Hamfest's biggest moments was taking shape. The Huntsville Hamfest is the setting for an exciting yearly event_and that's the presentation of the annual Amateur Radio Newsline Young Ham Of The Year Award. This year's winner is 17-year-old Jay Thompson, W6JAY, of Santa Ana, California:

--

Jay Thompson, W6JAY: "When I first started I did not think that thre was allot to do in Amateur Radio, but the longer I am a part of it , I realized that there is much more that I could do. And I know that as much as I have done so far, I know that there is still kore out there for me. So I'll keep trying to acomplish more and maybe Ill become even better at Amateur Radio in the future."
--

CQ Magazine is one of the award's principal underwriters. Editor Rich Moseson, W2VU, says that_while Jay stood above fellow nominees_many other young hams are big achievers, as well:

--

Rich Moseson, W2VU: "Every year we review applications and nominations from a variety of people. The person you see standing here on the stage is not the only really good kid who has done allot. He's just risen the crop a little bit. There are a whole lot of other young people out there in ham radio doing great things, and we congratulate all of them."

--

The Amateur Radio Newsline Young Ham Of The Year Award is in its 17th year. Vertex Standard and CQ Magazine are the Award's principal corporate underwriters.

That's it from the 23003 Huntsville Hamfest. The rest of the newscast will come from our New Orleans studio, but first this. (ARNewsline)

**

Break 1

From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the 145.600 MHz repeater of the Hiway Amateur Radio Club serving Durban South Africa.

RESCUE RADIO: THE BLACKOUT

Ham radio came to the rescue as cellphone systems totaly failed during the recent North-East blackout. Bill Pasternak, WA6ITF, has more:

--

A New York Times article said it this way: When technology failed on a massive scale, some old-fashioned broadcasting stepped into the breach. This, as ham radio operators took to the airwaves to reach emergency workers.

The technology that failed was the North-East power grid that provides electricity to cities like Cleveland, Detroit and New York. This in turn lead to communications failures as numerous cellular telephone sites without generators or battery back-up - went away -- the afternoon of August 14th .

According to an ARRL Bulletin, with cellular systems overloaded or out altogether, the incident turned into a test of Amateur Radio's capabilities to operate without commercial power. The New York City-Long Island Section Emergency Coordinator is Tom Carrubba, KA2D. He estimates that ham radio operators handled 800 to 1,000 messages from Thursday afternoon until early Friday.

Diane Ortiz, K2DO, is the ARRL Public Information Coordinator for the area. She took to the air when power went down in her Suffolk County community. Ortiz called up an informal VHF net. Over the next 20 hours hams passed about 500 pieces of traffic. In addition to handling messages for people stranded in the city, amateurs also relayed other useful information. This included such items as which stores or gas stations were open.

In the Big Apple itself, ARES teams provided communication support for Red Cross Emergency Response Vehicles set up at transportation centers in Manhattan. ARES members also accompanied Emergency Response Vehicles to fire calls. RACES was activated in the greater New York City area after a state of emergency was declared.

Across the Hudson River in New Jersey, a net linked the Red Cross lead chapter N2ARC in Princeton with other chapters. Further to the West, Michigan ARES teams assisted emergency operations centers and the Red Cross.

In Ohio, Section Emergency Coordinator Larry Rain, WD8IHP, reports that all ARES organizations in the Northern tier of the stated were activated.

For millions of people in the Northeast and Midwest, the August 14th power outage took away access to wireless voice, e-mail and the Internet. The failure of the cellular system was especially evident. Nextel Communications spokesman Chris Grandis said that the company needs electricity to power its cell sites, but when you don't have that, it's out of his company's control.

The same held true for virtually every other wireless provider, few of which bother to have emergency power at cellular and wireless Internet sites.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF.

--

The bottom line: The traditional forms of communications failed, but hams were there to lend a hand. (ARRL, NY Times, others)

RADIO LAW: FCC DECLINES TO RECONSIDER ITS HUMAN EXPOSURE TO RF RULES

The FCC has declined to open an Inquiry into updating its human exposure to RF signals rules. In particular, the petitioner in this case wanted the Commission to consider possible health hazards not covered by the current rules, including non-thermal effects and the effects of long-term low-level RF exposure.

According to the CGC Communicator the FCC dismissed the petition, arguing that any such evidence should be presented to other, more appropriate expert agencies. The Commission also noted that its current human exposure rules have recently been upheld by the Second Circuit Court of Appeals. This, in the face of similar arguments by other petitioners. The complete story is in cybrspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-191A1.doc (CGC)

**

WRC'03 FALLOUT: GERMANY GOES CODE FREE

It's another week and another country has joined the no-code revolution. Following Switzerland, the U-K, and Belgium, Germany is the latest country to announce that it is abandoning the Morse code test as a requirement for HF band operation.

According to the website of the German national amateur radio society, the DARC, from the 15th of August radio amateurs in Germany with a CEPT Class 2 license are allowed to use the High Frequency bands using their existing callsigns. Further details were to follow, the website said. (GB2RS)

**

RESCUE RADIO: OREGON HAM RECEIVES HONOR FOR GOING THE EXTRA MILE

Back on this side of the Atlantic, an Oregon ambulance dispatch coordinator, EMT and amateur radio operator has been named a recipient of a "Star of Life" award. This, from the American Ambulance Association.

Scott Waggoner, KC7DHJ, of Clackamas County was nominated for the honor by his co-workers in recognition of the many extra tasks he has undertaken at AMR's headquarters in Portland. Among other things, KC7DHJ was cited for his help in setting up portable repeaters during search and rescue operations, his treatment of minor injuries suffered by firefighters and his overtime work on an American Medical Response

ambulance. (CGC from OregonLive.com)

**

ENFORCEMENT: UNCOORDINATED REPEATERS TAKEN OFF THE AIR

It took three letters and allot of patience on the part of the FCC but a repeater interference problem in Stockton California has been solved. This, as Thomas G. De Lasaux, WA6SEK, removes his repeater from the air.

The matter goes back to September 9, 2002, when the FCC notified De Lasaux that his operation of uncoordinated repeaters on 224.660 and 441.275 MHz was causing interference to coordinated repeaters on the same frequencies in his are. By letter dated May 5, 2003, the FCC informed De Lasaux that the information he submitted in regard to the initial inquirey did not demonstrate coordination for either of the repeaters. Also, that until he was able to demonstrate current coordination, the primary responsibility to prevent interference.

At that time the FCC requested De Lasaux inform the agency within 20 days what steps you were taking to resolve the interference issues. On July 1, 2003, the FCC notified WA6SEK that we had not received a response to the May 5th letter, and enclosed an additional complaint. The July 1 letter afforded De Lasaux an additional 20 days to respond, and stated that if the matter were not resolved by July 25, we would initiate enforcement action against his license.

On July 22nd, De Lasaux notified the Commission that your repeaters operating on 224.660 MHz and 441.275 MHz had been shut down and would remain so. The FCC has now terminated all further action in this matter. (FCC)

**

ENFORCEMENT: FCC AFFIRMS $10,000 FINE AGAINST NY PIRATE

The FCC has affirmed a $10,000 fine issued on July 23rd of 2002. This, against the Reverand Yvon Louis in a case the case involves an aleged series of unauthorized FM broadcasts made from Louis' Calvary Tabernacle in Brooklyn, New York.

The FCC says that over the course of several months in 2001, Reverend Louis reportedly transmitted on 93.7 MHz, then switched to 88.1 MHz after getting caught. But it was not over yet. He then used 90.1 MHz after getting caught again, then reverted to 88.1 MHz in open defiance of the FCC order to stay off the air. (FCC, CGC)

**

RADIO HAPPENINGS PAROCHIAL SCHOOLS TO REMOVE CELLULAR ANTENNAS

Bowing to health concerns from parents, sixteen schools operated by the Catholic Diocese of Brooklyn will eliminate cellular antennas mounted atop buildings and church facilities. The on-line edition of the New

York Post reports that one parish stands to lose $18,000 a year in rent money used to offset the school's operating costs as a result of the change. (CGC)

**

COMMUNICATIONS FOR THE HANDICAPPED: BLIND STUDENTS LEARN TO NAVIGATE USING NEW GPS TOOL

A group of blind high school students visiting Catholic University in Washington D.C. recently shouldered specially equipped laptop computers. This, as they navigated about the campus and visited a pizza restaurant led by voice commands and the Global Positioning System.

A $1,000 Global Positioning System add-on to the BrailleNote keypad showed the students that getting around a college campus is suddenly much easier than it used to be. The complete story is on line at www.washtimes.com/business/20030729-093916-2006r.htm (CGC)

**

WITH THE HANDI HAMS: SUMMER CAMP ON THE AIR

Handi Ham station W0EQO, will be on the air during the summer Minnesota Radio Camp from August 23rd through August 30th. You can look for W0EQO on several different bands using CW, single sideband, FM, and digital modes. Also listen in cyberspace for an EchoLink net on Monday evening at 2400 hours GMT. The HandiHams will respond to all QSL requests for all contacts, including EchoLink contacts. (HandiHams)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

INTERNATIONAL - HOLLAND: NEW PREFIXES FOR THE NETHERLANDS

A New call sign prefix went into effect in the Netherlands on August 7th. On the High Frequency bands, the PA, PB, PC, PF, PG and PI prefix callsigns will now be be heard with one, two or three letter suffixes. On VHF and above, the PD, PE and PH are the prefixes, again with one, two or three letter suffixes. For example, the former PBZ0AIU, who sent in this news story, is now PC2A. (PC2A via GB2RS)

**

DX

In D-X, word that GM0GNY, is active as 4K0GNY from an oil drilling and production platform in Azerbaijan. He will be there starting the 20th of August for around a month. Look for him on daily on 40, 20, and 17 meters and QSL as directed on the air. (OPDX)

**

THAT FINAL ITEM: A FINAL 73 TO K6DUE

At the beginning of our newscast, we told you about the passing of a member of the Amateur Radio Newsline family. Roy Neal, K6DUE, died August 15th following heart surgery. One of the people who knew Roy best is Alan Kaul, W6RCL. Roy and Alan worked together at NBC News, and on projects benefitting amateur radio. Alan looks at the life of a man who was an institution in American broadcast journalis, as well as a driving force in amateur radio's conquest of space:

--

When Roy Neal, K6DUE, died last week, he was possibly the best-known ham in America. He left an indelible imprint on Amateur Radio.

Roy, more than anyone else, was responsible for getting ham radio aboard manned space craft and each new mission is testament to his legacy. His efforts earned Roy awards from the Dayton Hamvention, they designated him Ham of the Year and from CQ-Magazine, which this year named Roy to the Amateur Radio Hall of Fame. He also received honors from The American Radio Relay League, and other groups and served as chairman of two key AMSAT committees.

Roy was a good guy. He was my friend and colleague at NBC News.

I met Roy in the 1960's when I was working in Seattle and he came to town to report on aerospace giant Boeing. After I moved to Los Angeles and joined NBC News in the 70's, Roy and I collaborated on a lot of news reports.

As a correspondent Roy was best known for his coverage of the U-S Space program _ he was a friend of the original astronauts _ and often reported from both the launch site at Cape Canaverral and NASA Mission Control in Houston.

Not many people know this but Roy was also the author of a book about America's missile system_. called The Ace In The Hole. It was written at the height of the Cold War.

In the 1970's, Roy teamed with television producer Dave Bell, W6AQ, to launch the first of several documentaries about amateur radio. Number One was a 16-minute film, Moving Up to Amateur Radio. Followed a few years later by The World of Amateur Radio. Dave Bell remembers Roy as the ultimate professional:

--

Dave Bell W6AQ: "Of all the on-camera talent that I have known, Roy was the most assured and had the smallest ego of all of them.

He was a true professional when it came to the news. Everything was always true. Everything was straight from the shoulder and there was no compromise.

Roy was one of the old-school news guy. He grew up in the television business and he understood it better than anybody who is working in it today."

--

In the 1980's Roy helped convince NASA to put ham radio in Space aboard a manned flight of the Shuttle. That first ham-astronaut was Owen Garriott, W5LFL, on board STS-9. Garriott's story of the 1st DX-pedition in Orbit was told by Roy in the television documentary Amateur Radio's Newest Frontier.

--

Audio from ARNF: "This is the story of an expedition. The story of STS-9. The Columbia. And these are the explorers: John Young - the commander. Brewster Shaw the shuttle pilot. And the scientists Dr. Ulf Merbold, Byron Lichtenberg, Robert Parker and Dr. Owen Garriott -- an Astronaut who is also Amateur Radio operator W5LFL. This is an expedition to probe the outer limits of science and Amateur Radio's newest frontier.

--

Roy's next project was called SAREX - Shuttle Amateur Radio EX-periment, followed by the New World of Amateur Radio which profiled a new ham, teen-ager Kelly Howard, N6PNY. She's now all grown up, married and has kids of her own. She fondly remembers working with Roy Neal.

--

Kelly Lenhert (ne Howard) N6PNY: It was all so exciting, but it was also overwhelming. But working with Roy made me feel so comfortable. He made me feel competent in what I could do. He took me under his wing and he was really supportive and he got me to do what I needed to do to make the film and bring out the best in me."

--

Roy's last documentary was called Ham Radio in Space. Roy's interest was a natural fit with AMSAT. Roy's close friend AMSAT Vice President Frank Bauer, KA3HDO, thinks of K6DUE as his mentor.

--
Frank Bauer KA3HDO: "One of the things that Roy taught me was how to distill information into basically sound bites, if you will. I remember one time where we had to give a presentation - at Dayton - and we had 20 minutes. I told him that I did no know how he could so that, and he

said: `Frank, if I can do the whole world on the news in 30 seconds, you can do this in 20 minutes.' So Roy taught me a whole lot from an executive perspective because he was a true executive."
--

Another AMSAT officer who worked closely with Roy is Robin Haighton, VE3FRH, the President of AMSAT North America.

--

Robin Haighton VE3FRH: "The space program itself is in good hands, but there is no doubt about it that we will miss that leveling confidence that Roy always brought to the meetings and the discussions. He made friends with everybody. The moment you met him you felt that here was a man you could trust."

--

Other comments have come in from all over the world From New Zealand, the past president of NZART, Jim Meechen ZL2BHF sent his condolences. As have numerous other Newsline listeners. Another of Roy's friends, Bob Heil, K9EID, had this to say.

--

Bob Heil K9EID: "I'm going to miss his spirit. He had a spirit about him that when you heard him on the air, you stopped tuning. This was something special you were listening to. And it wasn't always the tone of his great broadcast voice. It was his spirit. He was always in an up-mode about this hobby."

--

Roy was in the first generation of television newsmen who began their craft after World War Two. He started in Philadelphia and then moved to the West Coast where he helped found the NBC News bureau in Los Angeles. That was during the days of the old John Cameron Swayzee Camel News Caravan.

Roy was at ease in front of a microphone _ and could talk to millions of television viewers as easily as he could talk to the ham across town. On camera, he had the uncanny ability to read to time, precisely to time. When I produced updates for NBC Nightly News and Roy was the on-camera talent, I would time the newscast and tell Roy how long he would have to report the story.

I'd say something like this: "Roy, can you do it in 19 seconds?"

And Roy would always reply, "You know I can old buddy."

Roy liked that phrase "old buddy." He used the phrase to address friends and co-workers for some time. As for the updates - Roy always got them right. He would stop talking just an instant before we'd have to switch back to the network.

By the time he retired in 1986, Roy had worked out of the Los Angeles news bureau for almost 35-years. He'd probably written millions of words, and brought his audience uncountable hours of news and information.

But even in retirement, Roy Neal didn't stop doing what he did best. He was no stranger to listeners of Amateur Radio Newsline who knew him as a tireless volunteer giving freely of his own time to report the latest information -- always signing off in his own stylized way.

--

"This is Roy Neal, K6DUE. Thanks for listening and 73."

--

73, Old Buddy _ I really hate to see you go.

I'm Alan Kaul, W6RCL, reporting for Amateur Radio Newsline.

--

Roy leaves his wife Pat, and sons Mark and David. Services were held August 19th at the Wesley Memorial United Methodist Church in High Point, North Carolina.

In lieu of flowers the family requests that donations in Roy's mame be made to the Astronaut Scholarship Foundation at the Astronaut Hall of Fame. The mailing address is 6225 Vectorspace Blvd, Titusville, Florida, 32780. Please mark your envelope to the attention of Linn Le Blanc.

And this final thought. Yes, we at Newsline have lost a very dear friend. More important -- so has all of Amateur Radio.

73, Roy. None of us will ever forget you. (ARNewsline, W6RCL)

1642. Need pinout for KDK mic connector

Newsgroup: rec.radio.amateur.misc
Date: 2003-08-24 17:14:46 UTC
From: Greg Courville <EngNOSPAMinuitor@Gee-Enginuity.com>
Message-ID: <vkhsknso6tshda@corp.supernews.com>
Source record: 64012
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc

I need a pinout for the microphone connector on my KDK FM-2033. It has the same connector as the FM-2030, the FM-4033 and the FM-7033, as well as, possibly, the FM-2016. It is a screw-on connector with 6 pins. There is one pin in the center, with five others at various points surrounding it, and there is a notch at the bottom. The microphone unit has the female connector, the one on the radio is male.

Anybody got a similar connector with a pinout for it?
Thanks!

-Greg Courville

1643. Re: Need pinout for KDK mic connector

Newsgroup: rec.radio.amateur.misc

Thanks to Robert Offer for help on this one.
There is a useful diagram showing the PTT and mic. lines at
http://www.cqham.ru/trad/aeakdk.gif
From there I have figured out the following:

*-Down button (12V to activate)

*-Up button (12V to
activate)
* -PTT line (ground to transmit)
* -GND

*-Mic-level audio *-12V power (regulated to 5V inside
handset)

(looking at the male connector on the radio)

I hope this helps anyone else who is looking for this pinout.
Reply if you can't understand the diagram and I can clarify it.

Thanks all!
-Greg Courville

1652. ICOM IC-T90A Opinions!?!?

Newsgroup: rec.radio.amateur.misc
Date: 2003-08-26 01:01:45 UTC
From: doug_mitton@hotmail.x.com
Message-ID: <3f4aab45.1100245@news.bellglobal.com>
Source record: 64022

Hello All;

I'm wondering if anyone would like to comment on their use of the "new" IC-T90A tri-bander. I have had one for over 2 months now and have noticed a few things about it. I'm hoping a good discussion may resolve some of the issues, let me know if I actually have a problem or confirm that it is normal operation.

1) Squelch - I have found this to be a source of problems, it just doesn't seem to be very sensitive and it seems to work differently at different times. I found the AUTO setting to be too unpredictable and find myself using Level 1 most of the time BUT I still seem to miss signals.

2) PRIORITY - It doesn't seem to have a REAL priority channel ability ... it seems one memory channel can be monitored BUT only when you are in VFO mode. It doesn't seem that one memory channel (ie. local repeater) can be monitored while simply scanning through memory channels.

3) SET settings - It seems that saved memory settings seem to get changed or simply not recalled properly sometimes. In particular TS (step) and TONE (pl). I will recall and start a range scan and all of a sudden notice that the T-SQL is set from my previous memory channel scan. I suppose it is possible that an option button was pressed but normally the beep is loud enough to hear and it does have to be pressed for a few seconds.

4) Rapid Charger and blinking Orange LED - I have noticed that if the batteries die when the radio is on you can't recharge it in the desktop charger without first powering up the radio from another power source and pressing and holding the power button to shut it off. This caused me some distress on a couple of occasions until I identified the issue as the "blinking orange LED" is listed as "problem with the battery pack or charger ... return to your dealer" in the manual.

5) Software - Has anyone any recommendation or source of some free software (open source) or even some instructions for low level manual commands from a simple terminal emulator for this radio? All the commercial software is very expensive, I have home built a few of the hardware interfaces for other devices so one of my existing ones will work BUT the software interface is a bit of a mystery. The CIV interface seems to be documented (and I haven't tried it) but there is supposed to be a second interface for computer interface. The CIV is apparently used for cloning. Also, since I use Linux the Windows standard is sometimes not useful to me. :-)

6) Accessory Prices - I just thought I'd throw in that the add ons are very pricey for this radio ... and I guess ICOM in general. I was able to make a nice head/ear phone from some headsets I purchased at "A Buck Or Two". Also, the remote speaker/mic from my old Radio Shack HTX-202 works just fine on it as well. Well, the sound may be a little "tinny" but it does function.

I guess this is about it for now. Don't get me wrong, it is a nice radio and there is a lot packed into a small size but I'm wondering if I'm seeing some real issues or simply ghosts.

Thanks in advance for insights, comments (constructive hopefully) and pointers.

Alan -- read the manual and make a cheat sheet

Here is a generic guide

Maybe best to walk before you run. First tackle the easy one, program a simplex channel.
Then try programming for a repeater not requiring PL for access.

Next, program for a repeater that does require PL to access (Pled repeater).

For a simplex channel, first determine how to access the VFO and put in the desired frequency.

Next, find the information for offset.

Check that the offset is neither plus or minus, i.e., it is in simplex, then memory write all.

For a Pled Repeater, invoke the VFO mode and enter the repeater output frequency,

set the offset value (e.g., 600 kHz) plus or minus as required.

Next enter the tone frequency, tone activation, then memory write all.

Many beginners enter the tone frequency, but forget to activate the tone.

If you have trouble , there are pocket guides at URL:

http://niftyaccessories.com/index.html

Or get a programming cable and software -- see AES or HRO stores.

Here is how a repeater works
In the illustration above -- (sorry can't post a pic on a NG), the mobile station wishes to communicate with both the base and the pedestrian with a Handi-Talkie (HT). But the mobile, base, and HT are too far apart, too low in altitude and blocked by the mountain. So the mobile transmits on 146.130 MHz to the mountain top repeater. The repeater processes the FM signal and simultaneously transmits the information on 146.730 MHz. Both the base and HT are in the receive mode (146.730 MHz) and pick up the communication from the repeater that was transmitted by the mobile station slick huh?

When the HT wishes to transmit (when the mobile station is done), the user presses the mic button and the HT will automatically switch to transmit mode and transmit at 146.130 MHz, the other two stations, when not transmitting,

automatically go to the receive mode and receive the communication on 146.730 MHz. You'll may hear this repeater referred to as "The 73 Repeater or the Mount Stratosphere machine".

Repeaters are not parrots (listen then repeat), so repeat is perhaps a misnomer, as it doesn't listen, store, and then after a delay re-transmit, it does this simultaneously. For repeater operation, our transceivers have to be preset or programmed to transmit on one frequency and receive on a different frequency. This is referred to as offset, split, input/output. See conventions for Offsets at the end of this chapter.

For an offset example, consider a repeater that hears you as you transmit on 146.130 MHz (input), and repeats you onto 146.730 MHz (output). The amount that the receive frequency is offset from the transmit frequency is called just that -- the "offset" or "offset frequency". Sometimes referred to as "split". In this case a 600 kHz offset. Since this repeater receives below the transmit frequency it is termed a minus offset. A repeater that receives on 147.130 and transmits on 147.730 MHz has an offset of plus 600 kHz.

Repeaters that have outputs in the lower part of the 146 MHz portion are often plus offsets while those operating in the upper portion of 146 MHz are usually minus offsets. For the 145 MHz range splits are minus, and for the 147 MHz range splits are plus. See your repeater guides. Most of the new rigs default to the standard offsets. In some areas, repeaters operate on a reverse split check you repeater guide. Although 600 kHz is a standard offset for 2 Meters, other "oddball splits" are sometimes used, but rarely.

An easy way to remember offsets is (+) Plus Offset = Transmit UP. (-) Minus Offset = Transmit DOWN

Good Luck

1) It is possible, and can be done easily.

2) A scan converter, that takes the computer display signals
and converts them to NTSC/PAL/SECAM, will do the trick.

3) Prepare yourself for an ugly, bletcherous image.

4) Computer monitors are dirt cheap, if not free, if you are
looking for a down-and-dirty one. Even nice ones are not
very expensive.

5) I scan convert to my big screen 525-line TV, but only for
some games. Many images simply do not convert well as the
resoultions are very diifferent.

6) Your TV will need some sort of auxiliary input, such as a
composite (RCA jack) or S-Video (round multi-pin jack)
that is fed from the scan converter. Most modern TV sets
or TV monitors have this capability.

7) Bottom line is, unless you have special interest (like the
one where I use a 53" big screen for low resolution games),
then it is of questionable value to do so. The resultant image
will contain flicker, non-readable text unless it is VERY large,
poor color reproduction, and poor resolution.

Just my experience, and I hope it is of help.

73

An NTSC TV is a very low resolution display. Think of a CGA display on an old IBM PC.
That is the limit of a standard color (or black & white) TV.

1664. WANTED - Will pay $100 for Lafayette Explor-Air kit radio

Newsgroup: rec.radio.amateur.misc
Date: 2003-08-26 23:48:57 UTC

My first radio as a kid in the mid-1960s was one my father bought for me -- a Lafayette Explor-Air kit radio. He built it, and I used it well. It was a three-tube regenerative unit for AM and three SW bands. It was Lafayette model KT-135, and it looked like this: http://hometown.aol.com/kc0imn/explorair.jpg

Osterman prices it $25-35 (Shortwave Receivers Past & Present, p. 255). There's another pic there as well for those who have the book.

I would very much like to acquire one unit, working if possible (although I would be happy to acquire one even if not), to present to my father at an anniversary event in December 2003. I will pay $100 plus shipping to anyone who has one they're willing to unload.

Thanks very much!

Randy Padawer (WA4FJF)

Web TV has been doing it for years. (..and I was not
impressed with the video quality, but my grandparents
like it as it's easy to use so it's OK by them and I was
glad to get rid of it - grin)

As for TV's as monitors, good luck, but there is an
alternative you may consider...

I see no less than 3 monitors (including a few 21"
sizes) out on the curb, free for the taking, each trash
night. It seems everyone is tossing out their CRT monitors
for LCD screens. I'm presently using two 21" CRT
monitors that I "lifted" from off the curb on trash night(s).
One a Viewsonic, the other a Toshiba. Both of them
worked 100%, were less than 3 Years old as-found
and after a dusting/cleaning I was a VERY happy camper.

Take a drive around the neighborhood the night before
trash day. You'll be amazed what you can find sometimes.

Does anyone believe the bumper sticker that says "United We Stand"?

Here, on this newsgroup, we all sound like a bunch of assholes who hate each other.

And we all sound like a bunch of *hams* who hate each other, if you read this newsgroup.

Why do those people want to kill us? I don't know. But if we fight amongst ourselves, they win. They win by sitting back and watching us self-destruct.

It's MUCH more effective if you DO NOT subscribe
to QST, support their advertisers, and discourage any
potential membersfrom joining. Deprive them of their
dues paying members and watch em' scream. Make sure
you tell the ham stores that you will not patronize them
if they appear in QST or support ARRL, and tell them
why. The days of the Wouff Hong are LONG GONE.
Denying them their primary sources of revenue is FAR
MORE EFFECTIVE!

1676. (UPDATE, SHORT) Auto-FAQ Sent to Over 32,500 rec.radio.amateur.* Posters

Newsgroup: rec.radio.amateur.misc
Date: 2003-08-27 13:24:10 UTC
From: "Paul W. Schleck" <pschleck@novia.net>
Message-ID: <3f4cb076$0$804$45beb828@newscene.com>
Source record: 63946

For the previous (SHORT) update, see:

http://groups.google.com/groups?selm=3e8a285b%240%243646%2445beb828%40newscene.com

In September of 1996, I started mailing an introductory message to all new posters to rec.radio.amateur.misc. This is accomplished via a special Perl script originally written by comp.infosystems.www.* FAQ maintainer Tom Boutell, who uses it on comp.infosystems.www.authoring.html, to send each poster such a message once, and only once, to a given E-mail address. It runs from a Unix cron job on my host every morning at 2 AM and queries my local news server via NNTP for the headers of any new articles posted to this newsgroup.

The project was expanded on June 19, 2002 to cover all rec.radio.amateur.* newsgroups, but with the same previous-poster database (as I stated my intention to do in previous updates). This means that if you have already received the message to a given E-mail address, you won't receive it again to that same E-mail address. This expansion increased the average number of recipients each day from about 7 to about 25. The average number of recipients per day is currently about 20. Feedback statistics remain about the same for the additional 2,500 recipients (see previous updates via the link above for more details). Here are the milestones in terms of number of recipients, and the date each milestone was attained:

Recipients: Date: Average Recipients/Month (approx.):
0 September 21, 1996 N/A
5,000 July 5, 1997 625
7,500 December 7, 1997 500
10,000 June 2, 1998 420
12,500 December 20, 1998 420
15,000 September 29, 1999 280
17,500 May 30, 2000 310
20,000 April 7, 2001 250
22,500 April 3, 2002 220
25,000 August 8, 2002 625
27,500 December 1, 2002 670
30,000 April 1, 2003 625
32,500 August 27, 2003 500

For those who are curious, here is the current version of the message, modified in response to feedback as the project progressed.

>Subject: WELCOME to rec.radio.amateur.*
>X-Loop: rec.radio.amateur-auto-faq@oasis.novia.net

Hello,

The following message is automatically sent to every new poster or cross-poster (as of June 19, 2002) to any of the rec.radio.amateur.* newsgroups. It should be sent once, and only once, to each unique address. This is a welcome message. The Internet amateur radio community welcomes you to the newsgroups, including rec.radio.amateur.*, and welcomes your input, opinions, and constructive participation. To help make you feel welcome, experienced participants like myself have chosen to systematically inform you, as a new poster, about useful information resources and user tips to enable you to get the most out of these newsgroups. I hope you will consider the message in that spirit.

* * *

1. The news.announce.newusers newsgroup, moderated by Jon Bell, et al, contains a number of very informative articles providing an overview of net-etiquette, suggested writing styles for electronic forums, and other various do's and don'ts concerning Internet culture. If the articles have expired at your site, you may also access them from:

ftp://rtfm.mit.edu/pub/usenet/news.answers/news/

2. Original newsgroup voting and charter information for the rec.radio.amateur.* hierarchy, as well as for rec.radio.info and rec.radio.swap, may be accessed from:

ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.info
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur-reorg
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur.dx
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur.boatanchors

3. The Guide to the rec.radio Newsgroups, originally written by Jay Maynard, K5ZC, is now maintained by Jeffrey Herman, KH6O. It provides an excellent overview of all of the Usenet newsgroups devoted to amateur and CB radio. It may be accessed from:

ftp://rtfm.mit.edu/pub/usenet/news.answers/radio/personal-intro

4. The rec.radio.swap FAQ: A Guide to Buying and Selling on Usenet, also originally written by Jay Maynard, K5ZC, is now also maintained by Jeffrey Herman, KH6O. It contains a number of good pointers for reading and posting articles concerning the buying and selling of radio and radio-related equipment on the Usenet newsgroup rec.radio.swap (which, with the sole exception of rec.radio.amateur.boatanchors for vintage equipment, is the only appropriate newsgroup in the rec.radio.* hierarchy for such articles). It may be accessed from:

ftp://rtfm.mit.edu/pub/usenet/news.answers/radio/swap-guide

Please direct any submissions feedback, or administrivia regarding the above two resources to jeffreyh@hawaii.edu.

5. The national amateur radio society of the United States, the American Radio Relay League, has a presence on the Internet. You may access their comprehensive and informative home page at:

http://www.arrl.org/

(They also have information about amateur radio organizations in other countries.)

6. Read the newsgroup first to see if your question has already been answered. You may also view, and search for keywords in, older news articles (going all the way back to 1981) at the Google (formerly DejaNews) archive:

http://groups.google.com/

Many topics have been discussed before, often in great depth, but the articles have expired at your local news server. Services like Google allow Usenet a much longer "institutional memory," greatly benefiting both new and experienced users.

7. If you do post to the newsgroup, give as many details as possible. After you post, read the newsgroup for a week or two to see all replies to your posting. A recommended practice is to ask for responses by E-mail and offer to post a summary if others are interested in the answer to your question. Note that it is (almost without exception) inappropriate to post your article to all (or even a significant subset of) rec.radio.amateur.* newsgroups. Please pick only the most relevant newsgroups (2 or 3 at most), and post your article as a simultaneous cross-post (check your newsreader documentation) so that only one article is propagated, and the article is only shown once in a newsreader.

8. Remember, Usenet newsgroups are based on the idea of mutual aid. Usenet only works if we put as much into it as we get out of it.

73, Paul W. Schleck, K3FU

The author welcomes any and all constructive feedback. Please direct all such feedback to pschleck@novia.net and retain the original subject (e.g., "Re: WELCOME to rec.radio.amateur.*") in your reply.

Wow, Dave! That's a stretch. With just a few notable exceptions, most of us here in rrap enjoy our arguments with each other, and don't take it too seriously or personally.

Or do you want to tell us just what we should think and say?

- Mike KB3EIA -

One could easily be fabricated from a piece of old wood. "Old plow
handles" etc.. I would not sand the device. It's much more effective
when the splinters are functional. I've heard tell fleet brand enemas
are based on the original Wouff Hong design. Not as glamorous as
machine gun design, but useful none the less. MK

I thought I would post a followup on this...
I deceided not to try and take the HT as a carry-on and just put it in some checked in baggage - on both flights out and coming back though the suitcase was checked by TS and they left a little card indicating that they had checked it. I also had some battery holders with the HT that had alligator clips on the ends along with a MAHA charger - I am sure seeing the jumble of wires and alligator clips and a taped together Nicad pack for the FT-50 got them excited :)

Look at the title of the newsgroup.... Well, actually it should be
rec.radio.amateur.POLITICS instead, because except in a few rare occasions
where there actually is intelligent debate and/or discussion, it is all
POLITICS!!!!!!!

>
> Here, on this newsgroup, we all sound like a bunch of assholes who hate

Probably just catching the newsgroup at the wrong time. Look at
rec.radio.amateur.misc or even alt.ham-radio.vhf-uhf right now. It's the "I
know you are, but what am I" childish arguements....

>
> Why do those people want to kill us? I don't know. But if we fight

Amateur radio will die on its own problems, not from exterior sources, as
the energy to promote and protect the service is definitely not being
utilized that way. This and other newsgroups are a prime example of the
cancer festering on our hobby/service.

Source record: 63955

Hi Fellow QRP'ers,

I just finished building a 40 meter receiver that was designed to be a match for my Class E transmitter kit by The Arizona Scorpions. The receiver project turned out so well that I thought I would see if there would be any interest in selling the printed circuit board to others who may want to build the receiver. It could be easily modified for other bands. If you're interested check out my webpage at www.members.cox.net/w7ji/receiver.html

You can respond to me direct at w7ji@cox.net

Best 72/73's,
Lou, W7JI

>out of them!
>

I have a baseball bat, can I join you? HA

I bailed out of the ARRL 14 years ago when it started to become clear that the Leagues agenda was tending more toward a policy of supporting lower licensing stardards (CB'er Ham). A pool of trained, capable radio operators means something to me and I could no longer stand to be a part of an organization that was moving to disregard that section of Part 97.

It was a life membership too.

I am staring as I type, at the Heath GR-54 my late brother and I built together while in high school in the 60's. We passed it back and forth for nearly 40 years, and I'm glad it was in my possession when he passed away in '94.

Oh BS Ryan, you think this bunch of mis fits on USENET has anything in common with the 'real hams' ?? I don't.

I have been here since I got a computer, way back in 1996. Not much has changed. Even some of the same folks are here.

Nothing that goes on here happens on the air. Its a good way to vent and have fun.

In fact I'll bet if you could take a pole you would find most of these folks are not on the air, for whatever reason, and don't care to be. This is their only connection to a enjoyable outlet they can't or won't use any longer. Being on the air and having fun.

A "sow" is a female porcine (i.e., a pig). You know: it is one of those
entities you used to date and then later married.

You must be a result of the dumbing down generation. The word is spelled SOW, as in you reap what you sow.....not "SOW"

I don't need a "spell checker" my generation learned to spell in school, unlike yours.

I thought the Wouff Hong was supposed to suggest unspeakable horrors
to the bad operator, but I don't think it has anything to do with beating
anyone up. It's power is so great that nobody wants to mess with it,
so they keep in line.

And how come nobody has mentioned the Rettysnitch in this thread?

TM-261 is a Kenwood number.

Pioneer, to the best of my knowledge, has never made any 2-way
radio products for amateur or commercial bands.

Maybe if you Republicans would sing it MY way the song could go something
like...
"People. People who need Wouff Hongs are the luckiest people in the world.."
Of course I'd throw in my own Babs melody and claim copyright. Then you'd
have to deal with my lawyers and deal with me, The Divine Diva Of All Times.

You beat me by 10 years. I bailed out about four years ago. Mine wasn't a life membership, but you didn't loose much considering what the ARRL has become. Still, I miss the technical articles in QST. Now days the technical articles are probably geared to the new style ham like, how to hook an antenna to a rig, or which side of a microphone you should talk into. I was hoping the ghost of Hiram Percy Maxim was still hanging around ol Newington guiding the League in some small secret way. But the ghost is dead.

It's not my place to say who is a "real ham" but my comments were merely responding to what that guy had observed HERE in Usenet, not on the air. And I still stand by my comments, sometimes the newsgroups are nutty as a Snickers bar and sometimes they are not..... Just depends on when ya catch them.

>
> I have been here since I got a computer, way back in 1996. Not much has

Same here, but from around 1999. It goes in cycles. That was the main reason of responding to that guy, stuff goes in cycles on here.... Sometimes some quality posting, sometimes garbage.
>

> Nothing that goes on here happens on the air. Its a good way to vent and
> have fun.
>

Pure BS. These people may or may not operate the same way they act in this newsgroup, but there are a ton that act like complete asses, bringing the amateur radio community "one step closer to extinction" on HF. And this is from an overwhelming amount of these people being licensed anywhere from 25-40 years!!!! (The ones that are supposed to be "better hams.")

I will give to ya, on the venting and having fun part. I do agree with that. My sole purpose for participatin in newsgroups whatsoever is two-fold: recreation and education. Certain newsgroups (other than ham radio related as well) provide for some excellent sources of information.

> In fact I'll bet if you could take a pole you would find most of these

1711. studying for tests, looking for equipment for my rocketry goals

Newsgroup: rec.radio.amateur.misc
Date: 2003-08-29 14:20:16 UTC
From: tater1337@yahoo.com
Message-ID: <44f502ad.0308290620.5e5c0819@posting.google.com>
Source record: 63979

Hi, I am currently studying for my Technitians test and am trying to determine what equipment i shall need.

The reason for my getting a ham ticket is I am a model rocketeer, and I would like to do some electronic payloads with telemetry.

Back in the early days, Estes rocketry came out with a electronics kit that would transmit either a beeper, or a tone regulated by a sensor, allowing a single channel for telemetry, it would tranmist this via the Citizens Band to be picked up by CB Walkie Talkies. It had to be hand tuned and had plenty of discrete components and was not the happiest of designs.

I remember when I was in electronics school using a PLL chip to build a transmitter, was a simple things to do, required hardly anything in the way of extrenal components, and was FM (could have been AM, our choice)

I was wondering if one could create the kit above but using up to date components like PLL? anybody know of a trick circuit for it? I am looking to telemeter back any one (or more if possible) of the following

temperature (thermistor)
G force (piezo? strain guage?)
pressure(barometeric, strain guage)
location (gps? maybe just locator beacon)

What I would like to know is what kind of reciever setup would be best. launch field may not have 110V AC, and I would prefer a base unit to a mobile (mount in either truck or club launch trailer) Older documents suggest

TenTec Triton 4
Kenwood TS520
Heath SB100
Heath SB101
Drake TR-3
Drake TR-4

Cost is a consideration, as this hobby is being used to help another hobby.

This ICOM IC-7100 scanner is in mint condition, perfect working order, no cosmetic blemishes. It has many powerful features and can be controlled very effectively through a PC with the addition of the CT-17 Serial Interface, which I also have listed for sale. The unit comes with power cord and original manual.

Ebay auction 3044088672, see http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3044088672.

1715. FS: ICOM SP-20 External Speaker with 4 Filters

This ICOM SP-20 speaker is in mint condition, perfect working order, with virtually no scratches or cosmetic blemishes.

The ICOM SP-20 is designed for use with a wide variety of communication equipment. It is equipped with four separate audio network filters for maximum control of the audio characteristics of received signals. It also features two audio input jacks (3.5 mm mini jack). Input A or B may be selected from a switch on the front of the speaker. There is also a Speaker On/Off switch and a 1/4 inch headphone jack on the front panel.

Ebay auction 3043932162, see http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3043932162.

One CT-17 connected to a standard RS-232c PC connection port can simultaneously control four different receivers/transceivers from a single PC.

This CT-17 is in mint condition. I have included in the sale the power supply and a serial interface cable. Both of these items did not come in the original package from ICOM, for some unknown reason.

Ebay auction 3043954021, see http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3043954021.

1717. Bikes and Ham Radio

Recently took up recreational bicycling as a means of exercise and relaxation. My bike is a Marin "Redwoods" model.

One of my other hobbies is ham radio, and I carry a Yaesu VX-5R HT on my belt for "company" and possible means of summoning help (I ride on some rather isolated rural trails sometimes). I'm looking for a plug-in lightweight headset (preferably earbud and throat mike) with a PTT switch which I could situate on the handlebars.

Anyone here know of such a unit which works with the Yaesu radios?

Ham Radio Outlet sells an earpiece with a small boom mike. I don't
recall the model number or manufacturer but I use them with both a VX1
and an FT50. I use it more to listen to PBS or the ballgame while
riding than hamming. The PTT switch could be mounted on the handlebar
but I find it more convenient to clip it too my shirt collar. Most of
my hamming/cycling occurs during endurance events when I communicate
to my crew (also hams) in the support van. Moving my hand to my
jersey collar to press the mic button has never been a problem.

73s,
Tom

Pioneer was a Taiwan company that made 2M
radios for a short time in the 80's. They were sold
in Asia and not exported as they did not have FCC
Type Acceptance for export into the USA usage.

Ham radio started going into the toilet shortly
after Dick Bash published his infamous "study
guides". Later after the ARRL went crying to the
FCC to publish the question pools (to put Dick Bash
out of business because *his books* were out-selling
the ARRL study guides 10 to 1 at hamfests and mail
order) it sealed the "initial cycle of dumbing down" for
Amateur Radio - and we are now where we are today
as a DIRECT result of the same.

All because *one ham* in Alaska managed to singlehandedly
'step on the proverbial toes of a publishing company' in Newington
Conn. and in their response, they decided to not only throw out
the baby with the bathwater, but also rip the tub out of the wall
and toss it out the 2nd story window...

These are the true facts of the matter.

That's very sweet but exactly what does it have to do with shortwave
/listening/?

A lot of hams seem to think that SWLers are - automatically - interested in
ham stuff.

I doubt that the hams that crosspost into rec.radio.shortwave realize how
badly they make hams look.

I guess that Jon finally published one too many porno links or one too many pictures of naked women. His web pages are toast at the time of this posting. They got yanked right along with Lloyd's AOL pages.

Birds of a feather? ...

Jon Cunningham is ham radio operator K1TP, and he has had his 14.313 MHz web pages up for quite a long time at http://members.aol.com/jcunham.

On them, he frequently put down Usenet radio posters as beneath contempt, but he completely overlooked his own tendency of late to post what many people would think of as porn or links to porn. I guess that AOL decided to nuke the pages for that same reason.

Truly, pride goeth before a fall ...

I have done side by side comparison of a 102" whip tuned by an AH-4 equivalent vs. a resonant style antenna such as the Hustler series. On 40m, There was a repeatable 1 "S"unit difference in rx signal and tx signal strength. I did not have the chance to check it on other bands, but the difference would probably decrease as you got closer to 10m, and increase as you went to 75/80m

Bottom line is that if you want/need performance in a mobile environ, use some sort of resonant antenna, especially on the lower bands. However, a 102" whip will do for convenience. Or you can split the difference and get a screw-driver style antenna.

As a matter of fact, it was measured on 75m. My 11.5' whip with an SGC-230 tuner was 12dB down from my top-loaded junk box antenna. That's two (or more) S-units. A 9' whip would be even worse. Why spend all that money on a tuner that dissipates 94% more power than a tuned 75m mobile antenna that costs less than the tuner?

Hey Cecil
I have both the AT180 and the AH4.
They're on a shelf.
In a closet.
I use a resonant Hustler with a toroidal matching transformer.
I want a screwdriver-type antenna.

To be fair, if all anyone wants to cover mobile is 20m-10m,
an 11.5' whip and an SGC-230 did a remarkable job for me.

: Anyone here know of such a unit which works with the Yaesu radios?

A year or two ago I got a little gadget from Radio Shack (their catalog number 21-1832) which is an adapter for a cell phone headset that functions as either a PTT switch or a VOX unit. It uses one AAA cell (needed for VOX only), it has a standard dual plug that fits my old HTX-202 as well as my newer ADI HT-204. The unit that contains the battery, the circuitry, and the PTT button is about 1" x 2" and has a clip on the back for attaching to clothing that I think could also be used to hold it onto some kind of bracket on handlebars. I've used this a little on my bike, but I can't say I've done an extensive amount of bicycle mobile operation.

When I said it was down, it was. The fact that Jon whined to AOL and
got some of his priveleges back doesn't change a thing. The original
post clearly stated "at the time of this posting" so that dipwads like
you couldn't try to spin things.

Get your facts straight asshole. Your lies don't fool anyone in this
news group.

Let's see, just last week, you were Jim Nye. Now you are Jane Nye? had a
quick
sex change huh?

Caught.....once again asshole!

I suppose one of the whining Puritans out here went crying to AOL that Jon
had "porn" on his web page. I don't know how the heck one can equate a photo
of a topless woman to "porn", but you Puritans have your own set of oddball
mores that are understandable only by you moralist extremists.
I suspect that what really happened was that Jon poked fun at a particular
Ham or two who couldn't stand the criticism, so they went mewling to AOL.
Don't you just LOVE crybabies?????

Jon Cunningham is ham radio operator K1TP, and he has had his 14.313
MHz web pages up for quite a long time at http://members.aol.com/jcunham.

On them, he frequently put down Usenet radio posters as beneath contempt,
but he completely overlooked his own tendency of late to post what
many people would think of as porn or links to porn. I guess that AOL
decided to nuke the pages for that same reason.

Truly, pride goeth before a fall ...
....

"Many" people, or just you?
Truly, twits abound.

And you "know" that Jon whined??? I know Jon, asshole and I don't believe he
whines about anything.

Go play with your gay friends like you usually do when you are outed!

Jayne Nye my ass!!!
>>

Nothing like a self-righteous asshole or two to ruin it for the majority.
Let the pocket protector dudes whine that they find some sort of "offense"
on pages such as Jon's and Katie Bar The Door!!!
The Momma's Boys go crying to AOL, and cry they do!
It is rather odd that these same guys who went pissing and moaning to AOL
that Jon's pages had objectional material are the same closet porno dudes
who secretly look at "fuck" photos every chance they get.
Odd that these self-styled censors are themselves the biggest violators of
porn....
Nothing like being a Hypocrite....

Sp speaks Jayne, Jim, Christy, Doug et al, also GM melzer among the many aliases he/she uses, whenever he/she is outed, he/she resorts to the GM Melzer role and lists all the names he/she has used.....

You are correct Jayne Nye (or whatever he/she is called today), "you need to get your facts straight asshole, your lies (and aliases) do not fool anyone in this newsgroup."

Except for your pitiful self.

Welcome to the hobby(ies).

You may be interested in the Bicycle Mobile Hams of America
(http://bmha.lafetra.com) and/or
the Bicycle Mobile Hams Yahoo!group (http://groups.yahoo.com/group/BMHA/).
Both vary between "not much going on" and "a fair amount of activity".

In my case, I've found that a headset provides a lot of transmitted wind
noise (although putting tape over many of the microphone's "vent holes"
reduced this problem quite a bit). My currently-preferred solution is an
in-the-ear solution (think of a speakermike stuck in your ear -- including
the microphone).

Radio Shack used to have one that was nice. it could work with just about
any radio that had the small mic jack and the slightly larger ear jack
side by side.

I have one here, but the ptt switch has since gone south (use the vox
almost exclusively on it these days).

Check with radio shack or your nearest Ham radio outlet or AEA store.

Wrong again, LARDASS!!!! Bwhahahahahahahahaha!!!!!!
But you got yours NUKED didn't you, 5'06" 250 lb LARDASS?

> Wrong once again, come to think of it, you are wrong more often than not.

That's a Lllllllllloyd......

> Jon's webpage is running as normal.

I rather enjoy looking at the pictures of Penny....guess LARDASS Lllllllllllloyd hasn't discovered girls yet. Oh, that's right, he's almost 30 years old and still hasn't had his first piece of ass.

> But lloyd's isn't...........:-)

No need to thank me, it was my pleasure.

My first was a Heath HW101 which was a less expensive version of the SB-101..but, that was about 1971. I'd suggest you look for all solid state. I have an Icom IC-730 (vintage 1980 +/-) which would be a great starter rig. I recommend you stay away from QRP rigs until you get some experience on the bands.

When you posted that his page was down I had just came off of that page at
the AOL URL. So if you want to continue with your LIE. That is your
choice.

I simply stated it was still there. And it was. SO stick it up your arse.

And as for 'porn'. If you consider a picture of a very lovely woman, undressed, in a NON SEXUAL pose pornographic......you need help.

Dan/W4NTI

SB DX @ WW < KB8NW $OPDX.624
Ohio/Penn DX Bulletin No. 624

The Ohio/Penn DX PacketCluster
DX Bulletin No. 624
BID: $OPDX.624
September 1, 2003
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, K2PF, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, K8YSE, F5NQL & UFT, JI6KVR & JA-IOTA Islands News, PA0ABM and VA3RJ & ICPO for the following DX information.

SPECIAL NOTE FROM EDITOR (by Tedd KB8NW): Well the "2003 Blackout" affected many including me. As I mentioned in the last bulletin, I finished OPDX.623 within minutes before leaving for my vacation. With the power going out after 3:30 PM Thursday, August 14th, I was unable to finish the bulletin until the power was turned back on Friday morning about 5:30 AM, August 15th. Everything seemed to be fine and working when I left for MTSU in Tennesee and Biloxi, Mississippi, except the UPS backup for my LINUX mail system (BARF80). However, with the rolling blackouts in the Cleveland area, BARF80 took a system hard-drive crash and currently is being worked on by Dave Foran, WB8APD, Administrator for HAMNET.ORG and NSHORE.ORG. All my main mail (between August 16-23rd) is now being stored on NSHORE.ORG until BARF80 is re-activated again. So, that is the reason for the short bulletin this week (NO MAIL - NO INFO). Hopefully, no mail was lost, and if you E-mailed me something, it is still in storage. My mail (as of August 24th) is now being forwarded to a family ISP E-mail account until BARF80 is back online.....

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 24th/August, through Sunday, 31st/August there were 220 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9N, 9Q, 9V, 9Y, A4, A6, A7, AP, BV, BY, C3, C6, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX,

LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VK9X, VP2V, VP5, VP8/o, VP9, VQ9, VR, VU, XE, XU, XW, XZ, YA, YB, YI, YJ, YK, YL, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS. Ian, 3B8IK, has been active on PSK31 on or around 21070 kHz. Look for him after 0845z and after 1330z.

3B9, RODRIGUES ISLAND. Robert, 3B9FR, (now a NODXA member) was quite active last week (with a great signal) on 20 and 17 meters CW. Watch around 14022 kHz (+/- a few kHz) after 1230z or 0230z. Watch around 18070 kHz (+/- a few kHz) after 1230z and as late as 1700z.

3XY, GUINEA. Leo, 3XY1L, continues to be very active. This past weekend he spent alot of time on 10 meters SSB on 28504 kHz usually between 1700-1900z. His activity during the week was on 15 and 20 meters SSB (21285 and 14195 kHz) between 1700-1900z. QSL via UY5XE.

4S, SRI LANKA. Nelson, 4S7NE, has been very active on the WARC bands with very few takers. Watch for activity on 30 meters as early as 1215z and after 1900z (as late as 0100z). Watch 17 meters around 18072 kHz (+/-) between 1000-1200z. Watch 12 meters around 24901 kHz after 1145z. QSL via: Nelson Ranasinghe, No. 18, Katana Housing Scheme, Demanhandiya 11270, Sri Lanka. Seal the envelope with tape and send only the QSL card with a green stamp. No return envelope is needed.

5W, SAMOA. Manfred, 5W0MW, became active August 29th. Most of his activity has been on 30/20/17/15/12/10 meters, mainly on CW with some SSB. The length of his stay is unknown. QSL via DJ7RJ.

9G, GHANA. Henk, 9G1AA, was heard this past weekend mainly on 15 meters CW/SSB on various frequencies (21007, 21209, 21268 and 21280) and times. QSL via PA3AAW.

9M2, WEST MALAYSIA. Ian, 9M2/G3TMA, was active this past weekend looking for stateside stations on 17 meters CW. Activity was on 18070 khz between 1500-1830z. QSL via the address on BUCK.com. Also active was Masaru, 9M2/JI1ETU, on 15 meters CW/SSB at various times and frequencies. QSL via the address on BUCK.com.

BQ9P, PRATAS ISLAND. Word out of Japan is that the BQ9P operation will have/use SSTV on this trip. According to their Web page, concentration will be on SSTV and the WARC bands. The DXpedition team still needs landing permission, but they say this should not be a problem. This operation is scheduled to take place October 9-16th. Activity will also be on CW/SSB/RTTY and on 160-6 meters. Operators listed so far are: BV3BW, BV3FG, BV4FH, DL3DXX, DK7YY, JI6KVR, OE1WHC, UA3VCS and ZL4PO. Remember their Web is at: http://www3.ocn.ne.jp/~iota/newpage64.htm

F5, FRANCE. Yves, F5PRU, will be in the French Alps for some mountaineering training for the Army September 1-20th. He will start in the town of Briancon (1326m ASL, the highest town in the CEE). In his spare time Yves will be active as F5PRU/p on 40 and 15 meters, mainly CW, using a 3 watt transceiver and a vertical antenna. This operation counts for French reference numbers: Hautes Alpes (DDFM 05) and French Province - Cote d'Aur (DPF 20). QSL via F5PRU, direct or by the bureau.

DXCC NEWS.....
Bill Moore, NC1L, ARRL DXCC Manager, announced that the E4/DF3EC operation (August 7-10th) has now been approved for DXCC.

It was announced (while your Editor was on vaction) by the ARRL Awards Committee that Timor Leste (4W), which was formally known as East Timor (4W), will NOT be added to the DXCC List as a new entity. There will NOT be a removal from the DXCC List, but East Timor's name will be changed to Timor Leste. More details are available via the ARRL Web at: http://www.arrl.org

IOTA NEWS.....
AS-079. Look for Mat, JS6PXB, to sign homecall/6 from Tarama Island (JIIA 079-008), September 2-3rd. Activity will be on 40, 15 and 10 meters CW/SSB. QSL via his home callsign, either direct or via the bureau.

INTERESTING READing AND WEB PAGE. Wino, PA0ABM, provides OPDX readers with the following: "The Gatti-Hallicrafters Expedition of 1947-1948, the first Grand HAM DXpedition ever, found its way to the World-Wide Web in June 2003. Besides the ARRL article (see QST December 1993), you can read the story Gatti told in the International Harvester, and the (short) story of Bob Leo, W6PBV (now W7LR). I can tell now that there is a BIG update available. In this update both hams, Bob Leo, W6PBV (now W7LR), and Bill Snyder, (W0LHS), tell the story in their own words. Bob and Bill provided me with a lot of documents and pictures, which are illustrated on the many web-pages. Make sure you read both stories, they are very different. There is even a Dutch version available. The link is:
http://www.qsl.net/pa0abm/ghe/00ghe.htm
Enjoy the reading. Thanks to Bob Leo and Bill Snyder for letting me do this job.... 73, Wino, PA0ABM, devoted to CW."

SPECIAL EVENT. Look for special event station EO12J to be active to celebrate 12 years of independence in the Ukraine. Activity over the past weekend has been on 20/17/15/12/10 meters. Watch the following frequencies: 14204, 18070-85, 18130, 18145, 21031, 24897, 24945 and 28024 kHz. QSL via K2PF.

ST2, SUDAN. Magdi, ST2BSS, was heard (almost daily) active on 15 meters (21260-21280 kHz) this past week at various times between 1300-1900z. QSL via DL5NAM.

SU, EGYPT. Alan, SU9BN, was active this past weekend on 15/20 meters. Watch between 21250-21280 kHz between 1000-1500z. Also, watch during the week for him on 40 meters around 7005 kHz after 2330z. QSL via EA7FTR.

VK9X, CHRISTMAS ISLAND. Andy, G3AB, is now active as VK9XAB until September 6th. His activity has been mainly on 40/30/20/17/15/12/10 meters CW at various times throughout the day. QSL via G3AB.

XW, LAOS. Operator Larry, XW1A, was heard August 28th on 21290 kHz between 1600-1700z. He stated to QSL via E21EIC direct or via the bureau.

YA, AFGHANISTAN. Sada, YA1D, was heard on 15/20 meters this past week on 21265 kHz at 1545z and on 14270 kHz between 1430-1745z. He said QSL via JG1OWV.

YI, IRAQ. Plenty of activity took place this past week. Patrick, F5ORF, was active as YI/F5ORF, on 20/15 meters. Watch between 1700-1800z on 14195, 21195 or just below 21200 kHz. QSL via KU9C. Also active was Abel, YI/KC0LEK, on 20/15 meters SSB and PSK31. Watch between 1130-1630z on 14070-71, 21070, 21255 and 21302 kHz. QSL via address on QRZ.com. Willie, YI/KV4EB, was mainly active on 17 meters SSB. Watch around 18160 kHz between 1645-2000z. He also sometimes visits 21280 kHz. "The Daily DX" also reports that Willie is now on RTTY, so be watching 14088 kHz possibly around 0300z. QSL via K0JN. Robert, S53R, was also active as YI9R on 20/15/10 meters CW usually between 1130-2000z. QSL via K2PF. Also active this past week on 20 meters was YI/OM2DX and YI/SM7WZA.

ZS0, ST. PETER AND ST. PAUL ROCKS. "The Daily DX" reports that Joca, PS7JN, will once again be active from here between September 1-14th. His expected callsign will be ZS0S. QSL via PS7JN.

So, Dan, you lying sack of shit, you posted your claim almost six
hours later! By then, Jon had plenty of time to whine and to beg AOL
for a reprieve.

The pages were down at the time I said they were. You came late (and
uninformed) to the discussion, blazing away with your cap pistols.

And as to the pornographic nature, or lack thereof, of Jon's Penny
pictures, he was in violation of AOL's TOS simply by posting nudity,
and he knew it. AOL in general sucks, and its college kid, part time
employees will kill an account or some web pages at the drop of a hat.

Anyone who goes ahead and uses AOL as an ISP anyway deserves what they
get. I have no sympathy for them at all.

Interesting, that back on August 19, 2003, you were posting as Jim Nye. Now you post as Jayne Nye.....did you have a quickie sex change? Or just a transvestite?

Oooops, time for another name change.

Who is the lying sack of shit now Jayne, Jim, Christy, Doug, etc., etc.???

.....
.....
And one must surmise that it was because of crybabies such as yourself who
went whining to AOL that the page was censored.
I guess that Hell Hath No Fury such as a twinky, overly sensitive, Ham
operator who has been scorned on Jon's page.
Come on...face it. The photo of the naked gal with sand all over her
backside was just a ruse...one of you crybabies went whining to AOL because
Jon poked fun at you.
Will the real crybaby please stand up?

HAM ops look bad because Hillary needs a dildo?

If anything makes HAM ops look bad, it is a low
education level and atrocious mastery of their native
tongue. WA8ULX is the poster BOY for this crisis.

The only thing I'd send to Hillary is sun-ripened canine
feces, and her web "sight" isn't set up for that.

Darn the luck!

Well, I would, but your mom won't let me.

She is blathering incoherently about her being
depicted in too many compromising situations,
plus she doesn't want the newsmedia to catch
wind (no pun intended) of your house.

She mentioned that money talks, however.

Will advise.

1779. Help: Seeking info on amatuer radio..

Newsgroup: rec.radio.amateur.misc
Date: 2003-09-02 08:36:57 UTC
From: mlopez028@msn.com
Message-ID: <6648f2bc.0309020036.20c6d60f@posting.google.com>
Source record: 63849

Hello.

I'm not actually "new to amatuer radio". I'm not involved in radio at all.

But I'd like to be. I've found that the idea really interests me. A friend of mine at work is into it and after just talking with him for a few minutes I found myself being really fascinated at the idea.

So I wonder if some of you might be willing to give me your input. What is it that you love about your radio experience? What are some of your better experiences with it? What neat things have you done with it? Just basically what is your history with it?

Also... considering myself to be a person at the absolute having nothing starting point, perhaps some of you might be willing to write out a very brief road map from where I am now to being fully up and operational.

What equipment to I have to buy, and how much does it cost? What classes, courses or education do I need to aquire to know what I'm doing and where is it offered?

Those types of things.

I'm really excited about this idea. And I would really appreciate any feedback at all.

Also if there is something that you feel is pertinent that I have failed to ask about... please feel free to comment on it.

Thank you.

For info on getting started go to www.arrl.org

Cost is variable depending on what you want to do once you get involved and whether you buy new or used.

Try to find a club in your area. They can really be helpful in answering your questions.

Got to go to work so can't address the rest right now.

See URL's
http://www.arrl.org/hamradio.html

http://electronics.howstuffworks.com/ham-radio.htm

Should answer your questions

Used equipment can be purchased when first starting ranges from $25 up.
Many clubs have auctions and for sale items in their news letters.
For clubs -- see http://www.arrl.org/FandES/field/club/clubsearch.phtml

Exciting ham activities include:
Emergency Communications during a crisis
Talking around the world to other hams
Mobile and portable radio while travelling
Building your own equipment
Expermenting
Much more

Free study guide at URL:

Transpose the 'e' and the 'u' in 'amateur,' and you'll have it right. ;-)

> of your better experiences with it? What neat things have you done
> with it? Just basically what is your history with it?

Oh, bugger... I could write a book! ;-)

I'll try and summarize. Ham radio fascinates me for multiple reasons. First, I like the opportunities I have to tinker with stuff, and to (sometimes) make equipment do things that its original designers never guessed at.

Another reason is the opportunities to chat with someone from halfway around the planet, even on just a couple of watts worth of power, and find out about their culture and interests. My first real HF voice contact was someone operating on a DXpedition from the Orkney Islands. I've never forgotten what that felt like, nor have I forgotten my first-ever CW contact. Granted, I don't use CW any more (was never really into it), but the memory is still there.

Yet another reason is the opportunity to be of assistance during public-service events (parades, marathons, etc.) I just plain like to help people out, and ham radio is an excellent way to coordinate such things. I recently joined the US Army MARS (Military Affiliate Radio Service) network because military communications and equipment are of great interest to me as well.

Let's see, what else? I like helping others to enter the hobby, and see what they do with it. Part of my side business (Blue Feather Technologies) is dedicated to the conversion of commercial radio hardware (mostly Motorola) to amateur service, for the benefit of those who want to use the gear but may not want to invest in the programming

hardware, software, and test equipment required.

I could go on, but I think you get the idea.

> Also... considering myself to be a person at the absolute having
> nothing starting point, perhaps some of you might be willing to write
> out a very brief road map from where I am now to being fully up and
> operational.

Absolutely! Love to help. First and foremost, you should probably pay a visit to http://www.arrl.org and use their club search feature to locate a ham club that's local to you. Attend one of the meetings, and see if they have classes available to help you get your license.

Equipment-wise, ham radio is interesting in that you get out of the hobby exactly what you put into it. You could probably pick up a basic 2-meter handheld or mobile radio at a ham swap meet for $100 or less, and that'll be enough to get you started.

It's difficult to advise you where to go from there, because everyone develops their own specific area of interest within the hobby once they get their license. Some folks just want to chat. Others find that experimenting with ATV (Amateur TV) or satellite work tickles their fancy. Still others become 'code nuts,' and reach levels of competency with Morse code that always leave me in awe that anyone can make intelligible words out of a 20+ WPM signal.

For my part, I'm heavily into radio construction, modification, and station-building. As one example, I've kitted out our minivan as a mobile station capable of operating on every band from 40 meters through 70cm. You can see the details at:

http://www.bluefeathertech.com/kc7gr/thevan.html

> I'm really excited about this idea. And I would really appreciate any

>
> Also if there is something that you feel is pertinent that I have
> failed to ask about... please feel free to comment on it.

It's a fun field, and I think many in this newsgroup will be absolutely thrilled to give you directions, as it were.

One thing you will need to quickly develop, though, is a thick skin. There are some in the hobby (usually older operators) who, though they may have a very high level of skill and experience, and may have made other good contributions to amateur radio, are openly hostile and suspicious towards newcomers, simply because said newbies may not have had to live up to the same standards that they did when they got their license.

What these older operators tend to forget is that amateur radio is also about diversity. It takes a constant influx of new 'heads,' as it were, to keep the hobby alive and growing. What many also forget is that

any new operator's beliefs and habits within ham radio are going to be largely dictated by the EXAMPLE SET BY OTHER OPERATORS.

This is important! If new would-be hams are exposed to nothing but hostility and suspicion, they're either going to leave the field early (which would be a shame, because we'd never get to see what they have to contribute) or become poor operators.

If, on the other wing, they're exposed to examples of good operating practices, mentoring in how to tweak with electronics, and maybe helping out with a marathon or emergency-services drill, they'll probably become real assets to the hobby.

In short: Be careful of who you take your examples from, and don't be put off by the curmudgeons. They tend to make noise all out of proportion to their importance, and are usually their own worst enemy.

Best of luck on your journey. Drop me an E-mail (there's a human-readable address in my signature block) if you still need a nudge here and there.

Thanks for the info. I am amazed no one else out here has been able to
suggest a response. from what i read on the net, there appears to be
thousands of options out there, but it apears that only a few are good
for the area I am lookign for.

I wouldn't bother. As I recall the 813 started losing RF output about 20 mhz or so.

You could try it, just reduce the plate voltage a bit. But I think the efficiency will be quite low. And it may be tough to neutralize.

August 2003

Dear Amateur Radio Club Members,

As summer fades and we anticipate a return to the rigors of fall, you will be reinvigorating Amateur Radio club operations in your communities. But before you club launches its activities, I hope you can take a moment at your next meeting and consider a disturbing and critical topic - Broadband over Power Lines (BPL).

BPL is a devastating threat to the Amateur Radio spectrum - especially the HF bands. There has been a lot of publicity on this issue - articles on the ARRL website (www.arrl.org/bpl <http://www.arrl.org/bpl>) and other ham radio sites. Your ARRL is at the forefront of the campaign to defeat BPL and will continue to work tirelessly to protect your Amateur Radio bands. And you can help.

This summer individual hams - and clubs - have responded generously to fund ARRL's efforts to fight BPL, and have filed comments to the FCC. But we still need to raise an additional $55,000 to fund the field measurements and document filings necessary to defeat this threat. We're all in this effort together, so I hope your club will jump on the bandwagon and support the campaign financially. We've received club contributions ranging from $50 to $2000. If your organization has already made a donation, thank you.

And if your club is considering a contribution, I hope you'll do so right away. With a contribution of $100, $250, $500 or more, your club can join the roster of clubs that are joining the effort. Your commitment will make a tremendous difference. And we'll put a list of contributing clubs on the ARRL website this fall as our way of saying thank you.

If you need more information on BPL for your club, go to the ARRL website (www.arrl.org/BPL <http://www.arrl.org/BPL>) for the full story, including copies of the two FCC filings and a video that graphically demonstrates the interference radio amateurs would experience from BPL. The video can be downloaded and played at your next club meeting, and there's a PowerPoint presentation you can use. Just follow the link above to an "Understanding the NOI" page and a resource page where you'll find the presentation.

ARRL President Jim Haynie calls BPL the biggest threat to Amateur Radio in decades - and hams have lent their voices to the cause. If BPL becomes a reality, many Amateur Radio activities, like Field Day, will be meaningless. Your club's support with a generous financial contribution now will help fund this effort.

Thank you for considering this request. Contributions can be made on-line at www.arrl.org <http://www.arrl.org>, or by mail to BPL Special Spectrum Defense Campaign, ARRL, 225 Main Street, Newington CT 06111.

73,
Mary M. Hobart, K1MMH
Chief Development Officer

Jon took down the Hillary with the dildoe pic but left the outhouse
pic on his sight. I wonder if some one put the fear of God into him?
Good ridance anyway to a pic that disrespected a United States senator
and theirfor the United States itself. such things are evil and must
be stopped although the outhouse pic is ok because it don't disrecpect
the US. I wonder what Galaxy Internet has for TOS regulations about
the new pages and I bet Jon already has broke them
.....
.....
For Chrissake man, learn to spell, willya?
Dildoe is what you use...Dildo is what Hillary uses.
Good 'ridance' means what?
How can one respect this rotund, lying "senator" when she has yet to utter
one single word of truth?
That woman's recounting of her years in the White House is nothing but
hyperbole and lies.
Her book is yet another work of fiction and is falling off the scale of most
popular books. I guess her fans must have colored in all the pictures and
got bored with it.

None of those radios would be appropriate for someone getting a tech license. Techs are limited to 50 MHz and above, those are all HF (30 MHz and below) rigs. If you want to learn the code, and get HF privileges, the Kenwood is a decent radio. I've used one for more than 10 years, and as far as I know it still has the original final tubes in it (The TS-520 uses 3 tubes in the final amplifier section of the transmitter). I always get good comments about my transmit audio.

If you only want to stay a no-code tech, you can get a decent used VHF and/or UHF radio(s) made by Icom, Kenwood, or Yaesu, although new radios are generally more capable and aren't that much more expensive than the used ones.

To look up what other people are saying about used and new radios, got to here:
http://www.eham.net/reviews/

Any particular models? any opinions on what brands are better, or
easier to use/understand?

I like my Icom IC-2100H. I don't think they make them anymore in
favor of a 2100 with a new suffix

The Icom 2100 series has been around for a little while, and enjoys a good reputation.

I'm somewhat of a unique case myself. I use an old Kenwood TS-700A 2 meter all-mode (AM, FM, USB, LSB and CW) at home, and an old Radio Shack HTX-202 handheld for my APRS station. In the car I have a new HTX-252 2 meter mobile, mainly because I found a new one for only $70. I used to use a different HTX-202 in the car as a mobile rig, but the finals blew after about ten years of daily use. I have the Kenwood TS-520 for HF work, along with a Heathkit HW-99 novice rig that covers the CW portions of 80, 40, 15, and 10 meters. I also have a RS HTX-420 dual band handheld, again mainly because it was so damned cheap on closeout.

Different follow up:

I just did a RT from Boston-Logan to Chicago-O'Hare. Both ways I had
my HT in carry on, antenna removed, put it in the tray with all the
other battery-powered devices, and ran it through the X-ray conveyor.

No comment from the TSA people.

I did however, have it charged and preset to a NOAA weather frequency
in case there was a need to demo it to them as a working radio.

>
> TenTec Triton 4

Get the TenTec Triton 4 (also known as the Ten Tec
Model 540 and the Model 544 with digital readout)

I have owned/used a Ten-Tec 540 since 1978 and
the only maintenance it's ever needed was a new
dial lamp(s).

> Kenwood TS520
> Heath SB100
> Heath SB101
> Drake TR-3
> Drake TR-4

Of these radios the Drake TR-4 is the better choice.

STAY AWAY from the other sets as they all use
two or more radio tubes, which are not bad in of
themselves, however they will cost you much $$$
if you need a replacement tube sometime down
the road, assuming you can find one someplace.

The ONLY exception to the rule is if along with the
radio the seller will also provide you with a complet
set of spare tubes. Then and only then would I consider
a "tube/transistor" hybrid set.

> Looking for a Motorola MT2000 136-177 MHz 160 Channel, NTIA compliant
> narrowband portable radio. Must be in very good condition; to be used for
> search & rescue.

Keep an eye on Ebay. Also, visit the for-sale/trade/wanted forum
at http://batboard.batlabs.com

If my past experience is any indication, expect to pay between
$400-$600, depending on condition and features.

Good hunting.

Roger Wiseman's Greyhound Men's Room Band
(R. Xemblinosky/P. McCartney)

It was twenty years ago today,
Roger Wiseman forced the boys to be gay
He's been going in and outa their rears
And he's made them into ravin' queers.
So watch out or I'll force on you
The act we've hated all these years,
Roger Wiseman's Greyhound Men's Room Band.

We're Roger Wiseman's Greyhound Men's Room Band,
Disciples of the Bucktoothed Choad,
Roger Wiseman's Greyhound Men's Room Band,
Sit back and watch us shoot a load.
Roger Wiseman's Greyhound, Roger Wiseman's Greyhound,
Roger Wiseman's Greyhound Men's Room Band.
It's wonderful to be here,
But Wiseman's full of crap,
The dirty goddamn pederast:
That fucker gave us syphilis,
That fucker gave us clap.

I don't really want to stop the show,
But I thought you had all better know,
That Wiseman's going to play a song,
On a stickpin that he stuck through his schlong.
So let me introduce to you
The one and only Bucktoothed Choad
And Roger Wiseman's Greyhound Men's Room Band.

1818. Imagine Roger Wiseman

Imagine #2
(R. Xemblinosky/J. Lennon)

Imagine Roger Wiseman
It's not so hard to do
Kneeling in the boys' room
Slurping down some spoo
Imagine all the Cub Scouts
He has done this to!

Imagine Marshall County
A breeding ground for hicks
When they hear how Roger
Gets his seedy kicks
Imagining old Wiseman
Gumming winos' dicks!

Imagine West Vagina
Contagious black lung
No more coal to shovel
So Roger gets by with his tongue
Imagine him paying rent
With free shots at his bung!

We all know Wiseman is a reamer
But he's useful just the same
Where else would the Nose find a patsy
Half as sad or half as lame?

1819. Hit the Road, Bucktoothed Choad

Hit the Road, Bucktoothed Choad
(R. Xemblinosky/J. Deutschendorf)

Marshall County, West Vagina
Rusted trailers, pregnant welfare mothers
Folks are close there: close as they can be
"She's good enough for Dad, she's good enough for me."

Bucktoothed choad, hit the road
To the place you belong: West Vagina
There or China
Hit the road, bucktoothed choad.

Roger Wiseman dreams about guys
Greyhound stations, reeking public restrooms
Cheap and nasty, suck and fuck and run
Mouthful of stale gism, asshole full of cum.

Bucktoothed choad, hit the road
To the place you belong: West Vagina
There or China
Hit the road, bucktoothed choad.

Rog thinks of Gareth when he's reading alt dot evil
The swear words all remind him of his punk far away
And beatin' on his meat Rog gets the feelin'
He don't wanna fuck chicks
Anyway, anyway!

Bucktoothed choad, hit the road
To the place you belong: West Vagina
There or China
Hit the road, bucktoothed choad.

So long sad times!,
Go 'long bad times!,
We are rid of you at last

Howdy, G A Y times!

Cloudy gray times,
You are now a thing
Of the past, cause:

Woger Wiseman's here again
The skies above are clear again
Let us sing a song of cheer again
Woger Wiseman's here again

Altogether shout it now!
There's no one who can doubt it now
So let's tell the world about it now
Woger Wiseman's here again

Your cares and troubles are gone;
There'll be no more from now on
Woger Wiseman's here again

The skies above are clear again
Let us sing a song of cheer again
Woger Wiseman's here again

My first was an OLD Icom 2AT with the thumbwheels to change the frew. I had to add a tone board to it to use the repeaters.. Now I've got HTX-202's from Radio Shack and even picked up the Dual Band they put out but took back real quick because of the cell phone problem.. I've got a few 2 meter mobiles from Radio Shack as well.. A lot of people slam on Radio Shack stuff but, it's easy to use and if you get the 3 year warranty and something happens, just take it back and get it replaced... FREE.. Here in AK there aren't any ham radio stores so if you have something like a Yaesu or ICOM rig, you have to send it out and that takes a while.. I've carried my 202 with a j-pole wire antenna on my snow machine as a soul source of survival communications and I think they're a great radio for the price..

1824. Ham Radio in the Peruvian Amazon

Newsgroup: rec.radio.amateur.misc
Date: 2003-09-05 23:16:40 UTC
From: elinks@cruzio.com
Message-ID: <2b787a59.0309051516.4fe8c4d6@posting.google.com>
Source record: 63794

HAM radio problem

Hello there,
We are sending this e-mail out because we are in desperate need of assistance in finding an answer to a complicated HAM radio dilemma. We are a small non-profit which will be helping to produce a video on the indigenous tribes of the Peruvian Amazon. A group of about __ of us will be traveling to the Amazon, east of Cuzco, along the Madre de Dios river. We will begin our journey in Cuzco (the nearest metropolitan area), which lies at about 10,000 feet on the West side of the Andes. From there, we will be traveling about 200 miles east into a forested region (Amazon) along the Madre de Dios river. Our elevation will drop to about 1200 feet. At this point our group will be splitting in three directions (each going on a different tour). We want to have radios (which we will leave behind with the tribes) to communicate with each other and with Cuzco. They have a new eco-tourist program. So we're basically looking to create a radio system or network keeping three goals in mind (listed below). We are planning on buying a handheld or portable radio for each group member (we can spend about $200 +/- a piece for them) as well as any other equipment we might need. We could possibly buy a new HF receiver with 6 meters or 2 meters added. The local villages and Cuzco have standard HF receivers.

Goal 1: We would like for each of the members of the group to be able to communicate with each other via radio in case of an emergency. We will be in a 25-mile radius of each other.

Goal 2: We would like to be able to communicate with a base camp at a village that would be no further than 50 miles away from each of the travelers at any given time. The base camp village has a high frequency radio. Ideally we'd like each of our group to be able to reach the camp via radio, but if only one can, that would be ok as long as each member of our group could communicate with the other (we figure if one person had the ability to communicate with the village they could act as a link in a communication chain).

Goal 3: We would like to be able to communicate from the rainforest to Cuzco. This is two hundred miles away and a 9,000 foot elevation gap. In Cuzco, there is a HF radio, we are not sure which bands/frequencies it's operating on. We would communicate only in the case of an emergency, but, possibly on a regular basis (if the system is reliable). Ideally, each of our group members would be able to reach Cuzco, but, again, we're willing to settle for one base radio in the rainforest, which would be able to reach Cuzco.

What are the general attributes/benefits of 10m/6m/2m frequencies?

R-O-T-F-L-M-FN-A-O !!!!!!!!!!!!!!!!!

Darnit, I was laughin so hard at readin this toon that
I passed a pint of pepsi thru my nose and
some of it blasted out onto the R-71a !!

PLEASE! PLEASE! SOMEBODY *NEEDS* TO PUT THIS TO THE
ORIGINAL SOUNDTRACK BY THE BEATLES AND THEN
PLAY IT ON 14.313 SOME SUNDAY AFTERNOON
TO OFFSET THE UN-FUNNY FRUITS AND KOOKS ON THERE.

1827. Pixie II questions

Newsgroup: rec.radio.amateur.misc
Date: 2003-09-06 06:43:00 UTC
From: Paul Jordan <pauljordan@gci.net>
Message-ID: <vlj0h9non49l4b@corp.supernews.com>
Source record: 63797

OK, I've put my Pixie II together and I see where there's a simple mod to go to 40 meters instead of 80 meters by switching the crystal and one inductor. Does anyone know if this mod could be carried a little farther and take this little gem up to 20 meters??

Any help is greatly appreciated. 80 meters is OK but, here in Alaska, you can't reach very many people..

Thanks,

Paul Jordan

Amateur Radio Newsline™ Report 1360– September 5 2003

Amateur Radio Newsline report number 1360 with a release date of Friday, September 5th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Pro-code fights back. A petition to retain Morse code testing is filed with the FCC and others are reportedly on the way. Find out the details on Amateur Radio Newsline report number 1360 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: PRO CODE PETITION FLED WITH THE FCC

The proponents of retaining Morse testing for all candidates for a United States Amateur License with high frequency operating priveleges are striking back. This, with a petition that not only asks the F-C-C to retain the 5 word per minute C-W exam, but to also require that Extra class pass a 12 word per minute test. And the organization that I sponsoring the measure also wants written exams stiffened as well. Amateur Radio Newsline’s David Black, KB4KCH, has more on this attempt to row against the deregulatory tide:

--

For the past couple of months, more and more countries have been steering toward making amateur radio code-free. That follows the July abolition of Morse code testing by the World Radiocommunications Conference. In the United States, the Federal Communications Commission has before it six petitions essentially seeking to remove Morse code from amateur radio in the U-S. Supporters of the code have been quiet--until now. A group called FISTS--said to be the largest code advocacy organization in the world--is leading an effort to make Morse code a more prominent part of ham radio and the licensing process.

FISTS is an international Morse code preservation society based in the United Kingdom with chapters world-wide. Its stated objective is to further the use of the Morse code in Amateur Radio communications. The group's north American chapter has delivered a detailed rule-making request to the FCC that seeks more than just making sure that Morse code testing is retained.

FISTS asks the Commission to raise the standards in other areas of testing, too. Nancy Kott, WZ8C, is U-S Chapter Manager for FISTS, and is Editor of Worldradio Magazine. She wrote the rule making request. Among the proposals are keeping code as a mandatory testing element for the General and Extra class licenses. General licenses would require 5 words per minute and Extra class

licenses would require 12 word per minute code proficiency.

FISTS says passing a 5 word per minute code test is no hindrance to people wanting to upgrade, and cites the large number of Technician class operators upgrading to General as proof.

FISTS also says that those aiming for the Extra license should be able to demonstrate Morse code skill at 12 words per minute.

Today's written exams are too easy. At least, that's what FISTS seems to suggest in noting that the FCC sought comments before amateur radio's restructuring about whether fewer morse code requirements should be offset by increased technical content on written questions. FISTS notes that nearly every commenter said yes, but the Commission's Report and Order failed to address the issue.

FISTS says the commission has a chance now to make General class written tests equivalent to the Advanced class written tests before restructuring. In other words, go back to the way it was, with tests that are harder and more thorough.

FISTS wants the Extra class exam to be more thorough, as well. It wants the FCC to require written knowledge of circuit design, information theory, digital methods and encoding schemes and software radio. FISTS says candidates for the Extra class ticket need to show a more thorough knowledge of propagation and geophysics than current tests require.

For the Technician class operator, FISTS suggests merging the Technician and Tech-Plus classes and not require a Morse code exam. But FISTS says technical content should be emphasized and should include the digital modes. FISTS advocates extending Technician Class privileges to include digital modes within the current Novice subbands, which it says should be kept. The group says that would let Technician Class operators participate in the explosive growth in digital applications occurring within the Amateur Radio Service on the high frequency bands.

But when it comes to giving Technicians even limited phone privileges on HF, FISTS says no. The group says the rush of upgrades by Technicians to higher classes following restructuring indicates that the barrier between General and Technician classes has already been lowered enough without needing to go any further.

FISTS also suggests one other big change and that involves taking license tests. Right now, if you fail an exam, you can go back and try again at the same session. FISTS is asking the Commission to impose a 24-hour waiting period before being able re-take either a failed written test or a failed code test.
For the Amateur Radio Newsline, I'm David Black, KB4KCH.

--

There’s 14 pages to the FISTS filing. You can read it on-line at ftp://ftp.qsl.net/pub/n1ea/FIST_FCC_Petition_8-30-303.pdf. As we go to air, no Rule Making designation has been assigned to the FISTS request.

(ARNewsline(tm))

RESTRUCTURING: ACA PAPER SUGGESTS TOTAL RESTRUCTURING OF VK HAM RADIO

Meantime, down-under the Australian Communications Authority has surprised that nations ham radio community with a proposal to totally restructure that nations Amateur Radio service. Jim Linton, VK3PC, has the rest of the story.

--
Radical changes are being proposed for the Amateur Service in the just issued ACA discussion paper entitled "A Review of Amateur Service Regulation.” The paper is sure to stimulate debate, particularly its reference to interference experienced by domestic television and radio receivers, and a suggestion that radio amateurs should take full responsibility to resolve these problems.

A major purpose of the paper is to discuss the implementation of the changes arising out of the World Radiocommunications Conference held in Geneva this year. These changes include the end of mandatory Morse code tests for amateur licences, amateur callsigns, third party traffic, communications during disasters, and reciprocal and visitor licensing.

The ACA, as expected, has also taken the opportunity to discuss restructuring of amateur licensing, the regulatory controls and administration of the Amateur Service in Australia. The paper acknowledges the WIA's proposal for a new entry level licence, and the potential for it to replace the current Novice licence. It discusses restructuring of the current system of seven different amateur licence types (five operator, plus repeater and beacon), to create only two operator licence types - Unrestricted and Novice.

On a positive note the paper hints that the removal of Morse code tests for amateur licences may occur earlier than the ACA's current timetable. It states that if there is sufficient public support, the code requirement could be removed prior to its proposed implementation of regulatory changes flowing from its discussion paper in early 2005.

In a controversial proposal, the ACA is to consider the introduction of a "no interference" policy for radio amateurs. It states "The operation of an amateur station, which is essentially a hobby, should not disturb another person's activities, such as television viewing or radio listening, or affect commercial activities." Should the "no interference" policy be introduced, it would be a major shift from the current ACA policy that provides for a shared responsibility between the radio amateur and his neighbour for the resolution of an interference problem.

To make it clear, the ACA explains "This would mean that an amateur must not cause interference to other radiocommunication services. If causing interference to another service, the obligation will be on the amateur to resolve the problem."

--

The Australian Communications Authority has set a deadline of October 31st as the last day for hams to file responses to its discussion paper. The 50-page discussion paper can be downloaded from www.wiavic.org.au/news or www.wia.org.au/vk4 (Q-News)

**

RADIO LAW: THE ACADEMY OF MODEL AERONAUTICS SAYS NO TO BPL

Back here in the United States, word that the Academy of Model Aeronautics is saying no to the introduction of Broadband Over Powerline or B-P-L technology. In Reply Comments to the FCC, the 175,000 member aviation hobby group says that it is concerned that B-P-L deployment could cause harmful interference to users of Radio Controlled systems and pose a safety hazard to aeromodeling equipment and spectators.

In its filing the A-M-A says that Broadband Over Powerline holds the potential to severely interfere with radio controlled models which operate in or near the 27, 50, 72 and 75 MHz bands. All of these fall within the 1 point 7 through 80 MHz spectrum where the FCC proposes to permit B-P-L to operate.

To the A-M-A this means that Broadband Over Powerline may not yield the benign environment the Commission expects. Also, that it could result in an unanticipated negative impact on Radio Controlled operations. And that’s what it has told the FCC. (AMA release)

RADIO LAW: MARYLAND COUNTY FILES RFI CONTROL APEAL TO FCC

Still with regulatory news, the CGC Communicator reports that Anne Arundel County, Maryland has filed an Application for Review before the full Commission. This, in the hope of reversing an order by the FCC’s Wireless Telecommunications Bureau that prevents the County from entering into the radio frequency interference control business through zoning laws. Laws that could even impact on ham radio, C-B and GMRS operators.

In 2001 Anne Arundel County, Maryland, had enacted legislation requiring that, prior to receiving a County zoning certificate, owners and users of any sort of telecommunications facility had to show that their installation would not degrade or interfere with the County's public safety communications systems. The ordinance also permitted the County to revoke a zoning certificate where degradation or interference was found.

Alarmed, telecommunications providers took the ordanance to the FCC asking that it be overturned. Last July it did just that. It In considering the case, the

Commission found that the challenged provisions of the Anne Arundel County zoning Ordinance infringe on the Commission's exclusive jurisdiction over RFI and are preempted under the doctrine of field preemption. Now the county is upping the antie.

In its pleading, Anne Arundel County maintains that reversal of the Bureau's decision is required because the Order conflicts with a controlling statute of the Communications Act. The County further states that, pending implementation of the Commission's 800 MHz proceeding, the Bureau's decision leaves public safety systems of local governments such as the County's vulnerable and powerless to deal with what it terms as -- quote: “ potentially deadly radio frequency interference from wireless systems of commercial mobile radio service providers operating in the 800 MHz band.”

The FCC has invited comments on this matter by September 26. More is on-line at the U-R-L featured in this weeks Amateur Radio Newsline printed report.

(DO NOT READ: The complete story in the the FCC website at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-2734A1.doc) (CGC)

**

RESCUE RADIO: CELL PHONE HELPS RESCUE FCC OFFICIAL

A cellular telephone has helped to rescue two men dangling in a gondola buffeted by severe winds near Aspen Colorado. One of them is the chief of the Federal Communications Commission's Wireless Bureau who turned to the phone during an ordeal where he was trapped for more than two hours. Amateur Radio Newsline’s Bruce Tennant. K-6PZW, reports:

--

According to news reports John Muleta leaned on the technology he oversees when he and Robert Pepper, an adviser to FCC Chairman Michael Powell, got stuck in the gondola on Monday, August 19th. The two men had used a break in a telecommunications summit to take in the view from atop of 11,000 foot Aspen Mountain.

Their sightseeing trip turned into an ordeal when the tram service abruptly shut down during their return. It stranded Muleta and Pepper n the enclosed gondola part way down the mountain. When help was slow to arrive, Muleta used his cellular phone to call for assistance. But the local service provider provider apparently did not have the latest "enhanced" 911 technology and could not locate him precisely. So Muleta simply directed the rescue effort over the phone.

Once off the mountain Muleta told the press that he was very happy that he had remembered to carry his cellular telephone with him. He added that had he not, that it would have been a much different scenario. This, if they had been trapped all night with the weather getting getting colder.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, in Los Angeles.

--

Ironically, just before he left for the trip Muleta told an interviewer that the FCC is looking at ways to accelerate the deployment of Enhamced 911 service. This is the system that uses G-P-S technology to more precisely locate callers. (Published News Reports)

**

ENFORCEMENT: INTERNET SALES BRING LETTER OF INQUIREY

The FCC has sent a letter of inquirey to Randy Owen, N9UOM, of Toma Wisconsin regarding his license renewal application. The Commision is asking Owen about his apparent involvement in the sale of non-certified C-B transcievers and non-certified High Frequency amplifiers over the Internet in 2002. Owen is the owner of Roper Electronics whose website was advertising the merchandise for sale. (FCC)

**

ENFORCEMENT: FORMER HAM WARNED NOT TO CONTACT THE FCC

A brefly licensed former ham has been told not to call the FCC and wait for it to contact him. The agency’s Daryl Duckworth, NN0W, explains:

--

(Duckworth) “Jack Gerritsen of Bell California has recieved a warnng notice about a violation of ex-patrte rules after his license had been set aside. His repeated calls to the offices of Administrative Law Judges is a violation odf the Commission’s rules against ex-parte communications. Ex-parte rules place restrictions on contacts with Commission decision making personel.”

--

Gerritsen’s license and KG6IRO call sign were set aside only days after they were issued back in November of 2001. This after the FCC learned that he had been convicted in California state court of a radio related offense. It also recieved complaints alleging that Gerritsen had been on the ham bands prior to recieving his license. (FCC, RAIN)

**

NAMS IN THE NEWS: 9M2TO WINS UKDXF AZWARD

Some names in the news. The Chiltern DX Club of the U-K DX Foundation has awarded its prestigious 'Local Heroes' Award for 2003 to Tex Izumo, 9M2TO. The club’s awards committee recognized the commitment Izumo has shown in providing many contacts and confirmations with amateurs world-wide on all bands from 160 to 6 metres over a period of many years.

This annual award goes to an operator resident in a DX country who has provided excellent service to the DX community and who maintains a high standard of operating without the benefit of major sponsorship. The award carries a cash prize and a year's honorary membership in the Chiltern DX Club. (GB2RS)

**

NAMES IN THE NEWS: HAM APPEARS ON TV MOTORCYCLE SPECIAL

Bob Mastrangelo, WA6ZTA, of Thousand Oaks Californis reports that he recently participated in the filming of a motorcycle special that aired August 28th on The Travel Channel. The show is called Revolution on Wheels, and Bob is seen in the beginning riding his yellow Honda Gold Wing and is interviewed about 25 minutes later. Since The Travel Channel does repeat these programs, check local listings to see when it will air again and keep an eye open for WA6ZTA. (ARNewsline(tm))

**

NAMES IN THE NEWS: KB4KCH NEW VP OF ARNEWSLINE(TM)

The Board of Directors of the Amateur Radio Newsline has confirmed the appointment of David Black, KB4KCH, of Helena, Alabama, as its Vice President. Black, whom you heard earlier in this newscast will fill out the unexpired term of Roy Neal, K6DUE, who died last month following heart valve surgery.

David Black, KB4KCH, is owner First Frame Video in Birmingham, Alabama. He is also a 20-year veteran of the broadcast television industry. Prior to starting First Frame Video, David worked as a television news reporter and weather anchor at WVTM, the NBC affiliate serving Birmingham, Alabama. KB4KCH also has extensive radio and television experience while working in broadcasting in Texas.

In addition to his reporting and anchoring Amateur Radio Newsline for well over a decade, KB4KCH is active in amateur radio Skywarn and emergency communications. He is past President of the Birmingham Amateur Radio Club and is one of the founders of ALERT Alabama. This is an organization of radio amateurs specializing in Skywarn communications to assist the National Weather Service in the Birmingham area. (ARNewsline (tm))

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

VOLUNTEERISM: HCI NEEDS VOLUNTEER SCHEDULES EDITOR

If you are a Shortwave Listener, live on the West Coast and want to edit an S-W-L newsletter, listen up. This one is for you.

Duane Fischer who heads up the Hallicrafters Collectors International needs a volunteer editor who can post the annual schedules of worldwide Shortwave radio stations. The site, located in cyberspace at www.w9wze.org/SWL contains loggings, current news, tidbits and program schedules. If you would like to become the Schedules Editor, please contact Duane as soon as possible at

dfischer@usol.com and tell him you heard about it on the Amateur Radio Newsline. (ASWLC, WDX6AA)

**

HAM RADIO IN SPACE: ARISS PACKET UPDATE

An update to last weeks story on the wayward packet radio system on board the International Space Station. Those of you who were on the air on Sunday, August 24 are aware that the packet system was re-activated around 12:00 UTC. Shortly thereafter, the ARISS team received reports from the general ham community that the packet system was operational.

Over the next 9 hours, many hams around the world sent digital signals through the packet system. But later that day, at around 21:22 U-T-C, the packet system abruptly stopped operating while traveling over the Western part of the U.S.

According to AMSAT's Frank Bauer, KA3HDO, the ARISS team has had several discussions on next steps to get the system back up and running properly. But it may be some time before this can be accomplished. This is because the debug efforts may be delayed further due to the arrival of the Progress 12P re-supply ship which will be keeping the two man crew very busy.

Once time is available, the plan is to have the crew report out on the status of the packet module and then to recycle the power. This should bring the packet system back up. If the system abruptly shuts down again after a few hours the ARISS team will then ask the crew to attach a computer to the packet module, download the current parameters to the ground and reset the module.

Stay tuned. ARISS promises to pass along word of progress as it happens. (AMSAT, ARISS)

**

INTERNATIONAL - AUSTRALIA: NEW BANDSPACE FOR VK HAMS

On the international beat, word than all-Australian radio amateurs will be allowed to operate between 3.776 and 3.800 Mhz effective from the 1st of January 2004. The move follows a proposal put to the Australian Communications Authority by the Wireless Institute of Australia several years ago. (GB2RS)

**

INTERNATIONAL - WORLDWIDE: LIGHTHOUSE WEEKEND A BIG HIT

Meantime, reports from the around the world indicate that there was allot of activity in this years International Lighthouse and Lightship Weekend operating event. Jeramy Boot, of the GB2RS News Service has the details:

--

Mike Dalrymple, GM4SUC, the organiser of the International Lighthouse / Lightship Weekend reports that a record number of stations - 369 - were established at lighthouses and lightships in 48 countries - another record -

over the weekend of the 16th and 17th of August.

The official list of participants can be found on the ILLW website. Next year the event will be on the 21 and 22nd of August 2004, and Mike invites individuals and groups to join in with a weekend of enjoying radio from a lighthouse or lightship.

Jeramy Boot, G4NJH

--

The International Lighthouse website is in cyberspace at http://illw.net. GM4SUC adds that as soon as you have your plans for participatiin in the 2004 Lighthouse Weekend made to let him know. You can contact Mike by e-mail to GM4SUC@compuserve.com (GB2RS)

**

DX

In D-X, word that IN3VZE will be active once more as 7Q7CE from Malawi through the 21st of September. QSL as directed on the air. (GB2RS)

And the K3EOD Contest Team will be active in the September VHF UHF contest September 13th to the 14th. The group consists of W3EFH, K3EGE, WR3P, W2SJ and K3EOD. They will be on all bands from 6 meters RF through visible light using SSB, CW and laser communications. For more information please e-mail k3eod@juno.com (VHF REflector)

Lastly, HL1IWD reports that he will be visiting Honolulu through the 12th of September, and will operate as KH6 stroke KB1AIM on 20 metres, mainly CW. QSL is via HL1IWD. (Modern DX)

**

THAT FINAL ITEM: NO MORE USE OF THE WORD E-MAIL IN FRANCE

And finally this week, a note from France where the governmet has said goodbye to the term e-mail in favor of the native language term courriel. A word that linguistically sensitive France is now using to refer to electronic mail in all official documents and hopes that the public will adopt as well.

Frances’ Culture Ministry announced a ban on the use of e-mail in all government ministries, documents, publications or Web sites on July 18th. This, as the latest step to stem what it sees as an incursion of English words into the French language.

Courriel is a contraction of the two words and is a term that has often been used in French speaking Quebec Canada. The ministry's General Commission on Terminology and Neology insists Internet surfers in France are broadly using the term “courrier electronique'' instead of e-mail - a claim some industry experts dispute.

And we thought that you would like to know! (Published reports)

Source record: 63799

10 meters will be of little use. 25 miles is possible, maybe. 50 miles might work, with extensive antenna systems but again iffy. 200 miles is far to close together for use. When 10 is "open" distances of 1,000 miles are normal minimums longer distances are possible, but the signal does not return to earth much closer than that.

With antennas that can "see" each other two meters is workable. Mobile rigs, battery powered, make more sense to me than handhelds. A J-pole 10 to 20 feet in the air should easily communicate 25 miles, and should make the 50 mile circuit also (the antenna might want to be higher in the air). I have reliably, 24/7, communicated between boy scout camp near Northeast, Maryland and Wilmington, Delaware (using a repeater located north of Wilmington), a distance of close to or more than 50 miles using a 10 watt radio into a J-pole antenna at about 30 feet. The repeaters antenna was much higher (150 foot +/-) but two 25 watt stations should have no problems with a 50 mile circuit with antennas 25 feet or more in air.

3.5 mhz and 7 mhz are better choices for the 200 mile circuit. 50 watts into a dipole should work just fine for your 200 mile path. Daily I use 5 watts into a short dipole (66 foot) on 3.9 mhz and can be heard reliably enough to be heard to pass message traffic at distances of 100 miles. Since the antenna is short (normal would be about twice as long) and low, it is 30 foot high in the center and 12 foot high at the ends, I don't know if it would be usable further away. I suspect that if the antenna were up at about 50 feet the reliable path would be zero to 1,000 miles, and that is with 5 watts. %9 watts would not make that big a difference, but might not require quite as many "fills" (repeating phrases or words due to atmospheric interference).

All the above is predicated upon "in the woods and bushes" experience, gained in the mid Atlantic states. VHF does not like rain, signals can be badly attenuated, UHF might be a better choice. UHF does not like chlorophyll. We set up Amateur Television between two stations located about a mile apart (maybe a little further apart). In the fall, with zero leaves on trees, signals were perfect; in the spring with leaves on trees signals were close to none existent.

You didn't mention you ability to build antennas, get a good ground and if the antennas will be in dense forest or in open areas. These factors will be very important. If you have vehicles or tin roofs you should consider using mobile antennas such as hustler whips and 80 and 40 meters should work. Your monetary budget appears to be the biggest constraint.

HI,

I need help with Pin-out for programming this radio and any information
about TOTAL RESET or user manuals.
Radio power-up fine but keyboard and mic is not responding. I think it is
locked by code ???

Tnx.

1835. Effect of small powerline devices

Newsgroup: rec.radio.amateur.misc
Date: 2003-09-07 17:18:10 UTC
From: Markus Baertschi <markus@markus.org>
Message-ID: <MPG.19c586bb2d592e4b9896f9@News.CIS.DFN.DE>
Source record: 63805

The nasty effects of the 'big' powerline data transmissions, like internet access are know. Essentially all HF in the area is disturbed.

But what is about the small powerline devices. The small boxes you plug into your power outlet in you basement an attic to link the two computers there. Example device: http://www.phonex.com/prd_nw14.htm

Anybody has experience with some of those ?

Markus

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 31st/August, through Sunday, 7th/September there were 220 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J3, J6, J8, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PY0F, PY0S, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, VE, VK, VK9C, VK9N, VK9X, VP2E, VP2M, VP2V, VP5, VP8/o, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

7Q, MALAWI. Ely, IN3VZE, will be in Malawi from September 4-21st and is expected to use the callsign 7Q7CE. His operation will take place from Club Makokola near Mangochi on the Lakeshore of Lake Malawi. Most of his activity so far has been on 20/15 meters SSB on various frequencies. Most of his activity has been between 0500-1700z. QSL direct to his home callsign, IN3VZE, with return postage: Ely Camin, Corso 3 Novembre 136/2,

3810 Trento - Italy.

9G, GHANA. Alan, G3XAQ, will be operating CW only as 9G5XA again from Accra, Ghana, September 13-21st. This trip he will be installing a WARC antenna at the Technical College club station, so listen for him primarily on those bands.

A6, UNITED ARAB EMIRATES. The Slovenia Contest Club team will be active as/from A61AJ in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi/Multi entry. QSL via N4QB.

DXCC NEWS. It was announced this past week that the following stations from Bhutan are approved for DXCC credit: A51AA, A51KC, A51PK, A51UD, A51WD and A51YL.

EA8, CANARY ISLAND. Daniel, EA5FV, will be active as EA8ZS during the CQ World Wide DX CW Contest (November 29-30th) as Single-Op/All Band/ High Power entry. QSL via EA5FV.

HC, ECUADOR. Jorge, HC1JQ, will participate CQ/RJ WW DX RTTY Contest as a Single-Op/Single Band (10m)/Low Power entry. QSL via HC1JQ.

HS8, THAILAND. Members of the Chumporn Amateuur Radio Society (HS8AC) will demonstrate Amateur Radio operation during the 160th anniversary of the "Langsuan" traditional long boat race. They will use the callsign HS8AC/P on October 11-12th (They will also be active before and after that time). QSL Manager is E21EIC. Operators are: HS1NGR, HS8LR, HS8FZ, HS8JJ, HS8BA, E20HHK, HS0EHF, HS0XNO and E21EIC. Activity will be on 40/20/15/10 meters (80/160m is possible). Mode will be: CW, SSB, RTTY, PSK-31 and SSTV.

IOTA NEWS.....
AF-014. Operators Braga/CT3HU, Helder/CT3HQ, Xavier/CT3JK and Jose/CT3MD will be active as CS9C from Porto Santo Island. Activity will take place before and during a festival on the island. The team will be active on all bands between September 20-27th. QSL direct or via the bureau to CT3MD.

AS-168. Members of the Korea DX Club (KDXC) and the Seorak DX Club will activate Cho Island from October 2-5th. Their callsign will be DS0DX/2. Activity will be on 80-10 meters with CW, SSB and RTTY. QSL Mmanager is HL1XP.

EU-067. Nicolas, F5TGR, will be active as SV8/F5TGR from some of the Cyclades Islands now through September 27th. Activity will be on 20-10 meters on SSB and CW. His schedule is as follows:
September 6-12th - Paros Island
September 13-19th - Santorini Island
September 20-27th - Naxos Island

EU-120. Glyn, GW0ANA, will make a short trip to Steepholm Island on September 10th, weather permitting. This will be a"Micro-lite" expedition with activity on SSB using a TS-50S into an outbacker

antenna. Also, this is a battery operation, so activity will
be only for 5 hours from 1100-1600z. Watch the IOTA frequencies.
QSL via GW0ANA.

OC-033. Masa, JF1UIO, will be active as FK/JF1UIO from Lifou Island
(Loyalty Islands), September 14-20th. Activity will be on
40-10 meters, not including 30 and 20 meters. QSL via his
home callsign.

OC-228. Operators Peter/VK3QI, Keith/VK3FT, Paul/VK3AJJ and Paul/VK3KXG
are expected to activate the South Australia State East Group,
Baudin Rocks (aka Godfrey Island) the last weekend in September,
commencing Thursday, September 25th, and concluding Monday,
September 29th. This will be a special event commemorating
the 200th Anniversary of the death of Captain Nicolas Baudin,
the French explorer, who died in September 1803, on the island
of Mauritius during his return to Europe from exploration of
the Australian coastline. A special commemorative callsign has
been applied for and will be announced later. Their activity
will be on the usual IOTA frequencies both CW and SSB. There
will be an emphasis on 30/40 meters CW and 20/17/15 meters
SSB. The long path to Europe around 0500-0800z will also be
emphasized. The team is also interested in making contacts
with as many French stations as possible. QSL via VK3QI,
direct (any callbook) or via VK3 QSL Bureau.

IS0, SARDINIA. A member of The Pannon DX Club, Geza, HA4XG, will travel
to Sardinia (EU-024) on a holiday with his XYL. His callsign will be
IS0/HA4XG/p. Geza and his wife will be staying at Cugnana Verde (Nr. OLbia),
September 13-20th and Tortoli, September 20-27th. Since this will be a
vacation, his activity will take place during the early morning and late
evening hours. Geza likes the WARC bands but he will be active on 40-10
meters; this depends on the possibilities on places to erect antenna(s).
He prefers CW but will do some SSB operations. QSLs are OK via HA bureau
or direct.

JW, Svalbard. Operators Just/LA9DL, Erling/LA6VM and Halvard/LA7XK will
be active from Longyearbyen on Svalbard during the "2003 Scandinavian
Activity Contest". They will be arriving in Longyearbyen just before noon
Thursday, September 25th and will depart for home early Monday morning,
September 29th. They will operate during the contest with the callsign
JW5X. QSL is via LA5X, direct or via the LA bureau. Before and after the
contest they will be active with their respective JW callsign (JW9DL,
JW7XK and JW6VM). QSL for these contacts are via their home callsigns.
Look for JW7XK to be mainly on BPSK31 and RTTY, while JW9DL and JW6VM will
work SSB and CW.

MJ, JERSEY. Richrad, M5RIC, will be active as MJ2Z for the CQ World Wide
DX SSB Contest (October 25-26th) as a Single-Op/All Band/High Power entry.
QSL via M5RIC.

NH0, MARIANA ISLANDS. Kuro, JH0MGJ (aka AL5A), will go to Saipan, Northern Mariana Islands and operate as AL5A/NH0 from September 20-22nd. Activity will be on 160-6 meters CW/SSB. If he can, Kuro will try RTTY and SSTV as KG6SA. QSL is OK via JH0MGJ.

OH0, ALAND ISLAND. Jukka, OH6LI, will be active as OH0V in the Scandinavian Activity Contest (September 27-28th) as a Single-Op/Single Band (15m)/ High Power entry. QSL via OH6LI.

OH0, ALAND ISLAND. Tomi, OH6EI, will be active as OH0Z in both CW and SSB Scandinavian Activity Contest (SAC). His planned activity is as follows:
SAC CW - September 20-21st, all bands operated by OH6EI and QSL via OH5DX (ex-OH1EH).
SAC SSB- September 27-28th, all bands operated by OH6EI and QSL via OH5DX (ex-OH1EH).
The Web page for these activitie are at: http://www.qsl.net/oh0z

PJ2, NETHERLANDS ANTILLES. Geoff, W0CG, will be active as PJ2DX from Signal Hill, Curacao (SA-006), between September 8-18th. His activity may be limited because it was reported that this is a working trip. He is expected to participate in the WAE DX SSB Contest (September 13-14th). QSL via N9AG.

PJ2, NETHERLANDS ANTILLES. Operators John/K4BAI, Steve/N8BJQ, Don/K8MFO, Jeff/K8ND, Jim/W8WTS, Geoff/W0CG and Leopold/S50R will be active from Curacao as PJ2T in the CQ World Wide DX CW Contest (November 29-30th) as a Multi-2 entry. QSL via N9AG.

PJ4, NETHERLANDS ANTILLES. Chris/DL5NAM, Uwe/DL9NDS and Klaus/DL7NFK will be active as P4/homecall from Bonaire Island (SA-006), October 16-26th. Activity will be on 80-6 meters CW/SSB/RTTY. QSL via their home callsign. They also plan to be active in the CQ World Wide DX SSB Contest (October 25-26th) with a contest callsign. For more information, visit their Web page at: http://www.dxpeditions.dl9nds.de

QSL INFO AND NEWS.....
Activity by CT1GFK/P, CT1GPQ/P and CT2IHP/P over the past weekend was from Rata Island (Portuguese Islands Award - DIP AL-13). A full color QSL card is available. QSL via their home callsigns, direct or by the bureau. All information and online logs are on the Web page at: http://adxg.sytes.net

Jean Michel/F6AJA and Yves/F6CYV have been QSL Manager for more than 15 years for some stations. The majority of the logs (75 logs, more than 240,000 QSOs) are now on the Web. Look for these logs on the Web page at: http://LesNouvellesDX.free.fr

HV3SJ QSLS. John, K1XN (from the GoList), informs everyone that Steve, I0MWI, told him: "All the logs for this callsign have been destroyed. Any reported operation using this callsign is a PIRATE."

Alan, VK4AAR, informs OPDX that he has taken on the job of managing the QSL cards for 9V1DX (Alan). Please QSL direct ONLY with USDs (or IRCs ... but USDs are much preferred!). Card printing is currently being negotiated. VK4AAR's address is: A. Roocroft, POB 421, Gatton 4343,

Australia.

John, K1XN (from the GoList), informs that Venco, Z36W, does not have a QSL Manager and states that he responds to all QSL requests for: Z36W, Z31JA, Z32JA and 4N5JA. Venco prefers direct with a SAE and 1 USD or 1 IRC, but the Bureau is okay. No E-QSL!!! Here is his correct postal address: Venco Stojcev, Ivo Lola Ribar 92, 2000 Stip, Macedonia.

T5/EI5C STATUS (The Final Word). OPDX was informed that someone in Ireland has contacted the "last remaining member" of the T5/EI5C team and the word is "that they had verbal permission from an un-named officer to operate the station in T5 with the club call. They made QSOs and sent out QSLs but they never had any paperwork. The logs are also gone at this stage." YOU MAY FILE THIS CARD!

TI5, COSTA RICA (Update). Operators Harry/AC8G, Ron/WA8LOW, W8ILC/Ron, Brian/KA7KUZ, Kecko/TI5KD, Tony/VE3RZ, Jorge/CX6VM, Ed/K1EP, Tom/ZP5AZL, Juan/ZP5MAL, Dale/N3BNA and Dave/WT8R will be manning the TI5N Contest station as a Multi-Multi entry in the CQWW SSB Contest, October 25-26th. QSL TI5N via W3HNK. For a day or two before and after the contest, the individual operators will be on then using TI5/own-callsign as time permits. Expect a higher level of CW and other non SSB modes on the contest bands due to the large SSB volume in the contest. Attention will also be directed to 6 meters and the WARC bands using various modes. QSLs for the individual QSOs should go to the callbook address unless advised otherwise. IMPORTANT: Do not mix the contest QSL with ones for the individual contacts.

TM8, FRANCE (Special Event). To celebrate the Clipperton DX Convention in Lille (Northern France) on September 20th, look for special event station TM8CDX to be on the air from September 8-21st. QSL via bureau to F5CQ.

VP9, BERMUDA. Operators Joe/K1JN, William/N1HRA, Foster/N3KCJ and possibly others will be active in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi-2 entry. Callsign and QSL route will be announced later.

W0DXCC 2003 IS GETTING CLOSER! The W0DXCC 2003 convention in Bloomington, Minnesota (near Minneapolis/St. Paul Airport and the Mall of America) is only weeks away! The event is on October 18th. They want you to come to hear top DXers speak, including the latest addition to the W0DXCC 2003 program, 160 meter guru Tom Rauch W8JI! There will be DXCC Card Checking, the W0 bureau, ARRL DXAC, and equipment vendors will be there as part of the fun. For details, visit the following Web page at:
http://www.w0dxcc.com
Or E-mail them at < w0dxcc@w0dxcc.com > or send mail to them at:
W0DXCC 2003, PO Box 390633, Minneapolis, Minnesota 55439-0633.

YI, IRAQ. More stations continue to show up from here. Some of the stations active this week were: YI1AL (Op. Ali), YI/N2OBM (Op. Trent), YI1EM (Op. Esam), YI/KC0LEK (Op. Abel, QSL via QRZ.com), YI/KV4EB (Op. Willie, QSL via K0JN), YI/S57CQ (Op. Dane, QSL via S5 7DX), YI1SPY (Op. Mark) and YI1BGD. Most of their activity seems to take place mainly on 20/15 meters.

ZK1, SOUTH COOK ISLAND. Victor, ZK1CG, from Rarotonga, is once again active as ZK1USA. This past week he was heard on 20/15 meters. Watch 14195-200 and 21305 kHz between 0400-0700z.

ZONE 2. Fred, K2FRD, informs OPDX that "It's early, but I've been encouraged to announce my Zone Two Labrador VO2/K2FRD mini-Dxpedition for summer 2004 (about June 1st to about September 7th, 2004)". Details of his operation can be found on the following Web page at:
http://home.stny.rr.com/k2frd/Labrador2004.htm
This page will be updated as plans solidify and the date nears. Fred states, "Everyone seemed pleased with the results of the 2001 DXpedition, so we're gonna do it again except this time, I hope to have RTTY and PSK-31. Details on the Web page."

ZW0, ST. PETER AND ST. PAUL ROCKS. Joca, PS7JN, continues to be active for one more week (unitl September 14th) as ZW0S (not ZS0S as mentioned in OPDX.624). His activity has been mainly RTTY on 20 meters, but there has also been some RTTY activity on 40/30/17/15/12 meters. Joca has also been on PSK31 and SSTV. QSL via PS7JN.

Did are discuss his Skywire Loop Antenna? I have a link in the Skywires group to an article with him discussing it. He claims it is generating 350 volts on its own. He claims its not due to static electricity. I would tend to favor the idea that it was due to a static charge build up.

here is the link..

I have a good ham friend who has been creating a lot of RFI with a nearby neighbor. The RFI is mainly coming through the neighbor's PC speakers and TV speaker. No one else in the neighborhood is affected. It doesn't matter what band or how much power he runs, 2-40 meters, 5-100 watts, he creates RFI. His own home equipment, including a TV and PC in the shack are not affected. The only odd thing we can think of, is his neighbor's roof is all tin. We don't know if there is a ground on it not, but the question is: Could the tin roof be a contributor to his problem? Would a good ground of the tin roof help?

Thanks...

I don't believe the roof is any part of the issue. This sounds like a simple case of inability of the computer speaker system reject nearby RF signals. The roof may possibly be a contributor to generating harmonics due to poor bonding of each element but you are not describing anything that sounds like harmonic generation.

The issue, in my opinion, is the speakers, speaker amplifiers and/or sound board in the computer cannot reject the presence of nearby RF signals..

In the USA the Ham is not legally responsible for the deficiencies in the computer equipment! He has demonstrated that his station does NOT interfere with his computer. So, the problem has to be in the offending computer!

The owner of the computer has the responsibility of adding the necessary suppression devices to eliminate the RFI. This is generally a series of snap on toroids on the various wires in the computer system. Very severe RFI cases may require input from the manufacturer to solve the problem.

The Ham should not become involved with any add-ons, clamp on ferrites, or modifications to the offending computer because of legal liability issues.

Diplomacy and Tact are the key issues for the Ham.

I'm looking into the best way to set up my station to run on batteries
and on commercial power. Most of the options narrow down to two basic
concepts: uninterruptible and manually switched.

A manually switched system would involve two or more power panels
(West Mountain has some really nice RIGrunners that would be perfect),
one for commercial power and one for each bank of batteries. Battery
banks would be charged independently of the commercial power used for
day-to-day operations. When power fails, unplug the components from
the commercial power panel and plug them into a battery bank panel.
When one bank of batteries is drained, unplug the components and plug
them into another bank so the drained bank can charge. There's a bit
of manual labor involved and there's a little more of an investment in
capital, but it's brain-dead simple and it works.

An uninterruptible system would be more complicated. The ARRL has a
collection of articles in their members-only system on how some hams
have set these up. One series of articles is by a ham who uses
several different types of batteries -- some float, some deep cycle,
some of some other kind -- and who has this intricate wiring network
to support everything. I would be afraid that I'd spend too much time
babysitting something like that, and all that extra time and effort
wouldn't be worth the few minutes saved when transitioning from
commercial power to battery power.

I am interested in real-life comments from those who have used either
system. Bonus points to those who have web pages describing their
systems in detail, explaining the costs and benefits and decisions
behind the design. Right now, I'm leaning towards a manually switched
design due to the simplicity of the system and the incremental nature
in which it can be built, but I'm at a good point to consider
alternatives.

Jack.

IMO the RF is probably coupling from the roof, where it IS gathered with the roof acting as a pretty efficient antenna, but it's then coupled into the house wiring then into the computer and probably into the speaker leads, perhaps independently.
If it was my problem I'd install decoupling ferrite chokes on every line/cable involved with the effected computer system. It's almost certainly travelling on the AC power wiring. I'd make sure that the computer & all peripherals (monitor, printer, etc) power from one source-a single outlet probably to a power strip where a single AC source can easily be choke-decoupled.
And I'd let the computer owner take care of the fix, possibly with advice from hams. Attempting to work on someone else's problem/gear is not a good plan in case all does not go well....

Such problems are the common result of transmitting antennas in too close proximity to susceptable devices. The metal roof undoubtedly enhances this effect by concentrating the RF in close proximity to the house power wiring.

I once had a lot of in-house RFI when I had my antennas mounted close to the hosue. Since I moved all them at least 100 feet behind the house I have *NO* RFI whatever, no matter what power I run.

Odd, but try having the neighbor operate his computer inside the ham's house while transmitting. Does the neighbor's computer still act improperly? If so, that eliminates the roof question.

Also, try a couple of the ham's electronic gadgets in the neighbor's house. Do the gadgets still work OK? If so, another reason to absolve the roof.

I have forwarded these suggestions to my friend ,who lives in Florida,
I'm in Ohio. He isn't a newsgroup user, so I presented the question
for him to these 2 groups. Thanks for the very good ideas. I've had
RFI before, but never with someone who has had a metal roof and
frankly don't have any idea if it's contributing to his problem or
not. If we figure it out, I'll post it. Thanks again.

I have an Icom IC 4AT. Anyone know anything about it's operation or specifications? A manual or users guide would be especially usful; I don't have one.

Thanks

1858. Sale: Icom IC-R7100, Optoelectronics Optolinx & Antenna icr7100 r7100 7100

It's the same as the 2AT and the 3AT but for 440 mhz operation. It's a thumb wheel frequency control with about 2.5 watt high power and a 1 watt low power with either a + or - 500mhz split operation.. very durable operational little radio.

If you are ever interested in getting rid of it let me know

Its amazing how fast NOAA drops its coverage of a hurricane once its no longer a threat to the US.

They stopped tracking Fabian today, and as of Noon EST, it was still a full Hurricane, south of Greenland.

I would think they would track it until it was back to below tropical depression status..

1864. carrier pulsing 913 mhz

Newsgroup: rec.radio.amateur.misc
Date: 2003-09-09 18:14:48 UTC
From: harryhydro@hotmail.com
Message-ID: <10e8ec27.0309091014.3f4d497@posting.google.com>
Source record: 63834

Hi Folks:
I've been following this carrier around, that I suspected might have been interfering with my cordless phone. It pulses around 913mHz, 100ms pulses or so, 3/sec or so. Occasionally, a longer pulse of 500mS or so. I jumped in the truck with a spectrum analyzer on SSB, and everywhere I drove, I heard it. Almost constant signal strength. I stopped and ended up putting a beam on the analyzer and with the spectrum analyzer in the truck running on an inverter, it seemed to be coming from inside the truck, but the signal was now varying.. It had a characteristic chirp, as if it was not phase-locked. I then plugged the analyzer in an outlet in a building. Funny the signal was still there. I disconnected a battery cable in the truck. Still there! When I approached the door of the building, the signal was quite strong..
Where was it coming from?
Ready?

My Motorola numeric pager!
RX freq., 931.8125mHz, carrier on 913.913mHz.
IF 17.8995mHz.

It can be heard about 50 feet from the spectrum analyzer!

Cool huh!!

Take Care!
Harry

1865. 48.74 mHz carrier

Newsgroup: rec.radio.amateur.misc
Date: 2003-09-09 18:32:25 UTC
From: harryhydro@hotmail.com
Message-ID: <10e8ec27.0309091032.2f1ec588@posting.google.com>
Source record: 63835

Hi Folks!
We have a licensed freq of 48.74 and every spring and fall, our
FM radio picks up a weak signal in the morning. It goes on for hours.
The last time I heard it, I heard a phone ringing through it. Not
like a microphone sound of a phone ringing, but more like what a
ringing phone sounds like in the handset when you make a phone call..
There is no PL on this signal, so I turned 'channel guard' on. It's
now gone, but I still wonder where it's coming from. It must be
strong, because three different radios, spanning over 100 miles apart,
hear the same thing.. I jumped on Javaradio, but I couldn't hear it
anyplace else.. If anyone wishes to reply with a signal report of
this signal at a location, I'd appreciate it..
Thanks!
Harry KB2MEN

Could it be VHF lo-band "skip" on a baby monitor?
Check to see if ten meters is open when you hear
it. If it is, it's likely something skipping in on lo-band.
Quite alot of fun back in the late 70's and early 80's.
I was hearing fire dispaches from New Mexico and
taxi companies in Jamaica from my home in Maryland
with an Grove outdoor omni antanna hooked up to my
scanner.

Firefighters in the next county also used to operate
on VHF Lo-Band for both dispach and fireground.
When the band was "open" they would often exchange
"radio checks" in the mid-morning once a week with 2
fire companies sharing the same frequency in the UP of Mich.
and another in Kansas! They even exchanged their
version of a QSL card in the form of uniform patches.

Yes, the good ole days of 1st generation VHF Lo-Band
radio was always alot of fun when the band was open!

Yeah...like active duty military personnel.....the men and women
defending our country.

> OR,the confusing ballots...

Only for the illiterati......

>or votes not being counted.

As in all the dead folks who "voted"?

>or people being turned away from the polls

Didn't happen.....except for the military....

Give it up already. The votes are in, Gore lost. He tried to backstab the
very veterans he claims to be one of.
Thank God that Al Gore wasn't President when 9-11 happened. He would have
surrendered.

Yeah, and Bubya and Rumsfeld DID backstab veterans... now what? And they're in the process of backstabbing the good men and women in Afghanistan and Iraq right now... they keep changing the rules in the middle of the game.. wazzupwidat?

Why do they all rely upon the kernels AX.25 ?
Kiss mode is limited to packet radio (at least with
the TNC's that I've got) and why would I want to run
packet radio on hf ? Pactor is better for hf and that
means I can't use any of all those "terminals" that
really rely upon the kernels ax.25 to do all the work.
Why pay lots of money for a competent controller and
then make it really stupid by using kiss ?

A lot of the Linux stuff is like that. When you wander away from the mainstream, this is to be expected. Part of the problem is that most software for Linux is open source, written by junior programmer wannabees, then re-hacked by other "programmers" who are no better.

... So the third-weenie OS is loaded up with third-weenie software.... Is that a big surprise?

If you really wanted performance, you'd be going with #1.

I really could not agree less.
There are loads of good projects around for linux, written by really
good programmers. The "Visual Basic" miseries plague that other OS,
not linux.
The ax.25 kernel module is not a problem with that other OS for the
simple reason that such a module is not even remotely possible.

If i really wanted instability, viruses, constant upgrades, need for
expensive third-party antivirus, expensive office software and all
those other problems related to the QDOS-Windows OS then I'd switch
to it.

Hi: Thanks for the reply!
It might be some kind of cordless phone, just that the carrier is
always there.. I suppose some older units might work that way.. The
frequency isn't right for cordless in this Country (States) but might
be typical for some other Country.. Would be a great DX QRP sig
report! 100mW or so..
The antenna on this radio is a ground plane verticle on a 300
foot tower that's on a 540 foot mountain in Jersey! It has
outstanding coverage!
Thanks!
Harry

1878. BPL - A NEW SLANT

Newsgroup: rec.radio.amateur.misc

I got a copy of WORLDRADIO, October 2003 - Year 33 - Issue 4, in the mail today and was reading WORLDRADIO Newsfront, and from the column quoted supplied by --ARNewsline,
"The problems is that powerlines are not shielded. They will act as much like giant antennas as they will a closed carrier for the broadband connection."

OK! We all know that they are going to supply garbage and a tremendous amount of noise on our precious HAM BANDS.

OK! My question is -- now that we are going to have all of this radiation going on -- and if it is going to bother us, what is going to STOP those that want to steal our IDENTITIES (as is being done on the internet), from this new service??

I have not seen this question raised before.

73's,

Howard W3CQH

Heh... open-source does not automatically equate to good. Or it
shouldn't, anyway. As in just about anything, 90 percent is crap.
There's some good open source stuff out there, but I've not found much
for amateur radio.

On the plus side, what is avaiable makes minimalists such as
myself happy. I'd rather have 10 programs that do one thing well
rather than one program that does 10 things. I seem to be in the
minority in this respect.

That's true, however, there seemed to be an implied message that all
open-source was junk, at least compared to the excellent-quality (snigger)
stuff from Redmond...

1883. ID Wizard - QSLware - New Version

Newsgroup: rec.radio.amateur.misc
Date: 2003-09-11 21:39:41 UTC
From: J Tabor <denews@taborsoft.com>
Message-ID: <vm1qsu5gu6c231@corp.supernews.com>
Source record: 63753

Greetings,

At first glance ID Wizard is deceptively simple - yet under the surface are several useful tools Hopefully you will find ID Wizard worth your time. <G>

ID Wizard is an ID timer with system clock setting and miscellaneous tools. Very handy for any shack machine and also others.

ID Wizard tools include:
Notes - a full-featured text editor
Calculator - with tape display
Conversion Utility - Area, Distance, Mass, Power, Temperature, Time and Volume
Net Utility - Trace Route, Ping and WhoIs
Time setting via the net with Simple Network Time Protocol

Download from:
http://www.taborsoft.com/softstuff/idwiz/

Home of: WinCAP Wizard 3, GeoAlert Wizard, Active Beacon Wizard++, Beacon Wizard, KCal+, NERDAlert, ID Wizard, Alert Wizard, Beacon-Time Wizard, Beacon-Prediction Wizard and more.

It has been our experience over the years that "free" or inexpensive software is held in low regard. This is extremely puzzling, since many feel all software should be free. Personally, I enjoy providing a few "free" apps. Unfortunately I've yet to win the lotto, so the software must support itself - but that's all a different story and you should not be burdened with such.

However ID Wizard isn't free. The requested fee is an email with "any kind" of comment or suggestion.

All comments welcome. We would appreciate any thoughts on these subjects. Thanks for your time and kind consideration. You are also welcome to get my email address from the web site, or qrz.com. We receive many, many, junk email to the address used to post the occasional Usenet message; therefore they are sent to the bit pit on the server and never seen.

For what it's worth, I've looked at most of the software this guy has,
and it's all good stuff. Well actually, it ranges from "good" to "great".

Check it out!

Howard,

Nothing would stop such an event. However, the complexity of a receiver and demodulator is likely more difficult than the same crooks buying (or stealing) a cable TV connection and performing the same type of theft.

My motto: if you want to keep a secret, NEVER EVER EVER PUT IT ON ANY COMPUTER!

The little fruit finally will lose his license. Serves him right.

August 25, 2003

RE: Set Aside of Renewal of Amateur Radio General Class license KB1EVE
Dear Mr. Tolassi:

The Wireless Telecommunications Bureau has notified the Enforcement Bureau that, on on its own motion on August 22, 2003, it set aside your license renewal pursuant to Section 1.113 of the Commission's rules, 47 C.F.R. Section 1.113. That action is based upon enforcement issues relating to the operation of your station and questions regarding your qualifications to be a licensee. Your application reverts to a pending status.

The Commission will need additional information from you in order to determine your qualifications to be remain a Commission license, and it may be necessary to designate your application for an evidentiary hearing before an Administrative Law Judge. You will be contacted by the Enforcement Bureau shortly.

hello everybody,

It's a pleasure to announce to the community this new Hamradio
web portal available at the address : http://www.radioamateur.eu.org

This site tend to provide for free to the community some services
like: News, Forums, Web links about our hobby but also some extra
topics like: Linux support, gsm forums, computer etc...

This site still under development and is not perfect,
it's the reason because i need your help to improve
the quality and content of my site.

Please don't hesitate to post informations good to share with
the hamradio community.

Register Now , it's free !

Many thanks pre advance

.....

Yes indeedie. What goes around comes around. How many times have we heard
Twinkle Toes talk about messages that Riley left on his answering machine
and David refused to answer? I once heard Davie say that he couldn't tell
for sure if that was Riley calling him and he said, "What's a guy supposed
to do?"
I guess he found out, didn't he?

VIRIN

Er, okay. Just what is a VIRIN? One of those Moundsville "girls" you used
to
date?

- - - - - - -
Wogie, as you know, operates with his own dictionary. One must make
allowances and consider the source.
Here are some prime examples of words Roger has misspelled...
(wonder if he has ever heard of a spell checker?)

�VIRIN��What Wogie was before he met the Lavender Lads.

�Minisule��he mussa meant miniscule. Like his IQ.

�Champoin��Whassup, Wiseman? No dictionaries in the mental ward?

"Anoinymous"...a cross between anonymous and annoying?

�Acident� Roger�s mom got preggers by accident.

�Alreaedy� Alright, already!

�Amouints� Roger amounts to nothing.

�Aposterphe� This guy is a hoot, ain�t he?

"Basios"...word Woger uses when he gets neeeerrrrvous.
"Behing"...a cross between being and behind?

�Coiward� As in peeking from behind his mommy�s curtains.
"Feamle"...I think he meant female.
"Losser"...only loser Roger can do it better.
"Ignroant"...typical, considering the source.
"Sluprs"...only Rogie knows what this means.
"Travelled"...a Rogerism, replete with ignorance.
"Postss"...pssst...Roger..that should be Posts.
"Defgenerate"...well, it's Roger's word...

"Faity"...he meant to say Fairy, but you know Roger.

�Ghet� Get a load of Curtain Boy!
"Distribiution"...Roger likes using phonics.
"Biotch"...he meant Bitch, but his phonics took over again.
"Methjadone"...a West Virginia substitute for Heroin.
"Sumbliminal"...one of Roger's favorites.
"Recepticle"...either of Roger's moist cavaties.
"Cociane"...a West Virginia drug of choice?
"Tiome"...Roger meant to say Time...but his fingers were numb.
"Beraking"...no definition. Could mean 'beraking' the leaves,
"Amny"...he meant 'any',
"Nlay"...a town in Maylaysia? Vermont?
"Al;ong"...only Wussman knows what this means.
"Becasu"...well, becasu Roger is not the brightest bulb on the tree.
"Seperation". Why? Because Roger cannot "seperate" from his mommie!
�Sisnce� He meant Since, but his pudgy little fingers slipped off the keys.
"gnetically" What?
"provce" (prove?)
"Piuzza" (West Virginia Pizza)
"Schol" (school?)
"strill" (still?)
�shoitgun� 12 ga or 20 ga?
"Snoip" (How they spell �snip� in Glen Dale)
"Maturbater". Wiseman does it all the time, he just can�t spell it.(leaves a sticky residue on his right hand)
"Coskscuking". It�s a Roger thing, as in Lavender Lads.
"Waddleing". Only in Glen Dale, eh?
"Spaeaking". Curtain Boy did this after his second retest.

� Stgop� Roger�s version of Stop.

�Fahter's� He meant Father�s Day.

�fserting�..would that be festering?

�poists�. Roger meant �posts�.

�snadwich� As in peanut butter and jelly?

�regualr� Glen Dale rendition of �regular�.

�aftrer� After? Aftrer what?

�soory�. Sorry Roger fucks up again.

�didnb't� He didn�t?

�whoile�. He ate the whoile thing?

�Woamn� He�s hooked on West Virginia phonics, all right.

�prrof� And he kin prove it, too.

�beforfe� Was that before he lurned to spell?

�yoiuy� Roger�s version of �y�all�.

�illarate� Only illiterate Roger can spell like this.

�haeart� Aw, how heartless of me to laugh!

�valule� Roger has no values. No wonder he can�t spell it.

�proch� Doesn�t everyone have one on their house?

�inmstitution� Where Roger�s mom put him in June 1999.

�timne� It�s Howdy Doody time?

�whgo� What? Who dat?

�gnetically� Only Roger knows what this one means�

�crfy� Like, cry, Roger, cry.

�stutrtering� Some stutter, Wiseman stutrters.

�Whjere� Where is Curtain Boy?

�Webiste� That�s Website to the rest of us.

�Youire� Your? You�re? Who knows.

�fiored� As in fired?

�Parety� Roger gave a party once. Nobody came.

�Bouynce� Bounce?

�Varification� Verifiable mental case.

�Probelms� Poor Rogie�has many problems of the mental sort.

�Partricipate� Oh, DUH!!!!

�Cryed� Gee, Wogie..cry me a river�you dolt!

�Stoick� What a dork. His old 386 has no spell check program.

�Partiall� More WV Phonics, I see.

�Obsucred� Either obscured or Rogie has �sucre� on his mind.

�Infinate� Stupid. Think finite, Rogie.

�Sustinance� As in Sustenance?

�Juvinile�. This is the way Roger likes his boys.

�Piut� Put it where, Rogie?

�Toyus�. �Toyus R Us?

�Diminuative�. Roger�s height.

�Percriptions� Say what?

�Credibiliy� More Glen Dale intellect.

�Thsoe� Yet another Glen Dale gaffe.

If I understand clearly you are interested in locating an RF source which
has nothing to do with GPS by using RF receivers and nondirectional antennae.
Trilateration is only of value if one can establish accurate timing distances,
synchronized between all receivers.

If you used directional RF antennae, then, in conjunction with receiver positions
determined by GPS receivers, you could simply triangulate to estimate the RF
source position.

Isn't there some algorithm which, the more data points it

Assuming your concept was valid, i.e. signal strength was a function of distance by some formula (inverse square), the approach to follow is called least squares. Look around for additional info with that terminology.

A system for integrating GPS with direction finding has been out for a
few years now. Utilizing Doppler Direction finding equipment, the
heading of the Doppler array, along with the Lat Long of the monitoring
station is sent in a packet burst and superimposed on a map. When you
have 2-3 of these stations submitting this data in real time, you get a
practically instantaneous triangulation on the location of the transmitter.

The Agrelo Doppler units that were available several years ago, had this
capability.

Since I'm not familiar with the term "trilateration", I'm guessing that you mean "triangulation"?

But without a bearing to the transmitter from your location, how can you do triangulation? That's why simple DF techniques use directional antennas.

If you knew the output power of the transmitter, knew the radiation pattern of the transmitter's antenna and knew the signal propagation characteristics at the instant you took your signal strength reading, you might be able to make a guess as to your current distance from the transmitter, and draw a circle of that radius around your location.

Repeat this for enough points, look at all the places that all the circles interesect and you might find your transmitter.

Other than being able to mark your location on a map and then navigating to the possible transmitter location(s), I don't see a GPS receiver being much direct use in this application.

Many people (including myself) use the word "triangulation" very loosely here because it's a word most people can understand, but purists would not call what GPS does "triangulation" because no angles are involved. But just so we don't confuse new folks learning GPS, it's really "trilateration" or "resection".

Ref: http://www.trimble.com/gps/triangulation.html
http://www.Colorado.EDU/geography/gcraft/notes/gps/gps_f.html

Trilateration
The measurement of distances... to fixed positions to determine an originating location. The process is normally to control points on the surface of the earth. In GPS trilateration, the fixed positions are instead satellites orbiting the earth with distance determined by the GPS signal travel time to a location on the surface of the earth. A four satellite trilateration provides an accurate earth position.

Triangulation
The measurement of angels... to determining the location of an unknown point, as in GPS navigation, by using the laws of plane trigonometry.

Your scheme is doomed to failure.

Although signal strength is proportional to disrtance it
is also affected to too many other things as well.

For your scheme to work both transmit and receive
antennas must be truly omni-directional with no
lumps in the polar diagram (not easy espicially
mobile). The terain must not cause any disturbance
to the signal (impossible). There should be no
reflections. The transmit power or receive gain
must not change. I am sure there are a few more
that I have not thought of off the top of my head.

Having said that such a scheme could give a very
approximate location if the data was analysed and
anomolous readings ignored.

Regards
Jeff

I participate in a lot of transmitter hunts. I hadn't thought of it but you are on to something. I wouldn't recommend finding a transmitter using the method he wants to do it in, that would take too much time. He would also need an attenuator to prevent full scale readings.

If he wants to hunt with an omni, all he needs really is a step attenuator and a receiver with an S-meter. Leave the GPS at home.

A faster method is with a directional or null antenna, attenuator, map, protractor, and possibly compass so he can put the headings on the map more accurately.

I was thinking of using GPS too, but here is how I would do it. I have a 4 antenna doppler array that gives real time headings. The array is mounted on my vehicle. The doppler unit sends four bit BCD to a 16 LED heading indicator.

I would pull the BCD readings and send them to a notebook computer with a mapping program installed and the GPS connected. The program code would take the heading from the doppler unit, the receiving position from the GPS, and superimpose it on the map. The code would also have an "averaging algorithem" to throw out bad heading do to reflections and such.

I would only do something like this to show how nifty you could find a transmitter. Will I do this? Probably not, I already do it in my head.

1909. Call letter

Newsgroup: rec.radio.amateur.misc
Date: 2003-09-13 16:37:46 UTC
From: Burt <burt@rocketmail.com>
Message-ID: <uJH8b.437303$uu5.77854@sccrnsc04>
Source record: 63779

Two Baseball fans and a ham were on their way to a game when one
noticed a foot sticking out of the bushes by the side of the road.
They stopped and discovered a nude female, drunk and passed out.
Out of respect and propriety, the Indians fan took off his cap and
placed it over her right breast. The Padres fan took off his cap and
placed it over her left breast. Following their lead, the ham radio
operator took off his call letter cap and placed it over her crotch.
The police were called and when the officer arrived, he conducted
his inspection. First, he lifted up the Indians cap,replaced it, and
wrote down some notes. Next, he lifted the Padres cap,replaced it,
and wrote down some more notes. The officer then lifted the call letter
cap,
replaced it, then lifted it again, replaced it, lifted it a third time,
and replaced it one last time.
The ham was getting upset and finally asked,"What are you,
a pervert or something?" "Why do you keep lifting and looking, lifting
and looking?" "Well," said the officer, "I am simply surprised;
normally when I look under a call letter hat, I find an asshole."

While it may be doomed to failure the value of the theory is sound and it is one of the techniques that can be used to determine user location of a cell phone except that the cell phone solution also have the time similar to GPS so they can use time instead of field strength.

It is an interesting idea theoretically. You could plot circles on a map from the relative signal strength value and centered on the GPS location, then increase the circle sizes proportionally until they intersect and this will provide a rough idea of the location. With more locations it would be better and better, throwing out some of the circles that don't fit. It will probably work if you live in one of the plains states and have a very sensitive RF meter and lots of driving time.

What is the reason for the constraint? I have used loops at frequencies
from a couple hundred Hertz up to 30MHz and I know they work even
higher. Why not use a loop?

There are a lot of factors besides distance affecting signal strength.
You would have to use an approximation to the inverse square law and
look at the area described by drawing circles from each reading. The
area common to all the circles would be your guess. You would then want
to get closer and repeat.

You could still make a directional bias with a reflector of some sort.

Turn the whole radio/built-in antenna into a directional antenna by mounting it 1/4 wavelength infront of a metal surface.

The metal surface can be tin foil over a piece of cardboard.

Rotate the radio and metal surface to find the direction of the signal.

Calibrate it with a known transmitter location first before you go hunting for an unknown transmitter.

One problem is that when you get close to the transmitter the signal
strength meter hits the maximum and ceases to provide useful information. A
method for attenuating the signal is useful for this problem.

I like the intersecting circle idea. Remember to use the inverse square law
for the circle sizes. The power level of the signal will decrease by the
square of the distance from the transmitter. Its not linear.

A similar concept to the intersecting circles theory is that if you collect
a set of data along a straight line (by driving down a straight road) then
the transmitter is most likely on a perpendicular line crossing the road at
the point where you received the maximum signal. You can work around the
"maxing out the signal strength meter" problem by noting the two points on
the line where the signal shows maximum and then draw the perpendicular line
half way in-between.
This idea assumes the transmitter has an omni directional antenna as well.

Sounds like a microwave oven. :-) Wavelength is only about 125mm. You could place the whole radio at the focus of a discarded parabolic dish. You could even make a cylindrical paprabola out of cardboard and aluminum foil.

It is really sad what is happening to ham radio and what some of the
people are doing to destroy it. I stumbled across this link tonight to
a club site. These people have problems.
From what I can gather, one of the club officers went off the deep
end.
http://www.qsl.net/tarc/
ANd just in case they take it down
http://www.auto-electrical.com/tarc.html
I put it up on my server.
I am really sad that people have to act this way.
Claude

They don't.

If you have a PTC data controller then take a look at kptc.
It's a KDE (X-windows) client to drive a PTC in just the way that you want.

You can find it at: http://kptc.sourceforge.net/

I found it by looking at: http://radio.linux.org.au/

Thank you for for the info !
Unfortunately I haven't got a PTC, I've got a PK-232MBX/DSP and an
MFJ-1278. There are no terminals for these, none that I know of
anyway, so I'm building one in kylix. Unfortunately async pro clx
that I'm using seems to have unresolved issues, it tries to free
unallocated memory upon termination and crashes. I'm looking into
building it in python instead but I'll have to learn python first.

But in this case, you only need to find places where there is enough signal
strength for access, not find the exact point of the access transmitter.

If you can get access at XXX corner, it doesn't matter if the access
transmitter is right next to you, or down the block.

Scott, i recommend you write software to collect the lat/lon of only the maximum signal strength readings. then average all the latitudes (add all the latitudes up and then divide by the number of samples). This should result in an "average latitude" line on a map. then do the same for all the longitudes. This "average" result should give you the location of the transmitter if you take enough samples.

If you want to get clever then take lat/lon samples of many signal strength readings but keep them separate. Only perform the averaging process described above on lat/lons that had the same signal strength reading. All of these "averages" should cluster around the transmitter location in lat/lon. There is no need to convert lat/lon to anything else. keep it simple. If you want to get even better results then the last step would be to average the results of all the averages of all the signal strength readings to pick one single most likely spot for the transmitter.

If the signals can be identified by a node name or an IP address then by all means keep the samples sorted by access point id as you perform the

averages. if every access point is using the same default id then the job will be a little harder.

This almost sounds like more fun than Geocaching

If you want to try this with the internal antenna, you should be aware
that it is probably *far* from omnidirectional. Even if the antenna
design itself is something that would have an omnidirectional pattern in
the middle of an open field, the proximity of other metal within the
laptop itself will mean that the pattern "in situ" is far from
omnidirectional. You can see this to some extent by just rotating the
laptop while sitting in one place and watching the RSSI change.

Then when you put that laptop inside a car, the car will further modify
the reception pattern.

The Dxpedition is scheduled to occur during the upcoming Austral summer 2004. Their 15 person team is scheduled to depart from Ushuaia, Argentina, on January 3rd, 2004, and arrive at Peter I Island on approximately January 9th (+/- weather). They will build the camp infrastructure and install all antennas before going QRV. This will be a high power DXpedition with an international team of experienced operators and multiple stations on all HF bands covering SSB, CW, and RTTY modes. The team hopes for a 3-week stay on Peter I. Weather, of course, may dictate otherwise. Additional details including QSL information, website and the team roster will be forthcoming. Several operator positions are available. Also, there are opportunities for ham or non-ham travelers to visit Peter I, the Antarctic continent, and the South Shetland Islands, returning around January 19th to Ushuaia, Argentina. For more information, contact Bob, K4UEE at: k4uee@arrl.net

4M, VENEZUELA (Special Event) (*). Alexis, YV5SSB, coordinator of a special DXpedition to San Fernardo de Apure (ITU 12, CQ 09, FJ67) to take place October 7-12th, states to look for 4M9YY to be active to celebrate being on the air for 13 years. Activity will be on all bands and modes, including the satellites. Check out their Web page at: http://www.4m9yy.com.ve

4S7, SRI LANKA. Look for the following operators (with callsigns) to be active until September 18th on 160-6 meters including the WARC bands on all modes. QSL via their home callsign by the bureau or direct via the address on QRZ.com. Operators expected to be active from AS-003 are:

5R8, MADAGASCAR (*). Phil Whitchurch, G3SWH, and his wife were expected to arrive in Madagascar on September 13th. They will be travelling extensively on the mainland (IOTA AF-013) until the 22nd, where they will then fly to Ile Sainte Marie (IOTA AF-090) and relax for a few days until the 27th. Phil hopes to activate his 5R8HA callsign from the mainland whenever he can and will use 5R8HA/P from AF-090, where he should be more

active. Activity will be CW only on all bands 40-10 meters. Please remember that this will be a "holiday" type operation, not a DXpedition. QSL via G3SWH.

9L1, SIERRA LEONE (*). Jerry, K4ZIN, informs OPDX that he expects to reactivate his 9L1JT callsign during his next trip to Freetown, Sierra Leone, September 15-23rd. Activity will be primarily CW, 40-10 meters. QSL via K4ZIN (Address via QRZ.com).

BQ9P, PRATAS ISLAND (Update). Yuki, JI6KVR, updates us that the operator list so far is: BV4FH, BV3BW, BV3FG, JI6KVR, DL3DXX, DK7YY, ZL4PO, OE1WHC and N2OO. UA3VCS can not make it.

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, announced that the following operations from Iraq are approved for DXCC credit: YI3DX, YI/9Y4RD, YI/4L4FN, YI/SM4UZM, YI/SM3VRO, YI/SM0URK, YI/SM5WTI and YI/SM5VOH.

DXPEDITION VIDEO (*). Glyn, GW0ANA, informs OPDX that the K8T/K8O American Samoa video is now available. This full 50 minute double video tells the story of their last DXpedition to American Samoa in which they operated from Ofu and Tutullia Islands. This interesting video not only shows hams operating but also gives you a glimpse of the beauty of these islands and its people. The video is available for 20 USD in a bank note or EU20 in a bank note or BPS £15 cheque (payable to Mr G.O.Jones). Mailing address is: Mr G.O. Jones, "Nirvana", Castle Precinct, Llandough, Cowbridge, Wales, CF71 7LX. Any surplus funds will be used in their next DXpedition. Their web page is at: http://www.ukdxers.co.uk

EA8, CANARY ISLANDS. Frank, DH5JG, will be operating as EA8/DH5JG from the Island of La Palma (IOTA AF-004, DIE-013), Canary Islands, October 2-14th. Activity will be on 80-10 meters (including WARC) especially on CW with some SSB. QSL via bureau to home call.

HB0, LIECHTENSTEIN (*). Pierre, HB9QQ, will once again be here as HB0/HB9QQ starting October 12th for a few days, if weather and snow permit. His activity will be mainly on 160 meters. His QTH is at an elevation 2200m. He will be using a dipole at a height of 23m and with 500W. QSL via HB9QQ. George, W5VU, reports, "I worked him very easily on 160m on August 10, 2003, when he was only running 100W."

IOTA NEWS.....
AF-018. Dario, IK4MED, will be active from Pantelleria Island as IH9/IK4MED now through September 26th. Activity will be mainly on CW on HF, 80-10 meters and both CW/SSB. Also, satellite AO-40. QSL via his home callsign through the bureau or direct.

AS-117. Makoto, JN4RDX, will be active from Yashiro Island, now through September 25th. He will use the callsign JN4RDX/4. Activity will be on 20/30/40 meters SSB and CW. QSL via the bureau to his home call or direct.

EU-006. (*) Christian, DL6KAC, will be on holiday on Mallorca Island (DIE: E-021) from now until October 7th. Activity will be on 40-10 meters (maybe 80m), mainly on SSB, but a CW Key is available. QSL via the DARC Bureau or direct (QRZ.com).

EU-011. Members of TADARC (Taunton & District Amateur Radio Club) will be activating St. Mary's Island, Isles of Scilly, with the special event callsign GB0SM. Activity will be from September 20-27th, on 160-10 meters, CW and SSB. QSL via the Bureau or direct to G0PSE: Tom Taylor, 19 Derwent Grove, Taunton, Somerset TA1 2NJ, England.

EU-047. Juergen, DJ7JB, will be active as homecall/p from Borkum Island, October 5-10th. Activity will be on SSB on 160-10 meters. He will check the IOTA frequencies also.

EU-050. (*) Look for Paolo to be active as IL7/IZ8FDH (a member of Vesuvio DX team) from San Domino Island (IIA FG-001) between now and September 18th. Activity will be on HF and 6 meters bands. QSL via the bureau or to: Paolo Capobianco, V. Enrico Cocchia 26, 80124 Napoli. For log info visit the Web page at: http://www.gruppomediterraneo.net/info_next.htm

EU-136. Look for Ron, 9A5JR/p, and Vlado, 9A2V/p, to activate the Island of Ilovik (CI-029) on September 19-20th and the islet/LH of Grujica (CI-026) on September 20-21st. The lighthouse of Grujica is on the Admiralty list of lights (by The UK Hydrographic Office) under LH-number E3044.

EU-174. Michael, DF3IS, plans to be active from Thassos Island located in the Aegean Sea, in the north part of Greece, now through September 25th. Activity will be on 40-10 meters, SSB and CW. QSL via his home callsign (no e-QSL's).

NA-029/
NA-128. Yoshiro, N1VF, will be active as VE2/N1VF from Orleans Island, September 17-19th, and as VY2/N1VF from Prince Edward Island, September 20-23rd. Activity will be on 40-6 meters CW/SSB. QSL via the bureau to his home callsign or direct to:
Yoshiro Nishimura, Takemidai 4-2-6, Suita City, Osaka 565-0863 JAPAN.

IS0, SARDINIA. Operators Lars/DF1LON, Marion/DF4UM, Peter/DH4JQ, Christoph/DK2CRN, Georg/DL1ECG, Karlfried/DL1EK, Stefan/DL1ELY, Gerd/DL3EW, Stefan/DL7AOS and Lars/DL9LR (They are looking for two more operators) will set up a Multi/Multi-station for the CQWW DX SSB Contest on the Island of Sardinia. They will have 3 running stations and an additional multiplier station; all FT-1000 Mark V Field. Their antennas will be monobanders for 10/15/20 meters; a 4 element multiband for multipliers; 2 dipoles each on 160/80/40 meters; a 4-square for 40 meters and beverages. The callsign is not known at the moment and will be announced later together with the QSL route.

KH6, HAWAII. Bill, W8QZA, will be operating the CQWW DX SSB Contest from KH6SQ's QTH on Maui. His callsign will be KH6/W8QZA. He will operate in the contest as a 20 meter Single Band entry and will be QRP. There will be some acivity before and after the contest on HF. QSL via his home call.

KH6, HAWAII (*). Bob, KE0UI, will be active as KH6/KE0UI in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/All Band/Low Power entry. He may also be active a day before and after the contest from Kauai. QSL via KE0UI.

KH6, HAWAII (*). Shunichiro, JH7IMX, will be on holiday in Honolulu between September 25-30th and active as K7WD/KH6. He will also be active in the CQ/RJ Worldwide DX RTTY Contest (September 27-28th). QSL via JH7IMX.

KH7K, KURE ATOLL DXPEDITION (Postponed) (*). Kimo Chun, KH7U, informs the following: "Gentlemen: Please be advised that this DXpedition has been postponed until sometime next year.
Due to uncertainties related to transportation access to Midway, our stepping stone to get to Kure, it has been decided to wait until things are settled. It is possible that a necessary part of our travel route may become inaccessible only a couple of weeks before our trip is to start. This is totally beyond our control. This will stop the trip dead in its tracks should it occur. I cannot ask the team members to arrange for the time off work only to find out at the last minute they can't go.
The team is anxious to go. We will continue to raise funds towards this trip which will cost more than was spent to go to Kingman Reef, KH5K, for our successful K5K effort. Please help in any way you can.
I will work to identify the next opportune time and reschedule the trip. Our team is welcome to go by the island manager. It will remain to coordinate transportation and compatibility with the bird nesting season requirements on this "No Landing Allowed" deserted island.
My apologies to all for the delay. I realize that this doesn't help in our effort to give Europe and others who need it all the QSO's they need. We will do all we can to fulfill that goal....."
Aloha, 73 Kimo Chun, KH7U

KH0, MARIANA ISLANDS. Yuki, JA1OGX, will be active as KH0S from Saipan, Northern Mariana Islands, now through September 17th. Activity will be CW/SSB on 40/20/17/15/10 meters. QSL direct to his home address below or the JARL bureau. His direct address is: Yuki Tanabe, 1-28-32, Kamitakaido, Suginami, Tokyo 168-0074, JAPAN.

KP2, U.S. VIRGIN ISLANDS. Jim, N6TJ, will be active as KP2A in the CQWW SSB Contest as a Single-Op/Single Band (20m) entry. QSL via W3HNK.

MU, GUERNSEY. Hein, DL2OBF, will be active as MU/DL2OBF in the CQ WW CW Contest from the clubhouse of the Guernsey Amateur Radio Society (GARS), St. Peter Port, Guernsey, as a Single-Op/All Bands/Low Power entry. QSL via his home callsign; bureau is 100% ok. Hein states, "I have to thank the members of the Guernsey Amateur Radio Society, especially Phil, GU0SUP, for once again giving me the opportunity to visit beautiful Guernsey and operate from the fine GARS clubstation. Please do not expect me to be very active in the days before and after the contest."

NCDXF PRESS RELEASE [NCDXF ELECTION] (*). At its Board of Directors meeting on August 26, 2003, in Berkeley, CA, the Northern California DX Foundation (NCDXF) re-elected the following officers and directors:
President Len Geraldi K6ANP
Vice President Al Burnham K6RIM
Secretary Tom McShane NW6P
Treasurer Bruce Butler W6OSP
Director Rusty Epps W6OAT
Director Dave Pugatch KI6WF
Director Chuck Ternes N6OJ
Director Glenn Vinson W6OTC
Director Steve Merchant K6AW
Director Ken Anderson K6TA
Director Tim Totten N4GN
Information pertaining to the Northern California DX Foundation is available at: http://www.ncdxf.org

NP2, U.S. VIRGIN ISLANDS (*). The Wireless Association of South Hills will be active as NP2SH from St. John, U.S. Virgin Islands from October 4-12th, 2003. The DXpedition team will be on the air during the California QSO party on October 4-5th and the Pennsylvania QSO Party on October 11-12th. Join them during the PA contest for an opportunity to snag the rare VI section during this fun and friendly contest! In addition, St. John is also listed on the RSGB's IOTA "Most Wanted" list (NA-106) and is in grid square FK-77. In between the contests, the NP2SH team will be running both SSB and CW stations on all bands 80-10 meters as band and weather conditions permit. QSL with SASE via N3ZNI. For more infor, contact them at: np2sh@yahoo.com Or visit the Web page at: http://www.w3srl.com

PACIFIC OPERATION (T88 and V63) (*). Look for Jim/W7UG and Tom/K7ZZ to be active from the Pacific at the beginning of October. Their activity will start off from Palau using the callsign T88ZX starting about October 1st and be there for one week. They will then move to Yap Island, Micronesia, using the callsign V63ZT. Activity again will be for one week. Operations will be CW/SSB on 80-10 meters. If there is enough interest in RTTY, they may be active. There will be an emphasis on the WARC bands as long as there is activity. Also, look for them to be active on CW 24 kHz up from the bottom of the band. They will also listen up for the new DXers who might need it. They will also run split in the General portion of the band for SSB. Tom states, "Although we'll be barefoot, we're going to be on the beach and will have a two element vertical dipole array for 20-10 and a single vertical for 80-30." QSL via K7ZZ, CBA and can be found at QRZ.com.

PJ5, ST. EUSTATIUS. Look for Jim, K1NA, to be active as PJ5NA in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/All Band entry. QSL via K1NA.

QSL INFO AND NEWS.....
Carlos Nora, CT1END, informs that the logs for CT6B (EU-040 Berlenga Island. QSL via CT1EEN) and CT1EGW/p (QSL via CT1EGW) are now available online at the following Web pages at:
http://ct1end.netpower.pt/ct6b

http://www.portal-dx.web.pt

NOT THE MANAGER. Robert, FK8AH, is not the QSL Manager for FK8KAB/P (QSO dated January 4-6th, 2003). Cards should be sent to A.R.A.N.C., Box 3956, F-98846 NOUMEA, NEW CALEDONIA. Cards already received by FK8AH have been sent to ARANC. Please do not send cards to FK8AH.

Graham, M5AAV, informs OPDX that he has been appointed QSL Manager for GB6MD [Marconi Day Special Event Station - All Years] and also G6PZ - To be heard in most Contests and at other times. QSL either via the Bureau to M5AAV or Direct (enclosing IRC/Greenstamp to Graham - Details on QRZ.com). Also see his Web site at: http://www.users.zetnet.co.uk/m5aav/index.htm

QSL HP0L (Special event station operated from Flamenco Island, Panama Canal Entrance - Pacific side - PAN-024, active August 16-17th, 2003) via HP1IBF or PCARA: P.O. Box 5414, Balboa, Ancon, Panama. (*)

The QSL route for contacts with Max, KH6ZM, after September 1st, 2003, will be "DIRECT ONLY" via I0MWI: Stefano Cipriani, Via Taranto 60, I 00055 Ladispoli (RM), Italy. (*) Please look at the QSL practice on: http://www.qsl.net/i0mwi/qslman.htm

Patrick, WD9EWK, informs OPDX that he has received the logs for Claudio Pons Estel, LU5FII, of San Justo (Santa Fe Province), Argentina, and is now Claudio's new QSL Manager. More information is available about Patrick becoming Claudio's QSL Manager, as well as other stations he takes care of QSLing for, on the Web page at:
http://www.qsl.net/wd9ewk/qsl-mgr.html
Patrick will receive cards either through the QSL bureau or directly. His postal address is listed on the Web page above, as well as in the usual locations like QRZ.com and Buckmaster. (*)

Ric, DL2VFR, was active from Langeland (EU-172), Denmark, last week as OZ/DL2VFR. QSL via his home callsign, either via the bureau or direct if necessary. (*)

Christian, DL6KAC, expects to have the OZ0AIS QSL cards by end of September. He states that they will start with the QSL shipping just after that (First direct cards, then bureau cards). Expect bureau cards to be in the bureau in October/November this year. Some pictures of the operation can be found at: http://www.aatis.de
(click on "Summertour 2003")
Unfortunately, the text is in German, however, they are working on an English version and want to add some more pictures. Additionally there is a log search available (powered by dx.qsl.net). (*)

NEW QSL MANAGER. Ralph, K2PF, informs OPDX that effective immediately, QSL cards for S21B should be directed to KX7YT. (*)

QSL Manager Change: John, N0JT, informs to "Please be advised, and possibly update your databases, WC4H is taking over for N0JT. Due to health concerns, N0JT is no longer a QSL Manager. Including the various

Contest Logs, I have turned all logs, 47 of them, and sent 120 lbs of blank QSL Cards to my friend Carl, WC4H, who is well qualified to assume the duties. WC4H will handle all submissions as of September 4, 2003. N0JT will forward all received mail to WC4H until things settle down. Stations effected are: 3E1AA, 3E1CW, 3E1DX (including many of his contests), 3E500XVH, 3F2XVH, EL2RR, FS5PL, (including his many Contests and IOTA trips) HH2/N3SIY, HI8FHD (on 14.247 only), HJ0QGL, HK0OEP, HP1MM, HP1XVH, J3/KB0QNS, J3/N3SIY, LX1RQ (NA Only), M0ADG, MQ0ADG, PT1TF (14.247 only), TO9PL and XE1/W6EFR. Thanks for your cooperation in the past and good DX", John N0JT....

QSL Manager Change: Luke, PT7WA, informs OPDX that due to family health problems PT7AA transferred to him all his QSL Manager obligations. This includes some of his own operations. Luke is able to confirm QSOs with the following stations. Bureau cards are OK!
SA-003 F.NORONHA ISLAND: ZY0FA 1989, ZY0FCA 1987, ZY0FCM 1987, ZY0FKL 1987, ZY0FMC 1987, ZY0FRT 1987, PY0FK 1995, PT7WA/PY0 2000
SA-010 TRINDADE ISLAND: ZY0TF 1988, ZY0TK 1988-1990, ZY0TR 1988. ZY0TW 1990, PY0TE 1984/1985 (OP. ANTONIO LUIS), SA-014 SP&SP ROCKS, ZY0SS 1989, ZY0SW 1989, ZY0SY 1989, PY0SK 1991, PY0SR 1991, ZY0SK 1994-1997, ZY0SP 1994, ZY0SG 1997
SA-023 ITAPARICA ISLAND: PT7FX/PY6 1999
SA-025 ILHA GRANDE DE SANTA ISABEL: ZW8AA 1992
SA-038 ROCAS ATTOL: ZY0RW 1991-1992, ZY0RK 1991
SA-041 SAO JOAO ISLAND: ZX8CW 1990
SA-046 ITAMARACA & S.ALEIXO ISLAND: PT7WA/PY7 1999, ZV7G 1999
SA-072 CANARIAS ISLAND: PT7AA/PR8 2000
SA-080 TINHARE ISLAND: PT7WA/PY6 1999
Luke will take care of all cards received and not answered. Most of the logs are "paper logs", but he will do his best to answer any question as fast as possible.

Leo, K8PYD, has acquired the logs for VK4TE (from Willis Island) from 1966-1970 for USA stations only. He has no idea how complete these logs are, but he has a few blank cards if anyone is still in need of one from that station.

S7, SEYCHELLES (*). Norbert, DL2RNS, will be here on holiday as S79NS between October 4-17th. He prefers CW and will be using a brand new FT-897. QSL via DL2RNS (DARC Bureau) or direct if necessary. There will be no online log. Please note that 1 USD does not cover the mail from DL to the U.S.

SPECIAL EVENT (*). Look for special event station EN100WAY (World Aviation Year) to be active until September 30th, to commemorate 100 years of world aviation and 85 years of aviation in Ukraine. Activity will be from the club station, UR4WWE, which is located at Lviv State Airport. Activity has been mainly CW, with some RTTY. Watch frequncies 3710, 7071, 14022, 14093, 18115, 18128 and 21010 kHz (+/- 5 kHz). QSL via UT7WZ by the bureau or direct to: Miroslav Lupiy, P.O.Box 94, Lviv, 79000, Ukraine. Bureau cards can also be requested via E-mail at: ur4wwe@ut1wpr.ampr.org

SPECIAL EVENT. Look for Sylvester, DH4PB, who will go to Cuxhaven, to celebrate Professor Ferdinand Braun day as DL0PFB. Professor Braun was with Marconi as a pioneer in wireless radio and the founder of the television tube. Activity will be on CW on all bands. Operations will start on Saturday, September 20th at 0800z.

SPECIAL EVENT. Noel, PT2ND, informs OPDX that the Ministry of National Integration by The National Secretary of Civil Defense, along with the Brazilian Amateur Radio League-LABRE, coordinators of the National Amateur Radio Emergency Network-RENER, will promote on October 4th and 5th as an international amateur radio event celebrating the "International Accident Reduction Day". Many Brazilian amateur radio operators will be operating the special callsign ZY2A between 0000z on October 4th until 2400z on October 5th, on all HF bands SSB, CW and Digital Modes. Noel states, "Natural disasters like earthquakes, floods, tornadoes, landslides, shipwrecks and others, cause huge financial expenses and the loss of many precious human lives. The consciousness of society is fundamental to prevent and minimize its effects. On these situations it is important that organized groups are prepared to immediately help control these events and solve such unexpected problems. The Amateur Radio Community, always willing to help on these circumstances, make themselves present, spreading the news about this event." All Amateur Radio colleagues that contact ZY2A station and submit their QSL cards will receive special commemorative QSL cards by reply, celebrating the International Accident Reduction Day. QSL via PT2AA either through the bureau or direct.

TA3, TURKEY. Operaors Erhard/DL5JQ and Wolfgand/DK3KD will be active as TA3/DK3KD in the CQ World Wide DX CW Contest (November 29-30th) as a Multi-Op/Low Power entry. QSL via DL5JQ.

V26, ANTIGUA AND BARBUDA. Bud, AA3B, informs OPDX that he will be active as V26K starting November 26th through November 30th. This will include the CQWW CW Contest. His activity will be CW only and a Single-Op/ All Band/Low Power entry. QSL via AA3B.

VP5, TURKS AND CAICOS ISLANDS. An enthusiastic Multi-Operator team led by Bud Foster, K4ISV, will be active as VP5B in the CQ World Wide DX SSB Contest (October 25-26th). Operators mentioned are: K4ISV, K1LZ, K4RO, K4UU, K4CN, W5AO and WX3B. QSL via N2AU.

VP6, BERMUDA (*). Bert, PA3GIO, will be active as PA3GIO/VP9 from September 18-28th on Bermuda Island (IOTA NA-005). Activity will be SSB only on 80/40/20/17/15/12/10 meters from the QTH of Ed, VP9GE. QSL (preferable by the bureau or E-mail: qsl@pa3gio.nl) to PA3GIO. Web site for this operation is at: http://www.pa3gio.nl/VP9

YI, IRAQ (*). Masa, JG1OWV, informs OPDX that Sada, JA1AHF, has just gotten his own liscense and is signing YA1D now. The new club station is also licensed as YA0J. Both are from Kabul, Afghanistan. Sada is operating most days after 1230z on 80-10 meters, mainly SSB with some slow CW. He will start to be active on some digital modes soon. QSL for YA1D and YA0J is via JG1OWV.

Maybe not. The photo still had the orginal attribution on it (the web
address)
and might be "fair use". You can quote or copy a small portion of a work
but be sure to mention where you got it from.

Indeed that does qualify as "fair use," LARDASS Lllllllloyd the 5'06" 250 lbs uneducated imbecile has no conception of the concept of either copyright or fair use.
Jon should post the photo of LARDASS standing by a stream, where he recreates his role in Deliverence.

1932. Vehicle installation options

Newsgroup: rec.radio.amateur.misc
Date: 2003-09-15 16:03:08 UTC
From: firstleafpub@yahoo.com
Message-ID: <11ade202.0309150803.38153795@posting.google.com>
Source record: 63701

This is a question for those of you more technically inclined than I am. I plan to install a Kenwood dual band mobile in my 2003 4Runner. I am considering two options for the installation and would like to get some opinions on which option would minimize the chance for RFI interference/damage to the onboard electronics.

In all options the antenna will mounted near the rear of the car using a Comet lip mount.

Option 1 ï¿½ Put main unit under the front driver's seat. This would allow for the shortest power cord and should allow me to mount the control head and mike without any extensions to the standard cord. The antenna coax would run to the rear. My concerns are that there is a wiring harness under the seat that has sensor for seat position (controls air bag force). There is also wiring for power seat functions. The main unit would be less than an inch or two from that wiring harness although I could keep the antenna cable away from this area. (This is my preferred option from an ease of installation standpoint)

Option 2 ï¿½ Mount the main unit in the rear cargo area. The antenna cable would be much shorter but I'd have to run a power cable, mic cable, speaker cables, control head cable, and GPS cable from the rear to the front of the vehicle, probably under the carpet. All of these cables would have to be extended. This would be a harder install. There is also the risk that I could bump the unit when loading cargo and it would also be visible to anyone looking into the car.

I've read Toyota's guidelines which have been posted in several different notes recently and their major concern as far as the installation location seems to be keeping the antenna cable at least 8 inches from ECUs and wiring.

Option 2 seems to be the safer choice but am I being overly cautions by ruling out an under the seat installation.

Regards,
KC7GDA

1943. Hurricane Watch Net to Activate

Newsgroup: rec.radio.amateur.misc
Date: 2003-09-15 22:36:30 UTC
From: janorfolk@yahoo.com
Message-ID: <c6a70d55.0309151436.2966c0ce@posting.google.com>
Source record: 63713

"Activation Plan for Net Operations"

The Hurricane Watch Net plans to begin operations on our net frequency (14.325 MHz) beginning Wednesday, Sept. 17 at 1400 UTC. According to recent advisory and track information, Hurricane Isabel will be within 300 miles of projected land fall someplace along the North Carolina coast at that time.

Our main operational goals for Wednesday will be two fold, as follows:

1) to make the storm advisory information on a regular basis to those in the affected area of the forecast path of the storm, and

2) to identify and collect a list of stations in the path of the storm who may be available throughout this event for the purpose of reporting local weather measurements and observations to us for conveyance to the forecasters in the National Hurricane Center. It is essential to contain our scope of reporting stations along and closely to the side of the forecast track, and it is important that you remain silent if not in the specified area.

Please honor our request that you should not check in to the net unless specifically requested to do so. We will attempt to handle all communications within the capabilities of our own members, and only when required assistance is needed will we ask for your help.

While our mission is specifically to provide storm related information into and out of the storm, please understand we are not involved in Health and Welfare traffic. That traffic will be handled by the SATERN net on 14.265 beginning at 1400 UTC on Thursday, and will be in place throughout the duration of this event. We will likely be reporting other emergency frequencies to be set up by local emergency management nets in the affected area. Please monitor 14.325 for that information as it is made available.

As a final reminder, please monitor this web site for storm related advisory updates, graphics displays, and other data made available from the National Hurricane Center.

Thanks in advance for your support and cooperation during this extremely dangerous storm.

Sincerely, Mike Pilgrim, K5MP Manager

From: Hurricane Watch Net, http://www.hwn.org

Well Franky it ain't all I've got to say on it. You know damn well you were using other people's callsigns. Mine included. And I know full well about your behind the scenes crap you and 'Big AL' and his associated sociopaths did.

Not that anyone in the 'opposite' camp were any better. But you are NOW an adult. And SHOULD be able to admit you were wrong...and go on. I have admitted to it, so has Al Abernathy. To my knowledge the only two that haven't are you and Rich Whitten.

Think about it.

Oh you mean Bob Youngblood? The man that was put off the air by the FCC in lew of being prosecuted for a variety of infractions on the ham bands. Just let him do a roll call. Be just like shooting fish in a barrel.

On second though...yeah...come on back Bob. You need slapped down hard.

As for Herb. Gotta give the man credit when credit is due. He played the game and lost. Then played by the FCC rules and won. See how simple that is RICH?

Does anyone know why Roger was kicked out of the
Glendale WV ARES?

Lloyd

First of all, NOBODY likes him.
You know how that works.

Burt is so lame, he can't even re-justify the paragraph when he changes
"Yankee" to "call letter".

It's rather satisfying to watch "the man who every ham hates" losing
what little mental acuity he once had.

If drool came through on a posting, we would see some on this message:

Burt wrote:
> Two Baseball fans and a ham were on their way to a game when one
> noticed a foot sticking out of the bushes by the side of the road.
> They stopped and discovered a nude female, drunk and passed out.
> Out of respect and propriety, the Indians fan took off his cap and
> placed it over her right breast. The Padres fan took off his cap and
> placed it over her left breast. Following their lead, the ham radio
> operator took off his call letter cap and placed it over her crotch.
> The police were called and when the officer arrived, he conducted
> his inspection. First, he lifted up the Indians cap,replaced it, and
> wrote down some notes. Next, he lifted the Padres cap,replaced it,
> and wrote down some more notes. The officer then lifted the call letter
> cap,
> replaced it, then lifted it again, replaced it, lifted it a third time,
> and replaced it one last time.
> The ham was getting upset and finally asked,"What are you,
> a pervert or something?" "Why do you keep lifting and looking, lifting
> and looking?" "Well," said the officer, "I am simply surprised;
> normally when I look under a call letter hat, I find an asshole."

According to the same 1930 ARRL Handbook, "The Wouff-Hong is amateur radio's most sacred symbol and stands for the enforcement of law and order in amateur operation." The Wouff-Hong's nearest analog is the old-fashion but still effective can opener. Now every can opener requires an initial insertion point, and (if you picture the human anatomical form) you can choose between upper and lower points. The object is to open up the miscreant and expose his evil to himself. This requires the subject to be supine and all opening to be done on the front side, where the victim can indeed see the results: the exposure of his own evil. The beauty of the wood Wouff-Hong lies in the fact that it leaves splinters in places from which they cannot be removed. Thus is the scoundrel reminded for life of his misdeeds and what lies ahead if any one of them should ever be repeated.

Every culture has it's dark spots, this is amateur radios. Some think it's
fun to joke about. It's pretty sickening, if you ask me. Anyone who has
truly studied what man is capable of doing to man during the Medieval period
or The Spanish Inquisition know this.

I think his description of the Rite of the Woulf Hong is a bit stretched, in
fact quite a bit.
My take on it was that it was a tool from which only a gentle prod in a certain
part of the anatomy was all that would be needed to correct the miscreant.
Maybe the thought of things to come if he didn't straighten up and fly right
was the main impetus.

This is an old thread, and I already basically said as much. It's
"too unspeakable" to mention how the Wouff Hong is used because the
threat is better than the application. There is no application, it's
just smoke and mirrors.

But that people are now describing quite graphically how they think the Wouff Hong is supposed to be used may be a reflection of how things have changed. In the twenties when it was originally cooked up, the idea was to prod hams into being more careful about how they operated. The chastisement was in The Old Man talking about the lids, not in the threat of doing damage to the lids. Suggesting, but never stating, that the Wouff Hong was used in a terrible fashion was more for the sake of fun, to not take a serious issue too seriously. The whole thing was basically Hiram Percy Maxim saying "I'm disappointed in some of the operating taking place today".

That sort of thing has less power today, sadly. I'm not sure if it's the make up of the hobby, or the make up of society.

So now the Wouff Hong is being portrayed as a weapon, by itself, rather than as some pseudo-ritual connected with trying to get hams to be better operators. The true meaning of the Wouff Hong is gone, when likely it is needed more than ever. Not because there is bad operating, but because it was part of a history and community that when lost, may lead to hams not being so concerned with good operating.

Hello all,

I am finding out about getting a GMRS license, and I guess there is no test for it but the cost is $75.

How about for Amateur radio for the 2 meter band? Is there a test, a test and a fee, or just a fee.

Also, if there is a test, is it able to be done on the interent through FCC.gov, or how does that work?

Thanks.

> no test for it but the cost is $75.
>
> How about for Amateur radio for the 2 meter band? Is there a test, a
> test and a fee, or just a fee.

Test and fee. The test covers electronics and RF theory, Part 97 rules, and amateur service operating practices. Commercial traffic is prohibited, just as on GMRS.

http://www.arrl.org should contain much of the info you will need. It is not possible to take exams online. They must be taken in person.

My advice would be to find a ham radio club local to your area, and see if they have any license instruction classes coming up.

Good hunting.

It would still be an interesting sight to see. A bunch of disgruntled League members showing up at the next Board meeting with a bunch of wouff hongs in hand. Maybe they would finally understand they needed to listen to the members that elected them. To late to change things now though. Ham radio is on the down hill side and picking up speed. And that's a BIG ten-four good buddy breaker breaker. Got ur ears on?

KB7ADL on the side.

Art Bell Returns to Radio
as Weekend Host of Coast to Coast AM

Press Release www.coasttocoastam.com

LOS ANGELES, Sept. 17, 2003- Art Bell, the radio personality known for his spontaneous and compelling conversations about all things unexplained, will replace Barbara Simpson as weekend host of Coast to Coast AM - the program he made famous. He will broadcast live from 1-5 a.m. ET Saturdays and Sundays with a refeed from 5-9 a.m. ET from his home studio in Pahrump, Nev., beginning Sept. 20.

Bell stated, "For me, a return to radio is both mysterious and reassuring."

"We welcome Art back to the weekend microphone," said Kraig Kitchin - president/COO Premiere Radio Networks. "His return reflects his long-standing bond with this audience and his undying passion for radio."

i'll give you a -2 on your poor attempt to troll... thankfully the FCC
remains committed to examination and testing for the three amateur radio
licensing levels in the U.S...

and from what i listen to on 80M, there are even experienced hams who don't
know how to properly use an amplifier...

NCI was founded by a bunch of whiners without brains, initiative or skills

NCI is part of the "Me-Me" generation of losers without a work ethic and
with little regard for learning, courtesy, or common-sense traditions in
amateur radio...

how's that for a troll?

Maybe we can finally get an explanation of how the cross field antenna works, why fractal antennas are the best of all possible antennas, how "critical coupling" works to get impossible gain, what happens when a wave of average power bounces off our final amp, and some of the other mysteries that have been plaguing us over at r.r.a.antenna. I've suspected the answers lie with aliens, black helicopters, chemtrails, or maybe a chi vortex, so I'm sure Art can set us straight.

I volunteer you Lllllllloooooyyyyyyddddddd. Go jump into the eye.

What a goofball.

Im listening to Baxter right now. What a clown. He wants teams to go to the affected area to SOLICITE Health and Welfare traffic.

Wonder what the cops will think of that idea? Some Baxter boobs showing up to put up antennas right where they cops evacuated earlier. Anyone see a problem with that?

Baxter and Llllloooyyyddd ;.. a match made in heaven.

ATTENTION USENET VISITORS, THIS AREA HAS BEEN DECLARED A TROLL
WILDLIFE REFUGE. TO LEARN ABOUT THE TROLL, ITS HABITAT, AND
ITS WAY OF LIFE, PLEASE READ THE SIGN-POST BELOW. IF YOU WOULD
LIKE TO LEARN MORE ABOUT THE TROLL, YOU CAN PICK UP BOOKS AND
SOUVENIRS IN THE GIFT SHOP AT THE END OF THE TOUR. THANK YOU
IN ADVANCE FOR OBSERVING ALL TROLL WILDLIFE REFUGE RULES, HAVE
A NICE DAY.
****
****

| Common name: Woodland Troll |
| Scientific name: Trollus Useneticus |

##########
# #
PHYSICAL CHARACTERISTICS:
# #
The common woodland troll (Trollus Useneticus) is an
approximately 1.7m long nocturnal furry creature that
has been found to exist in nearly every climate and
latitude. Predominant features include: a very pale

```
# complexion, a large bony ridge above the eyes, a dense #
# cranium, dragging knuckles, and a pungent odor. #
# #
#################################################################################

#################################################################################
# #
# HABITAT: #
# #
# Most trolls spend the daylight hours under a large rock #
# sleeping. Unfortunately, the natural habitat of the #
# troll has been encroached by development (as is all too #
# common these days). The modern troll has to make due #
# with a slimy, moss covered rock. Often, trolls are #
# forced to endure poor sanitation and filthy living #
# conditions. Combined with the general lack of hygiene #
# among trolls, this results in a very unpleasant odor. #
# #
#################################################################################

#################################################################################
# #
# ACTIVITIES AND DIET: #
# #
# During their active period at night, the common troll #
# engages in numerous activities, though the most #
# important of these is foraging for food. The one #
# characteristic that ties all different troll species #
# and sub-species together is their diet. Trolls #
# invariably survive off of a combination of cheetos, #
# arguments, and annoying others. A typical troll #
# requires approximately 10 arguments and flames per day #
# just to stay alive. With the increasing use of #
# killfiles and just regular ignoring of trolls, it has #
# become more and more difficult for trolls to eke out a #
# basic sustenance. #
# #
#################################################################################

#################################################################################
# #
# KNOWN PREDATORS: #
# #
# Unfortunately, trolls have many predators. Most common #
# among them are the helpful researcher, the informative #
# poster, the cool headed responder, and the kill-filer. #
# The cool header responder is technically not a troll #
# predator however. Trolls are typically unfazed by #
# logical counter arguments and cool headed reason. #
# However, even though their posts do not deliver the #
# same level of sustenance that a "flamer" or an "annoyed #
```

```
# poster" may provide, they still provide a valuable #
# source of dietary fiber for the troll. #
# #
# The most dangerous predators for the trolls are the #
# helpful researcher, the informative poster, and the #
# kill-filer. The common troll is highly allergic to #
# fact, real data, and research. Upon skin contact with #
# actual hard evidence and real data, the troll will #
# experience intense itching and burning at the site of #
# contact, followed by lesions and blisters. Eventually, #
# this results in loss of skin near the area of contact, #
# and usually to loss of a limb (in the example of #
# contact near the arm or leg). Contact with facts and #
# data near the facial area usually results in a slow #
# painful death. Contact with extremely high doses of #
# fact and hard data can cause temporary loss of #
# consciousness and even permanent brain damage for the #
# troll. #
# #
# The kill-filer poses a much more insidious threat to #
# the troll. Not posing a direct threat to the troll per #
# se, the kill-filer simply deprives the troll of yet #
# another source of nourishment. Some trolls have #
# developed counter measures to thwart the kill-filers, #
# usually this takes the form of a type of camoflage. #
# #
# The trolls' predators have reaped a terrible slaughter #
# over the years, resulting in the death of great hordes #
# of trolls. Trolls continue to breed rapidly though and #
# their population is stable. However, it is unknown how #
# long this situation can persist. Eventually, natural #
# predators and poachers may result in lower numbers of #
# trolls. Already we are seeing lower diversity among #
# the different troll species. That is why this troll #
# habitat refuge exists, to ensure the preservation of #
# the troll for not only our future, but the future of #
# our children. #
# #
#################################################################

============================================================
/ This troll habitat refuge has been paid for in part by /
/ the anti Troll-Defamation League, the International /
/ Society for the Advancement of Trolls, and the Troll /
/ Habitat Preservation Alliance. /

I'm a no-good knuckle-dragging no-coder, as the tech-class is referred to on these groups. I've had my license for exactly a month now, and I'm starting to explore some of the interesting modes one can work with a PC sound card. I have the speaker output of my rig linked to the line-in on a dedicated pc via an isolation transformer, and today I tuned around until I found some packet activity. It was not at all what I would have expected. People weren't really communicating, as much as broadcasting the same line of text over and over again. Several were just sending NMEA data (not actual APRS packets), presumably for some kind of position reporting system. There seems to be about four times as many people on that one packet channel as there are on voice throughout the entire 2-meter band.

Could someone:
Give me a brief intro to the procedures, protocol and etiquette of packet radio?
Explain how contacts are made and confirmed?
Recommend frequencies/times to join in, and software to use (right now I'm using UISS)

Thanks, and please don't flame me-- I promise I'll upgrade to general soon!
-Greg KG6SGY

Nope....he is an entertainer. He has found a niche in society and
caters to them and made a ton of money doing it.

I for one will be blad to hear Coast To Coast broadcast regularly "from the High Desert," even though it is on a part time basis. George Noorey is an excellent replacement, but Art Bell invented the format.

I just hope his back will hold up for the abbreviated work schedule.

Art Bell Returns to Radio
as Weekend Host of Coast to Coast AM

Press Release

LOS ANGELES, Sept. 17, 2003- Art Bell, the radio personality known for his spontaneous and compelling conversations about all things unexplained, will replace Barbara Simpson as weekend host of Coast to Coast AM - the program he made famous. He will broadcast live from 1-5 a.m. ET Saturdays and Sundays with a refeed from 5-9 a.m. ET from his home studio in Pahrump, Nev., beginning Sept. 20.

Bell stated, "For me, a return to radio is both mysterious and reassuring."

"We welcome Art back to the weekend microphone," said Kraig Kitchin, president/COO Premiere Radio Networks. "His return reflects his long-standing bond with this audience and his undying passion for radio."

muwhahahahaha..some "certificate in computer operations" you have there, smegmalips LLoyd...your position of the x-no-archive is in the wrong place, dumbfuck. Your certificate is only useful for wiping your FATASS.

>Hey Wogie,

Hey LARDASSED 30 year old VIRGIN LLoyd Davies...hear from your friends at somedayheaven.com lately? Has your saggy titted whore mommy Amanda called you and asked why she's geting all these calls asking why her son is such a fucking idiot? Another birthday has gone by, you're 30 fucking years old and still haven't gotten a piece of ass. mwhahahahahahaha!!!!!!

>I hear you were reelected to President of the Glendale Lavender Lads again.
>congratulations fruit boy!

I heard that you cried and cried when Boa told you to fuck off about your "interview", too, LARDASS!!!!!! muwhahahahahaha..I heard that you phoned Hal Turner and requested to suck his dick.

Everybody can get free phone sex from:
Amanda L. Davies
1601 8th Ave.
Belle Plaine, IA 52208-1204
(319) 444-2556

She is available day and night..she really likes getting calls at 3 AM!

>Woger the Pyscho

LARDASS LLLLLOYD the pizza delivery boy who was arrested yet again for giving blowjobs to passed out winos behind the Pappa John's dumpster.
Make sure you call LARDASS at work:

Papa John's Pizza
Tom Van Landingham - manager
916 US Highway 72 E
Athens, AL 35611-4318
Phone: (256)232-3000

LARDASS Llllloyd is too fucking stupid to figure out that I already had another ISP lined up, with a better monthly rate and better service when I told that FATASSED SOW Pam Hoffer to go fuck herself. She was quite shocked that I would tell her that over the phone, so I guess she went back into the server room and gave her lackey, black Anthony Lemons another blowjob.
Lemons was too busy getting blowjobs from Pam Hoffer to run the fucking system correctly.

> "Knuckle-Dragger". It's just unbelievable to me that while all of the
> books talk about how wonderful and helpful hams are, a significant
> number of them spend their time cutting each other down over random
> issues.

You can thank R. Hollingsworth for all of the above goings on.

Ham radio used to have 3 or 4 frequencies where all the
kooks would migrate to, day and night. It used to be that
14.313 or 14.300 were the "daytime kook channels" and
3894.5 or 3.901 were the "nightime kook channels".
Everywhere else was clean and clear.

Look at this this way: Every part of town
needs it's 'low rent district'. A place where
the lower strata of society can live, reproduce
kill off and amuse itself, apart from, and more importantly
out of sight/mind from the rest of polite society.

This is EXACTLY what PURPOSE the above frequencies
served, and it did it's function quite well. When R.H. started
to apply the "heat", all the crazies migrated away from ham
radio to Internet Newsgroups....and now we are where we
are as a result of the same.

>I see "newbies" come to these boards for help, and get cut
> down by inconsiderate jerks who just feel like making people feel
> stupid. How many hams didn't start out with a lower-level license?
> People need to stop beating up on us poor no-coders. Don't they
> realize that the new people look up to the old-timers? I must say that
> after reading books about how hams help people all over the world and

> are generally just a wonderful bunch, these groups have really changed
> my view of the amateur radio community. I don't doubt that even this
> thread will end in a violent exchange of profanities and become just
> another flame war.

This is the unfortunate result of the foregoing circumstances
when all the kooks migrated from 75 and 20 Meters.
Best to just ignore them, what few of them are left that is.
(many of the "all time great goofballs" of the 14.313/14.300
Maritime Net wars are now SK, or off of ham radio completely
and all your left with is the latecommerswho don't have a clue
as to the history if the same which goes back to 1978 and
peaked around 1989 -92)

Lloyd,

Are you a dope? These days, it is politically incorrect to treat voltage and current differently. ELI the Iceman is a vestigal appendage, no more important than the whiteface of the roaring twenties, or the vacuum tubes that they thought would change the world.

Get with the times, for gawd's sake.

If you let Voltage lead Current, OR EVEN VICE VERSA (emphasis added), you are contributing to the system that has been in place since positive and negative were even invented!!! Electron flow? Hole flow? Come on.

Sheesh.

We have a new way of looking at voltage and current. Resistance is futile, and we will address that, but not right now....

Stop being such an engineer.

Dave

>

Yeah. After six months, everything was peachy in Germany and in Japan.
That is why there were so many tourists going there.

Oh wait -- that's bullshit.

And when you say "we", as in "did we have this amount of trouble", do
you really mean "we", or are you referring to the generation who gave
you everything that you now disparage?

More people die every week in car crashes in the US, than the entire US
death toll in Iraq since the war started.

How come no one is bitching about car crashes? 100 US citizens per day
die in automobile accidents. But the news says "another US soldier was
killed in Iraq..."

Both of those stories are horrible, awful, but put it into perspective.
On average, one child per day dies from choking on crayons according
to the CDC.

http://search.cdc.gov/search97cgi/s97is.dll?collection=cdcall1&Action=filterSearch&ResultTemplate=advresult.hts&queryText=children+die+crayon&querytext2=&opt1=and1&opt3=htmlpdf&CaseSensitive=false&SortField=Score&filter=advsearch.hts

> > Has anybody ever noticed that 8 out of 10 threads on this group (and
> > many other amateur radio groups) end in a flame war?

such is true with many newsgroups.. there are many more people lurking
and reading than posting, but when a post is made that incites the passion
in somebody to say something, they are quick to do it....

It's just unbelievable to me that while all of the
> > books talk about how wonderful and helpful hams are,

and they ARE for the most part... but what you're dealing with here
is a small portion, a minority of them that isn't really representative
of the whole. NG's are famous for having people with a chip on
thier shoulders to use as a pulpit for thier beliefs, since most other
forms of doing so have limits to what you can do or say.

>
> You can thank R. Hollingsworth for all of the above goings on.
>

no, you can thank a free an open society for still allowing debate.

Amateur Radio Newsline™ Report 1362– September 19 2003

A NOTE TO THOSE WHO ONLY “READ” AMATEUR RADIO NEWSLINE

As you are aware, Amateur Radio Newsline is, primarily, an audio news service and this weeks newscast is very audio intensive. While reading gives the basic facts, we advise you to download the audio file at http://www.arnewsline.org/quincy to get the most out of the newscast in relation to our coverage of Hurricane Isabel and the role Amateur Radio played and continues to play in storm communications efforts. This is a story told in “sound” from the scene that really cannot be reported in any other way.

**

Amateur Radio Newsline report number 1362 with a release date of Friday, September 19th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio is there as a hurricane pounds the U-S east coast, the ARRL holds tight on Morse and more petitions are on their way to the FCC. Find out the details on Amateur Radio Newsline report number 1362 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM ADIO AND HURRICANE ISABEL

Her name is Isabel. She is a hurricane that slammed into the United States East coast with gale force winds. Emergency services including ham radio were ready and waiting as we hear in this report:

--

Roaring ashore with winds of more than 100 miles an hour, Isabel made landfall along North Carolina's Ocracoke Island, crossing the Outer Banks around midday September 18th. On the west end of Ocracoke Island, sustained winds were measured at 80 miles an hour. Storm surge of 12 feet was reported I

Bernard Nobles, WA4MOK, is a Section Emergency Coordinator in North Carolina. He says hams mobilized over a large part of the state:

4:07 IN In emergency operations centers
OUT in the eastern part of the state

The action wasn't just in North Carolina. Hams throughout the eastern seaboard were in position, ready to provide backup communications. Only a few hours after the storm had moved ashore, more than 800-thousand customers were without power in North Carolina and Virginia. Bill Moraine, N2COP, is a Public

Information Officer in southeastern North Carolina. He says hams were providing a variety of communications services:

--

IN they really run the range of
OUT in northeastern North Carolina.

--

Morrain says High Frequency conditions were often deplorable with extensive interference. He says the Hurricane Watch Net was being relayed locally through both EchoLink and IRLP, the Internet Repeater Linking Project, to help overcome H-F problem. All along the storms projected path ham radio operators trained in emergency communications were in service or on stand-by alert. The Hurricane Watch Net was busy on 14-point-325 MHz. At the National Hurricane Center in Florida, amateur station WX4NHC helped with relaying storm reports. With hams throughout the mid-Atlantic region helping in the communications effort, Morraine said putting a number on those assisting would be tough:

--

IN We don't have a handle
OUT in this particular disaster One bit of good news.

--

Morraine says Isabel is no Hugo, referring to the devastating hurricane that slammed into North Carolina in 1989:

--

IN Thanksfully, Isabel
OUT about 105.

--

Hams were scheduled to staff the North Carolina Emergency Management Eastern Branch headquarters in Kinston. The amateur station at the state emergency operations center in Raleigh was also activating, with an umbrella of liaison stations being organized to monitor the 146.88 MHz repeater and the Tarheel Net.

The National Weather Service had hurricane warnings posted for parts of North Carolina and Virginia. Forecasters warned hurricane force winds were possible 150 miles inland, along with tornadoes.

As Isabel began moving north after landfall, flooding became a serious threat. At least one hotel in Kill Devil Hills collapsed into the ocean. Evacuations were being ordered along Chesapeake Bay.

In the hurricane's first day ashore, nearly 900 flights had to be cancelled, with some airports closing or limiting service. Up to a foot of rain was possible in West Virginia's hilly Eastern Panhandle, with between 6 and 9 inches of rain expected over parts of Pennsylvania. Amateur radio operators say

they will stay on the air helping--as long as needed.

For the Amateur Radio Newsline, I'm David Black, KB4KCH, in Birmingham Alabama.

+++

As David said, it was North Carolina that was the first to feel Isabel’s fury. Gay Pearce, KN4AQ, is in Raleigh with that part of the story.

+++

Amateur Radio was in full swing in eastern North Carolina as Hurricane Isabel made landfall on Thursday. For hams and everyone else, the term "made landfall" was a confusing one. High winds, rain and power failures reached the Raleigh-Durham area, 150 miles inland, well before the hurricane eye crossed the coastline.

--

IN: WAKE EOC POWER FAIL AUDIO]

--

The Tarheel Emergency Net, North Carolina's ARES net, was in operation, splitting duty between 3923 and 7232 kHz, depending on propagation

--

IN: HF COUNTY CHECK-IN AUDIO],

--

The North Carolina ARES group has not yet begun to use 60 meters.

Most traffic between the coast and the states Eastern Branch headquarters in Kinston was being handled on linked repeater systems.

Several hams have remained on Hatteras Island on the Outer Banks, and for a time, hams across the world could listen to them via Echolink and IRLP connections. That ended as power and phone service failed near the coast.

The National Hurricane Center in Miami continued to use the Internet links to take reports from areas where connections remained in place.

--

[K4JVP AUDIO]

--

There was some confusion early as too many sources of input were mixed together on one combined Echoink/IRLP conference. The National Hurricane Center's liaison station commented:

--

[HNC CONFUSION AUDIO]

--

Control operators were able to clear up that confusion, but locally, repeater operators are finding that they can't mix local emergency and logistics traffic with a full-time Internet connection that's carrying similar traffic on other repeaters. That's a lesson for the next emergency.

Repeaters were used inland as well. The wide coverage 146.88 repeater in Raleigh linked the State EOC with surrounding counties and the Eastern Branch headquarters.

--

[VHF COUNTY CHECK-IN AUDIO]

--

Shelters began filling up as the storm moved inland, but with most shelters located in counties that would receive at least Tropical Storm force winds and a possible loss of power and telephone service, Amateurs were dispatched to provide communications.

--

[SHELTER VOLUNTEER AUDIO]

--

Reporting for Newsline from the fringe of Hurricane Isabel, this is Gary Pearce KN4AQ in Raleigh, North Carolina.

--

More on Hurricane Isabel and the role of ham radio in future Amateur Radio Newsline reports. (Numerous sources)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WR4AMS repeater serving Eastern Kentucky.

**

RESTRUCTURING: THE ARRL POSITION - WAIT TO HEAR FROM OUR MEMBERS

Why hasn't the ARRL joined those who have already filed petitions to the FCC on the topics of Morse Code testing and changes to license priveleges? In a note to his constituancy the League’s Southwestern Division Director Art Goddard, W6XD, explains it this way:

“After determining that the FCC will be handling these matters in due course, your ARRL has set a timetable that includes ample opportunity to

collect member input before determining its direction at the January 2004 Board meeting."

Goddard says to say tuned for further developments. He also tells ARRL members to contact their own ARRL Director and make known their views on these vital issues.

Goddard also suppled a brief overview of a meeting in St. Louis this past weekend, where ARRL Directors and Officers took what he calls the next step to define the ARRL's future role in Advancing and Advocating Amateur Radio. Although the details of ARRL's Long Range Plan aren't yet complete, W6XD says that hams can expect to see bold new actions in several key areas. These include advocacy in key regulatory and legislative issues, lifetime learning, certification and personal achievement and public recognition of Amateur Radio as a valuable service. Goddard adds that there will also be financial stability to implement all of these strategies. (ARRL SW Div. Report)

**

RESTRUCTURING: MORE CODE PETITIONS COMING

The ARRL may be taking the correct road on this one. This is because the latest ham radio restructuring show appears to be only in its opening act. In fact, it looks as if the six petitions favoring abolishing Morse testing and the one from FISTS favoring its retention may be only the beginning of a deluge of requests from both sides in the issue. We have heard that there are a number of other petitions already at the FCC or on their way but know little about them. Our Bruce Tennant, K6PZW has more:

As we go to air we believe there are as many as another half dozen petitions being filed on both sides of this contriversial restructuring issue. Amateur Radio Newsline will keep following this story and will have more fore you in upcoming reports. (Various sources)

**

RESTRUCTURING: FILE ON EACH PETITION

Still with this latest round of restructuring. If you are among those planning to file comments on one or more of the Morse petitions already before the FCC then listen up. If you want to make known your feelings on all of them, then you will have to file separate comments on each one.

As of this moment, a comment filed on any one particular petition will be considered for that specific rule making request alone and not on all. And having read the petitions, we can understand why. Each one asks for a specific approach in handling the Morse question and it would be impossible to provide a one comment that would fit all.

By the way, as we go to air the FISTS pro-code request has still not been assigned a rule making designation by the FCC. (ARNewsline(tm))

**

RADIO LAW: CONGRESS MAY INCREASE FCC AUTHORITY TO ISSUE FINES

The Federal Communications Commission would be given the authority to levy significantly higher fines. This, if a bill being considered by the Commerce Committee of the U.S. Senate becomes law. Amateur Radio Newsline's Mark Abramowicz, NT3V, has the details:

--

The Wall Street Journal reports that fines for violating FCC rules could jump tenfold, and activities of lobbyists would be further restricted under a bill introduced in mid-June by Senator John McCain who chairs the Committee that authorizes the agency's funding. In addition to the increase in the Commission's authority to levy fines, the proposed legislation would also extend the statute of limitations on violations of the agency's rules from one year to two.

Other provisions include restrictions that would prevent top staffers from lobbying the agency for one year after leaving their positions, and a ban on the payment of travel expenses of FCC officials by companies and private interest groups. In other words, if the FCC were to send out a representative to any gathering the cost must be borne by the agency and not the events sponsor. Its far to early to know if such a prohibition would impact on the FCC ability to attend hamfests, conventions and other hobby radio gatherings.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

McCain's bill reportedly has the support of Senator Ernest Hollings increasing its chances of gaining broader support. Even so, it is still expected to face tough opposition as it makes its way through the regulatory aproval process. (Published news reports)

**

REMEMBERING : THE 2ND ANNUAL N2LEN 9/11 NET

The second annual N2LEN nine eleven net took place on Thursday, September 11tth. The gathering used voice over I P technology to link repeaters world wide over the Internet. This allowed radio amateurs and non-ham listeners to reflect on the terrorist attacks of two years ago and the role that radio amateurs played in the aftermath.

ARRL President Jim Haynie, W5JBP, was this years keynote speaker. He addressed the role of Amateur Radio in homeland security and urged each amateur to develop his or her emergency communication skills.

As with the 2002 net, this year's cyberspace and radio meting relied on EchoLink and eQSO Internet software connections as well as repeaters and simplex links around the world. (N2LEN Net News Release)

**

AMATEUR RADIO SURVIVAL: UCF CLUB EVICTED FROM ITS HOME

The University of Central Florida Amateur Radio Club station K4UCF has been evicted. This, from the campus location that it had occupied for 30 years. Mert Garlick, N6AWE, reports:

--

According to a qrz.com website posting from Matt Collins, KG4JYD, the eviction took place last June but seems only now to have been made public. It reportedly resulted from faculty complaints about the radio club who concluded that damage to computer equipment was from a lightning strike that entered the building through the club's antenna system. University's plant personnel also complained that club members worked on the roof of the building without authorization.

But Matt Kassawara KG4FEQ , has a differing view. Kassawar who is with the club says that the ham station is the closest equipment to the antenna system. He says that neither that equipment nor the club repeaters were damaged by a lightning strike, indicating that the clubs antenna could not have been the source of the damage.

The club requested that University of Central Florida provide comparable space from which to operate. So far UCF administrators have refused.

For the Amateur Radio Newsline, I’m Mert Garlick, N6AWE.

--

More information is on the web at qrz.com and http://pegasus.cc.ucf.edu/~wb4tcw/evictimeline.html (qrz.com)

ENFORCEMENT: NY COURT DISMISSES HAM SCANNER CASE

Some good news for a New York State ham as a court dismisses a misdemeanor charge against Richard C. Lalone, KC5GAX. This for allegedly for violating an anti-scanner provision that state's Vehicle and Traffic Law.

According to the ARRL Letter, in a 1300-word decision, Judge John J. Hallet said it was clear the legislature never intended the provisions of traffic law 397 from applying to licensed Amateur Radio operators. He then dismissed the charge against Lalone August 5th.

The law in question prohibits individuals in New York state -- other than law officers -- from equipping their vehicles with radios capable of receiving signals on the frequencies allocated for police use without first securing a permit. The section also contains an explicit exemption for any person who holds a valid amateur radio operator's license. (ARRL)

**

ENFORCEMENT: FCC ASKS POWER COMPANY TO TRY HARDER TO RESOLVE NOISE COMPLAINTS

The FCC has asked American Electric Power Company of Columbus, Ohio to take a closer look at several power line noise complaints and try harder to resolve them. This in relation to complaints filed by four Amateur Radio operators in

Ohio, Indiana and Oklahoma.

According to the ARRL Letter AEP responded February 10th to the FCC's initial correspondence regarding the four cases. But the agencys' Special Counsel Riley Hollingsworth says that follow-up reports from the complainants suggest discrepancies exist between what AEP told the FCC and what the complainants report.

Hollingsworth said evidence to date indicates that none of the cases has been satisfactorily resolved. In one case, AEP erroneously identified the amateur's own antenna as the source of the noise.

Now, Hollingsworth has asked AEP to revisit each of these issues and to update the FCC within 45 days of any progress in each case. He also referred the power company to ARRL RFI Specialist Mike Gruber, W1MG, for technical assistance. (ARRL, FCC)

**

ENFORCEMENT: PAGING FINE

The FCC has affirmed a $9,000 fine against Air Paging, Inc.. This for failure to operate its Wireless Radio Station in accordance with its station authorization, continuous radiation of an unmodulated carrier, and failure to provide station identification by the assigned call sign.

Air Paging did not file a response to the initial Notice of Liability, so the $9,000 figure was affirmed. In addition, the Commission does not know if Air Paging has corrected the various violations, so Air Paging has been given 30 days to outline what measures it has taken or will take to correct the violations and ensure that they do not recur. The entire mater is in cyberspace at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-2741A1.doc (CGC)

**

ENFORCEMENT: TWO MORE TOWER FINES ISSUED

The FCC has issued two more broadcasters hefty fines because of tower related violations. A monetary forfeiture in the amount of $10,000 was issued to Pinnacle Towers, Inc., owner of a tower in Des Moines, Iowa, for failing to clean and repaint its antenna structure to maintain good visibility. Dinged with a $3000 fine is Best Country Broadcasting, LLC, owner of the antenna structure located in Bogalusa, Louisiana. No reason for this fine was mentioned in the FCC digest for the Best Country fine. (CGC)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

INTERNATIONAL - AUSTRALIA: BPL COMING TO VK-LAND

The problem of Broadband over Powerlines or BPL is about to hit dwn-under. This as Australia makes ready to give it a go. Q-News Graham Kemp, VK4BB, has the latest:

--

PLT, PLC, BPL. What ever way you say it it means noise. Now, the Wireless Institute of Australia - Victoria says there is now clear evidence of a PLT-C/PBL push in Australia. That no-one can continue to be in denial mode.

From the Q-NEWS perspective Barry VK2AAB will no longer be a "voice in the wilderness." Many of us will soon be asking "why didn't we act sooner".

You'll recall months ago we mentioned the little units being sold by DSE. Well these are small fry compared to the same basics being applied to our 240 volt mains supply, or worse, the High voltage distribution system.

--

It appears as id BPL is quickly becoming a world-wide problem for Amateur Radio. (Q-News)

**

RADIO LAW FOLLOW-UP: NEVADA TOLD TO SCRAP NEW RADIO SYSTEM

Here’s a follow up on a story we brought to you several months ago regarding a new state wide radio system in Nevada and an oversight by the regulators planning it. As previousy reported, the Nevada Highway Patrol had spent $14 million on a contract with Motorola to build a computerized radio system. It was activated back in 2000 but nobody from the state ever applied to the FCC for licenses for the frequencies. As a result, the FCC had told the Nevada Highway Patrol and other state agencies to stop using the 140 frequencies by last June.

To comply with the federal order, Nevada has had to scrap a costly radio system that's less than two yeas old. So on Tuesday, September 9th the Nevada state Board of Examiners voted to spend $16.1 million on new radio gear for the Nevada Highway Patrol. (Published news reports)

**

NAMES IN THE NEWS: W4FAL AND K2AD ELECTED NEW NFCC DIRECTORS

Some names in the news. They are Frank Lynch, W4FAL and Doug Sharp, K2AD who have been elected as Directors of the National Frequency Coordinators Council.

The NFCC made known the results on September 6th. This, after twenty-eigh of its member councils took part in the vote.

The National Frequency Coordinators Council is an umbrella group of recognized repeater coordinators. It was formed as the result of a meeting held in St. Charls Missouri in the late 1990's. (ARNewsline(tm))

**

HAMFESTS AND CONVENTIONS: QUEENSLAND AUSTRALIA ON SEPTEMBER 19-21

On the hamfest scene, the 30th annual North Queensland Amateur Radio Convention takes place September 19th to the 21st. The venue is down-under at James Cook University in the state of Queensland Australia. For details please e-mail vk4zz@wia.org.au (Q-News)

**

HAMFESTS AND CONVENTIONS: THE DX BASH IN TEXAS IN OCTOBER

Back on this side of the Pacific, the 13th Annual DX BASH will be held on Oct 10th to the 11 at Lake Buchanan near Austin, Texas. Icom has provided a IC-746 Pro and IC-756 Pro II that will be in use at the W5KFT contest station for attendees to try out in actual "on the air" conditions. Also planned are programs on operating, contesting, towers and antennas. More nformation is on-line at www.dxbash.com (W5KFT)

**

SWL-FESTS: SCADS IN HUNTINGTON BEACH IN SEPTEMBER

And short-wave hobbyists, this one is for you. Word that the Annual Southern California Area D-X'ers Picnic will be held on September 20th from 8am to 4pm. This, at the Huntington Beach Central Park in Huntington Beach California.

Huntington Beach is a suburb of Los Angeles. Further information available from Stewart MacKenzie, WDX6AA, at 714-846-1685 from about 9 a.m. to 8 p.m. - Pacific coast time. (SCADS)

**

DX

In D-X, if you are waiting for a Q-S-L card for last June's WB8XX operation on Antigua, you will have to be patient a bit longer. According to Kevin, cards ordered 2 months ago from PY2TNT never did show up and now it appears that the company maybe out of business. Kevin says that the website is suspended and E-mails bounce. WB8XX adds that he will be ordering more cards from a stateside supplier, and will have all of the cards out as soon as the 2nd order arrives. (VHF Reflector)

**

THAT FINAL ITEM: TEACHING HAM RADIO IN ALBANIA

And finaly this week, how would one of you like to teach ham radio in Albania? Yes, we said Albania. Well you can if you know the British Radio Amateur Examination course and like to travel. Here R-S-G-B Newsreader Jeramy Boot,

G4NJH, with the rest of the story:

--

A radio amateur lecturer is required to help give a radio amateur course in the Technical University of Tirana, Albania, this coming November. The course will integrate amateur radio communications theory and practice into the University's normal study programme.

The course is organised in coordination with the Ministry of Telecommunications in Albania, in conjunction with the IARU, and using RSGB documentation. Several agencies and companies are providing financial support. The applicant should have experience of
teaching electronics and telecommunications at the amateur radio level in a UK setting. The course material is based on the UK RAE at the Full licence level and will lead to a CEPT-recognised qualification for the successful students. The successful amateur will help to coordinate the other visiting lecturers, and the assignment will take three weeks out of a six-week program.

This is a unique opportunity to join a multi-national amateur radio team helping to create a new group of telecommunication engineers to benefit the Albanian economy. It will provide a rich experience, not to mention the opportunity to operate ZA1A from the hotel in any spare moments.

--

For more details, please contact Roger, G3LQP, by e-mail to g3lqp@aol.com (GB2RS)

Wow! I'm impressed that you are able to master the basic tools of the internet! What are you going to do next, look up my address on (drum roll here) Mapquest or something miraculous like that? Wow, you are the man.

As far as using company resources, why don't you go ahead and call my company and talk to somebody in the MIS group and complain about it.

Douchebag. Hiding behind a pseudonym, not having the balls to identify yourself, taking ad-hominem pot shots at someone who may be a lot more dangerous than you think.

You are boring. Go away now.

Interesting clip from the "Amateur Radio Newsline"
Posted here

"Morrain says High Frequency conditions were often deplorable with extensive interference. He says the Hurricane Watch Net was being relayed locally through
both EchoLink and IRLP, the Internet Repeater Linking Project, to help overcome
H-F problem. All along the storms projected path ham radio operators trained in
emergency communications were in service or on stand-by alert."

2025. The one and only great Lloyd Davies!

> to
> communicate with any one yet. I have a Vertex VX-150. Do I have to
> connect to a repeater to converse. If so, what steps do I take to connect to
> the repeater. The nearest one to me is Stone Mountain W4BOC 146.760 -
> 146.160 107.2 . I intend to join a amateur radio group this month.

I would recommend tuning your rig to 146.52 FM simplex (no repeater) and
listen for a little while. If you don't hear anyone, put out a CQ call
and see what you get. That'll put you in touch with some local hams on
the air who can shepherd you through your first few QSOs. The advantage
to this is that you will be communicating on a line-of-sight basis, so
anyone you talk to either resides locally or is driving through your
area. It's a great way to meet fellow amateurs in your local community.

Repeater operation is only slightly more complex, as each repeater (and
its owner(s)) have their own way of doing things. The object lesson is
to listen on a particular repeater frequency, see how people conduct
themselves, and when you feel comfortable jump on in. Instead of
calling CQ on a repeater channel, you would say, "KI4BSP, monitoring."
That just tells folks you're there, and interested in a conversation.
If you don't hear any replies, wait a few minutes and try it again.

The information you provided about the Stone Mountain W4BOC repeater
translates thus:

146.760 MHz is the output frequency of the repeater.
146.160 MHz is the input frequency.
107.2 is the CTCSS or "PL" tone used to access the repeater.

Translated, this means:

1) Turn your radio to the 146.76 frequency.
2) Set it to use a "minus" offset. Unless otherwise specified,
all 2m repeaters use a 600 kHz offset, up or down depending
on the output frequency. The term offset indicates how far
down or up the input frequency is.
3) Set it to use a CTCSS tone of 107.2. This is a sub-audible
tone that inserted on your transmit signal. The repeater
will listen for that tone and only allow signals coming

in to "open" the repeater up that carry that signal. The
repeater will then retransmit that signal in real-time
on the output frequency.

Forgive me if I elaborated on things you might already know, but judging
from the original posting it sounded like you were pretty new to the
idea of operating through a repeater. Hope it was helpful.

I'm happy with the little MFJ clock I have. Has two little LCD clocks,
run off internal watch-type batteries. I get a couple of years' use out
of the batteries, and I can take it afield when I have a mind to. One
clock is for local time, the other is for UTC. They also have a single
UTC-only version. No WWV sync though but I think that's not that
critical an issue.

> through the apparently simple process of joining USAF MARS. Feel free to
> e-mail replies to NE1R@arrl.net, or post here. Thanks!
> 73/Tom/NE1R

I wrote an email to USAF MARS, got a reply the next day, took care of
the paperwork via email and am now waiting for my training assignment
and callsign. I've been out of town all week on a business trip, so I
presume whatever had to be sent to me via snail mail has already arrived
by now. No problem so far.

Army MARS never returned my several email messages. Tough luck for
them.

Better be careful that you don't drive too many Echolink critics
crazy. Remember: They claim that it isn't "real ham radio."

How can they explain the fact that it was heavily relied upon in
an emergency situation which the "real" service couldn't handle?

Hello all,

this book:

http://www.arrl.org/catalog/lm/

this is the ARRL's Now your alking, 5th edition, for test questions from July 2003.

Can anyone tell me how long this book is good for? How long will the questions be relavent?

Also, If I were to take the Tech license, this would give me 2 meter privlages and what else?

thanks.

The question pool is relevant until the next time the national committee revises the question pool. Generally that will be about 3 years. They do this on a rotating schedule but if there are major changes in rules, they may elect to do it earlier. The technical material and operating procedures are always relevant. So even after you get your license, keep this book in your library for reference.

The Tech license gives you full amateur privileges on all the VHF, UHF, and higher frequency bands. This will include 6 meters, 2 meters, 1.25 meters, 70 cm and so on up (i.e frequencies above 30 megahertz). You can work voice, digital, image (i.e. amateur TV), satellite and many other activities in the VHF and higher ranges. There is a lot of work being done in microwaves too.

To get some HF privileges, Techs who pass 5 word per minute Morse code can get some HF (shortwave) privileges: some voice on 10 meters and some Morse code & data on 10 meters and some Morse code only on 15 meters, 40 meters, and 80 meters.

To get additional HF privileges, including additional bands and modes (digital, slow scan TV, etc), you will need to pass a General class.

Finally passing the Extra class exam will give you all bands allocated to amateurs in this country.

In article
"LARDASS Lloyd" <Lloyd@barfielloyd.org> whined:

>Roger tells us he has a Masters Degree in Electrical Engineering.

Never said any such thing, dumbass. But the facts never stood in your way, did they, dickhead? Still smarting about the somedayheaven board being taken down because I posted your remarks for all to see?
Guess you'll have to continue to pull things out of your fatass. You couldn't make it in college degree program, and all you came out with after 5 years at a community college is a "certificate in computer operations."

>Yet he cannot calculate RMS voltage! How can such a
>thing be possible?

As it's already been proved, you are the one who can't fucking calculate RMS voltage. You can barely count 2 + 2....

RMS stands for Root Mean Square (I'm not talking about the many man-roots you swallow on a given night). It is the effective value of a sine wave.

Example: 170 V peak * 0.707 = 120 V rms.

Or are you going to get your K-mart kiddie calculator out and claim that is wrong? Too bad you can't afford a real scientific calculator, on that pizza delivery boy salary. You can barely make the back rent on your section 8 /HUD apartment.

Or are you saying the test questions on the FCC exam are incorrect?
Hope you can prove that one, you ill-educated dumpster-dweller.
You can't even pass the General class exam, and have tried for over 10 fucking years, yet I was retested and which means I fucking passed it, TWICE, with ease...including the morse code. Which is another issue with you isn't it Lloyd? You are desperately waiting, hoping, maybe that that darned ol' morse code that mocks you so will just go away, so you can get on HF and jam with your gospel music.

>Lloyd

The bald, 250lbs, 5'06" LARDASS who is 30 years old, and still hasn't had a piece of ass!!!!! Lloyd flunked out of public school, and his chronic drunk father Ray and syphilis ridden obese mommy Amanda had exhausted every avenue of pulic schools in Belle Plaine, Iowa, and LARDASS had to go to the Praise christian School, where he barely squeaked by with a 2.0 gpa.
You fucking FATASSED cocksucker.

There was some confusion early as too many sources of input were mixed
together on one combined Echoink/IRLP conference. The National
Hurricane Center's liaison station commented:

I guess you kinda forgot about the part where the EchoLink stuff shut down the instant the power went down, making it utterly useless for any kind of communication, especially emergency communication. Forgot to quote that part, huh?

An honest oversight, I am sure.

Great, thanks. Can you also tell me where a good place, or places are to buy 2meter portables? -- I want to see whats out there and see how much it costs.

I found an old HTX-202 (Realistic....I assume its Radio Shack at a Garage sale about two weeks ago for $1. Seems to work good. Only came with the Alkaline battery pack So I have to put in my own batteries. But I have found some repeaters in my area, and think I would like to get started.

> all of those servers with a power outage.

Lloyd is right, you know.... The only part of EchoLink that shut down was the part that was in the area affected by the emergency, when the power went off.

In places unaffected by the emergency, it worked just fine! In this respect, EchoLink is every bit as valid and effective as a phone number you can dial to report a problem when the phone lines go dead. As long as there is no emergency the system works just fine!

Once the power shut down in the affected area and EchoLink went belly-up, the real Hams were still able to communicate with Ham Radio by use of battery power, as in their vehicles, or with power from a generator... Only the non-Ham stuff like EchoLink was dead, and in many parts of the northeast, EchoLink is still dead as this is being written, a few days after the storm hit.

No power, no phones - No EchoLink... That's one difference between EchoLink and Ham Radio.

Amateur Radio is independent of non-ham communications carriers; EchoLink of course is not. Not independent, and not Ham Radio.

> Anybody using a battery-powered laptop with a phoneline or satellite
> link would have stayed in business just fine.

Grasping at straws already, huh? Didn't take long, did it?

In packet radio, we call the "amateur telephone" devotees who cannot differentiate between Ham Radio and the non-Ham stuff "LandLine Lids". I suppose you must be another type of LandLine Lid.

You know.... The kind of guy whose idea of responding to an emergency *as a ham* is to demonstrate their ability to use the telephone. Since he's a Ham, his phone conversation is of course "ham radio"... Riiiiiight!
;-)

>It's no different than
> using an emergency-powered ham station, except that it's a lot more
> reliable.

I'd ask the hams in the areas with no power before I put forward any radical statements about how "reliable" EchoLink is with no Internet connection. You don't want to end up looking stupid and dishonest by making unsupported and unsupportable statements, do you?

>
> Echolink is the wave of the future AND YOU JUST CAN'T STAND IT!!!!

EchoLink is an Internet chat, nothing more and nothing less. As far as that goes, it is no better or worse than any other Internet chat. The only unfortunate part about it is that some people are easily confused by EchoLink, thinking that it is Ham Radio. It distracts them from the real thing, leaving them totally helpless and unprepared in the case of an emergency.

As long as that phone line doesn't go down. Satellite link would be
better if the
signal doesn't mind going thru rain saturated skies.

>It's no different than
>using an emergency-powered ham station, except that it's a lot more

If Echolink works, then other internet comms would also work as well.
It's an extra tool, nice to have, but it doesn't replace radio.

The 202 is a GREAT HT. Check out HRO, AES just to name a few. Both have web
sites.

Also go to arrl.org for more info!

Get now your talking and good luck!

2048. Free - 24-Hour Analog Clock

Newsgroup: rec.radio.amateur.misc
Date: 2003-09-20 23:27:08 UTC
From: J Tabor <denews@taborsoft.com>

The KTS 24-hour Clock Screen Saver is a great clock for radio listeners.

The KTS 24-hour Clock Screen Saver features:
24-hour analog display
User selectable time zone
Customizable face and hands

This is fully-functional-trial software. But, you can get a free license for the KTS 24-hour Clock Screen Saver - before 0000Z on Tuesday 23 September 2003 - just send an email saying that you read about it here. Use the email address on the website or the software, not the address on this message.

www.taborsoft.com

If you need a different type clock, try the NERDAlert and/or ID Wizard software.

We do not collect, nor de we share email addresses. The purpose of this offer is to provide a community service and introduce you to our software tools for radio users.

Regards,
Jim

2050. Play the Art Bell Drinking Game tonight !!

Newsgroup: rec.radio.amateur.misc
Date: 2003-09-21 00:41:43 UTC
From: Beloved Leader #4 <profishwrapper@yahoo.com>
Message-ID: <1064105442.55001@newshost03.voicenet.com>
Source record: 63570
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.shortwave

As you probably know by now, tonight Art Bell returns
to host Coast to Coast AM. In honor of this (his latest
return from retirement...again) we present:

******* The Art Bell Drinking Game ********

taken from http://www.skepticult.org/artpar/Drunk.htm

Supplies needed for play

*One bottle of Wild Turkey Bourbon per player

*One six-pack of beer per player preferably
generic or Rolling Rock to keep with the Art
Bell theme

*One shot glass per player

*One 16 oz beer mug per player

*One AM radio or Internet RealAudio set to to www.coasttocoastam.com

How to play :

Tune your radio to Art Bell Coast to Coast or Dreamland

When Art uses the words "anomaly" or "paradigm" incorrectly, everyone
drinks a shot of wild turkey.

When Art uses the words "anomaly" or "paradigm" correctly, everyone guzzles
a boilermaker.

When Art uses the phrase "It's all starting to come together" everyone must
remove an article of clothing and yells: "Beam me up Scotty!
(this part has no effect on the outcome of the game, but it's a hell of a
lot of fun).

Winning the game :

The last person to remain conscious wins the game. Under normal conditions,
a winner is determined in the first 45 minutes of Art's show.

Well said !!

Echolink's performance during the Hurricane
Emergency exposed the TECHNOLOGICAL
OBSOLENCE of traditional SSB Amateur Radio.

And there's N O B O D Y who can dispute that
from a rational technological perspective.

Since when did it become a "private" frequency? The H.F. Frequencies used for Ham operation are open to any one with the proper class of license to use them. Of course common courtesy does count when the frequency may already be in use. No wonder people are turning away from Ham. It is getting horrible. Used to be, I boasted it to anyone interested. Now, I tell them not to waste their time. It is getting to be High Power CB. As for the FCC, they have lost the battle so far as I'm concerned. The horses are out of the barn. TOO LATE! I'm about ready to sell all my ham gear.. Get my cash out of it while there is still some value left to it. I would NEVER buy a new rig again, that is for sure. I'll buy "used" if I decide to stay in it. It just isn't worth the huge cash lay out.

Lou

If I choose to talk on that frequency, I will, so long as I'm abiding by the rules and regulations as they are spelled out. YOU or no one else, can tell me to stay off. ASS WIPE.

BIG AL.. the only thing big about you, is your mouth....

Get your General lardass or shut the hell up. You'll wait until the
code is done away with then get your HF privileges. Too bad you can't
sting up a dipole in your 1 bedroom apartment, lardass.

MARS is the most boring crap I've ever heard. It's outmoded and dying
as it's members kick off one at a time. It's like listening to a car
rust.

me to stay off. ASS WIPE.
.....
Good thing old Rich Whiten is gone...THAT was a radio Hog times two....
The old YI YI song reminds me of Rich's selfish stupidity as he keyed over
all but a few of his chosen "butt buddies".
Rich would, in his arrogance, ignore all Hams who weren' t running
megawatts....of course old Rich got caught running over the legal
limit...among other things.
Story is that Rich got pissed and sent his resignation of his license to
Riley Hollingsworth. Riley accepted the resignation and rescinded Rich's
license.
Enter another story...Rich is now claiming that his letter of resignation
was sent "by mistake" to Hollingsworth and Whiten wants his license back.
Sorry, Rich. Your weak story ain't holding water up this way.
Gosh...how does one send email "by mistake"?
Rich is full of it...he screwed up out of anger and now he wants to take it
all back. It doesn't work that way.
Porkbutt Song.....YI, YI, YI.....

Funny that we've never heard the military members and their families
that it serves say that. It is getting pathetic the number of people
who want to run down anything that isn't new or doesn't involve a
computer and the internet. Other modes are fine, but try to advocate
your favorites without running down the others

Howard
